

Grade 1: Module 2

Unit 1: Overview and Lessons

Unit 1: Reading Literature and Retelling: Exploring the Sun, Moon, and Stars through Story

In Unit 1, students launch their learning about the sun, moon, and stars by focusing on literary texts about these celestial objects. In the first part of the unit, students explore the unit guiding question—“Why do authors write about the sun, moon, and stars?”—by participating in a cycle of inquiry through observations and literature. The unit begins with a lesson focused on noticing and wondering about the sun and moon with close viewing of both photographs and time-lapse videos. Students then generate questions about these celestial objects and begin reading literature that centers on these objects.

During the second part of the unit, students complete a series of focused read-alouds, in which they explore a number of literary texts. Each text is read over the course of two lessons: students answer text-dependent questions, complete a Story Elements board to track the elements of the text, participate in role-playing to better make sense of what they are reading, and write in response to text. Students also gather language from these stories and begin to build a Word Wall with words used to describe the appearance and movement of the sun and moon. This will later support the students in their performance task. For the Unit 1 Assessment, students listen to *Kitten’s First Full Moon* by Kevin Henkes read aloud, and then write in response to the text about its characters, setting, and major events using key details from both the text and illustrations. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6)

Guiding Questions and Big Ideas

Why do authors write about the sun, moon, and stars?

- Authors write books to describe, imagine, and explain the objects we see in the sky.

The 4 T's			
TOPIC	TASK		
Reading Literature and Retelling: Exploring the Sun, Moon, and Stars through Story	Reading and Answering Questions about <i>Kitten’s First Full Moon</i>		
TARGETS	TEXT		
CCSS explicitly taught and assessed: RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.1b, L.1.1c, L.1.1d, L.1.1e, L.1.4a, L.1.6	<i>Summer Sun Risin’, Kitten’s First Full Moon</i>		

Unit 1 Assessment

Reading and Answering Questions about *Kitten's First Full Moon*

This formative assessment focuses on students' comprehension of literary text read aloud. It centers on CCSS ELA RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, and L.1.6. Students listen to and answer questions about the basic story elements and storyline of *Kitten's First Full Moon*. Students use words and pictures to demonstrate understanding of characters, setting, and the major events from the story, including events that occur in the beginning, middle, and end of the story. The assessment follows a similar sequence of reading, speaking and listening, and writing as in previous lessons, but involves less teacher support in order to measure students' independent progress toward the above standards. The assessment is completed over the course of two lessons.

Assessment Checklists

Throughout this unit, teachers use the Reading Literature Checklist to gather data on students' reading comprehension, specifically progress toward RL.1.1, RL.1.2, RL.1.3, RL.1.6, and RL.1.7, the Language Checklist to gather data on students' progress towards L.1.1b, L.1.1c, L.1.1d, L.1.1e, L.1.2a, L.1.4a, and L.1.6, and the Speaking and Listening Checklist to gather data on students' progress toward SL.1.1 and SL.1.2. Further, teachers collect students' response sheets to serve as evidence of progress toward W.1.8.

Habits of Character

Social-Emotional Learning Focus

Central to EL Education's curriculum is a focus on "habits of character" and social-emotional learning. Students work to become effective learners, developing mindsets and skills for success in college, career and life (e.g., initiative, responsibility, perseverance, collaboration); work to become ethical people, treating others well and standing up for what is right (e.g., empathy, integrity, respect, compassion); and work to contribute to a better world, putting their learning to use to improve communities (e.g., citizenship, service).

In this module, students **work to become ethical people**: habits for how we treat others. Throughout Unit 1, students practice demonstrating respect themselves, others, and the environment with care (one specific habit of ethical people) as they engage in a cycle of reading, role-playing, and responding to text. This cycle employs a gradual release of responsibility as students take on more ownership of their understanding and learning.

Unit-at-a-Glance

This unit is approximately 3 weeks or 15 sessions of instruction.

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 1 W.1.8, SL.1.1, SL.1.1a, SL.1.2	Noticing and Wondering: Observing and Asking Questions about the Sun, Moon, and Stars 1. Opening A. Reading Aloud: “Elvin, the Boy Who Loved the Sky,” Part 1 (10 minutes) B. Picture Tea Party: Noticing and Wondering (10 minutes) 2. Work Time A. Engaging the Learner: Reviewing Effective Learners Anchor Chart (5 minutes) B. Back-to-Back and Face-to-Face: Engaging the Scientist (15 minutes) C. Independent Writing: Noticing and Wondering about the Sun, Moon, and Stars (15 minutes) 3. Closing and Assessment A. Shared Writing: Noticing and Wondering about the Sun, Moon, and Stars (5 minutes)	- I can describe what I observe in pictures and videos of the sun, moon, and stars. (W.1.8, SL.1.1a, SL.1.2) - I can ask and answer questions about what I notice in pictures and videos of the sun, moon, and stars. (SL.1.1a, SL.1.2)	Speaking and Listening Checklist (SL.1.1a, SL.1.2) as students engage in conversations through the protocols.	- Picture Tea Party anchor chart - Classroom Discussion Norms anchor chart - Working to Become Effective Learners anchor chart - Back-to-Back and Face-to-Face anchor chart - Noticing and Wondering anchor chart
Lesson 2 RL.1.1, SL.1.2, W.1.8	Reading and Speaking and Listening: Why Do Authors Write Stories About the Sun and Moon? 1. Opening A. Engaging the Learner: Introducing the Sun Movement Routine (10 minutes) 2. Work Time A. Reading Aloud: <i>Why the Sun and the Moon Live in the Sky</i> (20 minutes) B. Structured Discussion: Introducing the Unit 1 Guiding Question (10 minutes) C. Independent Writing: Reflecting on the Unit 1 Guiding Question (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	I can infer why authors write about the sun, moon, and stars using details from <i>Why the Sun and the Moon Live in the Sky</i>. (RL.1.1, SL.1.2, W.1.8)	Speaking and Listening Checklist (SL.1.2) as students engage in discussion about the Unit 1 guiding question.	- Sun Movement chart - Moon Movement chart - Noticing and Wondering anchor chart - Unit 1 Guiding Question anchor chart - Think-Pair-Share anchor chart
Lesson 3 RL.1.1, RL.1.2, RL.1.3, RL.1.4, RL.1.7, W.1.8, SL.1.2, L.1.1c, L.1.4a	Close Read-aloud, Session 1: <i>Summer Sun Risin’</i> 1. Opening A. Engaging the Learner: Reading “Elvin, the Boy Who Loved the Sky” Part 4 and Introducing the “Sun, Moon, and Stars” Song (10 minutes) 2. Work Time A. Review Close Readers Do These Things Anchor Chart (5 minutes) B. Close Read-aloud Session 1: <i>Summer Sun Risin’</i> , Pages 1-28 (30 minutes) C. Engaging the Learner: Sun Movement Routine (5 minutes) 3. Closing and Assessment A. Independent Writing: <i>Summer Sun Risin’</i> Student Response Sheet, Part I (10 minutes)	I can ask and answer questions about the boy and the sun in <i>Summer Sun Risin’</i> using key details from the text. (RL.1.1)	- Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.2, RL.1.3, RL.1.4, and RL.1.7. - Collect the student response sheets for progress toward RL.1.2 and W.1.8.	- Unit 1 Guiding Question anchor chart “Sun, Moon, and Stars” song “Moon” song - Close Readers Do These Things anchor chart <i>Summer Sun Risin’</i> anchor chart - Sun Movement chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 4 RL.1.1, RL.1.2, RL.1.3, RL.1.4, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a	Close Read-aloud, Session 2 and Introducing Role-Playing: <i>Summer Sun Risin'</i> 1. Opening A. Engaging the Learner: Sun Movement Routine (5 minutes) 2. Work Time A. Close Read-aloud Session 2: <i>Summer Sun Risin'</i> , Pages 2-10 (25 minutes) B. Role-play Protocol Pages 3-6 (15 minutes) C. Structured Discussion: Reflecting on Respect (10 minutes) 3. Closing and Assessment A. Pinky Partners Protocol: Sun Experience - Sunrise (5 minutes)	I can describe what the boy and the sun do in the beginning of <i>Summer Sun Risin'</i>. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)	- Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.2, RL.1.3, RL.1.4, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students engage the different protocols.	- Unit 1 Guiding Question anchor chart - Sun Movement chart <i>Summer Sun Risin'</i> anchor chart - Role-Play Protocol anchor chart - Think-Pair-Share anchor chart - Pinky Partners Protocol anchor chart
Lesson 5 RL.1.1, RL.1.2, RL.1.3, RL.1.4, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.1c, L.1.1d, L.1.4a	Close Read-aloud, Session 3 and Role-Playing Day 2: <i>Summer Sun Risin'</i> 1. Opening A. Song and Movement: "Sun, Moon and Stars" Song (5 minutes) 2. Work Time A. Close Read-aloud, Session 3: <i>Summer Sun Risin'</i> , Pages 11-20 (25 minutes) B. Role-Playing and Reflecting on Respect, Pages 13, 15, and 19 (15 minutes) C. Independent Writing: <i>Summer Sun Risin'</i> Student Response Sheet, Part II (10 minutes) 3. Closing and Assessment A. Structured Discussion: Sun Experience - Midday (5 minutes)	I can describe what the boy and the sun do in the middle of <i>Summer Sun Risin'</i>. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)	- Language Checklist to track students' progress towards L.1.1c and as students participate in the song activity. - Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play. - Collect the student response sheets for progress toward RL.1.3 and W.1.8.	"Sun, Moon, and Stars" Song <i>Summer Sun Risin'</i> anchor chart - Role-Play Protocol anchor chart - Think-Pair-Share anchor chart - Working to Become Ethical People anchor chart
Lesson 6 RL.1.1, RL.1.2, RL.1.3, RL.1.4, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a	Close Read-aloud, Session 4 and Role-Playing Day 3: <i>Summer Sun Risin'</i> 1. Opening A. Engaging the Learner: Sun Movement Routine (5 minutes) 2. Work Time A. Close Read-aloud Session 4: <i>Summer Sun Risin'</i> , Pages 21-26 (25 minutes) B. Role-Playing and Reflecting on Respect, Pages 21-26, (15 minutes) C. Independent Writing: <i>Summer Sun Risin'</i> Student Response Sheet, Part II (10 minutes) 3. Closing and Assessment A. Structured Discussion: Sun Experience - Sunset (5 minutes)	I can describe what the boy and the sun do at the end of <i>Summer Sun Risin'</i>. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)	- Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play. - Collect the student response sheets for progress toward RL.1.3 and W.1.8.	- Unit 1 Guiding Question anchor chart - Sun Movement chart <i>Summer Sun Risin'</i> anchor chart - Role-Play Protocol anchor chart - Think-Pair-Share anchor chart - Working to Become Ethical People anchor chart

The Sun, Moon, and Stars

Unit 1: Overview

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 7 RL.1.1, RL.1.2, RL.1.3, RL.1.4, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.1c, L.1.1d, L.1.4a	Close Read-aloud, Culminating Task and Reflecting on Guiding Question 1. Opening A. Song and Movement: “Sun, Moon, and Stars” Song (5 minutes) 2. Work Time A. Close Read-aloud Culminating Task: <i>Summer Sun Risin’</i> (40 minutes) B. Structured Discussion: Reflecting on Unit 1 Guiding Question (10 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	I can retell important events of what the boy and the sun do throughout <i>Summer Sun Risin’</i>. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)	- Language Checklist to track students’ progress towards L.1.1c and L.1.1d as students participate in the song activity. - Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Collect the Culminating Task Student Response Sheets for progress towards RL.1.3, RL.1.7 and W.1.8. - Note students’ ability to retell the important events from <i>Summer Sun Risin’</i> to assess progress towards RL.1.2.	“Sun, Moon, and Stars” Song - Unit 1 Guiding Question anchor chart <i>Summer Sun Risin’</i> anchor chart - Think-Pair-Share anchor chart
Lesson 8 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.1b, L.1.1e, L.1.6, L.1.2a	Focused Read Aloud and Retelling, Session 1: Papa, Please Get the Moon for Me 1. Opening A. Song and Movement and Language: “Sun, Moon, and Stars” Version 2 song (10 minutes) 2. Work Time A. Focused Read-aloud, Session 1: <i>Papa, Please Get the Moon for Me</i> (15 minutes) B. Role-play: Character and Setting, Pages 17-20 (10 minutes) C. Independent Writing: <i>Papa, Please Get the Moon for Me</i> Student Response Sheet, Parts I and II 3. Closing and Assessment A. Pinky Partners: Making Connections (5 minutes)	- I can answer questions about key details from <i>Papa, Please Get the Moon for Me</i>. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2) - I can describe the characters and setting from <i>Papa, Please Get the Moon for Me</i>. (RL.1.3, RL.1.7, L.1.6, W.1.8)	- Language Checklist to track students’ progress towards L.1.1e as students participate in the song activity. - Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play.	“Sun, Moon, and Stars” Song - Story Elements board - Role-Play Protocol anchor chart - Working to Become Effective Learners anchor chart - Pinky Partners protocol

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 9 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.1e, L.1.6	Focused Read Aloud and Retelling, Session 2: <i>Papa, Please Get the Moon for Me</i> 1. Opening A. Song and Movement: “Sun, Moon, and Stars” Song (10 minutes) 2. Work Time A. Focused Read-aloud, Session 2: <i>Papa, Please Get the Moon for Me</i> (15 minutes) B. Role-Play: Beginning, Middle, and End (10 minutes) C. Independent Writing: <i>Papa, Please Get the Moon for Me</i> Response Sheet, Part III (20 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can retell major events from <i>Papa, Please Get the Moon for Me</i>. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.6) - I can describe the central message of <i>Papa, Please Get the Moon for Me</i>. (RL.1.2, SL.1.1, W.1.8)	- Language Checklist to track students’ progress towards L.1.1e as students participate in the song activity. - Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play. - Collect the student response sheets for progress toward W.1.8.	“Sun, Moon, and Stars” song - Story Elements board - Role-Play Protocol anchor chart - Working to Become Ethical People anchor chart - Unit 1 Guiding Question anchor chart
Lesson 10 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.6	Focused Read Aloud and Retelling, Session 1: <i>Sun and Moon</i> 1. Opening A. Engaging the Learner: Introducing the Moon Movement Routine (5 minutes) 2. Work Time A. Focused Read-aloud, Session 1: <i>Sun and Moon</i> (20 minutes) B. Role-play: Character and Setting, Pages 1-11 (10 minutes) C. Independent Writing: <i>Sun and Moon</i> Student Response Sheet, Parts I and II (20 minutes) 3. Closing and Assessment A. Structured Discussion: Making Connections (5 minutes)	- I can answer questions about key details from <i>Sun and Moon</i>. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2) - I can describe the characters and setting from <i>Sun and Moon</i>. (RL.1.3, RL.1.7, L.1.6, W.1.8)	- Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.2, RL.1.3, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play.	- Moon Movement chart - Story Elements board - Role-Play Protocol anchor chart - Working to Become Effective Learners anchor chart - Discussion Norms anchor chart
Lesson 11 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.6	Focused Read Aloud and Retelling, Session 2: <i>Sun and Moon</i> 1. Opening A. Engaging the Learner: Moon Movement Routine (5 minutes) 2. Work Time A. Focused Read-aloud, Session 2: <i>Sun and Moon</i> (15 minutes) B. Role-Play: Beginning, Middle, and End (15 minutes) C. Independent Writing: <i>Sun and Moon</i> , Parts III and IV (20 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can retell major events from <i>Sun and Moon</i>. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6) - I can describe the central message of <i>Sun and Moon</i>. (RL.1.2, SL.1.1, W.1.8)	- Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Collect the student response sheets for progress toward W.1.8.	- Moon Movement chart - Story Elements board - Role-Play Protocol anchor chart - Working to Become Ethical People anchor chart - Unit 1 Guiding Question anchor chart

The Sun, Moon, and Stars

Unit 1: Overview

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 12 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.1e, L.1.6	Focused Read Aloud and Retelling, Session 1: <i>Why the Sun and the Moon Live in the Sky</i> 1. Opening A. Song and Movement and Language: “Sun, Moon, and Stars” Version 2 Song (5 minutes) 2. Work Time A. Focused Read-aloud, Session 1: <i>Why the Sun and the Moon Live in the Sky</i> (20 minutes) B. Role-play: Character and Setting, Pages 7-17 (15 minutes) C. Independent Writing: <i>Why the Sun and the Moon Live in the Sky</i> : Student Response Sheet, Parts I and II 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can answer questions about key details from <i>Why the Sun and the Moon Live in the Sky</i>. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2) - I can describe the characters, setting, and major events from <i>Why the Sun and the Moon Live in the Sky</i>. (RL.1.3, L.1.6, W.1.8)	- Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.2, RL.1.3, and RL.1.7. - Speaking and Listening Checklist (SL.1.1, SL.1.2) as students role-play.	“Sun, Moon, and Stars” song - Story Elements board - Role-Play Protocol anchor chart - Working to Become Effective Learners anchor chart - Back-to-Back and Face-to-Face protocol
Lesson 13 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.6	Focused Read Aloud and Retelling, Session 2: <i>Why the Sun and the Moon Live in the Sky</i> 1. Opening A. Song and Movement: “Sun, Moon, and Stars” Song and Moon Movement Routine (5 minutes) 2. Work Time A. Focused Read-aloud, Session 2: <i>Why the Sun and the Moon Live in the Sky</i> (20 minutes) B. Role-Play: Beginning, Middle and End (15 minutes) C. Independent Writing: <i>Why the Sun and the Moon Live in the Sky</i> : Student Response Sheet Parts III and IV (20 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can retell major events from <i>Why the Sun and the Moon Live in the Sky</i>. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6) - I can describe the central message of <i>Why the Sun and the Moon Live in the Sky</i>. (RL.1.2, SL.1.1, W.1.8)	- Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, and RL.1.7. - Collect the student response sheets for progress toward W.1.8.	“Sun, Moon, and Stars” song - Moon Movement chart - Story Elements board - Working to Become Ethical People anchor chart - Role-Play Protocol anchor chart - Unit 1 Guiding Question anchor chart - Sit, Kneel, Stand protocol
Lesson 14 RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6	Unit 1 Assessment, Part I: Reading and Answering Questions about <i>Kitten’s First Full Moon</i> 1. Opening A. Engaging the Learner: <i>Sun and Moon</i> Movement Routines (10 minutes) 2. Work Time A. Unit 1 Assessment, Part I: Reading and Answering Questions about <i>Kitten’s First Full Moon</i> (25 minutes) B. Role-play: Character and Setting (10 minutes) 3. Closing and Assessment A. Reflecting on Learning (10 minutes) B. Engaging the Learner: “Sun, Moon, and Stars” Song (5 minutes)	- I can ask and answer questions about key details from <i>Kitten’s First Full Moon</i>. (RL.1.1) - I can describe the characters, setting, major events, and central message from <i>Kitten’s First Full Moon</i>. (RL.1.2, RL.1.3, RL.1.7, W.1.8, L.1.6)	Collect the student response sheet from the Unit 1 Assessment for progress toward RL.1.2, RL.1.3, RL.1.7, and W.1.8.	- Sun Movement chart - Moon Movement chart - Story Elements board - Role-Play Protocol anchor chart “Sun, Moon, and Stars” song

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 15 RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6	Unit 1 Assessment, Session 2: Reading and Answering Questions about <i>Kitten's First Full Moon</i> 1. Opening A. Song and Movement and Language: "Sun, Moon, and Stars" Version 2 song (5 minutes) 2. Work Time A. Unit 1 Assessment, Part 2: Reading and Answering Questions about <i>Kitten's First Full Moon</i> (30 minutes) B. Revisiting the Unit's Guiding Question (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (10 minutes)	• I can describe the characters, setting, major events, and central message from <i>Kitten's First Full Moon</i> . (RL.1.2, RL.1.3, RL.1.7, SL.1.2, W.1.8, L.1.6)	• Collect the student response sheet from the Unit 1 Assessment for progress toward RL.1.2, RL.1.3, RL.1.7, and W.1.8. • Reading Literature Checklist to track students' progress toward RL.1.2 during Work Time B.	• "Sun, Moon, and Stars" Song • Story Elements board • Unit 1 Guiding Question anchor chart • Back-to-Back and Face-to-Face anchor chart • Working to Become Ethical People anchor chart

Accountable Independent Reading

The ability to read and comprehend text is the heart of literacy instruction. Comprehension is taught, reinforced, and assessed across all three components of this primary curriculum: module lessons, Labs, and the Reading Foundations Skills Block. See module overview for details.

For Unit 1, during the independent reading in the Skills Block, reinforce the comprehension skills and standards that students are practicing during the Integrated Literacy block:

- **RL.1.1** Ask and answer questions about key details in a text.
 - Invite the students to read aloud a portion of a narrative text and ask comprehension questions.
 - Invite a student to read aloud the first few pages of an informational text.
 - Ask:

"What questions do you have? What are you wondering?"
- **RL.1.2** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
 - When conferencing with a student, have him or her recall key details and ask the student to retell the story.
 - Ask:

"What message or lesson was the author trying to convey through this story?"
- **RL.1.3** Describe characters, settings, and major events in a story, using key details.
 - When conferencing with a student, have him or her identify the character, setting, and several major events from the story.
 - Ask:

"Who are the characters in this story?" and "Where and when does this story take place?"

Supporting English Language Learners

The Meeting Students' Needs column in each lesson contains support for both ELLs and Universal Design for Learning (UDL), and some supports can serve a wide range of student needs. However, ELLs have unique needs that cannot always be met with UDL support. According to federal guidelines, ELLs must be given access to the curriculum with appropriate supports, such as those that are specifically identified as "For ELLs" in the Meeting Students' Needs column.

- **Prioritizing lessons for classrooms with many ELLs:** Consider prioritizing and expanding instruction in Lessons 8–13 in which students discuss and practice identifying story elements, as some students may find sequencing major events particularly challenging. This will afford greater opportunity to prepare for the Unit 1 Assessment. In addition, be sure to complete the optional Language Dive for ELLs in Lesson 5. If necessary, place less focus and condense instruction in Lessons 2–6, focusing on scaffolding toward the culminating task, identifying events in the beginning, middle and end of the story.
- **Language Dives:** This unit offers only one full, optional Language Dive for ELLs in Lesson 5. Many lessons also include optional Mini Language Dives for ELLs. To maximize language practice and accommodate time, consider dividing or reviewing each Language Dive over multiple lessons. Beginning in Module 2 and going forward, create a "Language Chunk Wall"—an area in the classroom where students can display and categorize the academic phrases discussed in the Language Dive. At the end of each Language Dive, students are invited to place the Language Dive sentence strip chunks on the Language Chunk Wall into corresponding categories, such as "Nouns and noun phrases" or "Linking language." Consider color-coding each category. Examples: blue for nouns and subjects; purple for pronouns; red for predicates and verbs; yellow for adjectives; and green for adverbs. See each Language Dive for suggested categories. Students can then refer to the wall during subsequent speaking and writing tasks. For more information on Language Dives, refer to the Supporting English Language Learners Guidance in the Module 1 Appendix.
- **Goal 2 Conversation Cues:** Continue to encourage productive and equitable conversation using Goals 1 and 2 Conversation Cues, which are questions teachers can ask students to help achieve four goals: (Goal 1) encourage all students to talk and be understood; (Goal 2) listen carefully to one another and seek to understand; (Goal 3) deepen thinking; and (Goal 4) think with others to expand the conversation (adapted from Michaels, Sarah and O'Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012. http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O'Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Refer to the Module 1 Appendix for the complete set of cues. Goal 2 Conversation Cues are introduced in Unit 3 of Module 1. Heightened language processing and development is a primary potential benefit for ELLs.
- **Diversity and inclusion:** Investigate the routines, practices, rituals, beliefs, norms, and experiences that are important to ELLs and their families. Integrate this background into the classroom as students explore informational texts taking place across different cultures and countries. During this unit, students will discuss the sun and the moon. Provide students opportunities to share their own experience with stories, beliefs, or legends about the sun and moon. Consult with a guidance counselor, school social worker, or ESL teacher for further investigation of diversity and inclusion concerns.
- **Strategic grouping:** As students are invited to pair up for various tasks and protocols, seriously consider matching ELLs to a partner who has greater language proficiency. The

conversations that happen as a result of such strategic grouping will greatly serve the language development of both partners.

- **Language processing time:** Give ELLs sufficient time to think about what they want to say before they share with other students or write.
- **Close reading and identifying story elements:** Students will participate in a series of close reading sessions during which they will hone their comprehension and interpretive skills by asking and answering questions about the position of the sun in the sky and by identifying story elements, such as characters, settings, major events, and messages. Some students may grapple with recalling and sequencing major events. Provide additional support with this skill when possible. Use manipulatives and familiar examples to reinforce the skill.
- **Writing about story elements:** Students will complete a response sheet in which they will sequence stories and write about the author's messages. Students will benefit from whole-class demonstrations and built-in visual support as they complete their response sheets independently. Some students may need additional modeling before feeling confident enough to complete the task independently. Students who have trouble with writing may also benefit from completing some of their work as shared or interactive writing experiences.
- **Role-play:** Students will participate in a Role-Play protocol, during which they will act out major events of stories they read to deepen their comprehension. Although this activity is inherently supportive of ELLs, some students may be hesitant to perform. Empower students to speak up if they need support from teachers or peers. Allow students opportunities to observe the protocol before participating.
- **Celebration:** Celebrate the courage, enthusiasm, diversity, and bilingual skills that ELLs bring to the classroom.

Preparation and Materials

For basic lesson preparation, refer to the materials list and Teaching Notes in each lesson. The following are unusual materials that may take more time or effort to organize or prepare.

- Lesson 1: Mystery sky photos
- Lesson 2: Sun Movement chart, Moon Movement chart
- Lesson 3: Sun, Moon, and Stars Word Wall cards: sunrise, horizon; *Summer Sun Risin'* anchor chart, *Summer Sun Risin'* icons
- Lesson 5: Sun, Moon, and Stars Word Wall cards: midday
- Lesson 6: Sun, Moon, and Stars Word Wall cards: sunset
- Lesson 8: Sun, Moon, and Stars Word Wall cards: moon, night; Story Elements board and icons for *Papa, Please Get the Moon for Me*
- Lesson 9: Sun, Moon, and Stars Word Wall cards: full moon, half-moon, sliver
- Lesson 10: Sun, Moon, and Stars Word Wall cards: crescent; Story Elements board icons for *Sun and Moon*
- Lesson 11: Sun, Moon, and Stars Word Wall cards: darkness
- Lesson 12: Story Elements board icons and puppets for *Why the Sun and the Moon Live in the Sky*
- Lesson 14: Story Elements board icons and puppets for *Kitten's First Full Moon*; *Kitten's First Full Moon* chart
- Index Cards for Sun, Moon, and Stars Word Wall

Lesson 1: Noticing and Wondering: Observing and Asking Questions about the Sun, Moon, and Stars

CCS Standards

- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners *about grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.

Daily Learning Targets

- I can describe what I observe in pictures and videos of the sun, moon, and stars. (W.1.8, SL.1.1a, SL.1.2)
- I can ask questions about what I notice in pictures and videos of the sun, moon, and stars. (SL.1.1a, SL.1.2)

Ongoing Assessment

- As students engage in the protocols included in this lesson (e.g., Back-to-Back and Face-to-Face and Picture Tea Party), use the Speaking and Listening checklist to note whether students are following conversation norms and the types of questions they are asking. (SL.1.1a, SL.1.2)

Agenda

1. Opening

- A. Reading Aloud: “Elvin, the Boy Who Loved the Sky,” Part 1 (10 minutes)
- B. Picture Tea Party: Noticing and Wondering (10 minutes)

2. Work Time

- A. Engaging the Learner: Reviewing Effective Learners Anchor Chart (5 minutes)
- B. Back-to-Back and Face-to-Face: Engaging the Scientist (10 minutes)
- C. Independent Writing: Noticing and Wondering about the Sun, Moon, and Stars (15 minutes)

3. Closing and Assessment

- A. Shared Writing: Noticing and Wondering about the Sun, Moon, and Stars (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson introduces the module topic (sun, moon, and stars) through a narrative about a young boy named Elvin. The story about Elvin invites students into the study of the sun, moon, and stars. Students learn what Elvin notices, observes, and wonders about the sky. Throughout the unit, encourage students to engage with this imaginary character and his adventures as a way to foster their curiosity and imagination.
- In Work Time B, students watch two short videos to elicit wonder and curiosity about the sun, moon, and stars. As an alternative to the videos provided, consider gathering photographs of the sun, moon, and stars in varying shapes, sizes, colors, and positions.
- In almost all lessons in this unit, students hear complex texts read aloud. Primary learners need to hear many texts read aloud in order to build their word and world knowledge. When possible, display the text when reading aloud. And when doing a first read-aloud of a given text, read fluently, with expression, and without interruption. Refer to the module overview for additional information.
- To allow for a volume of reading on the topic of weather for this module, see the Recommended Texts and Other Resources list. Ensure that students have a variety of informational and narrative texts below, on, and above grade level for this topic available during independent reading in the K-2 Reading Foundations Skills Block.

How this lesson builds on previous work:

- This lesson builds on previously introduced speaking and listening routines such as the Back-to-Back and Face-to-Face protocol and introduces new instructional routines such as the Picture Tea Party protocol and independent writing.
- Throughout Module 1, students were introduced to Goal 1 and 2 Conversation Cues to promote productive and equitable conversation. Continue using Goal 1 and 2 Conversation Cues in this way, considering suggestions within lessons. Refer to the Module 1 Appendix for additional information on Conversation Cues.

Areas in which students may need additional support:

- The Picture Tea Party protocol is new for students. Students may need extra scaffolding or modeling to transition from Round 1 to Round 2 groups. Also, based on students' prior experiences, they may need more structure to determine the order in which they share.
- Some students may need extra support during Work Time C, as they independently write to capture their notices and wonders about the sun, moon, and stars. Support these students by encouraging them to draw their ideas and then add labels or by providing sentence frames such as: "I notice _____ about the sun" and "I wonder if the sun _____."

Down the road:

- In Lesson 2, students will be introduced to the Unit 1 guiding question: "Why do authors write about the sun, moon, and stars?" They will develop answers to this question as they engage in close read-aloud sessions of *Summer Sun Risin'* in Lessons 3–7 and focused read-aloud sessions of a number of other narrative texts in Lessons 8–13.
- In Unit 1, the focus is on supporting students' growing understanding of narrative texts and narrative story elements such as character, setting, major events, and the central message. In Unit 2, students deepen their understanding of observable patterns of the sun, moon, and

stars as they read nonfiction texts and take part in scientific experiences. In Unit 3, students will use this knowledge, coupled with a deepened understanding of scientific concepts gained from Unit 2, to develop their own narrative texts.

In advance:

- Prepare:
 - For the Picture Tea Party protocol in Opening B by copying the Picture Tea Party Protocol anchor chart onto chart paper, pre-determining groups of three to four students for the first round of the Picture Tea Party protocol, and organizing the mystery sky photos.
 - Sun, Moon, and Stars Word Wall cards for the words *sun*, *moon*, and *stars*. Write or type the word on a card and create or find a visual to accompany each word.
 - Technology necessary to play the “Observe Sunrise and Sunset,” “Moonrise,” and “Time-lapse of Starry Night Sky” videos.
 - Noticing and Wondering anchor chart (see supporting materials).
- Pre-distribute materials for Work Time C at student workspaces to ensure a smooth transition.
- Review the Picture Tea Party protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: “Elvin, the Boy Who Loved the Sky,” Part 1 could be an email.
- Opening A: Create a slideshow of the mystery sky photos.
- Opening B: Create the Sun, Moon, and Stars Word Wall in an online format such as Padlet (<https://padlet.com/>) to share vocabulary words with families.
- Work Time B: Consider showing students a sun time-lapse video now: “Observe Sunrise and Sunset.” PBS Learning Media. 2016. Accessed on 18 July, 2016. <http://www.pbslearningmedia.org/resource/ess05.sci.ess.eiu.riseset/observe-sunrise-and-sunset/>
- Work Time B: Consider showing students two moon and star time-lapse videos now:
 - “Moonrise.” PBS LearningMedia. 2016. Accessed on 18 July, 2016. <http://www.pbslearningmedia.org/resource/bb09.res.vid.moonrise/moonrise/>
 - “Time-lapse of Starry Night Sky.” PBS LearningMedia. 2016. Accessed on 18 July, 2016. <http://www.pbslearningmedia.org/resource/bb09.res.vid.timelapse/time-lapse-of-starry-night-sky/>
- Closing A: Create the Noticing and Wondering anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.6, 1.I.C.10, and 1.I.C.12

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to build schema about the topic of the module with videos, structured discussions, and graphic organizers.
- ELLs may find it challenging to process the abundance of information about the new topic in order to articulate things that they both notice and wonder. Frequently remind students of the meanings of notice and wonder. Frequently think aloud the cognitive process of making observations and asking questions about the observations. See Meeting Students' Needs column for further suggestions.

Levels of support

For lighter support:

- If students have been strategically paired with a partner of a more advanced proficiency level throughout Module 1, consider placing students in pairs of similar proficiency for this lesson. This will foster independence while providing the opportunity to assess progress in speaking and listening.

For heavier support:

- During Opening B, work closely with a group of students who need heavier support. Dictate the sentence frames "I see _____, so I predict we might learn about _____." and "I see _____, so I wonder _____." Support students in making predictions and wonders.
- During Work Time C, work closely with a group of students who need heavier support. Consider completing the task as a shared writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students review the Working to Become Effective Learners anchor chart. Some students may benefit from context-specific visual cues to remember the meaning of each habit of character (initiative, collaboration, perseverance, and responsibility) on this chart. Consider printing and displaying photographs of students demonstrating each habit of character to connect these terms to concrete shared experiences.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. During independent writing, vary methods for fine motor responses by offering options for drawing utensils, writing tools, and scaffolds.
- **Multiple Means of Engagement (MME):** When reading "Elvin, the Boy Who Loved the Sky," some students may need explicit prompts to relate to this text. Optimize relevance by pausing at several places, asking students to share connections to the text based on their own lives.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- sun, moon, stars (L)

Review:

- observe, effective (L)

Materials

- ✓ “Elvin, the Boy Who Loved the Sky,” Part 1 (one to display; for teacher read-aloud)
- ✓ Mystery sky photos (one per student)
- ✓ Picture Tea Party protocol anchor chart (new; teacher-created; see supporting materials)
- ✓ Classroom Discussion Norms anchor chart (begun in Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Sun, Moon, and Stars Word Wall (new; teacher-created; see Teaching Notes)
- ✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; three)
- ✓ Working to Become Effective Learners anchor chart (begun in Module 1) “Observe Sunrise and Sunset” (video; play in entirety; see Teaching Notes)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)
- ✓ “Moonrise” (video; play in entirety; see Teaching Notes)
- ✓ “Time-lapse of Starry Night Sky” (video; play in entirety; see Teaching Notes)
- ✓ Noticing and Wondering response sheet (one per student)
- ✓ Pencils (one per student)
- ✓ Crayons (class set; variety of colors per student)
- ✓ Noticing and Wondering anchor chart (new; co-created with students during Closing; see supporting materials)

Opening

A. Reading Aloud: “Elvin, the Boy Who Loved the Sky,” Part 1 (10 minutes)

- Invite students to the whole group area.
- Tell them that today is a very exciting day because they get to listen to a brand-new story.
- Display “Elvin, the Boy Who Loved the Sky,” Part 1 and read the title aloud.

- Using a total participation technique, invite responses from the group:
“Based on the title of the story, what do you think this story will be about?” (a little boy who likes things in the sky; a little boy who likes the clouds; a little boy who likes to look at the sky)
- Say:
“As I read this story, I want you to think hard about all of the things Elvin wonders about and all of the questions he has.”
- Invite students to quietly push the imaginary button on their brains to show they are ready to think hard. Model the gesture if necessary.
- Draw students’ attention back to the text and read aloud the first paragraph slowly, fluently, with expression, and without interruption.
- Using a total participation technique, invite responses from the group:
“What is one thing we know about Elvin?” (He loves to look at the sky, he wonders about the sun and the moon, and he likes to lie down in the grass to look at the sky.)
- Draw students’ attention back to the text and read aloud the second paragraph.
- Using a total participation technique, invite responses from the group:
“What does Elvin observe about the sun?” (He sees it in different places in the sky, he sees that sometimes it is bright and sometimes it is pale, and sometimes he can’t see it at all because the sky is full of clouds.)
“What does Elvin wonder about the sun?” (He wonders how it moves, he wonders about its size, and he wonders about its different colors.)
- Draw students’ attention back to the text and read aloud the third paragraph. Ask:
“What does Elvin observe about the moon?” (He sees that the moon is sometimes small and sometimes large, he sees that sometimes it rises from behind buildings, and sometimes he doesn’t see it at all.)
“What does Elvin wonder about the moon?” (He wonders why it is different sizes and why the shape of the moon sometimes changes.)
- Draw students’ attention back to the text and read the final paragraph.
- Display a selection of the **mystery sky photos** and tell students that they are each going to get a chance to look closely at one of the photos that the photographer gave to Elvin.

Meeting Students’ Needs

- As you discuss each paragraph of “Elvin, the Boy Who Loved the Sky,” optimize relevance by asking students to share connections to the text based on their own lives. (Example: After reading the first paragraph, say: “Give a thumbs-up if you have lain on the grass to look at the sky.”) (MME)
- After reading and discussing “Elvin, the Boy Who Loved the Sky,” support comprehension and provide options for expression by inviting three students to each illustrate one of the paragraphs in the story. Display the story with illustrations in an accessible place for students to refer to throughout the unit during subsequent readings. (MMR, MMAE)

Opening

B. Picture Tea Party: Noticing and Wondering (10 minutes)

- Direct students' attention to the posted learning targets and read the first one aloud:
"I can describe what I observe in pictures and videos of the sun, moon, and stars."
- Remind students that observe means to look closely at something.
- Share that today, they are going to talk about the pictures from Elvin and the photographer in a new way. They will use the Picture Tea Party protocol to share their ideas in a small group.
- Move students into pre-determined groups and invite them to label themselves A, B, C, etc.
- Referring to the **Picture Tea Party Protocol anchor chart**, explain the steps:
 1. Point to the image of the person looking at the picture. Tell students that you will give them a picture. When they get their picture, they should look at it closely. Have students put on their imaginary glasses to indicate looking closely.
 2. Point to the image of the people facing each other with speech bubbles. Tell students that once everyone has looked closely at their picture, you will signal them to share with their small group using the sentence frame "In my picture, I see_____." Group member A should share first.
 3. Point to the image of the people raising their hands. Once every group member has shared, they should raise their hands to show they have finished talking and listening.
 4. Point to the image of the people walking. Tell students that once all groups have their hands in the air, you will signal them to calmly and quietly walk around the room to form a new group of three to four students. Once in their new groups, they should relabel themselves A, B, C, etc.
 5. Point to the image of people sitting. Tell students that once they have formed a new group, they should sit with their group.
 6. Point to the image of the people facing each other with speech bubbles. Tell students that this time, they will share a prediction about what they might learn or a question about their picture, using a sentence frame. Group member A should share first. Review the definition of *prediction* as necessary (a statement about something the might happen or is expected to happen). Post the following sentence frames:
 7. Point to the image of the people raising their hands. Once every group member has shared, they should again raise their hands to show they have finished talking and listening.
- Direct students' attention to the **Classroom Discussion Norms anchor chart** and quickly review their jobs as speakers and listeners.
- Distribute the mystery sky photos and guide students through the Picture Tea Party protocol using the Picture Tea Party Protocol anchor chart.
- Circulate to support students as they discuss. Consider using the **Speaking and Listening Checklist** to gather data on students' progress toward SL.1.1a and SL.1.2.
- Give students specific, positive feedback on their work during the Picture Tea Party protocol. (Example: "I noticed Sarah looking closely at her picture for details to share with her group.")
- Introduce the **Sun, Moon, and Stars Word Wall**. Say:
"Remember how we had a special place in the room to collect our tools and work words? We will also have a special spot for our sun, moon, and star words, too. Let's add our first important word—sun!"

- Show students the **Sun, Moon, and Stars Word Wall card** for *sun*.
- Ask students to repeat the word aloud with an accompanying hand gesture.
- Define the word for students: “It is the star that is closest to the earth. The earth receives heat and light from the sun and travels around it.”
- Say:
“What is the translation of sun in our home languages?” (e.g., sol in Spanish, jua in Swahili) Call on a student volunteer to share. Ask other students to choose one translation to quietly repeat. Invite students to say their chosen translation out loud when you give the signal. Choral repeat the translations and the word in English. Invite self- and peer correction of the pronunciation of the translations and the English.
- Provide an example of the word in a sentence: “The sun shines through my window in the morning.”
- Place the Word Wall card and picture for sun on the Sun, Moon, and Stars Word Wall.

Meeting Students' Needs

- As you review the meaning of observe, offer an alternative to auditory information by introducing a physical gesture indicating the word's meaning. (Example: Form a circle with one hand and place it over an eye as if you are looking closely through a magnifying glass.) (MMR)
- For ELLs: Invite a small group of volunteers to briefly fish bowl or model the Picture Tea Party protocol for the group. As they model, cold call students to repeat or add to what the volunteers have said, using the sentence frames. This will provide an opportunity to check for comprehension while giving some students practice using the sentence frames before the protocol begins.
- For ELLs: It may take longer for some students to process language and follow the conversation during the Picture Tea Party protocol. Encourage students to speak up when they would like to hear something repeated. Empower them with questions they can ask to regulate the pace of the conversation. (Examples: “Can you please repeat what you said?” “Can you please speak more slowly?”)
- Have student volunteers model the Picture Tea Party protocol for the class, and then provide the entire class with the opportunity to practice grouping up with three to four students a few times before asking them to discuss the photos with their group. (MMR)

Work Time

A. Engaging the Learner: Reviewing Effective Learners Anchor Chart (5 minutes)

- Refocus students whole group.
- Remind students that in the previous module they learned a lot about habits that help them learn. Remind them they spent a lot of time practicing those habits and reflecting on their work to show those habits.
- Direct students' attention to the posted **Working to Become Effective Learners anchor chart** and read it aloud:

- “Initiative: I notice what needs to be done and I do it.”
- “Collaboration: I can work well with others to get something done.”
- “Perseverance: I challenge myself. When something is hard, I keep trying and ask for help if I need it.”
- “Responsibility: I take ownership of my work, my actions, and my space.”
- Invite students to turn and talk with an elbow partner:

“Which of these habits of character did you focus on using and learning more about during the last module? How did you show that you were using it?” (Responses will vary.)

“What is one of these habits of character that you would like to continue to focus on as we start this new module?” (Responses will vary.)
- Refocus whole group and invite a few students to share out.
- Tell students that they will use all of their hard work from the previous module as they begin this new study because it will be important to use their habits that help them learn as they read, write, notice, and wonder about the sun, moon, and stars.

Meeting Students' Needs

- Activate background knowledge by linking each habit of character (initiative, collaboration, perseverance, and responsibility) to printed photographs of students demonstrating each habit of character. (MMR)
- For ELLs: Annotate the Working to Become Effective Learners anchor chart with synonyms for each habit of character (Examples: do it; work together; keep trying; take care of my own work, behavior, and things.) To refresh their memories, invite students to use the sentence frame “I showed ____, when I ____.” (I showed collaboration when I helped make my magnificent thing).
- For ELLs: Watch the sky, sun, and moon videos twice. Students will be able to absorb and process more information during their second viewing. Before the second viewing, ask: “What is one thing you noticed about the sun in the video?”

Work Time

B. Back-to-Back and Face-to-Face: Engaging the Scientist (10 minutes)

- Tell students there are a few videos of the sky, sun, moon, and stars to see, and that as they watch the videos they should look carefully to see what they notice about the sky and what they observe about the sun, the moon, and the stars in the sky in each of the videos. Tell students they should also think about the questions they have as they watch the videos.
- Play the **‘Observe Sunrise and Sunset’ video**.
- Tell students that they will now have a chance to share their thinking with a partner using the Back-to-Back and Face-to-Face protocol. Remind them that they used this protocol in Module 1, and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)

- Guide students through the protocol using the following question and sentence frame:
 - “What is one thing you noticed about the sun in the video?”
 - “I noticed that the sun _____.”
- As students share, circulate and continue to use the Speaking and Listening Checklist to assess their progress toward the learning target.
- Refocus students whole group and play the **“Moonrise”** and **“Time-lapse of Starry Night Sky”** videos.
- Guide students through the protocol using the following question and sentence frames:
 - “What is one thing you noticed or wondered about the moon or the stars in this video?”
 - “I noticed that the moon/stars _____.”
 - “One thing I wonder about the moon/stars is _____.”
- As students share, circulate and continue to use the Speaking and Listening Checklist to assess students’ progress toward the learning target.
- Invite students to quickly and quietly return to their seats.
- Tell them that because they watched a video and discussed the moon and stars, they are going to add those words to the Sun, Moon, and Stars Word Wall.
- Show students the Sun, Moon, and Stars Word Wall card for *moon* and follow the same routine established in the Opening: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the Sun, Moon, and Stars Word Wall.
- Show students the Sun, Moon, and Stars Word Wall card for *star* and follow the same routine as above.

Meeting Students’ Needs

- As you circulate and listen in during the Back-to-Back and Face-to-Face protocol, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a structured choice. (Example: “Jarrod, did you notice the sun *rise* or *rotate*? Tell Maddie what you saw.”) (MMAE)
- For ELLs: Model and think aloud writing a wonder. Point out that a question word usually follows the phrase I wonder. (Example: “Hmm ... I wonder *if* the moon is always so big. I also wonder *how* the moon stays in the sky. What do you wonder? What are some question words you can use to write your wonder?”)

Work Time

C. Independent Writing: Noticing and Wondering about the Sun, Moon, and Stars (15 minutes)

- Give students specific, positive feedback on their discussions during the Back-to-Back and Face-to-Face protocol. (Example: “I noticed that Yavuz and Makayla watched both videos closely so they had several wonders and notices to share with their partners.”)
- Direct students’ attention to the posted learning targets and read the second one aloud:

“I can ask questions about what I notice in pictures and videos of the sun, moon, and stars.”

- Tell students that now that they have shared what they noticed and wondered about the sun, moon, and stars with their classmates, they are going to write down and draw what they notice and wonder.
- Direct students' attention to the **Noticing and Wondering response sheet**, **pencils**, and **crayons** already at their workspace.
- Invite students to use the response sheet to capture the things they noticed and wondered about the sun, moon, and stars. Tell them that they can use pictures and words to show what they notice and what they wonder.
- As students write and draw, circulate to offer support. Prompt students by referencing the mystery sky photos and asking students to articulate what they shared with their partners during the Picture Tea Party protocol or the Back-to-Back and Face-to-Face protocol. Remind students that they can draw and write to show what they notice and wonder.
- Provide students with sentence frames as needed:
 - “I notice _____.”
 - “I wonder _____.”
- When 3 minutes remain, prompt students to complete the drawing or sentence they are working on and begin cleaning up by placing pencils and crayons back on the tables where they found them.

Meeting Students' Needs

- As students begin independent writing, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). (MMAE)
- Before the transition to clean up, support self-regulation and independence during the transition by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)

Closing and Assessment

A. Shared Writing: Noticing and Wondering about the Sun, Moon, and Stars (10 minutes)

- Invite students bring their response sheets and return to the whole group area.
- Once students are settled, remind them of the work they did today viewing and videos of the sky, sun, moon, and stars, and thinking about what they noticed and wondered.
- Direct students' attention to the **Noticing and Wondering anchor chart**.
- Using a total participation technique, invite responses from the group:

“What did you notice about the sky, the sun, the moon, or the stars?” (Responses will vary.)
- If productive, cue students to listen carefully:

“Who can repeat what your classmate said?” (Responses will vary.)
- As students share out, capture and clarify their responses on the Noticing and Wondering anchor chart.
- Tell students that in the next few lessons they will continue to learn more about the sun, moon, and stars and add to the Noticing and Wondering anchor chart.

Meeting Students' Needs

- As students discuss what they learned about the sun, moon, and stars promote self-reflection by revisiting the four habits of character (initiative, collaboration, perseverance, and responsibility) on the Working to Be Effective Learners Anchor Chart. Ask students to Think-Pair-Share one way they demonstrated a habit of character during today's lesson. (MME)

Lesson 2: Reading and Speaking and Listening: Why Do Authors Write Stories about the Sun and Moon?

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.

Daily Learning Target

- I can infer why authors write about the sun, moon, and stars using details from *Why the Sun and the Moon Live in the Sky*. (RL.1.1, W.1.8, SL.1.2)

Ongoing Assessment

- During Work Time B, circulate and listen as students discuss the Unit 1 guiding question. Use the Speaking and Listening Checklist to document progress toward SL.1.2.

Agenda

1. Opening

- A. Engaging the Learner: Introducing the Sun Movement Routine (10 minutes)

2. Work Time

- A. Reading Aloud: *Why the Sun and the Moon Live in the Sky* (20 minutes)
- B. Structured Discussion: Introducing the Unit 1 Guiding Question (10 minutes)
- C. Independent Writing: Reflecting on the Unit 1 Guiding Question (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- Primary learners benefit from engaging with their whole bodies. During the Opening, students learn the first few steps of the Sun Movement routine, which is a series of steps inspired by dancers' poses and stretches.
- This lesson introduces the Unit 1 guiding question: "Why do authors write about the sun, moon, and stars?" This question invites students into the study of narrative texts and pushes them to build knowledge about the ways in which authors are inspired to write.
- This lesson invites students to revisit the character, Elvin, to whom they were introduced in Lesson 1. The continuation of his story invites students to build upon what they notice and wonder about the sun, moon, and stars.

- In Work Time A, students hear *Why the Sun and the Moon Live in the Sky* read aloud. Primary learners need to hear many texts read aloud in order to build their word and world knowledge. Display the text when reading aloud. And when doing a first read-aloud, read fluently, with expression, and without interruption.
- The text that is read aloud in this lesson is the first in a series of several narrative texts read aloud throughout the unit. Exposing students to a variety of narrative texts allows them to gain a greater understanding of narrative story elements such as character, setting, major events, and central message.
- During Work Time B, students discuss their initial thoughts on the unit guiding question with a partner. They then have the opportunity to demonstrate their thinking in writing during Work Time C. Allowing students to orally process their ideas before writing supports their development as young writers.

How this lesson builds on previous work:

- This lesson builds on the curiosity and excitement for the module topic generated in Lesson 1.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Some students may need extra support during Work Time C, as they independently write to capture their ideas about the unit's guiding question. Support these students by encouraging them to draw their ideas and then add labels or by providing sentence frames such as: "I think this author wrote about the _____ because _____."

Down the road:

- Students will revisit the text *Why the Sun and the Moon Live in the Sky* in Lessons 12–13 to complete a more in-depth study of its characters, setting, major events, and central message.
- In Lesson 3, students are introduced to the unit's central text, *Summer Sun Risin'*, and will begin a series of close read-aloud sessions devoted to an in-depth study of this text.

In advance:

- Prepare:
 - Sun Movement and Moon Movement charts by copying them onto chart paper (see supporting materials).
 - Unit 1 Guiding Question anchor chart by writing the title, the guiding question, and the labeled table on chart paper.
- Pre-determine pairs for Work Time A.
- Pre-distribute materials for Work Time C at student workspaces to ensure a smooth transition.
- Post: Learning target, Sun Movement chart, Moon Movement chart, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: “Elvin, the Boy Who Loved the Sky,” Part 2 could be an email.
- Opening A: Create the Sun Movement chart and the Moon Movement chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these movements.
- Work Time A: “Elvin, the Boy Who Loved the Sky,” Part 3 could be an email.
- Work Time B: Create the Unit 1 Guiding Question anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to engage with the topic through movement and to preview the key texts in the unit.
- ELLs may find it challenging to understand and answer the guiding question about authors’ motivations for writing about the sun and moon, as it shifts the point of view from the characters in the story to the author. Throughout the reading, remind students that they will be thinking about the writer of the story. (Example: “I wonder why the author wrote about this.”) Guide students through a Mini Language Dive to support their understanding of the guiding question. See Meeting Students’ Needs column for details.

Levels of support

For lighter support:

- Before providing sentence frames or additional modeling during Work Time, observe student interaction and allow students to grapple. Provide supportive frames and demonstrations only after students have grappled with the task. Observe the areas in which they struggle in order to target appropriate support.

For heavier support:

- During the read-aloud in Work Time A, support students who need heavier support by encouraging them to act out parts of the story. Dictate lines for them to recite so that they practice using verbal language.
- During Work Time C, before inviting students to work independently, prompt the class to brainstorm a few possible responses to the guiding question using the sentence frame: “I think the author wrote about the _____ because _____.” Record and display student responses. Invite students to use a class-generated response if they get stuck.
- During Work Time C, work closely with a group of students who need heavier support. Consider completing the task as a shared writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** Throughout this lesson, embed support for unfamiliar vocabulary by providing explanation and visual examples. This helps students make connections and support comprehension.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. During independent writing, vary methods for fine motor responses by offering students options for drawing utensils, writing tools, and scaffolds.
- **Multiple Means of Engagement (MME):** In this lesson, the Sun Movement routine provides students with options for physical action. Some students may have difficulty estimating the amount of space they need in order to move their bodies safely during this routine. Consider minimizing threats and distractions by directing all students to pre-determined spots for movement.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- explain, infer (L)

Materials

- ✓ "Elvin, the Boy Who Loved the Sky," Part 2 (one to display; for teacher read-aloud)
- ✓ Sun Movement chart (new; teacher-created; see supporting materials)
- ✓ Moon Movement chart (new; teacher-created; see supporting materials)
- ✓ "Elvin, the Boy Who Loved the Sky," Part 3 (one to display; for teacher read-aloud)
- ✓ *Why the Sun and the Moon Live in the Sky* (one to display; for teacher read-aloud)
- ✓ *Kitten's First Full Moon* (one to display)
- ✓ *Sun and Moon* (one to display)
- ✓ *Summer Sun Risin'* (one to display)
- ✓ Noticing and Wondering anchor chart (begun in Lesson 1)
- ✓ Unit 1 Guiding Question anchor chart (new; co-created with students during Work Time C; see supporting materials)
- ✓ Think-Pair-Share anchor chart (begun in Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Unit 1 Guiding Question response sheet (one per student)
- ✓ Pencils (one per student)
- ✓ Crayons (class set; variety of colors per student)

Opening

A. Engaging the Learner: Introducing the Sun Movement Routine (10 minutes)

- Invite students to the whole group area.
- Remind them that in the previous lesson they listened to a story about a boy named Elvin.
- Using a total participation technique, invite responses from the group:

“What did we learn about Elvin from the story?” (He loves to look at the sky, he wonders about the sun and the moon, and he likes to lie down in the grass to look at the sky.)

“What did Elvin share with us after we read his story in the last lesson?” (He shared that he saw a photographer and asked about the sun and moon, and the photographer gave him pictures. He shared those pictures with us.)
- Tell students that today you have another short story about Elvin to share with them.
- Display **“Elvin, the Boy Who Loved the Sky,” Part 2** and read the title aloud.
- Say:

“As I read this story, I want you to think about the new notices and wonders Elvin has.”
- While still displaying the text, read aloud the first paragraph, slowly, fluently, with expression, and without interruption.
- Using a total participation technique, invite responses from the group:

“What is Elvin wondering about now?” (He wonders if the sun and moon move. He wonders how the sun and moon move.)
- Draw students’ attention back to the text and continue reading the complete story.
- Display the **Sun Movement chart** and the **Moon Movement chart** side by side.
- Tell students they will now learn about these movements that the dancer shared with Elvin. Today, they will focus on the Sun Movement and in a later lesson they will learn about the Moon Movement.
- Tell students that you will model the first few steps of the Sun Movement routine and then you will invite them to join you in doing the routine. Tell them that while you model you want them to pay close attention to what you are doing with your body.
- Model the first five steps of the Sun Movement routine while referencing the Sun Movement chart:
 1. Point to the image next to Step 1 and read aloud the step: “Get ready to stretch. Take three deep breaths.” Model completing Step 1.
 2. Point to the image next to Step 2 and read aloud the step: “Crouch down. Hug your knees and relax.” Model completing Step 2.
 3. Point to the image next to Step 3 and read aloud the step: “Jump up and extend arms and legs out.” Model completing Step 3.
 4. Point to Step 4 and read it aloud: “Repeat Steps 2–3.” Model completing Step 4.
 5. Point to the image next to Step 5 and read it aloud: “Open feet and stretch arms down to the floor. Relax your neck and back.” Model completing Step 5.

- Using a total participation technique, invite responses from the group:
“What did you notice about how my body moved while I did this routine?” (You moved in your own space. You moved safely and calmly. Your voice was off when you were moving.)
- Invite students to stand up and spread out inside and around the edge of the whole group meeting area. As needed, remind students to move safely and make space for everyone.
- Invite students to join you as you complete Steps 1–5.
- Repeat one or two times as time permits.
- Offer students specific, positive feedback on their work learning a new movement routine. (Example: “I noticed that everyone took great care to make sure their bodies were safe as we learned the new movements.”)
- Tell students that in the next few lessons they will learn the remaining steps to the Sun Movement routine.

Meeting Students' Needs

- After demonstrating the Sun Movement routine, support comprehension by asking students to share what they think the motions represent (the sun is moving up, the sun is moving down). (MMR)
- Before asking students to complete the Sun Movement routine with you, minimize threats and distractions by directing students to pre-determined spots for movement. (Example: Use masking tape to mark a place on the floor for each student, ensuring that students will have enough space to move safely.) (MME)
- For ELLs: Briefly review some of the verbal directives involved in the Sun Movement routine and how they correspond to the model and chart before beginning the routine. (Example: “This is how you *crouch down*. Can someone show me what it looks like to *crouch*?”)

Work Time

A. Reading Aloud: *Why the Sun and The Moon Live in the Sky* (20 minutes)

- Refocus students whole group.
- Offer specific, positive feedback on their work learning a new movement routine. (Example: “I noticed that everyone took great care to make sure their bodies were safe as we learned the new movement routine.”)
- Tell students that today is an exciting day because not only did Elvin share the Sun Movement routine with them, but he also has something else to share with them.
- Display **“Elvin, the Boy Who Loved the Sky,” Part 3**.
- Remind students that so far Elvin has wondered what the sun, moon, and stars look like; what shape and size the sun and moon might be; and if and how the sun and moon move.
- Tell students that there are more things that Elvin wonders about and you are going to read the next part of the story so that students can find out more about what else Elvin wonders.
- Read aloud “Elvin, the Boy Who Loved the Sky,” Part 3 and invite students to follow along as you track the print.

- After reading the last line of Part 3, hold up the following texts, reading each title aloud as you do:
 - *Why the Sun and the Moon Live in the Sky*
 - *Kitten’s First Full Moon*
 - *Sun and Moon*
 - *Summer Sun Risin’*
- Tell students that just as Elvin wonders about the sun, moon, and stars, they also wonder about the sun, moon, and stars.
- Remind students that yesterday as they viewed pictures and videos of the sun, moon, and stars, they thought about, discussed, and wrote down the things they noticed and wondered about the sun, moon, and stars.
- Direct students’ attention to the posted **Noticing and Wondering anchor chart** and review what is written on it.
- Tell students that throughout this unit, they are going to read all of the stories that Elvin received from the storyteller. Share that today they will listen as you read *Why the Sun and the Moon Live in the Sky* aloud.
- Tell students that the story is a folk tale from Nigeria in West Africa. Locate Nigeria on a map, and invite any students to share if they are from, or have family in, West Africa. Invite students to share any stories about the sun and moon that they have learned from their families.
- Display *Why the Sun and the Moon Live in the Sky* and complete a first read of the text, reading slowly, fluently, with expression, and without interruption.
- Using a total participation technique, invite responses from the group:

“What was this story mostly about?” (The sun wanted the water to visit his house. The water brought a lot of friends, and then the sun and moon got pushed out of the house and into the sky.)

“How did the author include the sun and moon in this story?” (The sun and moon were characters in the story. The story is about how the sun and moon got into the sky.)
- Tell students that authors write stories about the sun, moon, and stars for all kinds of reasons. Tell them that now they will discuss why they think this author wrote this particular story about the sun and moon.

Meeting Students’ Needs

- After reviewing the Noticing and Wondering anchor chart, maximize transfer of information by explicitly linking the stories Elvin received to the classroom study of the sky. Say: “As we read all the stories that Elvin received from the storyteller, we will be learning more about the sun, moon, and stars. We will be adding what we learn to this chart.” (MMR)
- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.

Work Time

B. Structured Discussion: Introducing the Unit 1 Guiding Question (10 minutes)

- Direct students' attention to the **Unit 1 Guiding Question anchor chart** and read the question aloud:

"Why do authors write about the sun, moon, and stars?"

- Point to the table below the guiding question and read the headings of each column. Tell students that throughout this unit they will study several stories about the sun, moon, and stars to learn more about why authors write stories about them. Tell them that now they will think about this question in light of the text they just listened to.
- Direct students' attention to the posted learning target and read it aloud:

"I can infer why authors write about the sun, moon, and stars using details from Why the Sun and the Moon Live in the Sky."

- Point out the word *infer* and define it as making a guess based on facts and observations.
- Tell students they are now going to use the Think-Pair-Share protocol to discuss why Elphinstone Dayrell, the author of *Why the Sun and the Moon Live in the Sky*, wrote about the sun and moon. Remind them that they used this protocol in Module 1, and review as necessary using the **Think-Pair-Share anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Move students into pre-determined pairs and invite them to Think-Pair-Share:

"Why do authors write about the sun, moon, and stars?"

- As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Refocus whole group and invite a few students to share with the whole group.
- If productive, cue students to listen carefully:

"Who can repeat what your classmate said?" (Responses will vary.)

- Tell students that now they will use what they have discussed with their partner to help them independently reflect on the unit's guiding question using pictures and words.

Meeting Students' Needs

- When reviewing the definition of *infer*, maximize comprehension by providing an example of another way to use this term. (Example: "When I see steam rising from my hot cocoa, I *infer* that the liquid is hot.") (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the guiding question: "I / can infer / why authors write about the sun, moon, and stars / using details from *Why the Sun and the Moon Live in the Sky*." Write and display student responses next to the chunks. Examples:
 - Ask:

"What does this sentence mean?" (Responses will vary)

- Point to and read aloud the chunk: “I” and ask:
“Who is this sentence about?” (me; students)
- Point to and read aloud the chunk: “can infer” and ask:
“What will you be able to do?” (infer; make a guess about something)
- Point to and read aloud the chunk: “why authors write about the sun, moon, and stars” and ask:
“What will you be guessing about?” (the reason authors or writers write stories about the sun, moon, and stars)
- Point to and read aloud the chunk: “using details from *Why the Sun and the Moon Live in the Sky*.” and ask:
“What will you use to help you infer?” (details, or important facts from Why the Sun and the Moon Live in the Sky)
“Now what do you think this sentence means?” (We can use things we learn from Why the Sun and the Moon Live in the Sky to guess why people write about the sun, moon, and stars.)

Work Time

C. Independent Writing: Reflecting on the Unit 1 Guiding Question (15 minutes)

- Invite students to stretch their hands up to the sky as if they are touching the sun as they transition back to their tables.
- Once students are settled, direct their attention to the **Unit 1 Guiding Question response sheet**, **pencils**, and **crayons** already at their workspaces.
- Review the guiding question by reading it aloud:
“Why do authors write stories about the sun, moon, and stars?”
- Invite students to use the response sheet to capture their ideas about why this author wrote about the sun and moon. Tell students that they can use pictures and words to show their thinking.
- As students write and draw, circulate to offer support and take note of their independent writing abilities. Prompt students by asking questions to focus their thinking:
“How did the author include the sun and moon in this story? Why do you think the author included the sun and moon in this way?”
“What is this story mostly about? Why do you think the author chose to write this story?”
- Provide students with sentence frames as needed:
 - “I think the author wrote about the _____ because _____.”
- When 5 minutes remain, prompt students to complete the drawing or sentence they are working on and begin cleaning up by placing pencils and crayons back on the tables where they found them.
- Refocus students whole group and invite a few to share out their ideas with the whole group.
- As students share out, clarify and capture their response on the Unit 1 Guiding Question anchor chart, making sure to frame the idea of why the author wrote the story about the sun and moon with the word *explain*.

- Point out *explain* on the chart and tell students that this word means to give information about something so that another person can understand it. Tell them that in this case, Elphinstone Dayrell wanted readers to understand why the sun and moon live in the sky, so the story explains how they got there.
- Remind students that in the next few lessons they will read more stories about the sun and moon and learn more about why authors write stories about the sun and moon.

Meeting Students' Needs

- As students begin independent writing, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). (MMAE)
- For ELLs: Before inviting students to work independently, model and think aloud a response to the guiding question using the sentence frame: "I think the author wrote about the ____ because ____." (Example: I think the author wrote about the sun because it is big.)

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Offer students specific, positive feedback on their writing and drawing in response to the unit's guiding question as it relates to the text they read during this lesson. (Example: "I saw that Terrell and Curtis used what they understood about why the author wrote *Why the Sun and the Moon Live in the Sky* as they completed their independent writing about the Unit 1 guiding question.")
- Redirect students' attention to the learning target and read it aloud:
"I can infer why authors write about the sun, moon, and stars using details from Why the Sun and the Moon Live in the Sky."
- Invite students to turn and talk with an elbow partner:
"What is something you learned or did during this lesson that helped you meet the learning target?" (Responses will vary.)
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Refocus students whole group and invite two or three students to share out with the whole group.
- Tell students that in the next lesson they will begin reading one of the other texts and will gather even more information to help them add to their thoughts about the unit's guiding question.

Meeting Students' Needs

- For ELLs: Invite students to rephrase the learning target in their own words after gaining a deeper understanding of it. (Example: I can use the book to help me wonder why people like to write about the sun and moon.)

Lesson 3: Close Read-aloud, Session 1: *Summer Sun Risin'*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.4:** Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1c:** Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).
- **L.1.4:** Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grade 1 reading and content*, choosing flexibly from an array of strategies.
- **L.1.4a:** Use sentence-level context as a clue to the meaning of a word or phrase.

Daily Learning Target

- I can ask and answer questions about the boy and the sun in *Summer Sun Risin'* using key details from the text. (RL.1.1, RL.1.2, RL.1.3, and RL.1.7)

Ongoing Assessment

- During Session 1 of the close read-aloud in Work Time A, use the Reading Literature Checklist to track students' progress toward the RL standards listed for this lesson (see Assessment Overview and Resources).
- During the Closing, circulate and observe students as they complete the *Summer Sun Risin'* response sheet. Watch for students to observe and accurately describe character and setting. (RL.1.3, W.1.8)

Agenda

1. Opening

- A. Engaging the Learner: Reading “Elvin, the Boy Who Loved the Sky,” Part 4 and Introducing the “Sun, Moon, and Stars” Song (10 minutes)

2. Work Time

- A. Reviewing Close Readers Do These Things Anchor Chart (5 minutes)
- B. Close Read-aloud, Session 1: *Summer Sun Risin’*, Pages 1–28 (30 minutes)
- C. Engaging the Learner: Sun Movement Routine (5 minutes)

3. Closing and Assessment

- A. Independent Writing: *Summer Sun Risin’* Response Sheet, Part 1 (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson introduces the first of a series of close read-alouds of the unit anchor text, *Summer Sun Risin’* by W. Nikola-Lisa. Students strengthen their ability to understand and converse with their peers about the text as they hear it read aloud multiple times and engage actively through the use of the *Summer Sun Risin’* anchor chart, interactive role-playing, and text-dependent questions. At the end of Unit 1, students participate in an assessment that measures their ability to identify literary story elements such as beginning, middle, end; main character and setting; and central message or lesson of a piece of literature (RL.1.1, RL.1.2, RL.1.3, RL.1.7, SL.1.2, W.1.8).
- A close read-aloud is an instructional practice that gives readers an opportunity to study a complex text with teacher support, for the purpose of deep comprehension. A close read-aloud of a particular text occurs in a series of short sessions (approximately 20–25 minutes each) across multiple lessons. In the first session, students hear the entire text read aloud by the teacher, without interruption. In subsequent sessions, the teacher poses a focus question to set a purpose for deeper analysis and facilitates deeper comprehension by rereading excerpts of the text with this question in mind. In each session, the teacher lifts students’ understanding of the text through purposeful text-dependent questions, interactive discussion, and other activities that support comprehension. In the final session, students synthesize their learning by answering the focus question through a culminating writing or speaking task.
- For every close read-aloud, there is a Close Read-aloud Guide (see supporting materials). This material lays out the entire sequence of sessions. Before launching the first session with a given text, review the entire guide to have the big picture of the work students will do with that text across multiple lessons. Keep this guide in hand across the multiple lessons.
- The pages of *Summer Sun Risin’* are not numbered. For instructional purposes, the page that begins with “Wake up, little one! Summer sun’s a-risin’” should be considered page 2 and all pages thereafter numbered accordingly.

How this lesson builds on previous work:

- Continue to reinforce routines established in Lessons 2, specifically the Sun Movement routine.

- In Lessons 1–2, students built interest in the module topic through noticings and wonderings. This lesson allows for a more in-depth study of the sun as students begin the close read-aloud sessions of *Summer Sun Risin’*.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.
- The story “Elvin, the Boy Who Loved the Sky” was introduced in Lesson 1. In this lesson, students are introduced to Part 4 of the story, which helps introduce the “Sun, Moon, and Stars” song, during the Opening.

Areas in which students may need additional support:

- During the closing, students begin a new independent writing task. Some students may need additional support with making this transition. Consider remodeling the writing process and/or partnering students who need additional support to complete the task.

Down the road:

- This is the first lesson in a series of five in which students participate in a close read of *Summer Sun Risin’* and track the important details of the text on the *Summer Sun Risin’* anchor chart. Preview the Close Read-aloud Guide: *Summer Sun Risin’* (Session 1; for teacher reference) to familiarize yourself with what will be required of students. Complete only Session 1 in this lesson; students will complete the remaining sessions in subsequent lessons.
- Throughout this unit, students are introduced to habits of character for how we treat others, specifically showing respect. In Lessons 4–13, students learn the definition of respect and how it can be applied to their learning and work. Beginning in Lesson 4, students will reflect on how they and their classmates are showing respect during the Role-Play protocol.

In advance:

- Prepare Sun, Moon, and Stars Word Wall cards for the words *sunrise* and *horizon*. Write or type the word on a card and create or find a visual to accompany each word.
- During Work Time A, circulate and listen for students to use descriptive language as they talk about their tea party picture. (SL.2.2)
- Preview the entire Close Read-aloud Guide to fully understand the “arc” of these five lessons and to see how the learning and skills build from one lesson to the next.
- Pre-distribute materials for Closing at student workspaces to ensure a smooth transition.
- During Work Time A, circulate and listen for students to use descriptive language as they talk about their tea party picture. (SL.2.2)
- Review the Sun Movement routine as necessary (see Lesson 2).
- Post: Learning target; “Elvin, the Boy Who Loved the Sky,” Part 4; “Sun, Moon, and Stars” song; and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: “Elvin, the Boy Who Loved the Sky,” Part 4 could be an email.
- Opening A: Record the whole group singing the “Sun, Moon, and Stars” song and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time C: Video record students as they complete the Sun Movement routine to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with multiple opportunities to discuss and interpret the content from *Summer Sun Risin’*, using multiple language modalities.
- ELLs may find it challenging to listen to *Summer Sun Risin’* without stopping, especially if they do not understand some of the language used in the text. Encourage students to use the pictures to help them understand what is happening in the story. Tell them that if they do not understand everything right now, it is okay. Remind students that they will read everything again during the unit.

Levels of support

For lighter support:

- During Work Time A, allow students to grapple by pairing some students who need lighter support together in matching proficiency pairs.

For heavier support:

- During Closing and Assessment, work closely with a small group of students who need heavier support. Consider completing the response sheet together as a shared writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students review the Close Readers Do These Things anchor chart. Some students may benefit from context-specific visual cues to remember the meaning of each bullet on the anchor chart. Consider printing and displaying photographs of students demonstrating each bullet to connect these terms to concrete shared experiences.

- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. Some students may need additional support in order to visually plan for writing and drawing on their response sheets. Vary methods for fine motor responses, offering modified response sheets with a separate box for drawing and lines for writing.
- **Multiple Means of Engagement (MME):** In this lesson, students revisit the Sun Movement routine. Some students may have difficulty estimating the amount of space they need in order to move their bodies safely during this routine. Consider minimizing threats and distractions by reminding all students to stand in pre-determined spots for movement.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- events, setting, diagram (L)
- arisin', sunrise, horizon (T)

Review:

- noun, verb, character, observation, illustration, key details (L)

Materials

- ✓ "Elvin, the Boy Who Loved the Sky," Part 4 (one to display; for teacher read-aloud)
- ✓ "Sun, Moon, and Stars" song (one to display)
- ✓ Markers (two different colors; for teacher use)
- ✓ During Work Time A, circulate and listen for students to use descriptive language as they talk about their tea party picture. (SL.2.2)
- ✓ Close Readers Do These Things anchor chart (begun in Module 1)
 - Close Read-aloud Guide: *Summer Sun Risin'* (Session 1; for teacher reference)
 - *Summer Sun Risin'* (one to display; for teacher read-aloud)
 - Sun, Moon, and Stars Word Wall cards (new; teacher-created; two)
 - Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to in Work Time B; see Teaching Notes)
 - *Summer Sun Risin'* icons (new; one set for teacher use during the close read-aloud)
 - Sun icon (new; one for teacher use during the close read-aloud)
 - *Summer Sun Risin'* word cards (new; for teacher use during the close read-aloud; one)
 - *Summer Sun Risin'* anchor chart (new; co-created with students during Work Time A; see Close Read-aloud Guide)

- *Summer Sun Risin’* Culminating Task response sheet (one for teacher modeling and one per student; see Close Read-aloud Guide)
- Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Sun Movement chart (from Lesson 2; one to display)
- ☑ *Summer Sun Risin’* response sheet (one for teaching modeling and one per student)
- ☑ Colored pencils (class set; variety of colors per student)
- ☑ Pencils (one per student)

Opening

A. Engaging the Learner: Reading “Elvin, the Boy Who Loved the Sky,” Part 4 and Introducing the “Sun, Moon, and Stars” Song (10 minutes)

- Gather students whole group. As needed, remind them to move safely and make space for everyone.
- Remind students of the story “Elvin, the Boy Who Loved the Sky” and what they have learned about why Elvin loves the sun and moon.
- Share that today, they will hear the next part of the story.
- Display “**Elvin, the Boy Who Loved the Sky,” Part 4** and read it aloud slowly, fluently, with expression, and without interruption.
- After you read the end of Part 4 and read the words “but the musician did not answer his questions. Instead he gave him this ...” direct students’ attention to the posted “**Sun, Moon, and Stars” song**.
- Share that today, students will learn the “Sun, Moon, and Stars” song.
- Direct students’ attention to the “Sun, Moon, and Stars” song.
- Tell students you are going to sing the “Sun, Moon, and Stars” song aloud line by line and as you do, you would like them to:
 - Echo each line of the song as it is sung, tracking the print
- Sing the “Sun, Moon, and Stars” song, tracking the print with your finger or a pointer.
- Tell students you would like them to think of some motions that go along with this song. Point out that this song uses *nouns* and their matching *verbs* and that these can help them think of some movements for the song.
- Remind students that nouns are people, places, or things (like “the sun”!), and that verbs are action words (like “shines”!).
- Model using **markers** to underline the noun “the sun” with one color and the verb “shines” with the other color.
- Tell students that you are slowly going to repeat the song. When they hear or see a noun they can touch their head, and when they see or hear a verb they can touch their foot.
- Sing the song aloud slowly and underline the nouns and verbs in their prospective colors.
- After singing the song and underlining the nouns and verbs invite students to reread the phrases with you:
 - “The sun shines”

- “I see”
- “The moon lights”
- “I see:
- “Stars make”
- “I see”
- “I see”
- “I look”
- “I see”
- Using a total participation technique, invite responses from the group:
“What are some hand gestures, motions, or actions that could go along with these nouns and verbs in the song?” (Responses will vary, but may include: lifting their arms to form a circle; twinkling their fingers like stars; etc.)
- If time permits, repeat the song inviting students to sing with their movements for each noun and verb.

Meeting Students' Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: Before singing the “Sun, Moon, and Stars” song, reread the lyrics aloud and invite students to listen carefully for words that describe the sun and to give a silent signal when they hear one. Invite students to underline the words that they identify.
- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: Provide visuals for the nouns in the song (sun, moon, stars) and use these visuals when helping students to identify these nouns.

Work Time

A. Reviewing Close Readers Do These Things Anchor Chart (5 minutes)

- Direct students’ attention to the posted **Close Readers Do These Things anchor chart**. Point to each bullet while reading aloud.
- Remind students that readers do things to help them really understand the text well. (This is true even if they are hearing the text read aloud to them.) Explain that readers look closely at the illustrations to help them understand the details of the story and reread important parts of the text.
- Invite students to turn and talk to an elbow partner:
“What does it look like to look closely at the illustrations?” (Look for students to mimic studying and looking deeply at imaginary pictures.)
“What does it look like to reread the text?” (Look for students to mimic rereading a pretend text.)
- Refocus whole group and invite one or two students to share out.

- Share with students that today, they will begin reading a new book called *Summer Sun Risin'* and will get to practice the things close readers do as they answer the focus question: "What is the boy doing when the sun is rising, at its highest, and setting in the sky?"

Meeting Students' Needs

- To activate background knowledge, link each bullet on the anchor chart to printed photographs of students closely reading. (MMR)
- During Work Time A, circulate and listen for students to use descriptive language as they talk about their tea party picture. (SL.2.2)
- For ELLs: Some students may be confused about whether the prompt "What does it look like ..." requires them to provide a verbal description or to act it out. Make clear that students can choose to show or tell to their partners. As an option, invite one partner to act out looking closely at the illustrations while the other describes his or her actions. (Example: "You are looking at your hands up close as if you are looking at every part of the picture.")

Work Time

B. Close Read-aloud, Session 1: *Summer Sun Risin'*, Pages 1–28 (30 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning target and read it aloud:
"I can ask and answer questions about the boy and the sun in *Summer Sun Risin'* using key details from the text."
- Using a total participation technique, invite responses from group:
"What are key details?" (important parts of the text that support the main idea)
- Share that today, students will hear a story read aloud about a boy's daily activities as the sun travels across the sky from sunrise to sunset. They should pay attention to key details about the main character and setting.
- Remind students of the definition of *character* (person, animal, or object in a story, play, or movie)
- Using a total participation technique, invite responses from the group:
"What is the setting of a story?" (when and where a story takes place)
- As students share out, confirm thinking and explain that the setting is when and where a story takes place.
- Display ***Summer Sun Risin'***.
- Briefly review the definition of *risin'* (*rising*)(to climb upwards).
- Guide students through the close read-aloud for *Summer Sun Risin'* using the **Close Read-aloud Guide: *Summer Sun Risin'* (Session 1; for teacher reference)**. Consider using the **Reading Literature Checklist** during the close read-aloud (see Assessment Overview and Resources).
- During Session 1, refer to the guide for the use of:
 - ***Summer Sun Risin'* icons**

- **Sun icon**
- ***Summer Sun Risin'* word cards**
- ***Summer Sun Risin'* anchor chart**
- ***Summer Sun Risin'* Culminating Task response sheet**
- Refocus whole group. Give students specific, positive feedback on their close reading skills. (Example: “I saw you using the illustrations to think about where this story takes place.”)
- Tell students that in the next lesson they will write and draw about the key details from the beginning of the text.

Meeting Students' Needs

- When preparing students for the close read-aloud, provide options for physical action and sensory input by differentiating seating. Some students might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)
- For ELLs: Pair students with a partner who has more advanced or native language proficiency. The partner with greater language proficiency in the pair can serve as a model during the read-aloud, initiating discussions and providing implicit sentence frames.
- For ELLs: During the read-aloud, provide sentence frames for Think-Pair-Shares. (Example: “The text is mostly about ...”)
- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.
- For ELLs: Point out that *take* and *place* are words we hear a lot together. Example: “When you hear *take place* together, we are talking about where something happens.” Prompt students to practice using the phrase. Ask:

“Where does art class happen? Where does it take place?” (Art class takes place in the art room.)

Work Time

C. Engaging the Learner: Sun Movement Routine (5 minutes)

- Invite students to stand up and spread out inside and around the edge of the whole group meeting area. As needed, remind students to move safely and make space for everyone.
- Remind them that in the previous lesson, they learned the Sun Movement routine as a way to say “hello” to the sun.
 - Invite students to review Steps 1–5 of the Sun Movement routine while referencing the **Sun Movement chart**. Tell the class that today, they will practice Steps 1–5.
 - Invite students to join you as you practice Steps 1–5, taking 10–15 seconds for each step.
 - Repeat once or twice as time permits.
 - Offer students specific, positive feedback on their work practicing the beginning movements in the routine. (Example: “I noticed that everyone took great care to make sure their bodies were safe as we practiced the beginning movements.”)

- Tell students that throughout the unit they will continue to practice the Sun Movement routine.

Meeting Students' Needs

- Before asking students to complete the Sun Movement routine, ensure safety and minimize distractions by reminding students to find their pre-determined spots for movement. (Example: Use masking tape to mark a place on the floor for each student, ensuring that students will have enough space to move safely.) (MME)

Closing and Assessment

A. Independent Writing: *Summer Sun Risin'* Response Sheet, Part 1 (10 minutes)

- Remind students of the work they did thinking about key details relating to the main character and setting in *Summer Sun Risin'* during the close read-aloud.
- Invite students to turn and talk to an elbow partner:

"Who is the main character?" (the boy)

"Where does the story take place?" (a farm)

- Display *Summer Sun Risin'* **response sheet**. Point out that this material has two parts. Tell students that today they will complete only Part 1, by writing and drawing about the main character and setting using key details from the text.
 - Direct students to the top of the page and point to Part 1 and read the title aloud:

"Use words and pictures to answer these questions."
 - Point to the table below the title and read the headings of each column aloud:

"Who are the main characters?"

"Where does the story take place?"
 - Tell students that today they will answer these two questions using pictures and words to show their thinking.
 - Invite students to show a thumbs-up or to touch their head if they are ready to begin writing and drawing about the main character and setting.
 - Point out the *Summer Sun Risin'* response sheets already at their workspaces.
 - Transition students to their workspaces and invite them to begin working.
 - Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts).
- After 5 minutes, signal all students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief. Collect their response sheets.
- Offer students specific, positive feedback on their thinking regarding the characters and setting as it relates to the text they read during this lesson. (Example: "I saw that Elijah not only drew the boy and his mother and father under the section for characters, but he also stretched and spelled the word boy under his drawing.")
- Remind students that in the next few lessons they will begin to role-play events from the story and use thinking from this role-play to help with writing and drawing about the major events from the beginning, middle, and end of the story.

Meeting Students' Needs

- When preparing students for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- Before the transition to clean up, support self-regulation and independence during the transition by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)
- For ELLs: While displaying the *Summer Sun Risin'* response sheet, sketch a stick-figure icon next to the character heading and a landscape icon next to the setting heading. Model and think aloud completing it using a text familiar to all students, such as *The Most Magnificent Thing*. (Example: "Who is the main character from *The Most Magnificent Thing*? Oh, that's right! It is the little girl! I will draw a picture of the little girl and write, 'little girl.'")

Lesson 4: Close Read-aloud, Session 2 and Role-Playing: *Summer Sun Risin'*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Identify the main topic and retell key details of a text.
- **RL.1.3:** Describe the connection between two individuals, events, ideas, or pieces of information in a text.
- **RL.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RL.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.4a:** Use sentence-level context as a clue to the meaning of a word or phrase.

Daily Learning Target

- I can describe what the boy and the sun do in the beginning of *Summer Sun Risin'*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)

Ongoing Assessment

- During Session 2 of the close read-aloud in Work Time A, listen for students to describe characters, setting, and major events in the story using key details and use the Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.3, RL.1.4, RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use evidence from the text as they role-play specific story elements such as setting, characters, plot, and central message. (SL.1.2)
- During Work Time C, listen for students to share ways they showed respect during the Role-Play protocol. (SL.1.1)
- During the Closing, monitor students as they listen and respond to a pinky partner's idea. (SL.1.1)

Agenda

1. Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

2. Work Time

A. Close Read-aloud, Session 2: *Summer Sun Risin'*, Pages 2–10 (25 minutes)

B. Role-Playing and Showing Respect, Pages 3–6 (15 minutes)

C. Structured Discussion: Reflecting on Respect (10 minutes)

3. Closing and Assessment

A. Pinky Partners: Sun Experience—Sunrise (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- Close read-alouds support a deep understanding of a worthy text, support students' mastery of the reading informational or literature standards, and engage students with discussion, movement, and dramatic expression. Monitor both students' understanding and their engagement; adjust the practice as necessary to support each.
- During the close read-aloud in Work Time A, students continue to answer the focus question: "What is the boy doing when the sun is rising, at its highest, and setting in the sky?" They also focus on events from the beginning of the story. This text provides a rich narrative that allows students to track specific story elements such as setting, characters, plot, and central message.
- During Work Time B, students engage in the Role-Play protocol in order to respond to the text by acting out the beginning events. This instructional routine allows for oral language development and continued conceptual understanding of specific story elements such as setting, characters, plot, and central message, while honoring the curiosity of young learners (SL.1.2).
- In this lesson, the habit of character focus is on working to become an ethical person, specifically showing respect, as students work in pairs to role-play certain parts of *Summer Sun Risin'*. Using the Working to Become Ethical People anchor chart, students learn the definition of respect and begin to consider how to use and to show respect.

How this lesson builds on previous work:

- Continue to reinforce routines established in Lessons 2–3, specifically the Sun Movement routine.
- This lesson invites students to engage in several instructional routines introduced in previous lessons, units, and modules (e.g., Think-Pair-Share, pinky partners). Consider your students' familiarity with these instructional routines and reallocate time as needed to review them.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may find it difficult to reflect on how they demonstrate respect. As students role-play, name specific behaviors that show respect and give examples that help students articulate their own progress toward this habit of character.

Down the road:

- Throughout Unit 1, students will continue to reflect on their progress toward showing respect during the Role-Play protocol. As students reflect daily, consider guiding them toward more specific responses (e.g., “I showed respect by keeping my body safe when collaborating with my partner.”).
- The Role-Play protocol scaffolds students’ understanding of the story. Students will apply their understanding of story elements as they complete the response sheet for *Summer Sun Risin’* (begun in Lesson 3) in subsequent lessons. Consider maintaining role-play partnerships across Lessons 4–6.
- For the culminating task in Session 5, students will draw and write about three parts of the boy’s day from sunrise to sunset, being sure to include what he is doing and what the sun is doing in the beginning, middle, and end of the story (RL.1.1, RL.1.3, RL.1.7, SL.1.2).

In advance:

- Preview the Close Read-aloud Guide: *Summer Sun Risin’* (Session 2; for teacher reference). Complete only Session 2 in this lesson; students will complete the remaining sessions in subsequent lessons.
- Strategically pair students for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames. Students will maintain these partnerships in Lessons 4–6.
- Review:
 - Sun Movement routine (see Lesson 2).
 - Role-Play and Pinky Partners protocols. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning target and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If students were recorded during Work Time C in Lesson 3, consider replaying these recordings to remind students of the process.
- Work Time A: Create the *Summer Sun Risin'* anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these movements.
- Work Time B: Create the Role-play anchor chart and the Working to Become Ethical People anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these movements.
- Closing A: Record students as they participate in the Pinky Partners protocol to listen to later to discuss strengths and what they could improve on, or to use as models for the group. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read academic text closely, and to use role-play to reinforce comprehension.
- ELLs may find it challenging to comprehend some of the academic language and syntax in *Summer Sun Risin'*. Guide students through the Mini Language Dive conversation during Work Time A. See Meeting Students' Needs column for details.

Levels of support

For lighter support:

- During Closing and Assessment, invite students who need lighter support to share their sun experiences first.

For heavier support:

- During the role-play in Work Time B, empower students to ask for help if they are not sure what their characters would say. Prompt students to call, "Line!" when they get stuck. Tell students that this will signal their partners to provide them with an idea of something they could say.
- During the Role-Play Protocol in Work Time B, enlarge or project each corresponding page that is read aloud to students. Students may benefit from the additional visual cues.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students share ideas about how the habit of character respect looks and sounds during classroom activities. Some students may need additional support understanding and

remembering these ideas. Offer alternatives to auditory information by writing students' ideas on chart paper and referring to them in future lessons.

- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas with a partner about how they experience the sunrise. Some students may need additional support connecting the sunrise to their senses. As students share out, provide options for expression and communication by using prompts and sentence frames.
- **Multiple Means of Engagement (MME):** During the Role-Play protocol, students may disagree about choosing roles. Some students may need additional support generating positive strategies for resolving a disagreement. Foster collaboration by discussing strategies with students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- respect (L)
- risin', climbin' (T)

Review:

- sunrise, retell, characters, events, observations, experience (L)

Materials

- ☑ Sun Movement chart (from Lesson 2; one to display)
- ☑ Close Read-aloud Guide: *Summer Sun Risin'* (Session 2; for teacher reference)
 - *Summer Sun Risin'* (one to display; for teacher read-aloud)
 - *Summer Sun Risin'* anchor chart (begun in Lesson 3; co-created with students during Work Time A; see Close Read-aloud Guide)
 - *Summer Sun Risin'* icons (from Lesson 3; one set for teacher use during the close read-aloud)
 - Sun icon (from Lesson 3; two; for teacher use during the close read-aloud)
 - *Summer Sun Risin'* word cards (new; teacher-created; two)
 - Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Role-Play Protocol anchor chart (new; teacher-created; see Teaching Notes)
- ☑ Working to Become Effective Learners anchor chart (begun in Module 1)
- ☑ Working to Become Ethical People anchor chart (new; teacher created; see supporting materials)

- ✓ Think-Pair-Share Protocol anchor chart (begun in Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)

Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

- Invite students to stand up and spread out inside and around the edge of the whole group meeting area. As needed, remind students to move safely and make space for everyone.
- Remind students that in Lesson 2, they learned the Sun Movement routine as a way to say “hello” to the sun. Direct students’ attention to the **Sun Movement chart** and review Steps 1–5.
- Invite students to join you as you practice Steps 1–5.
- Tell students that today they will learn the remaining steps of the Sun Movement routine. Tell students you will model Steps 6–10 and then you will invite them to join you in doing the entire routine.
- Model Steps 6–10 of the Sun Movement routine while referencing the Sun Movement chart:
 1. Point to the image next to Step 6 and read aloud the step: “Slowly stretch your body up to the right, keeping arms in line with your ears.”
 2. Model completing Step 6.
 3. Point to the image next to Step 7 and read aloud the step: “Stretch up until you are standing straight with your arms raised next to your head.”
 4. Model completing Step 7.
 5. Point to the image next to Step 8 and read aloud the step: “Stretch arms out and down. Then cross in front of your body to come up again.”
 6. Model completing Step 8.
 7. Point to the image next to Step 9 and read aloud the step: “Take a breath and slowly stretch up and down to the left, keeping arms in line with your ears.”
 8. Model completing Step 9.
 9. Point to the image next to Step 10 and read aloud the step: “Keep stretching left until your body is stretched downward and your arms, neck, and back are relaxed.”
 10. Model completing Step 10.
- As needed, remind students to move safely and make space for everyone.
- Invite students to join you as you practice Steps 1–10.
- Repeat once or twice as time permits.
- Offer students specific, positive feedback on their work learning the new movements in the routine. (Example: “I noticed that everyone took great care to make sure their bodies were safe as we learned the new movements.”)

Meeting Students' Needs

- As you review the beginning of the Sun Movement routine, foster community by inviting a few student volunteers to model Steps 1–5 for the class. (MME)
- After demonstrating Steps 6–10 of the Sun Movement routine, support comprehension by asking students to share what they think the motions represent (the sunbeams are spreading light and warmth in all directions). (MMR)
- For ELLs: Briefly review some of the verbal directives involved in the Sun Movement routine and how they correspond to the model and chart before beginning the routine. (Example: "This is how you *cross your arms*. Can someone show me what it looks like to *cross your arms*?")

Work Time

A. Close Read-aloud, Session 2: *Summer Sun Risin'*, Pages 2–10 (25 minutes)

- Direct students' attention to the posted learning target and read it aloud:
"I can describe what the boy and the sun do in the beginning of Summer Sun Risin'."
- Above the target, draw a simple picture of a speech bubble over the word *describe*, a stick figure over the word *boy*, and a picture of a sun over the word *sun*.
- Using a total participation technique, invite responses from the group:
"How do these pictures help us understand this learning target?" (The pictures mean we will talk about what the boy and the sun do at the beginning of the story.)
- If productive, cue students to listen carefully and seek to understand:
"Who can tell us what your classmate said in your own words?" (Responses will vary.)
- Tell students that during today's close read-aloud session, they will read to meet this target.
- Invite students to take out their magic bows and take aim at the target.
- Guide students through the close read-aloud for *Summer Sun Risin'* using the **Close Read-aloud Guide: Summer Sun Risin' (Session 2; for teacher reference)**. Consider using the **Reading Literature Checklist** during the close read-aloud (see Assessment Overview and Resources).
- During Session 2, refer to the guide for the use of:
 - *Summer Sun Risin'*
 - *Summer Sun Risin'* anchor chart
 - *Summer Sun Risin'* icons
 - Sun icon
 - *Summer Sun Risin'* word cards
- Tell students that in the next lesson they will write and draw about the key details from the middle of the text.

Meeting Students' Needs

- As you prepare students for the close read-aloud session, provide options for physical action and sensory input by differentiating seating. Some students

might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)

- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the text: "Pa cracks the door, / I swing it wide. / Summer sun's shinin', / floodin' inside." from *Summer Sun Risin'*. Write and display student responses next to the chunks. Examples:
 - Ask:

"What does this verse mean?" (Responses will vary.)
 - Point to and read aloud the chunk: "Pa cracks the door," and ask:

"What is Pa doing?" (opening the barn door a little bit)
 - Point to and read aloud the chunk: "I swing it wide." and ask:

"What is the boy doing?" (opening the barn door really wide)
 - Point to and read aloud the chunks: "Summer sun's shinin' / floodin' inside.," and ask:

"What is the sun doing?" (Shining; filling the barn with sunlight)

"Now what do you think the verse means?" (Responses will vary.)

Work Time

B. Role-Playing and Showing Respect, Pages 3–6 (15 minutes)

- Refocus students whole group.
- Offer specific, feedback on their close reading skills used to explore the focus question: "What is the boy doing when the sun is rising?" (Example: "Everyone looked closely at the pictures in the text to notice that as the sun is beginning to rise, the boy is waking up and eating breakfast.")
- Tell students they are now going to act out part of *Summer Sun Risin'* using the Role-Play Protocol anchor chart. Share that acting out different parts of the text can help them understand it better.
- Referring to the Role-Play Protocol anchor chart, explain the steps:
 - Point to the image of the book. Tell students they will listen to a certain part of the text again. (Example: Today students will listen to the beginning events.)
 - Point to the image of the two people talking. Tell students that with their partners, they will think and talk about what each character is saying and doing. (Example: One partner could be the boy, and the other partner could be the boy's mother.)
 - Point to the image of the director's slate. Tell students that when they hear, "Action!" they will take on the role of their character and act out that part of the text as you read it aloud. (Example: On pages 3–4, students might role-play the boy being awakened by his mother.)
 - Point to the image of the check mark. Tell students when they hear, "Cut!" they should safely make a tent with their arms. (This shows that they are done.)
- Model completing the steps of the protocol with a student. Answer clarifying questions.

- Direct students' attention to the posted **Working to Become Effective Learners anchor chart** and review what is written on it by reading it aloud. Remind students that these are habits that help us learn.
- Tell students that along with habits that help us learn, there are also habits for how we treat others.
- Direct students' attention to the **Working to Become Ethical People anchor chart** and read the title aloud.
- Point to the table below the title and read the headings of each column. Tell students that throughout the unit they will learn one habit of character connected to how we treat others. Direct students' attention to the first row that reads *respect*. Tell students the first habit of character they will learn about is respect.
- Point to the column that reads, "What does it mean?" and read the definition for respect: "I treat myself, others, and the environment with care."
- Using a total participation technique, invite responses from the group:
"How does the picture on the chart show respect?" (The picture shows two people working and helping each other kindly.)
- If productive, cue students to listen carefully and seek to understand:
"Who can tell us what your classmate said in your own words?" (Responses will vary.)
- Tell students that they can show respect by working kindly with their partners during the Role-Play protocol. Tell them that throughout the next several lessons, they will think about and reflect on how they and their classmates show respect. For today, students should focus on what it looks like and sounds like to show respect during the Role-Play protocol.
- Invite students to turn and talk to an elbow partner:
"How will you show respect during our Role-Play protocol?" (I will listen to my partner and not make fun of him or her.)
- Move students into pre-determined pairs and tell them today they are going to use the Role-Play protocol to act out a few of the beginning events of *Summer Sun Risin'*.
- Invite students to begin the Role-Play protocol. All students should first act out pages 3–4, then pages 5–6.
- Refocus students whole group and offer them specific, positive feedback on their role-playing. (Example: "I noticed everyone participated and worked with their partner to act out what the boy did at the beginning of the story.")
- Tell students that in the next lesson, they will role-play the middle events from the story and use their thinking from this role-play to help them write and draw about the major events from the story.

Meeting Students' Needs

- As you and a student volunteer model the partner role-play, highlight critical features of *Summer Sun Risin'* by displaying specific pages on a document camera. Prompt students to refer to these pages for ideas about what to do or say as they role-play. (MMR)
- As you give directions for the partner role-play, foster collaboration by soliciting strategies for resolving a disagreement. (Example: "My partner and I might both

want to pretend to be the boy's mother. What can we do or say to respectfully resolve our problem?") (MME)

- For ELLs: Clarify the meaning of *respect* by prompting the class to brainstorm some specific examples of how they might care for themselves, others, and the environment. (Examples: I ask the teacher if I need something; I make sure my partner understands what to do; I keep my desk tidy.)
- For ELLs: Consider pairing students with a partner who has more advanced or native language proficiency. The partner with greater language proficiency can serve as a model in the pair, initiating scenes and providing dialogue.

Work Time

C. Structured Discussion: Reflecting on Respect (10 minutes)

- Direct students' attention to the Working to Become Ethical People anchor chart. Point to the column that reads, "What does it mean?" and read the definition of respect:

"I treat myself, others, and the environment with care."

- Tell students they are going to use the Think-Pair-Share protocol to discuss how they showed respect during the Role-Play protocol. Remind them that they used this protocol in Lesson 2, and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)

- Invite students to Think-Pair-Share with an elbow partner:

"What did it look and sound like when you were showing respect during the Role-Play protocol?"

- Offer the following sentence stems as necessary:
 - "It sounded _____, so I saw respect today."
 - "It looked like _____, so I saw respect today."
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.1 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share with the whole group.
- If productive, cue students to listen carefully and seek to understand:

"Who can tell us what your classmate said in your own words?" (Responses will vary.)
- Remind students that they will keep working on what respect looks like and sounds like throughout the unit.

Meeting Students' Needs

- As students share what they discussed with their partners, offer alternatives to auditory information by writing students' ideas on chart paper or a white board. Save this list to refer to as you begin the next lesson. (MMR)
- For ELLs: Offer alternative sentence frames to expand opportunities for students to express themselves. (Examples: "I heard others____, so I saw respect today."

"I saw others ____, so I saw respect today." "I saw ____ taking care of others by ____."")

Closing and Assessment

A. Pinky Partners: Sun Experience—Sunrise (5 minutes)

- Gather students together whole group. Tell them that they just finished role-playing what the boy in *Summer Sun Risin'* experiences when the sun is rising. They now get to talk with a partner about what they *experience* when the sun is rising. Define *experience* (to feel or know).
- Tell students they are going to discuss their experience when the sun is rising with a pinky partner. Remind them that they used this protocol in Module 1 and review as necessary, using the **Pinky Partners anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
 - Guide students through the protocol to discuss their experience when the sun is rising.
 - As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.1 using the Speaking and Listening Checklist.
 - Remind students to make a bridge with their arms after both partners have shared.
 - Gather students back together and invite a few students to share with the whole group.
- Tell students that in the next few lessons they will continue to discuss their experience with the sun when it is high above their heads at midday and close to the horizon at sunset.

Meeting Students' Needs

- As you circulate and listen in during the Pinky Partners protocol, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: "I experience ____ with my eyes when the sun is rising. I experience ____ with my skin when the sun is rising.") (MMAE)

Lesson 5: Close Read-aloud, Session 3 and Role-Playing: *Summer Sun Risin'*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about grade 1 topics and texts with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1c:** Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).
- **L.1.1d:** Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).
- **L.1.4:** Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 1 reading and content, choosing flexibly from an array of strategies.
- **L.1.4a:** Use sentence-level context as a clue to the meaning of a word or phrase.

Daily Learning Target

- I can describe what the boy and the sun do in the middle of *Summer Sun Risin'*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)

Ongoing Assessment

- During the Opening, listen and track progress as students review the noun, verb structures in the “Sun, Moon, and Stars” song using the Language Checklist (L.1.1c)
- During Session 3 of the close read-aloud in Work Time A, listen for students to describe characters, setting, and events from the middle of the story using key details use the Reading Literature Checklist to track students’ progress toward RL.1.1, RL.1.3, RL.1.4, RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use evidence from the text as they role-play specific story elements and as they reflect on respect. (SL.1.1, SL.1.2)
- During Work Time C, circulate and observe students as they complete the *Summer Sun Risin'* response sheet. Watch for students to observe and accurately describe events from the beginning and middle of the story. (RL.1.3, W.1.8)

Agenda

1. Opening

A. Song and Movement: “Sun, Moon, and Stars” Song (10 minutes)

2. Work Time

A. Close Read-aloud, Session 3: *Summer Sun Risin’*, Pages 11–20 (25 minutes)

B. Role-Playing and Reflecting on Respect, Pages 13, 15, and 19 (10 minutes)

C. Independent Writing: *Summer Sun Risin’* Response Sheet, Part II (10 minutes)

3. Closing and Assessment

A. Structured Discussion: Sun Experience—Midday (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In Work Time A, students continue the close read-aloud, focused on answering the question: “What is the boy doing when the sun is rising, at its highest, and setting in the sky?” During Session 3, they focus on events from the middle of the story (RL.1.1, RL.1.3, RL.1.7, SL.1.2).
- Recall that close read-alouds are distinct from, and do not replace, more typical daily read-alouds. Daily read-alouds are essential so students experience the volume of reading needed to build their world knowledge and vocabulary. For suggested module-related texts, see the K–5 Recommended Text List.
- The Role-Play protocol serves as students’ scaffolding toward understanding the story. Students apply their understanding of story elements as they complete Part II of the *Summer Sun Risin’* response sheet.
- During Work Time B, students revisit the habit of character respect. They continue to consider specific ways to show respect when collaborating with partners during the Role-Play protocol. This reflection helps them understand this habit of character in a more active, concrete way.

How this lesson builds on previous work:

- Continue to discuss and analyze the noun, verb structures within the song and introduce the use of pronouns while reviewing the “Sun, Moon, and Stars” song.
- In Lesson 3, students began writing about specific story elements from *Summer Sun Risin’*. This lesson allows for more independent writing about the beginning and middle of *Summer Sun Risin’*.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- “Respect” may feel abstract; students may find it difficult to reflect on how they show respect. As students role-play, continue to name specific behaviors that show respect and give concrete examples that help students articulate their own progress toward this habit of character.

- Some students may need additional support with making the transition to more independent writing. Consider remodeling the writing process and/or partnering students who need additional support to complete the task.

Down the road:

- Throughout Unit 1, students reflect on their progress toward showing respect during the Role-Play protocol. As students reflect daily, consider guiding them toward more specific responses (e.g., “I showed respect by keeping my body safe when collaborating with my partner.”).

In advance:

- Prepare Sun, Moon, and Stars Word Wall card for the words *midday*. Write or type the word on a card and create or find a visual to accompany each word.
- Preview the Close Read-aloud Guide: *Summer Sun Risin’* (Session 3; for teacher reference). Complete only Session 3 in this lesson; students will complete the remaining sessions in subsequent lessons.
- Maintain student partnerships for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Pre-distribute materials for Work Time C at student workspaces to ensure a smooth transition.
- Post: Learning target, “Sun, Moon, and Stars” Version 2 song, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Record the whole group singing “Sun, Moon, and Stars” Version 2 song and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time B: Video record students role-playing to review with students in later lessons as a reminder of what happened. Most devices (cellphones, tablets, laptop computers) come equipped with free video recording apps or software.
- Work Time C: Students use Speech to Text facilities activated on devices, or using an app or software such as Dictation.io (<https://dictation.io/speech>).

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read academic text closely, and to use role-play to reinforce comprehension.

- ELLs may find it challenging to comprehend some of the academic language and syntax in *Summer Sun Risin'*. Guide students through the Language Dive conversation during Work Time A. See below for details.
- In Work Time A, ELLs are invited to participate in a Language Dive conversation (optional). This guides them through the meaning and structure of a stanza from the *Summer Sun Risin'*. Students may draw on this sentence when competing their culminating tasks in Lesson 7. Preview the Language Dive Guide and consider how to invite conversation among students to address the questions and goals suggested under each sentence strip chunk (see supporting materials). Select from the questions and goals provided to best meet your students' needs.
- Create a "Language Chunk Wall"—an area in the classroom where students can display and categorize the academic phrases discussed in the Language Dive. During the Language Dive, students are invited to place sentence strip chunks on the Language Chunk Wall into corresponding categories, such as "Nouns and nouns phrases" or "Linking language." Students can then refer to this wall after the Language Dive and during subsequent lessons. For this lesson, the categories "Nouns and noun phrases" and "Verbs and verb phrases" are suggested.

Levels of support

For lighter support:

- During Closing and Assessment, invite students who need lighter support to share their sun experiences first.

For heavier support:

- During the role-play in Work Time B, empower students to ask for help if they are not sure what their characters would say. Prompt students to call, "Line!" when they get stuck. Tell students that this will signal their partners to provide them with an idea of something they could say.
- During Work Time C, work closely with a small group of students who need heavier support. Consider completing the response sheet together as a shared writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** After the close read-aloud, students are invited to discuss what the boy and sun do in the middle of *Summer Sun Risin'*. To do so, students will need to recognize a pattern that started in the beginning of the story. Because this story is read across several days, some students may need additional support in connecting the pattern from the beginning of the book to the new section read in this lesson. As you invite students to reflect on the relationship between the boy and the sun, activate background knowledge, explicitly prompting students to think about the relationship between the boy and the sun based on what they observed in the beginning of the story.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. Some students may need additional support in order to visually plan for writing and drawing on their response sheets. Vary methods for fine motor responses, offering modified response sheets with a separate box for drawing and lines for writing.

- **Multiple Means of Engagement (MME):** During the Role-Play protocol students may disagree about choosing roles. Some students may need additional support generating positive strategies for resolving a disagreement. Foster collaboration by discussing conflict-resolution strategies with students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- pronoun (T)
- midday (L)

Review:

- noun, verb (T)
- retell, characters, events, respect (L)

Materials

- ✓ "Sun, Moon, and Stars" Version 2 song (one to display)
- ✓ Marker (one; for teacher use)
- ✓ Close Read-aloud Guide: *Summer Sun Risin'* (Session 3; for teacher reference)
 - *Summer Sun Risin'* (one to display; for teacher read-aloud)
 - Sun, Moon, and Stars Word Wall cards (new; teacher-created; one)
 - Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during the Opening and close read-aloud)
 - *Summer Sun Risin'* anchor chart (begun in Lesson 3; co-created with students during Work Time A; see Close Read-aloud Guide)
 - *Summer Sun Risin'* icons (from Lesson 3; one set for teacher use during the close read-aloud)
 - Sun icon (from Lesson 3; two; for teacher use during the close read-aloud)
 - *Summer Sun Risin'* word card (from Lesson 3; teacher-created; two)
 - Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)

- ☑ Language Dive Guide: *Summer Sun Risin'* (optional; for ELLs; for teacher reference; see supporting materials)
 - Sentence Strip Chunks: *Summer Sun Risin'* (optional; for ELLs; one to display, see supporting materials)
- ☑ Role-Play Protocol anchor chart (begun in Lesson 4)
- ☑ Working to Become Ethical People anchor chart (begun in Lesson 4)
- ☑ Think-Pair-Share Protocol anchor chart (begun in Module 1)
- ☑ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ *Summer Sun Risin'* response sheet (from Lesson 3; one for teacher modeling and one per student)
- ☑ Pencils (one per student)

Opening

A. Song and Movement: “Sun, Moon, and Stars” Version 2 Song (10 minutes)

- Gather students whole group. As needed, remind them to move safely and make space for everyone.
- Remind students that they’ve learned a new song about the sun that was delivered to them by Elvin.
- Direct students’ attention to the “**Sun, Moon, and Stars**” Version 2 song and invite them to join you in singing.
- Remind students of the gestures, motions, and actions that they created.
- Remind students that this song uses *nouns* and their matching *verbs*. Remind students that nouns are people, places, or things (like “the sun”!), and that verbs are action words (like “shines”!).
- Turn and Talk:

“What are some of the nouns and verbs that go together in this song?” (Responses will vary)
- Circulate with the Language Checklist as students share to track students’ progress towards L.1.1c.
- Tell students that not only does this song use nouns and verbs, it also includes *pronouns*. Tell students that a *pronoun* is a word that can take the place of a noun.
- Redirect students’ attention to the first verse and reread it aloud. Tell students that the *pronoun* in this verse is “it” because it replaces the noun “the sun”. Use a **marker** to draw a box around the pronoun “it”.
- Tell students that you are slowly going to repeat the song. When they hear or see a *pronoun* they can touch their nose.
- Sing the song aloud slowly and draw a box around the pronouns.
- After singing the song and drawing a box around the pronouns and invite students to reread the pronouns with you: “it” and “them”.
- If time allows, practice replacing nouns with pronouns by naming individuals, groups, or things in the classroom and having students generate the matching pronouns.

Meeting Students' Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: Before singing the song, reread the lyrics aloud and invite students to give a silent signal when they hear pronouns. Invite students to come up and circle the words that they identify.

Work Time

A. Close Read-aloud, Session 3: *Summer Sun Risin'*, Pages 11–20 (25 minutes)

- Invite students to turn and talk to an elbow partner:
“Who is the main character? Where does the story take place? What happened in the beginning of the story?” (The main character is a boy. The story takes place on a farm. In the beginning of the story, a boy wakes up and starts to work on a farm. The sun is rising and moving in the sky.)
- Refocus whole group and invite one or two students to share out.
- Direct students' attention to the posted learning target and read it aloud:
“I can describe what the boy and the sun do in the middle of Summer Sun Risin’.”
- Invite students to turn and talk to an elbow partner:
“What time of day do you think the middle of the story takes place?” (in the middle of the day)
“Where do you think the sun will be in the middle of the story?” (in the middle of the page)
- Tell students that during today's close read-aloud session they will read to meet this target.
- Invite students to take out their magic bows and take aim at the target.
- Guide students through the close read-aloud for *Summer Sun Risin'* using the **Close Read-aloud Guide: Summer Sun Risin' (Session 3; for teacher reference)**. Consider using the **ReadingLiterature Checklist** during the close read-aloud(see Assessment Overview and Resources).
- Refer to the guide for the use of:
 - *Summer Sun Risin'*
 - *Summer Sun Risin'* anchor chart
 - *Summer Sun Risin'* icons
 - Sun icon
 - *Summer Sun Risin'* word card
- Tell students that in the next lesson they will write and draw about the key details from the end of the text.

Meeting Students' Needs

- To active background knowledge before students discuss what the boy and sun do in the middle of *Summer Sun Risin'*, invite students to reflect on the relationship based on what they know about the beginning of the story. (Example: “Think back to what the boy and sun were doing at the beginning of the story. With your

partner, discuss *why* you think the sun will be in the middle of the page in the middle of the story. What have you learned from the story so far that makes you think this might be the case?”) (MMR)

- For ELLs: During or after Work Time A, guide students through the Language Dive (see supporting materials). Refer to the **Language Dive Guide: *Summer Sun Risin'*** (for teacher reference). Display **Sentence Strip Chunks: *Summer Sun Risin'***.

Work Time

B. Role-Playing and Reflecting on Respect, Pages 13, 15, and 19 (10 minutes)

- Refocus students whole group.
- Offer specific feedback on their close reading skills used to explore the focus question: “What is the boy doing when the sun is at its highest in the sky?” (Example: “Everyone looked closely at the pictures in the text to notice that because the sun is pausing, it must be noon or lunch time.”)
- Tell students that later in the lesson they will write and draw about the beginning and middle events so today they will continue to think about, discuss, and role-play these events with a partner so they better understand them in order to do their best writing.
- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out a few of the middle events of *Summer Sun Risin'*. Remind them that they have been using this protocol in the last lesson and review as necessary using the **Role-Play Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Direct students’ attention to the posted **Working to Become Ethical People anchor chart** and review what is written on it by reading it aloud.
- Remind students to focus on showing respect while working with a partner during the Role-Play protocol. Students should continue to focus on what it looks like and sounds like to show respect.
- Invite students to begin the Role-Play protocol for the following sections of text:
 - Pages 13
 - Pages 15
 - Pages 19
- Refocus students whole group and offer them specific, positive feedback on their role-playing. (Example: “I noticed each partner group acting like the character and doing the things they did.”)
- Tell students that in the next lesson, they will role-play the ending events from the story and use their thinking from this role-play to help with writing and drawing about the major events from the story.
- Tell students they are going to use the Think-Pair-Share protocol to discuss how they showed respect during the Role-Play protocol. Remind them that they used this protocol in previous lessons, and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)

- Invite them to Think-Pair-Share with an elbow partner:
“What did it look and sound like when you were showing respect during the Role-Play protocol?”
- Offer the following sentence stems as necessary:
 - “It sounded _____, so I saw respect today.”
 - “It looked like _____, so I saw respect today.”
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share out.
- Remind students that they will keep working on what respect looks like and sounds like throughout the unit.

Meeting Students' Needs

- As students begin the Role-Play protocol, highlight critical features of *Summer Sun Risin'* by displaying specific pages on the document camera. Prompt students to refer to these pages for ideas about what to do or say as they role-play. (MMR)
- When giving directions for the Role-Play protocol, foster collaboration by reminding students of strategies for resolving a disagreement. (Example: “Yesterday we discussed strategies for what to do if you have a disagreement with your role-play partner. What can we do or say to respectfully resolve our problem?”) (MME)
- For ELLs: Offer alternative sentence frames to expand opportunities for students to express themselves. (Examples: “I heard others _____, so I saw respect today.” “I saw others _____, so I saw respect today.” “I saw _____ taking care of others by _____.”)

Work Time

C. Independent Writing: *Summer Sun Risin'* Response Sheet, Part II (10 minutes)

- Display Part II of the *Summer Sun Risin'* response sheet.
- Read the directions aloud: “Draw a picture to show an event from the beginning of the story, from the middle of the story, and from the end of the story. Complete the sentence frame at the bottom of each box to tell what your picture shows.”
- Direct students' attention to the three boxes. As you point to each box, read the sentence frame. (Example: Point to the beginning box and read, “In the beginning ...”)
- Using a total participation technique, invite responses from the group:
“What will we be writing and drawing in these boxes?” (the events from the beginning, middle, and end of the story)
- Tell students that in Lesson 3 they had a chance to write and draw about the main character and setting of *Summer Sun Risin'* using key details from the text. Today, they will write and draw about the beginning and middle events using key details from the text.

- Remind students to think about the parts they acted out for the beginning and the middle of the story when completing today's writing task.
- Invite students to turn and talk to an elbow partner:
"What happened at the beginning of the story?" (The boy woke up in the morning and had breakfast.)
"What happened in the middle of the story?" (It's lunchtime, and the boy has lunch.)
- Remind students to focus only on events from the beginning and middle. Tell them they will write about the events from the end of the book tomorrow.
- Invite students to show a thumbs-up or touch their head if they are ready to begin writing and drawing about the events from the beginning and middle of *Summer Sun Risin'*.
- Point out the *Summer Sun Risin'* response sheets and **pencils** already at their workspaces. Transition students to their workspaces and invite them to begin.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts) as necessary.
- After 5 minutes, signal students to stop working. Model cleanup, keeping directions clear and brief. Invite students to walk safely to the whole group gathering area. Collect response sheets.
- Remind students that in the next lesson they will role-play events from the end of the story and use thinking from this to help with writing and drawing about the major events from the end of the story.

Meeting Students' Needs

- When preparing students for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- For ELLs: Before inviting students to complete their *Summer Sun Risin'* response sheets, model and think aloud completing it using a text familiar to all students, such as *The Most Magnificent Thing*. (Example: "What events happened in the beginning? Oh, that's right! It is the little girl! I will draw a picture of the little girl and write, 'little girl.'")

Closing and Assessment

A. Structured Discussion: Sun Experience—Midday (5 minutes)

- Gather students together whole group.
- Tell them they are going to use the Think-Pair-Share protocol to discuss what the boy experiences when the sun is highest in the sky and what they themselves experience when the sun is highest in the sky. Remind students that they used this protocol earlier in today's lesson, and review as necessary using the Think-Pair-Share Protocol anchor chart. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Briefly review the definition of *experience* (to feel or know).

- Invite students to Think-Pair-Share with an elbow partner:
 - “Where is the sun during midday?” (At midday, the sun is highest in the sky—in the middle of the sky.)*
 - “What does the boy experience during midday?” (At midday, the boy is having lunch.)*
 - “What do you experience during midday?” (Responses will vary, but may include: At midday, I like to play outside.)*
- Offer the following sentence stem as necessary:
 - “At midday (the sun/the boy/I) _____.”
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the Speaking and Listening Checklist.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share with the whole group.
- If time permits, cue students to expand the conversation by saying more and to listen carefully:
 - “Can you say more about that?” (Responses will vary.)*
 - “Who can repeat what your classmate said?” (Responses will vary.)*
- Tell students that tomorrow they will continue to discuss their experience with the sun when it is close to the horizon at sunset.

Lesson 6: Close Read-aloud, Session 4 and Role-Playing: *Summer Sun Risin'*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.4:** Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.4a:** Use sentence-level context as a clue to the meaning of a word or phrase.

Daily Learning Target

- I can describe what the boy and the sun do at the end of *Summer Sun Risin'*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)

Ongoing Assessment

- During Session 4 of the close read-aloud in Work Time A, listen for students to describe characters, setting, and events from the end of the story using key details use the Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.3, RL.1.4, RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use evidence from the text as they role-play specific story elements and as they reflect on respect. (SL.1.1, SL.1.2)
- During Work Time C, circulate and observe students as they complete the *Summer Sun Risin'* response sheet. Watch for students to observe and accurately describe events from the end of the story. (RL.1.3, W.1.8)

Agenda

1. Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

2. Work Time

A. Close Read-aloud, Session 4: *Summer Sun Risin'*, Pages 21–26 (25 minutes)

B. Role-Playing and Reflecting on Respect, Pages 21–26 (15 minutes)

C. Independent Writing: *Summer Sun Risin'* Response Sheet, Part II (10 minutes)

3. Closing and Assessment

A. Structured Discussion: Sun Experience—Sunset (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson is similar in structure to Lesson 5. Students should be familiar with instructional practices and protocols introduced in previous lessons. Take note of this and allocate and adjust time as necessary.
- In Work Time A, students continue the close read-aloud, focused on answering the question: “What is the boy doing when the sun is rising, at its highest, and setting in the sky?” During Session 4, they focus on events at the end of the story (RL.1.1, RL.1.3, RL.1.7, SL.1.2).
- During Work Time B, students revisit the Role-Play protocol and the habit of character respect. They continue to consider specific ways to show respect when collaborating with and using supportive language with a partner. This reflection helps students understand this habit of character in a more active, concrete way.

How this lesson builds on previous work:

- Continue to reinforce routines established in previous lessons—specifically, Sun Movement routine. Students will practice the entire Sun Movement routine during this lesson.
- In Lesson 5, students began writing about specific events using key details. This lesson allows for more independent writing about the ending events of *Summer Sun Risin'*.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- “Respect” may feel abstract; students may find it difficult to reflect on how they show respect. As students role-play, continue to name specific behaviors that show respect and give concrete examples that help students articulate their own progress toward this habit of character.
- Some students may need additional support with making the transition to more independent writing. Consider remodeling the writing process and/or partnering students who need additional support to complete the task.

Down the road:

- Throughout Unit 1, students will continue to reflect on their progress toward showing respect during the Role-Play protocol. As students reflect daily, consider guiding them toward more

specific responses (e.g., “I showed respect by keeping my body safe when collaborating with my partner.”).

In advance:

- Prepare Sun, Moon, and Stars Word Wall card for the words *sunset*. Write or type the word on a card and create or find a visual to accompany each word.
- Review the Sun Movement routine from Lesson 2 as necessary.
- Preview the Close Read-aloud Guide: *Summer Sun Risin'* (Session 4; for teacher reference) to familiarize yourself with what will be required of students. Note that the Close Read-aloud Guide is divided into sessions. Complete only Session 4 in this lesson; students will complete the remaining sessions in subsequent lessons.
- Maintain student partnerships for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Pre-distribute materials for Work Time C at student workspaces to ensure a smooth transition.
- Post: Learning target and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students participating in the Sun Movement routine in Lesson 3, play this video for them to remind them of what to do.
- Work Time B: Video record students role-playing to review with students in later lessons as a reminder of what happened. Most devices (cellphones, tablets, laptop computers) come equipped with free video recording apps or software.
- Work Time C: Students use drawing apps or software to draw their response—for example, the Kids Doodle plug-in for Google or app for Apple products.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.IA.1, 1.IB.5, 1.IB.6, and 1.IC.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read academic text closely, and to use role-play to reinforce comprehension.
- ELLs may find it challenging to comprehend some of the academic language and syntax in *Summer Sun Risin'*. Guide students through the Mini Language Dive conversation during Work Time A. See Meeting Students' Needs column for details.

Levels of support*For lighter support:*

- Before providing additional modeling and support during Work Time, observe students and allow them to grapple. Provide support only after students have grappled with the task. Observe the areas in which they struggle to target appropriate support.
- During Closing and Assessment, invite students who need lighter support to share their sun experiences first.

For heavier support:

- During the role-play in Work Time B, empower students to ask for help if they are not sure what their characters would say. Prompt students to call, “Line!” when they get stuck. Tell students that this will signal their partners to provide them with an idea of something they could say.
- During Closing and Assessment, invite students who need lighter support to share their sun experiences first.
- During Work Time C, work closely with a small group of students who need heavier support. Consider completing the response sheet together as a shared writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** After the close read-aloud, students are invited to discuss what the boy and sun do at the end of *Summer Sun Risin’*. To do so, students will need to recognize a pattern that started in the beginning of the story. Because this story is read across several days, some students may need additional support in connecting the pattern from the beginning and middle of the book to the new section read in this lesson. As you invite students to reflect on the relationship between the boy and the sun, activate background knowledge, explicitly prompting students to think about the relationship between the boy and the sun based on what students observed in the beginning and middle of the story.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. Some students may need additional support in order to visually plan for writing and drawing on their response sheets. Vary methods for fine motor responses, offering modified response sheets with a separate box for drawing and lines for writing.
- **Multiple Means of Engagement (MME):** Students have had multiple opportunities to learn and practice the Sun Movement routine. Some students may benefit from opportunities to be seen as a peer model. Foster community by inviting a few students to help you demonstrate the steps of the Sun Movement routine.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- sinkin' (T)
- sunset, setting (L)

Review:

- retell, characters, events, respect (L)

Materials

- ☒ Sun Movement chart (from Lesson 2; one to display)
- ☒ Close Read-aloud Guide: *Summer Sun Risin'* (Session 4; for teacher reference)
 - *Summer Sun Risin'* (one to display; for teacher read-aloud)
 - Sun, Moon, and Stars Word Wall card (new; teacher-created; one)
 - Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during the Opening and close read-aloud)
 - *Summer Sun Risin'* anchor chart (begun in lesson 3; added to during Work Time A; see Close Read-aloud Guide)
 - *Summer Sun Risin'* icons (from Lesson 3; one set for teacher use during the close read-aloud)
 - Sun icon (from Lesson 3; two; for teacher use during the close read-aloud)
 - *Summer Sun Risin'* word card (new; teacher-created; one)
 - Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ☒ Role-Play Protocol anchor chart (begun in Lesson 4)
- ☒ Working to Become Ethical People anchor chart (begun in Lesson 4)
- ☒ Think-Pair-Share Protocol anchor chart (begun in Module 1)
- ☒ Speaking and Listening Checklist (for teacher reference see Assessment Overview and Resources)
- ☒ *Summer Sun Risin'* response sheet, Part II (begun in Lesson 3; added to during Work Time C; one per student)
- ☒ Pencils (one per student)

Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

- Invite students to stand up and spread out inside and around the edge of the whole group meeting area. As needed, remind students to move safely and make space for everyone.
- Remind students that in Lesson 4, they learned the rest of the steps to the Sun Movement routine. Review the steps on the **Sun Movement chart**.
- Invite students to join you as you practice Steps 1–10, taking 10–15 seconds for each step.
- Repeat once or twice as time permits.
- Offer students specific, positive feedback on their work practicing all of the movements in the routine. (Example: “I noticed that everyone took great care to make sure their bodies were safe as we practiced all of the movements.”)

Meeting Students' Needs

- When reviewing the Sun Movement routine, foster community by inviting a few student volunteers to model Steps 1–10 for the class. (MME)

Work Time

A. Close Read-aloud, Session 4: *Summer Sun Risin'*, Pages 21–26 (25 minutes)

- Direct students' attention to the posted learning target and read it aloud:
“I can describe what the boy and the sun do at the end of Summer Sun Risin’.”
- Invite students to turn and talk to an elbow partner:
“What time of day do you think the end of the story takes place?” (at the end of the day)
“Where do you think the sun will be at the end of the story?” (at one corner of the page)
- Tell students that during today's close read-aloud session they will read to meet this target.
- Invite students to take out their magic bows and take aim at the target.
- Guide students through the close read-aloud for *Summer Sun Risin'* using the **Close Read-aloud Guide: Summer Sun Risin' (Session 4; for teacher reference)**. Consider using the **Reading Literature Checklist** during the close read-aloud (see Assessment Overview and Resources).
- During Session 4, refer to the guide for the use of:
 - *Summer Sun Risin'*
 - *Summer Sun Risin'* anchor chart
 - *Summer Sun Risin'* icons
 - Sun icon
 - *Summer Sun Risin'* word card
- Tell students that in the next culminating task for the close read-aloud, they will focus on retelling the important events of what the boy and the sun do throughout the story.

Meeting Students' Needs

- To activate background knowledge before students discuss what the boy and sun do in the end of *Summer Sun Risin'*, invite students to reflect on the relationship based on what they know about the beginning and middle of the story. (Example: "Think back to what the boy and sun were doing at the beginning and middle of the story. With your partner, discuss *why* you think the sun will be at one corner of the page at the end of the story. What have you learned from the story so far that makes you think this might be the case?") (MMR)
- For ELLs: During or after Work Time A, consider returning to the Language Dive conversation introduced in Lesson 5. Review each chunk and complete practice using the sentence frame: "In the ____, the boy's _____. The summer sun's _____."
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the text: "Pa by the door, / me tucked in bed. / Summer sun's sleepin', / stars overhead." from *Summer Sun Risin'*. Write and display student responses next to the chunks. Examples:
 - Ask:
 - "What does this verse mean?" (Responses will vary.)***
 - Point to and read aloud the chunk: "Pa by the door," and ask:
 - "What is Pa doing?" (Pa is playing guitar and singing by the door.)***
 - "What does the word by mean in this chunk?" (next to)***
 - Point to and read aloud the chunk: "me tucked in bed" and ask:
 - "What is the boy doing?" (sleeping; lying in bed)***
 - Point to and read aloud the chunks: "Summer sun's sleepin'" and ask:
 - "What is the sun doing?" (It is gone because it is night time.)***
 - Point to and read aloud the chunks: "stars overhead." and ask:
 - "Where are the stars?" (in the sky; overhead)***
 - "What two words do you see in overhead? What do you think overhead means? Point to something overhead." (over + head; up above our heads)"***
 - "Now what do you think the verse means? (Responses will vary.)"***
 - "Discuss with a partner what the boy and sun are doing using the frame: In the end, the boy is _____. The sun is _____." (sleeping; gone or set)

Work Time

B. Role-Playing and Reflecting on Respect, Pages 21–26 (15 minutes)

- Refocus students whole group.
- Offer students specific feedback on their close-reading skills used to explore the focus question: "What is the boy doing when the sun is setting in the sky?" (Example: "Everyone looked closely at the pictures and noticed that the sun was moving down on the page and that the boy was reading a story with his dad and getting ready for bed.")
- Using a total participation technique, invite responses from the group:
 - "What does it mean when the sun is setting?" (The sun is going down.)***

- As students share responses, confirm thinking and explain that *setting* means to move down. Remind students that the sun begins to go down when day begins to turn to night.
- Invite students to create an accompanying hand gesture as they repeat the word with you.
- Tell students that later in today's lesson they will be writing and drawing about the ending events so today they will continue to think about, discuss, and role-play these events with a partner so they better understand them in order to do their best writing.
- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out a few of the ending events of *Summer Sun Risin'*. Remind them that they have been using this protocol in the past few lessons, and review as necessary using the **Role-Play Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Direct students' attention to the posted **Working to Become Ethical People anchor chart** and review it. Remind students to focus on showing respect while working with their partner during the protocol.
- Invite students to begin the Role-Play protocol for the following sections of text:
 - Pages 21–22
 - Pages 23–24
 - Pages 25–26
- Refocus students whole group and offer them specific, positive feedback on their third Role-Play protocol. (Example: "I noticed everyone participated and made sure their bodies didn't distract their partner as they acted out the events from the end of the story.")
- Tell students they are going to use the Think-Pair-Share protocol to discuss how they showed respect during the Role-Play protocol. Remind them that they used this protocol in previous lessons, and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Invite them to Think-Pair-Share with an elbow partner:

"What did it look and sound like when you were showing respect during the Role-Play protocol?"
- Offer the following sentence stems as necessary:
 - "It sounded _____, so I saw respect today."
 - "It looked like _____, so I saw respect today."
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share out.
- Remind students that they will keep working on what respect looks like and sounds like throughout the unit.

Meeting Students' Needs

- When giving directions for the Role-Play protocol, foster collaboration by reminding students of strategies for resolving a disagreement. (Example: "Yesterday we

discussed strategies for what to do if you have a disagreement with your role-play partner. What can we do or say to respectfully resolve our problem?") (MME)

Work Time

C. Independent Writing: *Summer Sun Risin'* Response Sheet, Part II (10 minutes)

- Display Part II of the Summer Sun Risin' **response sheet** and read the directions aloud.
- Remind students that yesterday they began Part II by writing and drawing about the beginning and middle events using key details from the text. Tell them that today they will complete the response sheet by writing and drawing about the ending events of the story.
- Direct students' attention to the last box. As you point to the box, read the sentence frame. ("At the end ...")
- Remind students to think about the parts they acted out for the ending of the story when completing today's writing task.
- Invite students to turn and talk to an elbow partner:

"What happened at the end of the story?" (The boy reads a book with his dad and goes to sleep.)

- Invite students to show a thumbs-up or touch their head if they are ready to begin writing and drawing about the events from the ending of *Summer Sun Risin'*.
- Point out the *Summer Sun Risin'* response sheets and **pencils** already at student workspaces. Transition students their workspaces and invite them to begin working.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts).
- After 5 minutes, signal all students to stop working. Model cleanup. Invite students to walk safely to the whole group gathering area. Collect student response sheets and offer specific, positive feedback on their writing and drawing. (Example: "I noticed that Samantha and Jose used pictures and words to describe events from the ending of the story.")

Meeting Students' Needs

- When preparing students for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- For ELLs: Before inviting students to complete their *Summer Sun Risin'* response sheet, model and think aloud completing it using a text familiar to all students, such as *The Most Magnificent Thing*. (Example: "What events happened at the end? Oh, that's right! She created the magnificent thing! I will draw a picture of the little girl and write, 'little girl.'")

Closing and Assessment

A. Structured Discussion: Sun Experience—Sunset (5 minutes)

- Gather students together whole group.
- Define *setting* (moving down).

- Tell students they are going to use the Think-Pair-Share protocol to discuss what the boy experiences during sunset and what they experience during sunset. Remind students that they used this protocol earlier in today's lesson, and review as necessary using the Think-Pair-Share Protocol anchor chart. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Invite students to Think-Pair-Share with an elbow partner:
 - “Where is the sun at sunset?” (The sun is starting to disappear in the sky.)*
 - “What does the boy experience when the sun is setting?” (The boy is reading a book with his dad and getting ready for bed.)*
 - “What do you experience when the sun is setting?” (I get ready for bed.)*
- Offer the following sentence stem as necessary:
 - “When the sun is setting (the sun/the boy/I) _____.”
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share with the whole group.
- If time permits, cue students to expand the conversation by saying more and to listen carefully:
 - “Can you say more about that?” (Responses will vary.)*
 - “Who can repeat what your classmate said?” (Responses will vary.)*
- Tell students that tomorrow they will continue to think about the boys' experiences from sunrise to sunset as they complete the close read-aloud culminating task.

There are no new supporting materials for this lesson.

Lesson 7: Close Read-aloud Culminating Task and Reflecting on Guiding Question

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.4:** Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1c:** Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).
- **L.1.1d:** Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).
- **L.1.4:** Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 1 reading and content, choosing flexibly from an array of strategies.
- **L.1.4a:** Use sentence-level context as a clue to the meaning of a word or phrase.

Daily Learning Target

- I can retell important events of what the boy and the sun do throughout *Summer Sun Risin'*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.4a)

Ongoing Assessment

- During the Opening, listen and track progress as students review the noun, verb structures and use of pronouns in the “Sun, Moon, and Stars” song using the Language Checklist (L.1.1c, L.1.1d)
- During the culminating task of the close read-aloud in Work Time A, use the Reading Literature Checklist to track students’ progress toward RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2 (see Assessment Overview and Resources).
- Collect student response sheets for the culminating task to serve as evidence of progress toward standards RL.1.3, RL.1.7, W.1.8 and to inform instruction for subsequent lessons.
- During the Closing, note how students self-assess their ability to retell *Summer Sun Risin'*. Use this information as a guide for subsequent lessons as students continue to practice retelling stories they hear read aloud.

Agenda

1. Opening

- A. Song and Movement: “Sun, Moon, and Stars” Song (5 minutes)

2. Work Time

- A. Close Read-aloud Culminating Task: *Summer Sun Risin’* (40 minutes)
- B. Structured Discussion: Reflecting on Unit 1 Guiding Question (10 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- During Work Time A, students finish their close read of *Summer Sun Risin’*. In this session, students orally retell the story from beginning to end and capture the retell in pictures and words (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2).
- In the Closing, students return to reflect on the Unit 1 guiding question: “Why do authors write about the sun, moon, and stars?” (RL.1.1, SL.1.1).

How this lesson builds on previous work:

- In Lessons 3–6, students reread parts of the unit’s anchor text, role-played several key parts, and discussed specific story elements such as setting and characters. Students also recorded the beginning, middle, and end events of the story using pictures and words. Now, in the culminating task, students experience similar instructional activities with less scaffolding and support while retelling events in the story.
- In prior lessons, students have learned about the nouns, verbs, and pronouns in the “Sun, Moon, and Stars” song. In this lesson, students practice singing the entire “Sun, Moon, and Stars” song and identify some of the nouns, verbs, and pronouns.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Some students might find the culminating task challenging. For those students who have difficulty remembering key details of the story in sequential order, consider allowing them to use a copy of the text to support their retell. And remind students to use the *Summer Sun Rising’* anchor chart to assist with the retell task.
- Some students may need additional time to complete the culminating task.

Down the road:

- In Lessons 8–13, students complete focused read-alouds of different texts, discussing specific story elements such as setting, characters, plot, and central message. After these focused read-alouds, students will complete written response sheets to track specific story elements.
- Throughout Unit 1, students will continue to reflect on their progress toward showing respect during the role-play protocol. Guide them toward more specific responses (e.g., “I showed respect by keeping my body safe when collaborating with my partner.”).

In advance:

- Prepare Sun, Moon, and Stars Word Wall card for the word *sunset*. Write or type the word on a card and create or find a visual to accompany each word.
- Preview the Close Read-aloud Guide: Summer Sun Risin' (Session 5; for teacher reference). Complete only Session 5 in this lesson.
- Pre-distribute materials for Work Time A at student workspaces to ensure a smooth transition.
- Review:
 - Sun Movement routine from Lesson 2 as necessary.
 - Sit, Kneel, Stand protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, the “Sun, Moon, and Stars” Version 2 song, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Record the whole group singing “Sun, Moon, and Stars” Version 2 song and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time A: Students complete the *Summer Sun Risin'*: Culminating Task response sheet using a word-processing tool—for example, a Google Doc.
- Work Time A: Students use drawing apps or software to draw their response—for example, the Kids Doodle plug-in for Google or app for Apple products.

Supporting English Language Learners

- Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself:

- The basic design of this lesson supports ELLs with opportunities to synthesize their learning throughout the close read-aloud by completing a culminating task that has been scaffolded throughout the unit this far.
- ELLs may find it challenging to sequence the events in *Summer Sun Risin'* as they complete their culminating tasks. Review all of the resources in the classroom that will be helpful as they complete the task. Encourage students to use language from the Language Dive and Mini Language Dives in lessons 4–6.

Levels of support

For lighter support:

- As students complete their culminating tasks, challenge them to write their sentences two ways: one using contractions and informal spelling, and one using

a more formal register. (Examples: “In the beginning, the sun’s shinin’”; “In the beginning the sun is shining.”)

For heavier support:

- During Work Time A, distribute a partially filled-in copy of the *Summer Sun Risin’* Culminating Task response sheet. This will provide students with models for the work expected of them, while relieving the volume of writing required.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students reflect on the learning target and the support they might need to meet this learning goal. Some students may need additional support understanding and remembering these ideas. Offer alternatives to auditory information by writing students’ ideas on chart paper and referring to them in future lessons.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas with a partner about why the author wrote *Summer Sun Risin’*. Some students may need additional support with connecting the author’s purpose to the study of the sun, moon, and stars. As students share out, provide options for expression and communication by using prompts and sentence frames.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- retell (L)

Review:

- noun, verb, pronoun (T)
- characters, events, setting, sunset (L)

Materials

- ✓ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ✓ Language Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Close Read-aloud Guide: *Summer Sun Risin’* (Session 5; for teacher reference)
 - *Summer Sun Risin’* (one to display; for teacher read-aloud)
 - *Summer Sun Risin’* anchor chart (begun in Lesson 3)
 - *Summer Sun Risin’* Culminating Task response sheet (from Lesson 3; one for teacher modeling and one per student)

- Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Unit 1 Guiding Question anchor chart (begun in Lesson 2; added to during Work Time B; see supporting materials)
- ☑ Think-Pair-Share Protocol anchor chart (begun in Module 1)
- ☑ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Sit, Kneel, Stand Protocol anchor chart (begun in Module 1)
- ☑ Pencils (one per student)

Opening

A. Song and Movement: “Sun, Moon, and Stars” Version 2 Song (5 minutes)

- Gather students whole group.
- Direct students’ attention to the **“Sun, Moon, and Stars” Version 2 song** and invite students to join you in singing and doing the motions for the song.
- Remind students that they have looked at three types of words in this song: *nouns*, *verbs*, and *pronouns*.
- Turn and Talk:
 - “What nouns are in the song?” (the sun, the moon, the stars, I)**
 - “What verbs are in the song?” (shines, see, lights, make, look)**
 - “What pronouns are in the song?” (it, them)**
- Circulate and listen as students share. Track students’ progress towards L.1.1c and L.1.1d on the **Language Checklist**.
- As time permits, sing the song one more time or generate a new line for the song in collaboration with students. Include a noun with matching verb and pronoun (Ex. My mom taught me to watch the sky and now we watch it day and night.)

Meeting Students’ Needs

- After singing the song with motions, foster community and offer alternatives to auditory information by making a class resource that includes the lyrics and motions to the song for students to revisit during free time. (Example: Create a class songbook that can be kept in the classroom library. Include a page with the lyrics to the song, embedding drawings for the motions or photos of children demonstrating the motions.) (MMR, MME)
- For ELLs: Identify students who might be mouthing the words or not singing while the class sings chorally. If students seem to be avoiding singing, encourage them to sing without pressuring them. If students are comfortable, invite them to sing “duets” with more confident students so they can more easily hear themselves as they practice.

Work Time

A. Close Read-aloud Culminating Task: *Summer Sun Risin'* (40 minutes)

- Direct students' attention to the posted learning target and read it aloud:
"I can retell important events of what the boy and the sun do throughout Summer Sun Risin'."
- Define *retell* (to tell again).
- Explain that when we retell stories, we tell the important parts again to help us understand the story better and to remember the important parts.
- Remind students that over the past several lessons they have had a chance to think about events from the beginning, middle, and end of the story. Tell them that today they will focus on retelling the important events of what the boy and the sun do throughout the whole story.
- Guide students through the close read-aloud for *Summer Sun Risin'* using the **Close Read-aloud Guide: *Summer Sun Risin'* (Session 5; for teacher reference)**. Consider using the **Reading Literature Checklist** (see Assessment Overview and Resources).
- During Session 5, refer to the guide for the use of *Summer Sun Risin'*, the **Summer Sun Risin' anchor chart**, and the **Summer Sun Risin' Culminating Task response sheet**.
- Offer students specific feedback on the close reading skills they used as they answered the focus question: What is the boy doing when the sun is rising, at its highest, and setting in the sky? (Example: "Everyone looked closely at the pictures in the text and listened to the text read aloud to notice and describe all the things the boy does as the sun is changing from sunrise to sunset.")

Meeting Students' Needs

- As you prepare students for the close read-aloud session, provide options for physical action and sensory input by differentiating seating. Some students might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)
- For ELLs: Underline the prefix *re-* and tell students that it means again. Ask:
"If re- means again, what do you think it means to retell?" (to tell again)
- For ELLs: Remind students of the content and language structures they practiced during the Language Dive and Mini Language Dives in lessons 4–6. Direct them to any related sentence frames or work still on display. Invite students to draw from this language as they complete their culminating tasks.

Work Time

B. Structured Discussion: Reflecting on Unit 1 Guiding Question (10 minutes)

- Refocus students whole group.
- Direct their attention to the **Unit 1 Guiding Question anchor chart** and read it aloud:
"Why do authors write about the sun, moon, and stars?"

- Remind students that they have been working toward answering this question through their close reading of *Summer Sun Risin'*. Tell them they will now add their new learning to the Unit 1 Guiding Question anchor chart.
- Point to each column on the anchor chart and read the headings aloud.
 - “What is the title and author of the book?” (*Summer Sun Risin'* by W. Nikola-Lisa)
 - “Was it about the sun or the moon?” (sun)
 - “Why do you think the author wrote the book?” (Answers will vary, but may include something like: to show and tell all the things you can do during the day.)
- Ask students to help you fill out the first column of the anchor chart.
- Tell students they are going to use the Think-Pair-Share protocol to address the other two questions. Remind them that they used this protocol in previous lessons, and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Invite students to Think-Pair-Share with an elbow partner:
 - “Was it [the text] about the sun or the moon?”
 - “Why do you think the author wrote the book?”
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider documenting progress toward SL.1.2 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share with the whole group.
- If productive, cue students to expand the conversation by giving an example and to listen carefully and seek to understand:
 - “Can you give an example?” (Responses will vary.)
 - “Who can tell us what your classmate said in your own words?” (Responses will vary.)
- Thank students for their hard work reflecting on the guiding question and remind them that they will add to this anchor chart throughout the unit each time they read a new text.

Meeting Students' Needs

- When circulating and listening in during the Think-Pair-Share, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: “*Summer Sun Risin'* was about the ____ [sun/moon]. I think the author wrote the book because ____.”) (MMAE)

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Gather students together whole group.
- Remind them that the best learning happens when learners check to see how well they are doing and what they can do to be even better. Tell them that this is called *assessing* and that today they will do use the Sit, Kneel, Stand protocol. Remind students that they used this

protocol in Module 1 and review as necessary, using the **Sit, Kneel, Stand Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)

- Guide students through the protocol using the learning target.
- If productive, cue students to listen carefully and seek to understand:

“Who can tell us what your classmate said in your own words?” (Responses will vary.)

- Offer students specific, positive feedback on their work of accurately reflecting on their learning today. (Example: “It is always challenging to think about how well you are doing with a learning target and in thinking about what you can do even better, but I notice that everyone was thoughtful in their reflection, and it is clear that everyone really seems to know where they are at in meeting the learning target.”)

Meeting Students’ Needs

- As students share their reflections on the learning target, offer alternatives to auditory information by scribing their ideas on chart paper. Save this list and revisit students’ goals/needs in future lessons. (MMR)

Lesson 8: Focused Read-aloud and Retelling, Session 1: *Papa, Please Get the Moon for Me*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1b:** Use common, proper, and possessive nouns.
- **L.1.1e:** Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).
- **L.1.2a:** Capitalize dates and names of people.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can answer questions about key details from *Papa, Please Get the Moon for Me*. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2)
- I can describe the characters and setting from *Papa, Please Get the Moon for Me*. (RL.1.3, RL.1.7, L.1.6, W.1.8)

Ongoing Assessment

- During the Opening, use the Language Checklist to track students' progress towards L.1.1e as students participate in the song activity.
- During the focused read-aloud in Work Time A, use the Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.2, RL.1.3, and RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Song and Movement and Language: “Sun, Moon, and Stars” Version 2 song (10 minutes)

2. Work Time

- A. Focused Read-aloud, Session 1: *Papa, Please Get the Moon for Me* (15 minutes)
- B. Role-Play: Character and Setting, Pages 17–20 (10 minutes)
- C. Independent Writing: *Papa, Please Get the Moon for Me* Response Sheet, Parts I and II (20 minutes)

3. Closing and Assessment

- A. Pinky Partners: Making Connections (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the first of two lessons in which students engage in a focused read-aloud of *Papa, Please Get the Moon for Me*. Students use the text and illustrations to ask and answer questions about the characters, setting, and events in the story. Continue to reinforce the value of revisiting rich and complex texts many times to think about the important ideas and enjoy the beautiful language.
- Students complete a response sheet regarding *Papa, Please Get the Moon for Me* across Lessons 8–9. In Lesson 8, they focus on character and setting (Parts I and II of the response sheet).
- This lesson introduces the Story Elements board as a visual aid, which is used during the focused read-alouds in Lessons 8–15 to track the characters, settings, and events of each story. Students work with each text over the course of two lessons. For each new text, the board is “wiped clean.”
- The pages of *Papa, Please Get the Moon for Me* are not numbered. For instructional purposes, the page that begins with “Before Monica went to bed she looked out of her window ...” should be considered page 1 and all pages thereafter numbered accordingly.
- If possible, give students access to the text, *Papa, Please Get the Moon for Me* by Eric Carle, during the K-2 Labs and K-2 Reading Foundations Skills Block.
- ELLs benefit from having access to content in a home language. *Papa, Please Get the Moon for Me* is also available in Spanish. Consider making a copy available in the classroom to lend to families who speak Spanish.
- Invite students to discuss myths and stories about the moon with their family and friends at home, and to then share what they learn with the class. Students can bring objects from home to enhance the sharing.

How this lesson builds on previous work:

- Throughout the first half of the unit, students frequently used the Think-Pair-Share protocol. Based on students’ familiarity with the protocol, its introduction has been shortened starting in this lesson. Continue to reinforce students’ understanding of this protocol as necessary.

- This lesson builds upon the understanding of character and setting that was introduced with the *Summer Sun Risin'* anchor chart in Lessons 3–7.
- Throughout their work with *Summer Sun Risin'*, students participated in the Role-Play protocol. In Lesson 8, students continue to use this protocol to more closely understand the character and setting of *Papa, Please Get the Moon for Me*.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Some students may need more support with their oral language during the role-play. Look for opportunities to support students' oral language as they practice role-playing by providing sentence stems or modeled actions.
- Support students in their transfer of oral rehearsal into their writing before and during Work Time C by referring back to the Story Elements board.
- Students write independently for the *Papa, Please Get the Moon for Me* response sheet, Parts I and II. Have a plan in place for students who may need more support to complete this writing task. Consider using sentence stems, personal Word Walls, sight word lists, appropriate writing tools (pencil grips, slant boards), and other differentiated tools to aid students in independent writing.
- The scientific term *moon* is defined in this lesson, and it is stated that the earth has one moon. It is likely that students will know that our planet has one moon. Help students understand that other planets also have moons, and that some planets have many moons. Encourage students to visit the Research Lab during Labs if they would like to discover more about moons.

Down the road:

- Students will complete Part III of the *Papa, Please Get the Moon for Me* response sheet in Lesson 9.
- Throughout this unit, students repeatedly return to texts to ask and answer questions about the characters, setting, events, and central message of the story. To scaffold students' writing about the story elements, the response sheet prompts are broken into separate parts for each lesson. Students first focus on the characters and setting, then on retelling important events, and, for some texts, the central message.
- In Lessons 14–15, students will complete the same response sheet for their Unit 1 Assessment, as they work with the text *Kitten's First Full Moon*.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall cards for *moon* and *night*. Write or type the word on a card and create or find a visual to accompany each word.
 - Story Elements board on a surface that can be “wiped clean” (e.g., white board, magnetic board, felt board, etc.) each time students begin a new text.
 - Story Elements board icons for character and setting (see supporting materials).
 - Parts I and II of the *Papa, Please Get the Moon for Me* response sheet on clipboards for Work Time C.

- Review the Role-Play protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Strategically pair students for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Prepare writing materials (pencils) for ease of access in the whole group gathering area.
- Post: Learning targets; Sun, Moon, and Stars Word Wall; “Sun, Moon, and Stars” Version 2 song; and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Record the whole group singing the “Sun, Moon, and Stars” Version 2 song and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Create the Story Elements board in an online format—for example, a Google Doc—for display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards: 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself:

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and expand oral language by acting out events of the text *Papa, Please Get the Moon for Me*. Students will also have the opportunity to demonstrate understanding by writing in a structured organizer.
- ELLs may struggle with using verb tenses in Opening A. Consider using additional time to drill students on using the correct verb tenses by asking them to respond to different questions using the correct tense. (Examples: “What did you do yesterday? What do you see now?”) See Meeting Students’ Needs column for details.

Levels of support

For lighter support:

- During the focused read-aloud in Work Time A, add gestures and emphasis to key words such as *stretched*, *long*, *very*, *high*, and the figure of speech *just the right size* and invite students to copy the gesture as you say the word. This will help ELLs participate, internalize language, and engage with content.

For heavier support:

- During the role-play in Work Time B, empower students to ask for help if they are not sure what their characters would say. Prompt students to call, “Line!”

when they get stuck. Tell them this will signal their partners to provide them with an idea of something they could say.

- During the Role-Play protocol in Work Time B, enlarge or project each corresponding page that is read aloud to students. Students may benefit from the additional visual cues.
- During Work Time C, model doing quick sketches within the graphic organizer as placeholders for information. Say: “You can sketch first so that you don’t forget the information you want to add. Then you may go back later and write.”

Universal Design for Learning

- **Multiple Means of Representation (MMR):** During the focused read-aloud, students discuss character and setting in *Papa, Please Get the Moon for Me*. Students were introduced to character and setting in Lessons 3–7 when reading *Summer Sun Risin’*. Some students may need additional support with connecting these story elements to a new book. Maximize generalization by reminding students that they have already learned about character and setting and prompt students make this text-to-text connection.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas about what they imagine when they look at the night sky. Some students may need additional support connecting their own experience of the character Monica in *Papa, Please Get the Moon for Me*. As students share out, provide options for expression and communication by using prompts and sentence frames.
- **Multiple Means of Engagement (MME):** During independent writing, students may need explicit examples of how to problem-solve when they want to write a word with tricky spelling. Emphasize process and effort by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print to support spelling accuracy.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- present tense, past tense (T)
- proper noun, common noun, moon, night (L)

Review:

- noun, verb, pronoun (T)
- character, setting (L)

Materials

- ✓ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ✓ Language Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during the Opening)
- ✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; two)
- ✓ Story Elements board (new; teacher-created; see Teaching Notes)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Papa, Please Get the Moon for Me* (one to display; for teacher read-aloud)
- ✓ Story Elements Board Icons: *Papa, Please Get the Moon for Me* (two; added to Story Elements board during Work Time A)
- ✓ Story Elements Board: *Papa, Please Get the Moon for Me* (answers, for teacher reference)
- ✓ Role-Play Protocol anchor chart (begun Lesson 4)
- ✓ Working to Become Effective Learners anchor chart (begun in Module 1)
- ✓ *Papa, Please Get the Moon for Me* response sheet (one for teacher modeling and one per student)
- ✓ Pencils (one per student)
- ✓ Pinky Partners Protocol anchor chart (begun Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)

Opening

A. Song and Movement: “Sun, Moon, and Stars” Version 2 Song (10 minutes)

- Direct students to sit in a circle in the whole group meeting area.
- Display the **“Sun, Moon, and Stars” Version 2 song**.
- Remind students that they have used this song to learn about *nouns*, *verbs*, and *pronouns*. With excitement, tell students that they can also use this poem to learn about the different tenses: past, present, and future!
- Tell students that the poem is written in *present tense* and that present tense means that whatever is happening is going on right now.
- Invite students to slowly sing the song aloud and pause at the noun and verb phrases. Think aloud:

“When it says ‘I see’ or ‘the moon lights’ the song is describing what is happening in the moment. Not yesterday, and not tomorrow, but today!”

- Turn and Talk:

“Use the present tense to say something you see today in the classroom.” (Responses will vary, but may include: “I see the computer. I see the teacher. I see my friends. Etc.”)

“Use the past tense to say something you saw yesterday in the classroom.” Model as needed. (Responses will vary, but may include: “I saw the art teacher. I saw grey skies. I saw wet rain boots. Etc.”)

- Circulate and listen in as students share with one another. Use the **Language Checklist** to track progress towards L.1.1e.
- Tell students that they can play a fun game with the different tenses by changing the song to take place in the past or in the future. Tell students that they will try it today by singing the song as if they were singing about something that happened yesterday, or the past tense.
- Model singing the song in the past tense:
 - “The sun shone over us all, I saw it sparkle like a ball...etc.”
- Invite students to sing the song in the past tense with you.
- Provide specific, positive feedback on their ability to change the song from the present tense to the past tense.
- With excitement, tell students that in the next lesson they will change the song once again to future tense!
- Cold call two to three students to share what they discussed with their partner. Encourage students to use the sentence stem “The song is telling us _____.”
- Ask students to turn and talk with an elbow partner:

“How is the moon described in this song?” (The moon is described as rising up above the trees.)
- Cold call two to three students to share what descriptions they heard. Encourage students to use the sentence stem “The moon is described as _____.”

Meeting Students' Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: When cold calling, select one or two strong language models first so ELLs have a chance to hear the frame a few times in an authentic way from their peers.
- For ELLs: Use the words *yesterday* and *today* to provide context when giving examples of using correct verb tenses. Provide a few non-examples and challenge students to notice when the sentence uses the incorrect verb tense. (Examples: “Yesterday, I see the art teacher. Does that sound right? How can I saw it correctly?”)

Work Time

A. Focused Read-aloud, Session 1: *Papa, Please Get the Moon for Me* (15 minutes)

- Direct students’ attention to the posted learning targets and read them aloud:

“I can answer questions about key details from Papa, Please Get the Moon for Me.”

“I can describe the characters and setting from Papa, Please Get the Moon for Me.”
- Tell students that during the focused read-aloud today, they will read to meet these two targets.
- Direct students’ attention to the **Story Elements board** and focus them on the labels “character” and “setting.” Read the labels aloud.

- Tell students that during the read-aloud they will use the Story Elements board to track different elements of the story. Today, they will focus on character and setting. Use the **Reading Literature Checklist** to track their progress as students engage with the text.
- Review the definitions of *character* and *setting*.
- Invite students to Think-Pair-Share with an elbow partner:
 - “What is a character in a story?” (a person, animal, or object in a story, play, or movie)
 - “What is the setting in a story?” (when and where a story takes place)
- Display *Papa, Please Get the Moon for Me*.
- Show students the **Sun, Moon, and Stars Word Wall card** for *moon* and follow the same routine established in the Lesson 1: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the Sun, Moon, and Stars Word Wall.
- Show students the Sun, Moon, and Stars Word Wall card for *night* and follow the same routine as above: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the Sun, Moon, and Stars Word Wall.
 - “What is the translation of moon in our home languages?” (alqamar in Arabic)
- Call on student volunteers to share. Ask other students to choose one translation in a home language other than their own to quietly repeat. Invite students to say their chosen translation out loud when you give the signal. Choral repeat the translations and the word in English. Invite self- and peer correction of the pronunciation of the translations and the English.
- Invite students to act out something they do at night when the moon can be seen (sleep, read a bedtime story, etc.)
- Read pages 1–4 slowly, fluently, with expression, and without interruption.
- Pause after reading page 4 and ask:
 - “Who are the characters in this story?” (Monica, Papa, and the moon)
- Place the **Story Elements Board Icon: Papa, Please Get the Moon for Me** for Monica on the Story Elements board (add Papa and the moon only if students have brought them up as a character). Refer to **Story Elements Board: Papa, Please Get the Moon for Me (answers, for teacher reference)** as necessary.
- Ask:
 - “When is this story taking place?” (at night)
 - “Where is this story taking place?” (outside the house)
- Place the Story Elements board icon for outside at night on the board.
- Draw students’ attention back to the text and read aloud pages 5–12 slowly, fluently, with expression, and without interruption.
- Pause after reading page 12 to remind students that Papa and the moon are also characters in the story.
- Place the Story Elements icons for Papa and the moon on the board (if not previously added).
- Remind students that *nouns* are words that are people, places, or things, so the characters in a story are words that are nouns.
- Tell students that nouns can be *proper nouns* or *common nouns*. A proper noun is a specific name and is always spelled with a capital letter like Ms. Adelia or San Jeronimo Bilingual

School (insert your name and your school name). A common noun is a word used for general people, places, or things like girls, boys, and school.

- Direct students' attention back to the Story Elements icons for the characters. Using a total participation technique, ask:

"Which of these words are proper nouns?" (Monica and Papa)

"Which of these words are common nouns?" (moon)

"How do you know?" (Monica and Papa are names and spelled with a capital letter)

- Circulate as students talk and use the Language Checklist to track students' progress towards L.1.1b.

- Invite students to turn and talk with an elbow partner:

"What does the author tell us about Papa? How would you describe him?" (He works hard to get Monica the moon. He is kind, caring, generous, hardworking, etc.)

- If productive, cue students to listen carefully and seek to understand:

"Who can tell us what your classmate said in your own words?" (Responses will vary.)

- Draw students' attention back to the text and read aloud the remainder of the book.
- Remind students that they had identified the setting of this story to be outside of Monica's house at night.

- Display page 19. Show the illustration and allow students time to look closely.

- Invite students to turn and talk with an elbow partner:

"How can you describe the setting by looking at this illustration for evidence?" (It is outside at nighttime. It is dark; there are stars. The sky is colorful; the moon is a sliver, etc.)

- With excitement, give students specific, positive feedback on completing the character and setting portions of the Story Elements board for the very first time. (Example: "Naima used the Word Wall word *night* to help describe the setting of the story.")
- Tell them that in the next lesson they will use the Story Elements board again to help retell important events from this story.

Meeting Students' Needs

- As you discuss character and setting in *Papa, Please Get the Moon for Me*, maximize generalization by reminding students that they have already learned about these story elements in *Summer Sun Risin'*. Help students make this text-to-text connection by prompting them to share what they remember about character and setting in *Summer Sun Risin'*. Invite students to reflect on how this is similar to or different from character and setting in *Papa, Please Get the Moon for Me*. (MMR)
- For ELLs: To internalize, pronounce, and do pre-writing oral practice, briefly ask the class to say the words *character* and *setting*. Syllabicate them through call and response and use a hand gesture of a wave to put them back together. This will be helpful with the word *evidence* as well.
- For ELLs: Students may describe Papa in terms like big, tall, and thin because they may be very familiar with the language of physical description. Prompt students to describe the characters' personal attributes by asking about their actions. (Example: "What did Papa do? Was that a kind thing to do?")

Work Time

B. Role-Play: Character and Setting, Pages 17–20 (10 minutes)

- Direct students' attention to the posted learning targets and reread the second one aloud:
"I can describe the characters and setting from Papa, Please Get the Moon for Me."
- Share with students that as in the previous lessons, they will get a chance to show what they know about the *characters* and *setting* of *Papa, Please Get the Moon for Me* using the Role-Play protocol.
- Tell students that today they will think about, discuss, and role-play with a partner so they better understand character and setting in order to do their best writing.
- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out a section of *Papa, Please Get the Moon for Me*. Remind them that they have been using this protocol in the last few lessons, and review as necessary using the **Role-Play Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Invite students to begin the protocol for pages 17–20.
- Give students specific, positive feedback on their ability to role-play the characters and setting of *Papa, Please Get the Moon for Me*. (Example: "Devonte, you really showed Papa's determination when you pretended to climb that very high ladder.")

Meeting Students' Needs

- As students begin the partner role-play, highlight critical features of *Summer Sun Risin'* by displaying specific pages on the document camera. Prompt students to refer to these pages for ideas about what to do or say as they role-play. (MMR)

Work Time

C. Independent Writing: *Papa, Please Get the Moon for Me* Response Sheet, Parts I and II (20 minutes)

- Direct students' attention to the **Working to Become Effective Learners anchor chart** and quickly review it.
- Tell students that now they are going to continue to use these habits that help us learn to retell the key details of the story.
- Share that now they are going to write what they know about the characters and setting in *Papa, Please Get the Moon for Me*.
- Invite students to turn and talk with an elbow partner:
"What is one attribute of the Working to Become Effective Learners anchor chart you will use today as you write?" (Responses will vary.)
- Circulate and listen in as students share.
- Cold call two to three students to share out.
- Encourage students to continue showing the habits of effective learners for this lesson and all that they do.
- Display the ***Papa, Please Get the Moon for Me* response sheet**.

- Distribute prepared clipboards with response sheets and **pencils**.
- Point out that this material has three parts, but they will complete only Parts I and II today.
- Focus students on Part I and read the prompt aloud, allowing adequate think time:
 - “Who are the main characters?”
 - “Where does the story take place?”
- Invite students to show a thumbs-up if they are ready to begin writing and drawing about the characters and setting from *Papa, Please Get the Moon for Me*.
- Tell students that they may begin writing their responses to Part I.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with teacher support and refer to the Story Elements board from Work Time A.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up Part I. Signal all students to stop working through the use of a designated sound.
- Focus students on Part II and read the prompt aloud, allowing adequate think time:

“Based on the pictures, which of these words best describes Papa?” Read four options aloud and model selecting one and circling it.
- Tell students that there is more than one correct answer, so they should choose the one that makes sense to them.
- Provide the following sentence frame:
 - “I think Papa is _____ because _____.”
- Remind students that in the first blank they will write the descriptive word they circled above. In the second blank they will write why they think Papa is best described that way.
- Invite students to show a thumbs-up if they are ready to begin writing about Papa from *Papa, Please Get the Moon for Me*.
- Tell students that they may begin writing their responses to Part II.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with teacher support and refer to the Story Elements board from Work Time A.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up Part II. Signal all students to stop working through the use of a designated sound.
- Collect students’ response sheets.
- Direct students’ attention to the Working to Become Effective Learners anchor chart and give them specific, positive feedback for showing great initiative, collaboration, perseverance, and responsibility while tackling a new writing task. (Example: “Abdi, you showed great initiative when you raised your hand and asked me to reread the writing prompt.”)

Meeting Students' Needs

- As you prepare for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- Before the transition to clean up, support self-regulation and independence during the transition by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)
- After the Turn and Talk, emphasize process and effort in writing by modeling how to sound out a word with tricky spelling. Demonstrate how to use environmental print if students get stuck with spelling. (MME)
- For ELLs: Provide a visual and gesture for the four adjectives in the characteristics word bank: tired (example: a picture of a sleepy face), sneaky, scared, and kind. Make language transparent by telling students these are adjectives, words we use to describe people, places, or things.
- For ELLs: Before inviting students to complete Part 2 of the *Papa, Please Get the Moon for Me* response sheet, model and think aloud choosing an adjective from the word bank and providing a reason. (Example: "Hmm ... I think Papa is sneaky. So what should I write here? That's right, sneaky! Why is he sneaky?")
- For ELLs: Students may benefit from orally rehearsing their writing with peers. After introducing the sentence frame "I think Papa is _____ because _____," encourage students to tell a partner their full sentence aloud. Circulate to support this interaction.

Closing and Assessment

A. Pinky Partners: Making Connections (5 minutes)

- Share that today students learned all about the characters and setting in *Papa, Please Get the Moon for Me*. They learned how Monica was imaginative as she pretended she could play with the moon.
- Tell students they will now share what they imagine about the night sky with a classmate using the Pinky Partners protocol. Remind them that they used the Pinky Partners protocol in Module 1 and review as necessary, using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Guide students through the protocol using the following question:
"In Papa, Please Get the Moon for Me, Monica imagined that she could play with the moon. What do you imagine when you look up at the night sky?"
- Circulate and listen in as students share with their partner. Consider collecting data using the **Speaking and Listening Checklist**.
- Refocus whole group. Give students specific, positive feedback regarding their sharing. (Example: "Kaylee, I heard you sharing in a loud and proud voice. Andres, you used a complete sentence to share how you imagine traveling to outer space in a rocket ship.")

Meeting Students' Needs

- As you circulate and listen in during the Pinky Partners protocol, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: "When I look up at the night sky, I pretend the moon is a _____. I imagine ____ with the moon.") (MMAE)

Lesson 9: Focused Read-aloud and Retelling, Session 2: *Papa, Please Get the Moon for Me*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1e:** Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can retell major events from *Papa, Please Get the Moon for Me*. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.1, SL.1.2, L.1.6)
- I can describe the central message of *Papa, Please Get the Moon for Me*. (RL.1.2, W.1.8, SL.1.1)

Ongoing Assessment

- During the Opening, use the Language Checklist to track students' progress towards L.1.1e as students participate in the song activity.
- During Work Time A, B, and C, track students' progress towards the reading standards in this lesson using the Reading Literature Checklist.
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).
- During Work Time C, circulate and observe students individually writing their *Papa, Please Get the Moon for Me* response sheet. At the end of the lesson, collect students' writing samples to check progress toward RL.1.1, RL.1.2, RL.1.3, and W.1.8.

Agenda

1. Opening

- A. Song and Movement: “Sun, Moon, and Stars” Song (10 minutes)

2. Work Time

- A. Focused Read-aloud, Session 2: *Papa, Please Get the Moon for Me* (15 minutes)
- B. Role-Play: Beginning, Middle, and End (10 minutes)
- C. Independent Writing: *Papa, Please Get the Moon for Me* Response Sheet, Part III (20 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the second of two lessons in which students engage in a focused read-aloud of *Papa, Please Get the Moon for Me*. Students use the text and illustrations to ask and answer questions about the characters, setting, and events in the story. Continue to reinforce the value of revisiting rich and complex texts many times to think about the important ideas and enjoy the beautiful language.
- Nurturing an inquiry-rich classroom environment begins with asking and answering questions and cultivating curiosity. This lesson invites students to re-engage with the Unit 1 guiding question in order to uncover the author’s purpose for writing *Papa, Please Get the Moon for Me*.
- In Work Time B, students reflect upon the habit of respect and how to treat others. Revisit the Working to Become Ethical People anchor chart to guide students in thinking and discussing how respect is important to uphold throughout the Role-Play protocol.

How this lesson builds on previous work:

- Students complete the Story Elements board for *Papa, Please Get the Moon for Me* by adding key details from the beginning, middle, and end of the story.
- Students continue to use the Role-Play protocol, focusing on retelling the important events from the beginning, middle, and end of the story. Students will role-play with the same partner established in Lesson 8.
- Students continue their writing from Lesson 8, completing Part III of the response sheet to retell the important events of the beginning, middle, and end of the story using pictures and words.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Some students may need more support with their oral language during the role-play. Look for opportunities to support students’ oral language as they practice role-playing by providing sentence stems or mimed actions.

- Support students in their transfer of oral rehearsal into writing before and during Work Time C by referring back to the Story Elements board.
- Students write independently for the *Papa, Please Get the Moon for Me* response sheet, Part III. Have a plan in place for students who may need more support to complete this writing task. Consider using sentence stems, personal Word Walls, sight word lists, appropriate writing tools (pencil grips, slant boards), and other differentiated tools to aid independent writing.

Down the road:

- Throughout this unit, students repeatedly return to texts to ask and answer questions about the characters, setting, events, and central message of the story. In Lessons 14–15, students will complete the Unit 1 Assessment by completing all parts of the response sheet for the text *Kitten’s First Full Moon*.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall card for the words *full moon*, *half-moon*, and *sliver*. Write or type the word on a card and create or find a visual to accompany each word.
 - Story Elements board icons for beginning, middle, and end.
 - Part III of the *Papa, Please Get the Moon for Me* response sheet on clipboards for Work Time C.
- Review the Role-Play protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, “Sun, Moon, and Stars” Version 2 song, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Record the whole group singing the “Sun, Moon, and Stars” Version 2 song and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Create the Story Elements board in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.
- Video record students as they role-play to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards: 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself:

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and expand oral language by acting out events of the text *Papa, Please Get the Moon for Me*. Students will also have the opportunity to demonstrate understanding by writing in a structured organizer.
- ELLs may find it challenge to comprehend the question “Why do think the author wrote the book?” because it may seem abstract. Consider making this question more concrete by researching the author of *Papa, Please Get the Moon for Me*, Eric Carle, and displaying a picture of him throughout the read-aloud. Discuss his inspirations for writing. Refer to his photograph each time the class thinks about his motivation for writing about the moon.

Levels of support

For lighter support:

- During Work Time C, invite a student to model completing the first section of the graphic organizer for the class.

For heavier support:

- In preparation for Opening A, create index cards with the word *will* written in a different color than the ink used to write the “Sun Moon and Stars” Version 2 song. Students can use them for visual and tactile reference during Opening A. See Meeting Students’ Needs column for details.
- During Work Time C, Model doing quick sketches within the graphic organizer as placeholders for information. Say: “You can sketch first so that you don’t forget the information you want to add. Then you may go back later and write.”
- During Work Time C, consider providing students with three copies or illustrations of events from *Papa, Please Get the Moon for Me*, each representing the beginning, middle, and end of the story. Students can refer to these as they complete their response sheets.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students share ideas about the central message of *Papa, Please Get the Moon for Me*. Some students may need additional support with understanding and remembering these ideas. Offer alternatives to auditory information by writing students’ ideas on chart paper and referring to them in future lessons.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas about why the author wrote *Papa, Please Get the Moon for Me* with a partner. Some students may need additional support with connecting the author’s purpose to the study of sun, moon, and stars. As students share out, provide options for expression and communication by using prompts and sentence frames.
- **Multiple Means of Engagement (MME):** As students engage in the Role-Play protocol with a partner, foster community by discussing strategies with students for how to ask for help from their peers during the protocol.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- full moon, half-moon (L)
- future tense, sliver (T)

Review:

- present tense, past tense (T)
- proper noun, common noun, moon, shining, night, event, beginning, middle, end (L)

Materials

- ✓ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ✓ Language Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during Opening)
- ✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; three)
- ✓ Story Elements Board: *Papa, Please Get the Moon for Me* (begun in Lesson 8; added to during Work Time A)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Papa, Please Get the Moon for Me* (one to display; for teacher read-aloud)
- ✓ Story Elements Board Icons: *Papa, Please Get the Moon for Me* (from Lesson 8; three; added to Story Elements board during Work Time A)
- ✓ Working to Become Ethical People anchor chart (begun in Lesson 4)
- ✓ Role-Play Protocol anchor chart (begun Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Papa, Please Get the Moon for Me* response sheet (from Lesson 8; one per student)
- ✓ Pencils (one per student)
- ✓ Unit 1 Guiding Question anchor chart (begun in Lesson 2; added to during the Closing; see supporting materials)

Opening

A. Song and Movement: “Sun, Moon, and Stars” Version 2 Song (10 minutes)

- Direct students to sit in a circle in the whole group meeting area.
- Display the “Sun, Moon, and Stars” Version 2 song.

The Sun, Moon, and Stars

- Remind students that the song is written in *present tense*, but that yesterday they changed the words to the *past tense*.
- Tell students that today they will sing it in *future tense*, so they will sing the song as if it will happen tomorrow.
- Turn and Talk:
“Use the future tense to say something you will see in the classroom tomorrow.” Model as needed. (Responses will vary, but may include: “I will see the art teacher. I will see my best friends. Etc.”)
- Circulate and listen in as students share with one another. Use the **Language Checklist** to track progress towards L.1.1e.
- Invite students to sing the song in the past tense with you.
“The sun will shine over us all, I will see it sparkle like a ball...etc.”
- Provide specific, positive feedback on their ability to change the song to the future tense.

Meeting Students' Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: For tactile and visual support using the future tense, invite students to affix the *will* index cards in the appropriate spots on the “Sun Moon and Stars” Version 2 song. See Supporting ELLs for details about the preparation of these cards.

Work Time

A. Focused Read-aloud, Session 2: *Papa, Please Get the Moon for Me* (15 minutes)

- Direct students' attention to the posted learning targets and read them aloud:
“I can retell major events from Papa, Please Get the Moon for Me.”
“I can describe the central message of Papa, Please Get the Moon for Me.”
- Tell students that during the focused read-aloud today they will read to meet these targets.
- Remind students that the characters in *Papa, Please Get the Moon for Me* are Monica, Papa, and the moon.
- Say each character name again and invite students to make a “p” with their hands if the noun is proper, and a “c” with their hand if the noun is common.
- Point out the phrase *central message* in the second learning target and explain that the central message of a story is the big idea or lesson it teaches the characters and readers.
- Give an example of the central message from a familiar story. (Example: “The central message from *The Most Magnificent Thing* is that if you work hard as an effective learner you can accomplish magnificent things.”)
- Tell students that as they listen to *Papa, Please Get the Moon for Me* today, they should pay close attention to what the central message might be.
- Direct their attention to the **Story Elements Board: *Papa, Please Get the Moon for Me*** and point to the boxes labeled Beginning, Middle, and End. Read the labels aloud.

- Invite students to turn and talk to an elbow partner:
“What will we track with the Story Elements board today? (major events from the beginning, middle, and end of the story)”
- Cold call two or three students to share their thoughts.
- With excitement, share with students that yesterday they read the story *Papa, Please Get the Moon for Me*, and today they will use the Story Elements board again to dig back in and retell major events from the beginning, middle, and end of the story. As students engage with the text, use the **Reading Literature Checklist** to track their progress.
- Invite students to Think-Pair-Share with an elbow partner:
“What is an event in a story?” (anything that happens; an event is usually special or important)
- Display *Papa, Please Get the Moon for Me*.
- Remind students that the shape of the moon can be described in different ways.
- Show them the **Sun, Moon, and Stars Word Wall cards** for *full moon* and *half-moon* follow the same routine established in the Lesson 1: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the Sun, Moon, and Stars Word Wall.
- Read aloud pages 1–4 slowly, fluently, with expression, and without interruption.
- Pause after reading page 4 and ask students to turn and talk with an elbow partner:
“What happened in the beginning of the story?” (Monica wants to play with the moon, so she asks her Papa to get it for her.)
- Encourage students to use the sentence frame: “In the beginning, _____.”
- Cold call on one to two students to share out.
- Place the **Story Elements Board Icon: Papa, Please Get the Moon for Me** for the beginning on the Story Elements board.
- Draw students’ attention back to the text and read aloud pages 5–18 slowly, fluently, with expression, and without interruption.
- Flip back through pages 5–18 and ask students to turn and talk with an elbow partner:
- “Looking at the illustrations for evidence, describe what happened in the middle of the story.” (Papa climbed a very tall ladder and waited for the moon to be small enough to carry down and give to Monica).
- If productive, cue students to listen carefully:
“Who can repeat what your classmate said?” (Responses will vary.)
- Encourage students to use the sentence frame: “In the middle, _____.”
- Cold call on one or two students to share out.
- Place the Story Elements board icon for the middle on the Story Elements board.
- Draw students’ attention back to the text and read aloud page 19 and pause at the word *sliver*.
- Show students the Sun, Moon, and Stars Word Wall card for *sliver* and follow the same routine established in the Lesson 1: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the Sun, Moon, and Stars Word Wall.
- Draw students’ attention back to the text and read aloud from page 19 to the end of the text.

- Invite students to turn and talk with an elbow partner:
“What happened at the end of the story?” (Monica played with the moon, but it got smaller and smaller until it disappeared. Then it reappeared in the sky.)
- Encourage students to use the sentence frame: “At the end, _____.”
- Cold call on one or two students to share out.
- Place the Story Elements board icon for the end on the Story Element board.
- With excitement, give students specific, positive feedback for listening to the story carefully and completing the entire Story Elements board for *Papa, Please Get the Moon for Me*.
- Invite students to Think-Pair-Share with an elbow partner:
“What was the central message of this story? What do you think the author, Eric Carle, was trying to show and tell us about the moon?” (that the moon changes shape and gets bigger and smaller as time goes by)
- As students discuss, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Cold call on two to three students to share out.
- Tell students that now that they have completed the Story Elements board to show the major beginning, middle, and end events of *Papa, Please Get the Moon for Me*, they will be role-playing those events with their role-play partners.

Meeting Students' Needs

- When preparing students for the focused read-aloud, provide options for physical action and sensory input by differentiating seating. Some students might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)
- As students share out ideas about the central message of the story, offer alternatives to auditory information by writing students' ideas on chart paper or a white board. Save their ideas to refer to in future lessons. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the guiding question: “I / can describe / the central message / from *Papa, Please Get the Moon for Me*.” Write and display student responses next to the chunks. Examples:
 - Ask:
 - ***“What does this sentence mean?” (Responses will vary.)***
 - Point to and read aloud the chunk: “I” and ask:
 - ***“Who is this sentence about?” (me; students)***
 - Point to and read aloud the chunk: “can describe” and ask:
 - ***“What will you be able to do?” (describe; tell about something.)***
 - Point to and read aloud the chunk: “the central message” and ask:
 - ***“What will you be telling about?” (the central message; the most important thing the author wants to tell us.)***
 - Point to and read aloud the chunk: “from *Papa, Please Get the Moon for Me*.” and ask:

“What book will you describe the message of?” (Papa, Please Get the Moon for Me.)

“Now what do you think this sentence means?” (We can tell about the most important thing the author wants us to know.)

“How will describing central events help you understand why authors write about the sun and moon?” (Responses will vary, but may include: It might help us understand why the writer of Papa, Please Get the Moon for Me wrote about the moon.)

Work Time

B. Role-Play: Beginning, Middle, and End (10 minutes)

- Direct students’ attention to the posted learning targets and reread the first one aloud:

“I can retell major events from Papa, Please Get the Moon for Me.”

- Share with students that as in the previous lessons, they will get a chance to show what they know about the major events in *Papa, Please Get the Moon for Me* by role-playing the beginning, middle, and end.
- Direct students’ attention to the **Working to Become Ethical People anchor chart** and focus them on the Respect row.
- Invite students to turn and talk with an elbow partner:

“How will you show respect toward others during our Role-Play protocol today?”

- Circulate and listen in as students share.
- Cold call on two to three students to share out.
- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out the key details of *Papa, Please Get the Moon for Me*. Remind them that they have been using this protocol in the past few lessons, and review as necessary using the **Role-Play protocol anchor chart**. Refer to the Classroom Protocols document for the full version of the protocol.
- Invite students to begin the protocol for the following sections of text and track their progress with the **Speaking and Listening Checklist** for SL.1.1 and SL.1.2:
 - Pages 1–4
 - Pages 9–18
 - Pages 19–end
- Give students specific, positive feedback on their ability to role-play the key details of *Papa, Please Get the Moon for Me*. (Example: “Ava, you made your body smaller and smaller to show how the moon grew smaller and smaller in the middle of the story.”)

Meeting Students’ Needs

- When giving directions for the Role-Play protocol, foster collaboration by guiding students in knowing when and how to ask a classmate for help. (Example: “When you are role-playing today, you might forget what happens in the middle of the story. That is okay! First, try your best to look at the pages and remember what happened in the story. If you are still stuck, your partner can help you. What could you say to your partner if you forget something about the story?”) (MME)

Work Time

C. Independent Writing: *Papa, Please Get the Moon for Me* Response Sheet, Part III (20 minutes)

- Display the *Papa, Please Get the Moon for Me* response sheet.
- Distribute prepared clipboards with response sheets and **pencils**.
- Focus students on Part III and read the prompt aloud, allowing adequate think time:
“Use words and pictures to show what happened in the story.”
- Direct students’ attention to the box labeled Beginning.
- Invite students to whisper a response into their hands:
“What happened in the beginning of Papa, Please Get the Moon for Me?”
- Tell students that they may begin writing their response in the Beginning box.
- Repeat this process with the remaining two boxes, Middle and End.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with teacher support and refer to the Story Elements board from Work Time A.
- Signal all students to stop working through the use of a designated sound.
- Collect students’ response sheets.
- Provide specific, positive feedback about students’ ability to complete Part III of their response sheets. (Example: “Charlotte, I saw that you chose to draw your picture first and then write the words for each part of the story.”)

Meeting Students’ Needs

- When preparing students for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- Before the transition to clean up, support self-regulation and independence during the transition by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)
- For ELLs: Students may benefit from orally rehearsing their writing with peers. After prompting students to whisper each event into their hands, encourage them to tell a partner their thinking. Circulate to support this interaction.
- For ELLs: Before inviting students to complete each section of Part 3 of the *Papa, Please Get the Moon for Me* response sheet, model and think aloud strategies for remembering the sequence of events. (Example: “Hmm ... I’m not sure what happened in the middle, but where can I look? The Story Elements board!”)
- For ELLs: Complete the first section of the *Papa, Please Get the Moon for Me* response sheet with the class as a shared or interactive writing experience to prepare students to work on the remaining sections independently.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Tell students they are now going to consider why the author may have written *Papa, Please Get the Moon for Me*.
- Direct students' attention to the **Unit 1 Guiding Question anchor chart** and complete the first column with the book title.
- Direct students' attention to the second column and ask:
“Was this story about the sun, the moon, or both?” (the moon)
- Model how to use the Sun, Moon, and Stars Word Wall to properly spell the word *moon*.
- Direct students' attention to the third column and invite students to turn and talk with an elbow partner:
“Why do you think the author wrote the book?” (Responses will vary, but may include: to imagine what it would be like to play with the moon and/or to describe how the moon seems to get bigger and smaller.)
- If productive, cue students to expand the conversation by saying more:
“Can you say more about that?” (Responses will vary.)
- Circulate and listen in as students share with their partners.
- Cold call on two to three students to share out their ideas.
- As students share out, capture their responses on the anchor chart.
- Reread the new information added to the anchor chart about *Papa, Please Get the Moon for Me*, reading from left to right across the chart.
- Invite students to sing and do the movements of the “Sun, Moon, and Stars” Version 2 song as the lesson comes to a close.

Meeting Students' Needs

- When circulating and listening in during the Turn and Talk, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: “I think the author wrote the book because ____.”) (MMAE)
- For ELLs: Review the learning targets introduced in Work Time A. Ask students to give specific examples of how they worked toward achieving them in this lesson. Invite students to rephrase the learning targets now that they have more experience recalling major events and describing the central message. (Example: I can describe how Eric Carle wanted to tell us that the moon is beautiful.)

Lesson 10: Focused Read-aloud and Retelling, Session 1: *Sun and Moon*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can answer questions about key details from *Sun and Moon*. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2)
- I can describe the characters and setting from *Sun and Moon*. (RL.1.3, RL.1.7, W.1.8, L.1.6)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.2, RL.1.3, and RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

A. Engaging the Learner: Introducing the Moon Movement Routine (5 minutes)

2. Work Time

A. Focused Read-aloud, Session 1: *Sun and Moon* (20 minutes)

B. Role-Play: Character and Setting, Pages 1–11 (10 minutes)

C. Independent Writing: *Sun and Moon* Response Sheet, Parts I and II (20 minutes)

3. Closing and Assessment

A. Structured Discussion: Making Connections (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows the pattern of Lesson 8. It is the first of two lessons in which students engage in a focused read-aloud of *Sun and Moon*. Students use the text and illustrations to ask and answer questions about the characters, setting, events, and central message/lesson in the story.
- This lesson introduces the Moon Movement routine, which is similar in purpose to the Sun Movement routine. The inclusion of movement gives young children time to prepare their bodies and minds for deeper understanding and focus. The rhythm and repetition of this stretch and similar activities brings consistency and comfort to the lesson opening.
- The pages of *Sun and Moon* are not numbered. For instructional purposes, the page that begins with “‘Just for one day,’ begged the moon ...” should be considered page 1 and all pages thereafter numbered accordingly.
- If possible, provide students access to the text, *Sun and Moon* by Lindsey Yankey, during the K-2 Labs and K-2 Reading Foundations Skills Block.

How this lesson builds on previous work:

- In Lessons 8–9, students created a Story Elements board for *Papa, Please Get the Moon for Me*. In this lesson, they begin a new Story Elements board for *Sun and Moon*.
- In Lesson 8, students named the characters in response to a teacher-directed question. In this lesson, students are introduced to a signal to use when they hear or see a character. This practice promotes independence and moves students toward mastering the skill of identifying characters more fluidly while reading.
- In this lesson, students continue to use the Role-Play protocol (begun in Lesson 4) with a focus on the characters and setting.
- Students follow the same structure used in Lesson 8–9 for completing Parts I and II of the response sheet.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may be shy or uncomfortable taking part in the Moon Movement routine. Invite students to join, but do not force students to do the stretches. Maintain a welcoming classroom environment.
- Some students may need more support with their oral language during the role-play. Look for opportunities to support students' oral language as they practice role-playing by providing sentence stems or mimed actions.
- Support students in their transfer of oral rehearsal into writing before and during Work Time C by referring back to the Story Elements board.

Down the road:

- The Story Elements board for *Sun and Moon* will be completed in Lesson 11. Then, for each following pair of lessons, the board is “wiped clean” to track story elements for a new text.
- Throughout this unit, students repeatedly return to texts to ask and answer questions about the characters, setting, events, and central message of the story. In Lessons 14–15, students will complete the Unit 1 Assessment by completing all parts of the response sheet for the text *Kitten's First Full Moon*.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall cards for *crescent* and *earth*. Write or type the word on a card and create or find a visual to accompany each word.
 - Story Elements board by clearing the icons used to track the character(s), setting, and events from *Papa, Please Get the Moon for Me*.
 - Parts I and II of the *Sun and Moon* response sheet on clipboards for Work Time C.
- Review the Role-Play protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, Moon Movement chart, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Create the Story Elements Board in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.
- Video record students as they engage in the Moon Movement routine Steps 1–6 to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards: 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and expand oral language by acting out events of the text *Sun and Moon*. Students will also have the opportunity to demonstrate understanding by writing in a structured organizer.
- ELLs may focus more on the illustrations to make meaning of the text. Stop frequently to connect the illustrations. Express wonder and notice the detail, colors, and textures in the illustrations. Because students will be adding drawing to their response sheet, consider mentioning a quality that appears on the High-Quality Work anchor chart.

Levels of Support

For lighter support:

- During the Role-Play protocol in Work Time B, invite students to play “director” as they support students who need heavier support. They can help arrange scenes and provide lines as they work with a pair of students.
- The supports in this lesson and in Lesson 11 are similar to the supports in Lessons 8–9 because the tasks mirror one another. Based on student performance in Lessons 8–9, consider releasing students from some of the supports to foster independence and assess student progress.

For heavier support:

- During Work Time C, begin to complete Parts 1 and 2 of the *Sun and Moon* response sheets as a shared writing experience before prompting students to write independently.
- During Work Time C, model doing quick sketches within the graphic organizer as placeholders for information. Say: “You can sketch first so that you don’t forget the information you want to add. Then you may go back later and write.”

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students share ideas about Moon’s experiences and opinions in *Sun and Moon*. Some students may need additional support with understanding and remembering these ideas. Offer alternatives to auditory information by writing students’ ideas on chart paper and referring to them in future lessons.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas about which character they would prefer to be in *Sun and Moon* with a partner. Some students may need additional support with sharing an opinion based on the characters in this story. As students share out, provide options for expression and communication by using prompts and sentence frames.
- **Multiple Means of Engagement (MME):** As students engage in the Role-Play protocol with a partner, foster community by discussing strategies with students for how to ask for help from their peers during the protocol.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- crescent (L)

Review:

- character, setting, moon, sun (L)

Materials

- ✓ Moon Movement chart (from Lesson 2; one to display)
- ✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; 1)
- ✓ Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during the Opening and Work Time A)
- ✓ Story Elements board (blank; added to during Work Time A)
- ✓ *Sun and Moon* (one to display; for teacher read-aloud)
- ✓ Story Elements Board Icons: *Sun and Moon* (two; added to Story Elements board during Work Time A)
- ✓ Story Elements Board: *Sun and Moon* (answers, for teacher reference)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Role-Play Protocol anchor chart (begun Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Working to Become Effective Learners anchor chart (begun in Module 1)
- ✓ *Sun and Moon* response sheet (one per student)
- ✓ Pencils (one per student)
- ✓ Discussion Norms anchor chart (begun in Module 1)

Opening

A. Engaging the Learner: Introducing the Moon Movement Routine (5 minutes)

- Direct students to sit in a circle around the whole group meeting area.
- Display the **Moon Movement chart** and share that this is a set of movements and stretches that the dancer in “Elvin, the Boy Who Loved the Sky” shared with Elvin.
- Follow the same process used for the Sun Movement routine to lead students in Steps 1–6 of the Moon Movement routine, providing time for students to practice and try it out.

- Repeat Steps 1–6 once more, going through the movements more smoothly and fluidly.
- Name the side stretches as “crescent moon” shapes.
- Show students the **Sun, Moon, and Stars Word Wall card** for *crescent* and follow the same routine established in the Lesson 1: Provide its definition, use it in a sentence with an accompanying gesture, and place the Word Wall card and picture for it on the **Sun, Moon, and Stars Word Wall**.
- Lead students through Steps 1–6 of the Moon Movement routine once more, moving smoothly and fluidly through the motions.

Meeting Students’ Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)

Work Time

A. Focused Read-aloud, Session 1: *Sun and Moon* (20 minutes)

- Direct students’ attention to the posted learning targets and read them aloud:
 - “I can answer questions about key details from Sun and Moon.”*
 - “I can describe the characters and setting from Sun and Moon.”*
- Remind students that they will work toward meeting these learning targets during the focused read-aloud today.
- Direct students’ attention to the **Story Elements board** and ask:
 - “According to the learning targets, which part of the Story Elements board will we be filling in today?” (character and setting)*
- Display **Sun and Moon** and tell students that today they will use a signal to show when they see or hear a character introduced in the story. Demonstrate the signal (thumbs-up, pat your head, touch your toes, etc.).
- Tell students you are now going to begin reading the text aloud. As you do, they should use the chosen signal when they hear or see a character. Read pages 1–10 slowly, fluently, with expression, and without interruption.
- Pause after reading page 10 and ask:
 - “Who are the characters in this story? How does the author describe (not physical descriptions) Sun and Moon?” (Sun and Moon are the characters. They are friends. Moon is bored with his place in the sky at night.)*
- Place the **Story Elements Board Icons: Sun and Moon** for Sun and Moon (the characters) on the Story Elements board. Refer to **Story Elements Board: Sun and Moon (answers, for teacher reference)** and track students’ progress towards with the **Reading Literature Checklist** as necessary.
- Show students the Sun, Moon, and Stars Word Wall card for *earth*.
- Invite students to turn and talk with an elbow partner:
 - “What is earth?” (the planet on which we live)*
- Invite students to use the word *earth* in a sentence. (Example: “We live on planet earth.”)

- Place the Word Wall card for *earth* on the Sun, Moon, and Stars Word Wall.
- Draw students' attention back to the text and read aloud page 11 slowly, fluently, with expression, and without interruption.
- Pause after reading page 11 and invite students to turn and talk with an elbow partner:
"Look carefully at the illustration. Tell me what details you see that help you understand the setting." (dark sky, people and animals down below, etc.)
- Cold call on two to three students to share out details of what they see.
- Tell students that from the details they shared from the illustration we can figure out the setting. Ask:
"When and where is this story taking place?" (at night in the sky above the earth)
- Cold call on one to two students to share out.
- Place the Story Elements board icon for the sky on the Story Elements board.
- Draw students' attention back to the text and read aloud pages 11–28 slowly, fluently, with expression, and without interruption.
- Pause after reading page 28 and flip back between pages 11 and 29 to show the illustrations.
- Invite students to turn and talk with an elbow partner:
"Based on the illustrations for evidence, what did Moon see when he paid attention to the world during the night?" (beautiful things such as children dreaming, foxes, flowers blooming, fireworks, etc.)
- Cold call on two to three students to share out.
- Draw students' attention back to the book and finish reading it aloud.
- Invite students to turn and talk with an elbow partner:
"Why do you think Moon decided to remain in the night sky? What made him change his mind?" (He paid attention to all the beautiful things he sees at night.)
- If productive, cue students to clarify the conversation by confirming what they mean:
"So, do you mean ____?" (Responses will vary.)
- Invite students to whisper a response into their hands:
"What is something beautiful you would want to see during the night?" (Responses will vary.)
- Tell students that in the next lesson they will complete the Story Elements Board: *Sun and Moon* to help retell events from *Sun and Moon*.

Meeting Students' Needs

- When preparing students for the focused read-aloud, provide options for physical action and sensory input by differentiating seating. Some students might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)
- As students share what they discussed with their partners about Moon's experiences and opinions, offer alternatives to auditory information by writing students' ideas on chart paper or a white board. Save their ideas to refer to in future lessons. (MMR)

- For ELLs: Encourage active listening by assigning groups of students specific characters to listen for. Invite them to use a special signal when their character is introduced and subsequently mentioned. (Example: "Your group will be the moon group. Make a circle around your face with your hands whenever you hear about the moon.")
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the text: "At night / with everyone asleep / his world / was often boring and lonely." Write and display student responses next to the chunks. Examples:
 - Ask:

"What does this sentence mean?" (Responses will vary.)
 - Point to and read aloud the chunk: "At night" and ask:

"What is the setting of this sentence? When does it take place?" (at night)
 - Point to and read aloud the chunk: "with everyone asleep" and ask:

"What happens at night? Who is everyone?" (people are sleeping; all the people)
 - Point to and read aloud the chunk: "his world" and ask:

"What character is this sentence about? Whose world? How do you know?" (The moon. The nighttime is the moon's world. I know because the moon comes out at night; because the moon is in the picture.)
 - Point to and read aloud the chunk: "was often boring and lonely." and ask:

"How would the moon describe the nighttime?" (boring and lonely.)

"How would you describe the character the moon? (bored and lonely)

"Pretend you are bored and lonely like the moon. Show your partner how your face looks when you are bored and alone."

"Now what do you think this sentence means?" (The moon feels bored and lonely when all the people are asleep.)

"How did this sentence help you describe a character?" (It tells how the character feels when people are asleep.)

Work Time

B. Role-Play: Character and Setting, Pages 1–11 (10 minutes)

- Use the routine established in the first half of the module to review the first learning target with students and guide them through the Role-Play protocol for pages 1–11 of *Sun and Moon*.
- Review the **Role-Play Protocol anchor chart** as necessary (Refer to the Classroom Protocols document for the full version of this protocol.) and track their progress with the **Speaking and Listening Checklist** for SL.1.1 and SL.1.2.
- Give students specific, positive feedback on their ability to role-play the characters and setting of *Sun and Moon*. (Example: "Mikayla, you really showed Moon's curiosity about the daytime as you showed the excitement with your facial expressions and body.")

Meeting Students' Needs

- When giving directions for the Role-Play protocol, foster collaboration by guiding students in knowing when and how to ask a classmate for help. (Example: "When you are role-playing today, you might forget details about the character and setting in *Sun and Moon*. That is okay! First, try your best to look at the pages and remember what happened in the story. If you are still stuck, your partner can help you. What could you say to your partner if you forget something about the story?") (MME)

Work Time

C. Independent Writing: *Sun and Moon* Response Sheet, Parts I and II (20 minutes)

- Tell students that now they are going to write what they know about the characters and setting in *Sun and Moon*.
- Direct students' attention to the **Working to Become Effective Learners anchor chart** and quickly review it. Remind students that they should continue to use these habits as they write today.
- Distribute prepared clipboards with **Sun and Moon response sheet** and **pencils** and follow the same routine established in Lesson 8 to complete Parts I and II.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with support and refer to the Story Elements board from Work Time A.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up Part II. Signal all students to stop working through the use of a designated sound.
- Collect students' response sheets.

Meeting Students' Needs

- When preparing students for independent writing, vary methods for fine motor responses by offering modified response sheets with a separate box for drawing and lines for writing. (MMAE)
- For ELLs: Provide a visual and gesture for the four adjectives in the characteristics word bank: *curious*, *bored*, *angry*, *confused*. Make language transparent by telling students these are adjectives, words we use to describe people, places, or things.
- For ELLs: Before inviting students to complete Part 2 of the *Sun and Moon* response sheet, model and think aloud choosing an adjective from the word bank and providing a reason. (Example: "Hmm ... I think Moon is bored. So what should I write here? That's right, 'bored'! Why is he bored?")
- For ELLs: Students may benefit from orally rehearsing their writing with peers. After introducing the sentence frame "I think Moon was _____ because _____," encourage students to tell a partner their full sentence aloud. Circulate to support this interaction.

- For ELLs: Prepare students for the task by displaying and reviewing a student's *Papa, Please Get the Moon for Me* response sheet completed in Lesson 8. Tell students they will now complete a similar activity, but this time they will think about the text *Sun and Moon*.

Closing and Assessment

A. Structured Discussion: Making Connections (5 minutes)

- Invite students to form a circle in the whole group area.
- With excitement, tell students that now that they have written about the characters Sun and Moon, they have a challenging decision to make: whether they want to be the Sun, and spend their time in the daylight, or the Moon, and spend their time in the night.
- Display the **Discussion Norms anchor chart** and review the norms.
- Invite students to whisper a response into their hands:
“What is one discussion norm you want to uphold while discussing today?” (Responses will vary.)
- Invite students to turn and talk with an elbow partner:
- “Would you rather be the sun or the moon? Why?”
- If productive, cue students to listen carefully and seek to understand:
“Who can tell us what your classmate said in your own words?” (Responses will vary.)
- As students discuss, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Refocus students whole group and call on a few students to share out.
- Engage students in a whole group discussion regarding their responses.
- Give students specific, positive feedback on following the discussion norms. (Example: “Samuel, I noticed you were looking at the speaker throughout our discussion. Mia, you raised your hand to add onto Fatima’s idea.”)

Meeting Students’ Needs

- When circulating and Listening in during student discussions, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (MMAE)

Lesson 11: Focused Read-aloud and Retelling, Session 2: *Sun and Moon*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can retell major events from *Sun and Moon*. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6)
- I can describe the central message of *Sun and Moon*. (RL.1.2, W.1.8, SL.1.1)

Ongoing Assessment

- During Work Time A, B, and C, track students' progress towards the reading standards in this lesson using the Reading Literature Checklist.
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).
- During Work Time C, circulate and observe students individually writing their *Sun and Moon* response sheets. At the end of the lesson, collect students' writing samples to check progress toward W.1.8.

Agenda

1. Opening

- A. Engaging the Learner: Moon Movement Routine (5 minutes)

2. Work Time

- A. Focused Read-aloud, Session 2: *Sun and Moon* (15 minutes)
- B. Role-Play: Beginning, Middle, and End (15 minutes)
- C. Independent Writing: *Sun and Moon* Response Sheet, Parts III and IV (20 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the second of two lessons in which students engage in a focused read-aloud of *Sun and Moon*. Students use the text and illustrations to ask and answer questions about the characters, setting, and events in the story. They then complete Parts III and IV of their response sheet, dealing with the text's central lesson/message.
- Nurturing an inquiry-rich classroom environment begins with asking and answering questions and cultivating curiosity. This lesson invites students to re-engage with the Unit 1 guiding question in order to uncover the author's purpose for writing *Sun and Moon*.

How this lesson builds on previous work:

- Students completed Parts I and II of the response sheet in Lesson 10. In this lesson, they complete Parts III and IV.
- Students complete the Story Elements board for *Sun and Moon* by adding key details from the beginning, middle, and end of the story.
- In Lesson 9, students used sentence frames to describe the beginning, middle, and end of the story. In this lesson, students are introduced to a signal to use when they hear or see an important event from the beginning, middle, and end of the story. This practice promotes independence and moves students toward mastering the skill of identifying important events more fluidly while reading.
- Students continue to use the Role-Play protocol to better understand the major events in *Sun and Moon*.
- Students answer the Unit 1 guiding question in relation to *Sun and Moon*.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Some students may need additional support with their oral language during the role-play. Look for opportunities to support students' oral language as they practice role-playing by providing sentence stems or mimed actions.
- Support students in their transfer of their oral rehearsal into their writing before and during Work Time C by referring back to the Story Elements board.

- This lesson introduces the writing about the central lesson/message in Part IV of the student response sheet. Students may need additional time to complete their writing. Consider your students' comfort and capabilities with independent writing and reallocate instructional time to provide more time for the assessment as necessary.

Down the road:

- Students have worked with their partners for the Role-Play protocol for Lessons 8–11. In Lesson 12, students will have the opportunity to work in a triad with new partners.
- Throughout this unit, students repeatedly return to texts to ask and answer questions about the characters, setting, events, and central message of the story. In Lessons 14–15, students will complete the Unit 1 Assessment by completing all parts of the response sheet for the text *Kitten's First Full Moon*.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall Card for the word *darkness*. Write or type the word on a card and create or find a visual to accompany each word.
 - Story Elements board icons for the beginning, middle, and end.
 - Parts III and IV of the *Sun and Moon* response sheet on clipboards for Work Time C.
- Review the Role-Play protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, Moon Movement chart, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Create the Story Elements board in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.
- Video record students as they engage in the Moon Movement routine Steps 1–6 to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Video record students as they role-play to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards: 1.I.A.1, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself:

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and expand oral language by acting out events of the text *Sun and Moon*. Students will also have the opportunity to demonstrate understanding by writing in a structured organizer.
- ELLs may find it challenge to comprehend the question “Why do think the author wrote the book?” because it may seem abstract. Consider making this question more concrete by researching the author of *Sun and Moon*, Lindsey Yankey, and displaying a picture of her throughout the read-aloud. Discuss her inspirations for writing. Refer to her photograph each time the class thinks about her motivation for writing about the sun and the moon.

Levels of support

For lighter support:

- During Work Time C, invite a student to model completing the first section of the graphic organizer for the class.
- The supports in Lesson 10 and in this lesson are similar to the supports in Lessons 8–9 because the tasks mirror one another. Based on student performance in Lessons 8–9, consider releasing students from some of the supports to foster independence and to assess student progress.

For heavier support:

- During Work Time C, complete the first section of the *Sun and Moon* response sheet, Part 3 with the class as a shared or interactive writing experience to prepare students to work on the remaining sections independently.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students share ideas about the central message of *Sun and Moon*. Some students may need additional support with understanding and remembering these ideas. Offer alternatives to auditory information by writing students’ ideas on chart paper and referring to them in future lessons.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, students talk with a partner about why the author wrote *Sun and Moon*. Some students may need additional support with taking the perspective of the author. Provide alternatives for expression by inviting students to act out an interview with an author.
- **Multiple Means of Engagement (MME):** Students have had multiple opportunities to learn and practice the Moon Movement routine. Some students may benefit from opportunities to be seen as a peer model. Foster community by inviting a few students to help you demonstrate the steps of the Moon Movement routine.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- darkness (T)

Review:

- character, setting, moon, sun (L)

Materials

- ✓ Moon Movement chart (from Lesson 2; one to display)
- ✓ Story Elements board (begun in Lesson 10; added to during Work Time A)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Sun and Moon* (one to display; for teacher read-aloud)
- ✓ Sun, Moon, and Stars Word Wall card (new; teacher-created; one)
- ✓ Sun, Moon, and Stars Word Wall (begun in Lesson 1; added to during Work Time A)
- ✓ Story Elements Board Icons: Sun and Moon (from Lesson 10; three; added to Story Elements board during Work Time A)
- ✓ Story Elements Board: *Sun and Moon* (from Lesson 10; answers, for teacher reference)
- ✓ Working to Become Ethical People anchor chart (begun in Lesson 4)
- ✓ Role-Play Protocol anchor chart (begun Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Sun and Moon* response sheet (from Lesson 10; one per student and one to display)
- ✓ Pencils (one per student)
- ✓ Unit 1 Guiding Question anchor chart (begun in Lesson 2; added to during the Closing; see supporting materials)

Opening

A. Engaging the Learner: Moon Movement Routine (5 minutes)

- Direct students to stand in a circle around the whole group meeting area.
- Focus students' attention on the **Moon Movement chart** and remind them that this is a set of movements and stretches that the dancer shared with Elvin.
- Lead students through Steps 7–10 of the Moon Movement routine.
- Repeat Steps 7–10 with students.

- Invite students to complete Steps 1–10 of the Moon Movement routine with you.

Meeting Students' Needs

- When engaging in the Sun Movement routine, foster community by inviting a few student volunteers to model Steps 1–10 for the class. (MME)

Work Time

A. Focused Read-aloud, Session 2: *Sun and Moon* (15 minutes)

- Direct students' attention to the first posted learning target and read it aloud:
"I can retell major events from Sun and Moon."
- Remind students that the "major events" of a story are the important things that happen in the beginning, middle, and end.
- Invite students to take out their magic bows and take aim at the target.
- Direct students' attention to the **Story Elements board** and ask:
"According to the learning targets, which part of the story elements will we be filling in today?" (beginning, middle, and end)
- Direct students' attention to the second posted learning target and read it aloud:
"I can describe the central message of Sun and Moon."
- Remind students that the central message of a story is the big idea or lesson it teaches the characters and readers.
- Remind students of an example of the central message from a familiar story. (Example: "The central message from *The Most Magnificent Thing* is that if you work hard as an effective learner you can accomplish magnificent things!")
- Tell students that as they listen to *Sun and Moon* today, they should pay close attention to the events and central message. As students engage with the text, use the Reading Literature Checklist to track their progress.
- Display *Sun and Moon*.
- Tell students that as in Lesson 10, they will use a signal. This time, they will use a signal when they see or hear an important event from the beginning, middle, and end of the story. Demonstrate the signal. (It should be different from that of the previous lesson to avoid confusion.)
- Draw students' attention to the text and read pages 1–10 fluently and without interruption, paying attention to when students show the signal for an important event.
- Pause after reading page 10 and tell students how impressed you were at how they used the signal. Ask:
"What did you hear that helped you understand the important events from the beginning of the story?" (Moon is bored with night and asks Sun to trade places, but Sun tells him that first Moon must spend an entire night looking closely at the world.)
"What did you see in the illustrations that helped you understand the beginning of the story?" (Moon looked sad; Moon talked to Sun.)
- Show students the Sun, Moon, and Stars Word Wall card for *darkness*.

- Invite students to turn and talk with an elbow partner:
“What is darkness?” (lack of light)
- Invite students to cover their eyes to see darkness.
- Place the Word Wall card for *darkness* on the **Sun, Moon, and Stars Word Wall**.
- Place the **Story Elements Board Icon: Sun and Moon** for beginning on the Story Elements board. Refer to **Story Elements Board: Sun and Moon (answers, for teacher reference)** as necessary.
- Draw students’ attention back to the text and read aloud pages 11–28, slowly, fluently, with expression, and without interruption. Remind students to show the signal again when they hear an important event from the middle of the story.
- Pause at page 28 and flip back through the previous illustrations.
- Ask:
“What did you hear that helped you understand the important events from the middle of the story?” (Moon agreed to spend one more night in the sky looking closely at earth. Moon saw many beautiful things, such as foxes hunting, colorful cities, children’s dreams, fireworks, etc.)
“What did you see in the illustrations that helped you understand the middle of the story?” (beautiful things such as fireworks, flowers, dreams, animals, etc.)
“Who can repeat what your classmate said?” (Responses will vary.)
- Place the Story Elements board icon for middle on the Story Elements board.
- Draw students’ attention back to the text and read aloud the remainder of the book. Remind students to use the signal when they see and hear important events from the end of the story.
- Ask:
“What did you hear and see that helped you understand the end of the story?” (Moon realized all the exciting and enjoyable things he could watch during the night and decided not to trade places with Sun.)
- Place the Story Elements board icon for end on the Story Elements board.
- Invite students to Think-Pair-Share with an elbow partner:
“Why did Moon change its mind? What was the central message or lesson that Moon learned?” (Moon realized that the world is beautiful no matter if it’s day or night, and Moon learned to appreciate his place in the night sky.)
- As students discuss, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Cold call a few selected students to share out.
- Give students specific, positive feedback for collaborating to make sense of the central message in *Sun and Moon*. (Example: “Fabiana, you were thinking about how Moon’s feelings changed during the book, and I heard Gina add on that he felt happy when he learned that night was beautiful too.”)

Meeting Students' Needs

- As students share out ideas about the story's central message, offer alternatives to auditory information by writing students' ideas on chart paper or a white board. Save their ideas to refer to in future lessons. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the text: "But now, Moon / wished for nothing more than to spend the rest of his nights / enjoying the exciting and wonderful things / that came to life in his moonlight." Write and display student responses next to the chunks. Examples:
 - Ask:
 - "What does this sentence mean?" (Responses will vary.)*
 - Point to and read aloud the chunk: "But now, Moon" and ask:
 - "What character is this sentence about?" (Moon)*
 - Point to and read aloud the chunk: "wished for nothing more than to spend the rest of his nights" and ask:
 - "What did moon do?" (wished)*
 - "What does it mean that moon wished for nothing more than to spend the rest of her nights?" (He didn't wish for anything else. He just wanted to spend time at night.)*
 - "What is something that you wish for nothing more than?" (I wish for nothing more than ice cream; healthy food.)*
 - Point to and read aloud the chunk: "enjoying the exciting and wonderful things" and ask:
 - "What does Moon want to do as he spends time in the night?" (enjoy wonderful things.)*
 - Point to and read aloud the chunk: "that came to life in his moonlight." and ask:
 - "What else does the author tell us about these wonderful things Moon enjoys?" (they are alive in the nighttime. They move about at night.)*
 - "Pretend you are foxes coming to life in the moonlight."*
 - "Now what do you think this sentence means?" (The Moon wants to enjoy the nighttime and all of the creatures that live in the moonlight.)*
 - "How did this sentence help you understand the central message of the story?" (It describes how Moon loves and appreciates the night and his place in the sky.)*

Work Time

B. Role-Play: Beginning, Middle, and End (15 minutes)

- Use the routine established in the first half of the module to review the first learning target and the **Working to Become Ethical People anchor chart** with students and guide them through the Role-Play protocol for the following pages of *Sun and Moon*. Review the **Role-Play Protocol anchor chart** as necessary (Refer to the Classroom Protocols document for the full version of this protocol) and track their progress with the **Speaking and Listening Checklist** for SL.1.1 and SL.1.2.
 - Pages 3–10
 - Pages 11–18
 - Pages 29–30

- Give students specific, positive feedback on their ability to role-play the key details of *Sun and Moon*. (Example: “Ben, I saw you use your facial expressions to show how amazed Moon was when he saw beautiful things at night.”)

Meeting Students' Needs

- When giving directions for the Role-Play protocol, foster collaboration by guiding students in knowing when and how to ask a classmate for help. (Example: “When you are role-playing today, you might forget all the major events in the story. That is okay! First, try your best to look at the pages and remember what happened in the story. If you are still stuck, your partner can help you. What could you say to your partner if you forget something about the story?”) (MME)

Work Time

C. Independent Writing: *Sun and Moon* Response Sheet, Parts III and IV (20 minutes)

- Tell students that now they are going to write what they know about the major events and central message in *Sun and Moon*.
- Display the ***Sun and Moon* response sheet**.
- Distribute prepared clipboards and **pencils**.
- Focus students on Part III and read the prompt aloud, allowing adequate think time:
“Use words and pictures to show what happened in the story.”
- Direct students’ attention to the box labeled Beginning.
- Invite students to whisper a response into their hands:
“What happened in the beginning of *Sun and Moon*?”
- Tell students that they may begin writing their response in the Beginning box.
- Repeat this process with the remaining two boxes, Middle and End.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with teacher support and refer to the Story Elements board from Work Time A.
- Signal all students to stop working through the use of a designated sound.
- Refocus whole group and focus students on Part IV. Read the prompt aloud, allowing adequate think time:
“What does *Moon* learn at the end of *Sun and Moon*?”
- Invite students to complete their written response.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts).
- When 2 minutes remain, provide students with a time reminder.
- Signal all students to stop working through the use of a designated sound.
- Collect students’ response sheets.

Meeting Students' Needs

- When giving the 2-minute reminders for each section of writing, provide alternatives to auditory information and support self-regulation by using a visual timer. (MMR, MME)
- For ELLs: Before completing Part 4 of the Sun and Moon Student Response Sheet, briefly review the Mini-Language Dive from Work Time A. Remind students that they discussed the central message of Sun and Moon. For heavier support, invite students to use the sentence frame: "Moon learned to enjoy ____ things that came to life in ____."
- For ELLs: Prepare students for the task by displaying and reviewing a student's *Papa, Please Get the Moon for Me* Student Response Sheet completed in Lesson 9. Tell students they will now complete a similar activity, but this time they will think about the text *Sun and Moon*.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Tell students they are now going to consider why the author may have written *Sun and Moon*.
- Direct students' attention to the **Unit 1 Guiding Question anchor chart** and complete the first column with the book title.
- Follow the same routine established in Lesson 9 to complete the three columns, culminating in a Think-Pair-Share for the third column:

"Why do you think the author wrote the book?" (Responses will vary, but may include: to imagine what the sun and moon might think about, and/or to describe the wonderful things that happen on earth at night.)
- If productive, cue students to expand the conversation by saying more:

"Can you say more about that?" (Responses will vary.)
- Cold call two or three students to share out their ideas.
- As students share out, capture their responses on the anchor chart.
- Reread the new information added to the anchor chart about Sun and Moon, reading from left to right across the chart.
- As time permits, invite students to complete the Moon Movement routine to close out the lesson.

Meeting Students' Needs

- As students Think-Pair-Share, provide options for expression and communication by inviting them to act out an interview. Partner A can ask interview questions ("What inspired you to write this book?") and partner B can pretend to be the author. Then partner A and partner B can switch roles. (MMAE)
- For ELLs: Review the learning targets introduced in Work Time A. Ask students to give specific examples of how they worked toward achieving them in this lesson. Invite students to rephrase the learning targets now that they have more experience recalling major events and describing the central message. (Example: I can describe how Lindsey Yankey wanted to tell us that exciting things happen under the moon.)

Lesson 12: Focused Read-aloud and Retelling, Session 1: *Why the Sun and the Moon Live in the Sky*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1e:** Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can answer questions about key details from *Why the Sun and the Moon Live in the Sky*. (RL.1.1, RL.1.2, RL.1.7, SL.1.1, SL.1.2)
- I can describe the characters, setting, and major events from *Why the Sun and the Moon Live in the Sky*. (RL.1.3, W.1.8, L.1.6)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Literature Checklist to track students' progress toward RL.1.1, RL.1.2, RL.1.3, and RL.1.7 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Song and Movement and Language: “Sun, Moon, and Stars” Version 2 Song (5 minutes)

2. Work Time

- A. Focused Read-aloud, Session 1: *Why the Sun and the Moon Live in the Sky* (20 minutes)
- B. Role-Play: Character and Setting, Pages 7–17 (15 minutes)
- C. Independent Writing: *Why the Sun and the Moon Live in the Sky* Response Sheet, Parts I and II (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows the pattern of Lesson 8. It is the first of two lessons in which students engage in a focused read-aloud of *Why the Sun and the Moon Live in the Sky*. Students use the text and illustrations to ask and answer questions about the characters, setting, events, and central message/lesson in the story.
- In Work Time A, students are invited to place the Story Element board icons onto the Story Elements board. This gradual release of responsibility puts the importance of tracking story elements onto the students and off of the teacher.
- This lesson introduces the use of puppets during the Role-Play protocol, which adds the element of play and serves as a vehicle to introduce the idea of respecting the environment through hands-on practice. Students also work in triads for the first time during the protocol. Both of these changes help to keep the protocol fresh, interesting, and engaging for students. Navigating this different kind of grouping may take more time, so anticipate reallocating some instructional time if necessary.
- If possible, provide students access to the text, *Why the Sun and the Moon Live in the Sky* by Elphinstone Dayrell, during the K-2 Labs and K-2 Reading Foundations Skills Block.

How this lesson builds on previous work:

- During the Opening, students review the “Sun, Moon, and Stars” Version 2 song.
- In Lessons 10–11, students created a Story Elements board for *Sun and Moon*. In this lesson, they begin a new board for *Why the Sun and the Moon Live in the Sky*.
- Students continue to use the Role-Play protocol, with the introduction of triad grouping and puppets.
- Students continue the routine of responding to the focused read-aloud in writing using the *Why the Sun and the Moon Live in the Sky* response sheet.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- The introduction of puppets in Work Time B may be exciting for students. Be sure to set ground rules and parameters for how students should use these role-playing tools—for example, modeling how and where to put puppets away in the classroom.
- Some students may need additional support with their oral language during the role-play. Look for opportunities to support students' oral language as they practice role-playing by providing sentence stems or mimed actions.
- Support students in their transfer of oral rehearsal into writing before and during Work Time C by referring back to the Story Elements board.

Down the road:

- In the next lesson, students will continue using the puppets to enhance the Role-Play protocol. Continue to uphold high expectations for using the puppets in the next lesson.
- Throughout this unit, students repeatedly return to texts to ask and answer questions about the characters, setting, events, and central message of the story. In Lessons 14–15, students will complete the Unit 1 Assessment by completing all parts of the response sheet for *Kitten's First Full Moon*.

In advance:

- Prepare:
 - Story Elements board by clearing the icons used to track the character(s), setting, and events from *Why the Sun and the Moon Live in the Sky*.
 - Parts I and II of the *Why the Sun and the Moon Live in the Sky* response sheet on clipboards for Work Time C.
- Strategically group students into triads for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Review the Role-Play and Back-to-Back and Face-to-Face protocols. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, “Sun, Moon, and Stars” Version 2 song, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Video record students as they sing the complete “Moon” song to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.6, 1.I.C.10, and 1.I.C.12

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and practice oral language by acting out key events from the text *Why the Sun and the Moon Live in the Sky*.
- ELLs may find it challenging to comprehend parts of the text because it contains some challenging academic language, and the class will not examine it as closely as other read-alouds. Stop often to check for comprehension. Encourage students to look closely at the illustrations and provide additional sketches to help determine the meaning of the text. Consider guiding students through the Mini Language Dive during Work Time A.

Levels of support

For lighter support:

- During Work Time B, challenge students to use language from the unit's Language Dives and vocabulary from the text as they act out events from *Why the Sun and the Moon Live in the Sky*. (Example: "I overflowed the top of the roof. I was forced to go up into the sky.")
- During Work Time C, as students complete the response sheet, encourage those who have received heavy support with the activity to work more independently.
- During the Mini Language Dive, challenge students to generate questions about the sentence before asking the prepared questions. Example: "What questions can we ask about this sentence? Let's see if we can answer them together."

For heavier support:

- During Work Time B, empower students to ask their partners for help if they are not sure what to say as they act out events from *Why the Sun and the Moon Live in the Sky*. Encourage them to say, "Line," if they feel stuck. Their partners can then suggest something for them to say.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students are introduced to puppets for use during the Role-Play protocol. Some students will need additional support in recognizing how to care for the puppets and use them purposefully. Provide alternatives to auditory information by inviting students to demonstrate what it looks like and sounds like to care for the puppets.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas about *Why the Sun and the Moon Live in the Sky* with a partner. Some students may need additional support with discussing story elements. As students talk with a partner, provide options for expression and communication by using prompts and sentence frames.
- **Multiple Means of Engagement (MME):** During the Closing activity, give students specific, positive feedback on how hard they have worked to become

effective learners. Foster a sense of community and provide options for physical action by inviting students to give themselves a special applause.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- character, setting, moon, sun (L)
- sky, earth (T),

Materials

- ☒ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ☒ Story Elements board (blank; added to during Work Time A)
- ☒ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ☒ *Why the Sun and the Moon Live in the Sky* (one to display; for teacher read-aloud)
- ☒ Story Elements Board Icons: *Why the Sun and the Moon Live in the Sky* (two; added to Story Elements board during Work Time A)
- ☒ Story Elements Board: *Why the Sun and the Moon Live in the Sky* (answers, for teacher reference)
- ☒ Sun, Moon, and Stars Word Wall (begun in Lesson 1)
- ☒ Working to Become Ethical People anchor chart (begun in Lesson 4; added to during Work Time B; see supporting materials)
- ☒ *Why the Sun and the Moon Live in the Sky* puppets (one per student)
- ☒ Role-Play Protocol anchor chart (begun Lesson 4)
- ☒ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ☒ *Why the Sun and the Moon Live in the Sky* response sheet (one per student and one to display)
- ☒ Pencils (one per student)
- ☒ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)

Opening

A. Song and Movement and Language: “Sun, Moon, and Stars” Version 2 Song (5 minutes)

- Direct students to sit in a circle around the whole group meeting area.

- Display the **“Sun, Moon, and Stars” song** and invite students to sing and move along with you as you sing the complete song in the present tense.
- If time permits, repeat the song in the past tense and in the future tense.
- Provide students’ with specific, positive feedback on their ability to engage with the song and movement.

Meeting Students’ Needs

- Provide differentiated mentors by seating students who are less comfortable singing next to students who may be more comfortable. (MMAE)
- For ELLs: Before singing the “Sun Moon and Stars” song using the past and present tenses, ask students to identify the words must change to correctly sing it in the past and future tenses, respectively. If time allows, use the *will* cards created for Lesson 9 to support students with the correct word order for the future tense.

Work Time

A. Focused Read-aloud, Session 1: *Why the Sun and the Moon Live in the Sky* (20 minutes)

- Direct students’ attention to the posted learning targets and read them aloud:
 - “I can answer questions about key details from *Why the Sun and the Moon Live in the Sky*.”**
 - “I can describe the characters, setting, and major events from *Why the Sun and the Moon Live in the Sky*.”**
- Remind students that they will work toward meeting these learning targets during the focused read-aloud today.
- Direct students’ attention to the **Story Elements board** and tell them that today, volunteers will come up and help add icons to the board. As students engage with the text, use the **Reading Literature Checklist** to track their progress.
- Display ***Why the Sun and the Moon Live in the Sky*** and remind students that, as in previous lessons, they will use a signal to show when they see or hear a character introduced in the story. Demonstrate the signal (thumbs-up, pat your head, touch your toes, etc.).
- Draw students’ attention back to the book and read aloud pages 1–12 slowly, fluently, with expression, and without interruption, looking for students to use the designated signal.
- Pause at page 13 and ask:
 - “Who are the characters?” (*Sun, Moon, and Water*)**
- Invite a student volunteer to come up and place the **Story Elements Board Icons: *Why the Sun and the Moon Live in the Sky*** for Sun, Moon, Water on the Story Elements board. Refer to **Story Elements Board: *Why the Sun and the Moon Live in the Sky* (answers, for teacher reference)** as necessary.
- Invite students to turn and talk with an elbow partner:
 - “As you look carefully at the illustration, what details help you understand the setting?” (*huts or houses made of grass, a pathway, people in costumes, etc.*)**
- Cold call a few students to share details of what they see.

- Ask:
“Based on these details, when and where is this story taking place?” (a long time ago in a village or small town on earth)
- Cold call a few students to share out.
- Invite a student volunteer to come up and place the Story Elements board icon for village on the board.
- Direct students’ attention to the **Sun, Moon, and Stars Word Wall**.
- Briefly review the words: *sun, moon, sky*, and *earth*.
- Draw students’ attention back to the text and read aloud pages 14–19.
- Ask:
“What has Water done so far in the story? How is that affecting Sun and Moon?” (Water brought friends to the house and they are filling up the house, so Sun and Moon have no space.)
- Draw students’ attention back to the text and read the remainder of it. Invite students to move their bodies to pretend to be the Moon or the Sun going up in the sky as the read-aloud comes to a close.
- Invite students to turn and talk with an elbow partner:
“At the end of the story, why did Sun and Moon go up into the sky?” (because their house was overflowed with water and there was no room for them)
- Cold call a few students to share out.
- If productive, cue students to listen carefully and seek to understand:
“Who can tell us what your classmate said in your own words?” (Responses will vary.)

Meeting Students’ Needs

- When circulating and listening in to students’ conversations, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: “Sun and Moon went into the sky because ____.”) (MMAE)
- As students share out ideas about why Sun and Moon went up into the sky, offer alternatives to auditory information by writing students’ ideas on chart paper or a white board. Save their ideas to refer to in future lessons. (MMR)
- For ELLs: Mini Language Dive. In this lesson and Lesson 13, ask students about the meaning of the chunks from a key sentence from the *Why the Sun and the Moon Live in the Sky*: “the water very soon overflowed / the top of the roof, /and the sun and moon were forced / to go up into the sky.” Write and display student responses next to the chunks. Point to pictures in the text on display, or quickly sketch and display the compound with water up to the roof and the sun and moon perched on top. Examples:
 - Read the chunks aloud in sequence. Ask:
“What is the meaning of this part of the sentence?” (Responses will vary.)
 - Place your finger on the chunk: *the water very soon overflowed*. Ask:
“What characters is this chunk about?” (water)

- Point to the prefix over- and ask:

“If flowed means the water moved quickly into the compound, what do you think overflowed means?” (moved into and above the compound). Consider demonstrating overflowed with a cup of water under a faucet or too many pencils in a box.

“So, what did the water do?” (The water overflowed.)

- Place your finger on the chunk: *the top of the roof*. Focus student attention on the sketch. Ask:

“Who can point to where the water overflowed?” (Look for students to come up to the display and point to the top of the roof and say the top of the roof. Next to the first sketch, sketch the water overflowing to the top of the roof.)

- Place your finger on the chunk: *and the sun and moon were forced to go*. Focus students' attention on the sketch. Ask:

“What characters is this chunk about?” (the sun and the moon)

“What did the sun and the moon do?” (They were forced to go.)

- Place your finger on the chunk: *up into the sky*. Focus students' attention on the sketch. Ask:

“So, the water overflowed the top of the roof. Who can point to where the sun and moon were forced to go?” (Look for students to come up to the display and point to the sky above the roof and say up into the sky. Next to the second sketch, sketch the sun and moon in the sky above the roof.)

“Who forced the sun and moon up into the sky?” (the water)

“We'll talk about these chunks again in Lesson 13. Before then, think about how these chunks help us understand the story.”

Work Time

B. Role-Play: Character and Setting, Pages 7–17 (15 minutes)

- Direct students' attention to the posted learning targets and reread the second one aloud:

“I can describe the characters, setting, and major events from Why the Sun and the Moon Live in the Sky.”

- Direct students' attention to the **Working to Become Ethical People anchor chart** and quickly review it.
- Tell students that we know how to show, to each other, the habit of respect from the Working to Become Ethical People anchor chart, but we can also show respect for our classroom environment by taking care of the things and space of our classroom.
- With excitement, share with students that today they will use a new retelling tool during the Role-Play protocol: puppets!
- Display each **Why the Sun and the Moon Live in the Sky puppet** and invite students to call out the names of the characters in a choral response.
- Invite students to turn and talk with an elbow partner:

“How can we work to become effective learners and care for the puppets?” (use them carefully so they do not break, put them away correctly, share nicely with each other, etc.)

- Move students into pre-determined triads and guide them through the Role-Play protocol with pages 7–17 of *Why the Sun and the Moon Live in the Sky*. Review using the **Role-Play Protocol anchor chart** as necessary (Refer to the Classroom Protocols document for the full version of this protocol) and track their progress with the **Speaking and Listening Checklist** for SL.1.1 and SL.1.2.
- Give students specific, positive feedback on their ability to show care for their environment. (Example: “Angela and Eliot showed how to be effective learners with respect to their environment when Eliot dropped his sun puppet and Angela very carefully picked it up and handed it to him.”)

Meeting Students' Needs

- As students share ideas for how to care for the puppets, provide alternatives to auditory information by inviting students to demonstrate what it looks like and sounds like to care for the puppets. (MMR)
- For ELLs: To provide heavier support, consider inviting more advanced proficiency students to create a word bank that students can use to talk about showing respect for the puppets. (Examples: carefully/put away/share)
- For ELLs: Create groups with varying levels of language proficiency. The students with greater language proficiency can serve as models in the group, initiating discussions and providing implicit sentence frames. If possible, consider grouping students who speak the same home language together to help one another interpret and comprehend the role-play in their home languages.

Work Time

C. Independent Writing: *Why the Sun and the Moon Live in the Sky* Response Sheet, Parts I and II (15 minutes)

- Tell students that now they are going to write what they know about the characters and setting of *Why the Sun and the Moon Live in the Sky*, just as they did in Lessons 8 and 10.
- Distribute prepared clipboards with *Why the Sun and the Moon Live in the Sky* response sheets and pencils and follow the same routine established in Lessons 8 and 10 to complete Parts I and II.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). If students need additional support generating ideas, invite them to work in a small group with support and refer to the Story Elements board from Work Time A.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up Part II. Signal all students to stop working through the use of a designated sound.
- Collect students' response sheets.

Meeting Students' Needs

- When giving the 2-minute reminders for each section of writing, provide alternatives to auditory information and support self-regulation by using a visual timer. (MMR, MME)
- For ELLs: Students who need heavier support may have trouble writing their thoughts. Help them identify key elements of the response sheet and allow them to repeat words and phrases. For example, if a student wrote or pointed to *generous* in Part 2, point to it and say: "The sun was generous because he was building a huge compound in which to entertain his friend." Encourage the student to repeat the sentence and then write each word as he or she repeats it again.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Invite students to move back into a circle around the whole group meeting area.
- Focus students on the Working to Become Ethical People anchor chart. Tell them they are going to use the Back-to-Back and Face-to-Face protocol to share one way they showed progress toward this habit of character during the lesson. Remind students that they used this protocol in the past and review as necessary, using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Guide students through the protocol using the following question:
"How did you work to become an effective learner for yourself, your classmates, and the classroom environment during today's lesson?" (Responses will vary.)
- Invite students to return to their seats and engage in a whole group discussion regarding their responses as time permits.
- If productive, cue students to listen carefully and seek to understand:
"Who can tell us what your classmate said in your own words?" (Responses will vary.)
- Give students specific, positive feedback on making progress toward becoming effective learners. (Example: "Nora, I heard you say you showed Working to Become Effective Learners for others when you moved over to make room for Shawn in the circle.")
- Tell students that in the next lesson, they will finish their focused read-aloud of *Why the Sun and the Moon Live in the Sky* in preparation for the unit assessment.

Meeting Students' Needs

- When discussing working toward becoming effective learners with the whole class, foster a sense of community and provide options for physical action by inviting students to join you in a special applause (e.g., silent cheer, firecracker, hip-hip hooray). (MMAE, MME)
- For ELLs: Invite students who need lighter support to suggest sentence frames to expand ways for students to express themselves. (Examples: "I heard others____, so I saw respect today." "I saw others ____, so I saw respect today." "I saw ____ taking care of others by ____.")

Lesson 13: Focused Read-aloud and Retelling, Session 2: *Why the Sun and the Moon Live in the Sky*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can retell major events from *Why the Sun and the Moon Live in the Sky*. (RL.1.1, RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6)
- I can describe the central message of *Why the Sun and the Moon Live in the Sky*. (RL.1.2, W.1.8, SL.1.1)

Ongoing Assessment

- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).
- During Work Time C, circulate and observe students individually writing their *Why the Sun and the Moon Live in the Sky* response sheet. At the end of the lesson, collect students' writing samples to check progress toward W.1.8.

Agenda

1. Opening

- A. Song and Movement and Language: “Sun, Moon, and Stars” Song and Moon Movement Routine (5 minutes)

2. Work Time

- A. Focused Read-aloud, Session 2: *Why the Sun and the Moon Live in the Sky* (15 minutes)
- B. Role-Play: Beginning, Middle, and End (15 minutes)
- C. Independent Writing: *Why the Sun and the Moon Live in the Sky* Response Sheet, Parts III and IV (20 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the second of two lessons in which students engage in a focused read-aloud of *Why the Sun and the Moon Live in the Sky*. Students use the text and illustrations to ask and answer questions about the characters, setting, and events in the story. Similar to Lesson 12, they add icons to the Story Elements board. They then complete Parts III and IV on their response sheet, dealing with the text’s central lesson/message.
- This is the final lesson where students practice independently writing in response to text before the unit assessment. Encourage students to be confident and independent as they work toward mastery of RL.1.2, RL.1.3, RL.1.7, and W.1.8.
- Students participate in the Role-Play protocol in the same groups as in the previous lesson.
- In the Closing, students re-engage with the Unit 1 guiding question by briefly reviewing the anchor chart and then self-assessing their ability to meet the learning targets.

How this lesson builds on previous work:

- Students complete Parts I and II of the response sheet in Lesson 12. In this lesson, they complete Parts III and IV.
- Students complete the Story Elements board for *Why the Sun and the Moon Live in the Sky* by adding key details from the beginning, middle, and end of the story.
- Students continue to use the Role-Play protocol (from Lesson 4) in groups of three and with puppets (from Lesson 12) to retell the major events of the story.
- Continue to use Goal 1 and 2 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- This lesson continues to build on the concept of central lesson/message as a story element. Students are asked to write and draw about the central message of *Why the Sun and the Moon Live in the Sky* during Work Time C. Have a plan in place for students who may need more time and practice understanding and writing about the central lesson.

The Sun, Moon, and Stars

- The continued use of puppets in Work Time B may be exciting for students. Be sure to uphold the ground rules and parameters established in Lesson 12 for how students should use these role-playing tools.
- The continued use of puppets in Work Time B may be exciting for students. Be sure to uphold the ground rules and parameters established in Lesson 12 for how students should use these role-playing tools.

Down the road:

- This is the final lesson in which students will practice completing all parts of the response sheet before completing it with the text *Kitten's First Full Moon* for the Unit 1 Assessment.

In advance:

- Prepare:
 - Story Elements board icons for the beginning, middle, and end.
 - Parts III and IV of the *Why the Sun and the Moon Live in the Sky* response sheet on clipboards for Work Time C.
- Review the Role-Play and Sit, Kneel, Stand protocols. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, “Sun, Moon, and Stars” Version 2 song, Moon Movement chart, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Video record students as they sing the complete Moon Movement routine to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Video record students role-playing to review with students in later lessons as a reminder of what happened. Most devices (cellphones, tablets, laptop computers) come equipped with free video recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.6, 1.I.C.10, and 1.I.C.12

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing opportunities to deepen comprehension and practice oral language by acting out key events from the text, *Why the Sun and the Moon Live in the Sky*. This will help prepare them with the remainder of the lesson and the unit assessment.
- ELLs may find it challenging to recall, identify, and sequence major events in a story. In preparation for the Unit 1 Assessment, consider spending additional

time practicing this skill. See “Levels of support” below and Meeting Students’ Needs column for details.

Levels of support

For lighter support:

- During Work Time B, challenge students to use language from the unit’s Language Dives and vocabulary from the text as they act out events from *Why the Sun and the Moon Live in the Sky*. (Example: “I overflowed the top of the roof. I was forced to go up into the sky.”)

For heavier support:

- During Work Time B, empower students to ask their partners for help if they are not sure what to say. Encourage them to say, “Line,” if they feel stuck. Their partners can then suggest something for them to say.
- Before Work Time C, practice sequencing events by creating cards with illustrations of major events in familiar stories from Module 1. Invite students, in partners or as a whole class, to sequence each event. Prompt students to describe the sequence using the words *first*, *next*, and *finally*.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students continue to use puppets during the Role-Play protocol. Some students will need additional support in remembering how to care for the puppets and use them purposefully. Provide alternatives to auditory information by inviting students to demonstrate what it looks like and sounds like to care for the puppets.
- **Multiple Means of Action & Expression (MMAE):** During independent writing, some students may get restless or tired. Provide options for physical action by inviting students to join you in a quick movement break after they complete each section of writing.
- **Multiple Means of Engagement (MME):** Students have had multiple opportunities to learn and practice the “Sun, Moon, and Stars” song and Moon Movement routine. Some students may benefit from opportunities to be seen as a peer model. Foster community by inviting a few students to help you demonstrate the motions for the song and movement routine.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- character, setting, moon, sun (L)
- sky, earth (T)

Materials

- ✓ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ✓ Moon Movement chart (from Lesson 10; one to display)
- ✓ Story Elements board (begun in Lesson 12; added to during Work Time A)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Why the Sun and the Moon Live in the Sky* (one to display; for teacher read-aloud)
- ✓ Story Elements Board Icons: *Why the Sun and the Moon Live in the Sky* (from Lesson 12; three; added during Work Time A)
- ✓ Story Elements Board: *Why the Sun and the Moon Live in the Sky* (from Lesson 12; answers, for teacher reference)
- ✓ *Why the Sun and the Moon Live in the Sky* puppets (from Lesson 12; one per student)
- ✓ Working to Become Ethical People anchor chart (begun in Lesson 4)
- ✓ Role-Play Protocol anchor chart (begun Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *Why the Sun and the Moon Live in the Sky* response sheet (from Lesson 12; one per student)
- ✓ Pencils (one per student)
- ✓ Sit, Kneel, Stand Protocol anchor chart (begun in Module 1)

Opening

A. Song and Movement and Language: “Sun, Moon, and Stars” Song and Moon Movement Routine (5 minutes)

- Display the **“Sun, Moon, and Stars” Version 2 song** and **Moon Movement chart**.
- Invite students to sing and move along to the “Sun, Moon, and Stars” song with you.
- Refocus the group and guide the class through the Moon Movement routine using the Moon Movement chart.
- Invite students to take a bow at the end and give them specific, positive feedback on their perseverance to practice and learn both the “Sun, Moon, and Stars” song and Moon Movement routine.

Meeting Students’ Needs

- When reviewing the “Sun, Moon, and Stars” song and Moon Movement routine, foster community by inviting a few student volunteers to model the motions to each for the class. (MME)
- For ELLs: To reinforce language, consider verbalizing the movements on the Moon Movement chart as students move through the stretches. To provide lighter support, invite students to verbalize the movements.

Work Time

A. Focused Read-aloud, Session 2: *Why the Sun and the Moon Live in the Sky* (15 minutes)

- Direct students' attention to the posted learning targets and read them aloud:
"I can retell major events from Why the Sun and the Moon Live in the Sky."
"I can describe the central message of Why the Sun and the Moon Live in the Sky."
- Explain to students that today they will revisit the text, *Why the Sun and the Moon Live in the Sky*, to look more closely at the major events and the central message of the story.
- Direct students' attention to the **Story Elements board** and remind them you will ask for volunteers to help keep track of important parts of the story. As students engage with the text, use the **Reading Literature Checklist** to track their progress.
- Display *Why the Sun and the Moon Live in the Sky* and remind students to use the signal, as in previous lessons, to show when they see or hear an important event from the beginning, middle, and end of the story.
- Draw students' attention back to the text and read aloud pages 1–13 slowly, fluently, with expression, and without interruption, paying attention to when students show the signal for an important event.
- Ask:
"What did you hear that helped you understand the important events from the beginning of the story?" (Sun wants Water to visit his and Moon's house, but Water says the house is too small for all of his people. Sun and Moon decide to build a larger house.)
"What did you see in the illustrations that helped you understand the beginning of the story?" (Sun had a small house and was talking with Water. Sun and Moon started building a bigger house.)
- Invite a volunteer to place the **Story Elements Board Icon: Why the Sun and the Moon Live in the Sky** for *beginning* on the Story Elements board. Refer to **Story Elements Board: Sun and Moon (answers, for teacher reference)** as necessary.
- Draw students' attention back to the text and read aloud pages 14–22 fluently and without interruption, paying attention to when students show the signal for an important event.
- Pause at page 23 and flip back through the previous illustrations. Ask:
"What did you see and hear that helped you understand the middle of the story?" (Water came to Sun and Moon's house and brought all of his people and animals. Water filled up the house until there was no more room.)
- Invite a student volunteer to place the Story Elements board icon for middle on the board.
- Draw students' attention back to the text and read the remainder of it, paying attention to when students show the signal for an important event.
- Ask:
"What did you see and hear that helped you understand the end of the story?" (Water overflowed the house. Sun and Moon were forced onto the roof and then up into the sky.)
- Invite a student volunteer to place the Story Elements board icon for end on the board.
- Invite students to turn and talk with an elbow partner:
"Why do the sun and the moon live in the sky, according to the author, Elphinstone

Dayrell?” (They were forced into the sky because water overflowed their home.)

- As students discuss, circulate and listen in. Take note of the ideas they are sharing and identify a few students to share out with the whole group.
- Cold call a few students to share out their ideas.
- Invite students to turn and talk with an elbow partner:

“What was the central message we learned from Why the Sun and the Moon Live in the Sky?” (We learned that people create stories to try to explain things in nature.)

- As students discuss, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Cold call a few students to share out.
- If productive, cue students to expand the conversation by giving an example and to listen carefully and seek to understand:

“Can you give an example?” (Responses will vary.)

“Who can tell us what your classmate said in your own words?” (Responses will vary.)

- Give students specific, positive feedback for collaborating to make sense of the central message in *Why the Sun and the Moon Live in the Sky*. (Example: “Jaime and Tyrese were unsure of the message, but they talked through their ideas together and asked for help when they needed it.”)

Meeting Students' Needs

- When circulating and listening in during the turn and talk, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: “The central message of *Sun and Moon* is _____.”) (MMAE)
- As students share out ideas about the story’s central message, offer alternatives to auditory information by writing students’ ideas on chart paper or a white board. Save their ideas to refer to in future lessons. (MMR)
- For ELLs: Practice sequencing events by prompting students to discuss some of the important events that take place each day at school. (Example: “First, we have morning message. Next, we eat lunch. Last, we line up to go home.”)
- For ELLs: Mini Language Dive. Continue the discussion from Lesson 12 of the meaning of the chunks from a key sentence from *Why the Sun and the Moon Live in the Sky*: “the water very soon overflowed / the top of the roof, / and the sun and moon were forced / to go up into the sky.”
 - Briefly review the meaning of each chunk.
 - Read the chunks together, in sequence. Ask:

“Now what do you think is the meaning of this part of the sentence?” (The sun and moon had to move into the sky because the water filled the compound.)

“In the last lesson, I asked you to think about how these chunks help us understand the story. What are your ideas?” Tell students you will give them time to think and discuss with their partner. (These chunks help us understand that the overflowing water is the reason that the sun and moon live in the sky.)

“And how do these chunks help us understand the central message of the story?” Tell

students you will give them time to think and discuss with their partner. (They help explain things in nature.)

“Close your eyes and imagine water came into our classroom. It very soon overflowed our classroom floor. Where would you be forced to go?” To provide heavier support, post: “The water very soon overflowed our classroom floor, and I was forced to go ____.” (Look for students to say they would be forced onto the chairs or desks, or out to the playground.)

Work Time

B. Role-Play: Beginning, Middle, and End (15 minutes)

- Move students into the same triads from Lesson 12 and distribute the ***Why the Sun and the Moon Live in the Sky*** puppets.
- Use the routine established in the first half of the module to review the first learning target and the **Working to Become Ethical People anchor chart** with students and guide them through the Role-Play protocol for the following pages of *Why the Sun and the Moon Live in the Sky*. Review the **Role-Play Protocol anchor chart** as necessary (Refer to the Classroom Protocols document for the full version of this protocol) and track their progress with the **Speaking and Listening Checklist** for SL.1.1 and SL.1.2.
 - Pages 7–15
 - Pages 16–21
 - Pages 22–27
- Refocus whole group. Ask students to carry their puppets with respect and care and carefully put them away in the designated place.
- Provide specific feedback around students’ ability to show respect for their environment. (Example: “I saw Jin show respect today when he saw a friend waving the puppet in the air and reminded his friend to hold the puppet carefully.”)

Meeting Students’ Needs

- Before students work with the puppets, remind them of their ideas for how to care for the puppets. Provide alternatives to auditory information by inviting students to demonstrate what it looks like and sounds like to care for the puppets. (MMR)
- For ELLs: If students struggle to put words to their ideas, remind them of the word or concept they recalled and have them repeat it. Prompt them to repeat the word or sentence back after scribing it.

Work Time

C. Independent Writing: *Why the Sun and the Moon Live in the Sky* Response Sheet, Parts III and IV (20 minutes)

- Tell students that now they are going to write what they know about the major events and central message of *Why the Sun and the Moon Live in the Sky*, just as they did in Lessons 9 and 11.

The Sun, Moon, and Stars

- Distribute prepared clipboards with ***Why the Sun and the Moon Live in the Sky*** response sheets and pencils and follow the same routine established in Lessons 9 and 11 to complete Parts III and IV.
- Circulate to support students as they write. Encourage them to use classroom resources (Story Elements board, Word Walls, high-frequency word lists, and alphabet or letter sound combination charts).
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up Part IV. Signal all students to stop working through the use of a designated sound.
- Collect students' response sheets.

Meeting Students' Needs

- After students complete each section, provide options for physical action by inviting students to engage in a quick stretch break. (MMAE)
- For ELLs: Invite students who need heavier support to identify key elements of the response sheet. Consider inviting students who need lighter support to provide words and phrases that the student who needs heavier support can repeat and write into the sheet. For example, if a student wrote or drew the sun and the moon up in the sky in Part 3, "End," another student might point to it and say, "In the end, the sun and the moon were forced up into the sky." Encourage the student who needs heavier support to repeat the sentence and then write each word as he or she repeats it again.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Remind students that the best learning happens when learners check to see how well they are doing and what they can do to be even better. Remind them that this is called "assessing" and that today they will use the Sit, Kneel, Stand protocol to assess their own learning. Remind them that they used this protocol in Module 1 and review as necessary using the **Sit, Kneel, Stand Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Guide students through the protocol using the learning targets.
- Lead the class in a debrief discussion on how the class has rated itself as time allows.
- If productive, cue students to listen carefully and seek to understand:

"Who can tell us what your classmate said in your own words?" (Responses will vary.)

Meeting Students' Needs

- For ELLs: Before introducing the Sit, Kneel, Stand protocol, ask students to rephrase the learning targets with an example of how they retold events and described the central message when reading *Why the Sun and the Moon Live in the Sky*.

This lesson has no new supporting materials.

Lesson 14: Unit 1 Assessment, Part I: Reading and Answering Questions about *Kitten's First Full Moon*

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can ask and answer questions about key details from *Kitten's First Full Moon*. (RL.1.1)
- I can describe the characters, setting, major events, and central message of *Kitten's First Full Moon*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, L.1.6)

Ongoing Assessment

- In Work Time A, collect response sheets from the Unit 1 Assessment as a work sample to demonstrate progress toward RL.1.2, RL.1.3, RL.1.7, W.1.8, and L.1.6. Use the Unit 1 Assessment answer key to evaluate students' progress (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Engaging the Learner: Sun and Moon Movement Routines (10 minutes)

2. Work Time

- A. Unit 1 Assessment, Part I: Reading and Answering Questions about *Kitten's First Full Moon* (25 minutes)
- B. Role-Play: Characters and Setting (10 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (10 minutes)
- B. Engaging the Learner: "Sun, Moon, and Stars" song (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- Throughout the unit, students have practiced asking and answering questions about a text (RL.1.1); retelling texts by identifying and describing a text’s characters, setting, major events, and central message (RL.1.2 and RL.1.3); and using a text’s illustrations and key details to describe characters, setting, and major events (RL.1.7). The unit assessment in Lessons 14–15 provides students an opportunity to demonstrate progress toward these skills.
- At this point in the school year, students should be able to write one or two complete sentences in response to the prompts in the unit assessment. Although this is a formal assessment of several reading literature standards, students should experience the lesson as routine. Do not overemphasize the assessment; instead, use this as an opportunity to continue to gather meaningful data.
- During the close read-aloud, students discuss answers to questions about character and setting with a partner. Even though this is an assessment, offering students the opportunity throughout the read-aloud for oral processing honors the learning needs of young children, acting as a support for recall, synthesis, and information processing. The oral processing should be done without teacher guidance and intervention as it is not intended to be a guided discussion; rather, it is an opportunity for students to recall and practice communicating the information they will need to put together in a more cohesive way in writing.
- Note that *Kitten’s First Full Moon* is the story of a kitten who mistakes the moon and its reflection for bowls of milk. In the end, the kitten drinks from a real bowl of milk. The story does not explain the kitten’s mistake, and some students may miss this important detail during the assessment. Consider explicitly pointing out the real bowl of milk in the story and the kitten’s mistake.
- The unit assessment is conducted over the course of two lessons. Breaking up the assessment in such a way allows students multiple opportunities to hear the text and discuss it with their classmates. Additionally, it gives students ample time to complete the independent writing portions of the assessment.
- The pages of *Kitten’s First Full Moon* are not numbered. For instructional purposes, the page that begins with “It was Kitten’s first full moon” should be considered page 1 and all pages thereafter numbered accordingly.

How this lesson builds on previous work:

- In this lesson, students demonstrate their ability to ask and answer questions about a text being read aloud; identify and describe that text’s characters, setting, and major events; and retell the story of that text, including its central message.
- Similar to Lessons 8–13, students track characters, setting, and major events using the Story Elements board. They also use the Role-Play protocol to better understanding the text and its central message.
- To balance the rigor and challenge of listening to a new text read aloud and completing an assessment based on the text, students engage in several familiar routines from previous lessons, such as the Moon Movement routine and the “Moon” song.

Areas in which students may need additional support:

- Students may need additional time to complete the Unit 1 Assessment. Consider your students' comfort and capabilities with independent writing and reallocate instructional time to provide more time for the assessment as necessary.
- Some students may need additional support completing the independent writing portion of the Unit 1 Assessment. Consider providing those students with a written sentence frame: "I think Kitten is _____ because I see _____."

Down the road:

- Students will complete the second half of the Unit 1 Assessment in the next lesson.

In advance:

- Strategically pair students for the Role-Play protocol in Work Time B.
- Prepare:
 - Story Elements Board: *Kitten's First Full Moon* by clearing the icons used to track the characters, setting, and events in *Why the Sun and the Moon Live in the Sky*.
 - Story Elements board icons for character and setting (see supporting materials).
 - *Kitten's First Full Moon* chart: Write the title on chart paper and, using an extra copy of the text, cut out the pictures from pages 6, 11, 12, 14, 18, and 19 and attach to the chart.
 - One set of *Kitten's First Full Moon* puppets per pair of students by copying onto cardstock and attaching to popsicle sticks.
 - Unit 1 Assessment response sheet on clipboards for Work Time A.
- Review the Role-Play and Sit, Kneel, Stand protocols. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning targets, Sun Movement chart, Moon Movement chart, "Moon" song, Moon Movement chart, and applicable anchor charts (see materials list).

Technology & Multimedia**Consider using an interactive white board or document camera to display lesson materials.**

- If students were video recorded participating in the Sun and Moon Movement routines during the Openings in Lessons 2 and 13, consider replaying these recordings to remind students of the process.
- If you recorded students participating in the Role-Play protocol with puppets in Lesson 13, play this video for them to remind them of what to do.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.6, 1.I.C.10, and 1.I.C.12

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in previous lessons, including a response sheet about story elements.
- ELLs may find the assessment challenging, as it is a big leap from the heavily scaffolded classroom interaction. ELLs will be asked not only to independently apply cognitive skills developed throughout the unit, but to independently apply new linguistic knowledge as well.
- Make sure that ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the skill being assessed. See additional support in the lesson.
- After the assessment, ask students to discuss what was easiest and what was most difficult on the assessment, and why. In future lessons, focus on the language skills that will help students address these assessment challenges.
- Consider inviting enthusiastic ELLs to practice the Sun and Moon Movement routines and the “Moon” song with gestures before class, and then lead the group in Opening A and Closing and Assessment B. This sort of activity can foster learning, trust, and equity.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, student volunteers lead the group through the motions of both the Sun and Moon Movement routines. Some students will benefit from both visual and auditory cues during these routines. Provide alternatives to visual information by inviting an additional student volunteer to help by giving verbal directions as the class engages in the Sun and Moon Movement routines.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. During the assessment, vary methods for fine motor responses by offering students options for drawing utensils, writing tools, and scaffolds.
- **Multiple Means of Engagement (MME):** When discussing assessments with students, provide feedback that is oriented toward mastery rather than relative performance. Focus on effort and improvement in order to build confidence and minimize risk.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- character, setting, central message (L)

Materials

- ✓ Sun Movement chart (from Lesson 2; one to display)
- ✓ Moon Movement chart (from Lesson 2; one to display)
- ✓ *Kitten's First Full Moon* (one to display; for teacher read-aloud)
- ✓ Story Elements board (blank; added to during Work Time A)
- ✓ Story Elements Board Icons: *Kitten's First Full Moon* (three; added to Story Elements board during Work Time A)
- ✓ Story Elements Board: *Kitten's First Full Moon* (answers, for teacher reference)
- ✓ Unit 1 Assessment response sheet (see Assessment Overview and Resources; one per student)
- ✓ Pencils (one per student)
- ✓ *Kitten's First Full Moon* chart (new; teacher-created; see supporting materials)
- ✓ Role-Play Protocol anchor chart (begun in Lesson 4)
- ✓ *Kitten's First Full Moon* puppets (one set per pair)
- ✓ "Sun, Moon, and Stars" Version 2 song (from Lesson 8; one to display)

Opening**A. Engaging the Learner: Sun and Moon Movement Routines (10 minutes)**

- Invite students to the whole group area.
- Remind students that throughout the unit they have learned a series of stretches and movements to energize and activate their bodies. Tell them that today they will get a chance to complete both movement routines, one after the other. They will complete several rounds of each movement routine, and a few student volunteers will be able to come to the front of the group to help lead the class through each routine.
- Direct students' attention to the **Sun Movement chart** and invite a student volunteer to lead the class through one round of the Sun Movement routine.
- Repeat the process with one or two more student volunteers as time permits.
- Direct students' attention to the posted **Moon Movement chart** and follow this same process with student volunteers as time permits.

Meeting Students' Needs

- As some student volunteers lead the group through the movements, provide alternatives for visual information by inviting an additional volunteer to give verbal directions. (MMR)

Work Time

A. Unit 1 Assessment, Part I: Reading and Answering Questions about *Kitten's First Full Moon* (25 minutes)

- Refocus students whole group.
- Remind them that they have listened to a number of texts read aloud and have been practicing identifying and describing the characters, setting, major events, and central message of those texts.
- Remind students that a character is a person, animal, or object in a story, play, or movie and the setting is when and where the story takes place.
- Using a total participation technique, invite responses from the group:
“What are some of the texts we have read so far? Who were the characters in those texts? Where did those stories take place?” (Summer Sun Risin’, Why the Sun and Moon Live in the Sky, Sun and Moon, and Papa, Please Get the Moon for Me; the little boy, the sun and moon, Monica and her papa)
- Direct students’ attention to the posted learning targets and read the first one aloud:
“I can ask and answer questions about key details from Kitten’s First Full Moon.”
- Display Kitten’s First Full Moon and read the title aloud.
- Tell students that today they will listen to *Kitten’s First Full Moon* and then, just as they have practiced with the previous texts read aloud, they will identify and describe the story’s character and setting.
- While still displaying the text, read *Kitten’s First Full Moon* aloud slowly, fluently, and with minimal interruption.
- Stop after reading page 10 and invite students to turn and talk with an elbow partner:
“Who is the main character of this story? How would you describe the character?” (Kitten; curious, adventurous, brave, a cat with white fur)
- Refocus students whole group and call one or two students to share out.
- Direct students’ attention to the **Story Elements board** and place the **Story Elements Board Icon:Kitten’s First Full Moon** for character on the Story Elements board. Refer to **Story Elements Board: Kitten’s First Full Moon(answers, for teacher reference)** as necessary.
- Draw students’ attention back to the text and continue reading through page 16.
- Invite students to turn and talk with an elbow partner:
“What is the setting of this story? Where and when does the story take place?” (It takes place outside, on Kitten’s front porch. It takes place in the garden and fields. It takes place at night.)
- Refocus students whole group and call one or two students to share out.
- Place the Story Elements Board Icon:Kitten’s First Full Moon for setting on the Story Elements board.
- Draw students’ attention back to the text and read the remainder of it.
- Tell students that now they will have a chance to write about the character and the setting of *Kitten’s First Full Moon*.
- Distribute prepared clipboards with the **Unit 1 Assessment response sheet** and **pencils**.

- Direct students' attention to Part I of the response sheet and read the prompt aloud:
"Who is the main character?" and "Where does the story take place?"
- Invite students to complete Part I of the Unit 1 Assessment response sheet. Remind them that they should use pictures and words to show their thinking.
- Circulate and support students by reviewing the prompts as needed, asking them to orally articulate their answers before writing, directing them to the Story Elements board, and reminding them to use the High-Frequency Word Wall as a resource as they write.
- Refocus students whole group.
- Display the Kitten's First Full Moon **chart**.
- Tell students they will use the pictures on the *Kitten's First Full Moon* chart to help them complete Part II of the response sheet.
- Invite students to point to Part II on the Unit 1 Assessment response sheet and read the prompt aloud:
"Based on the pictures on the Kitten's First Full Moon chart, which word would you use to describe how kitten is acting? Circle one."
- Read the four word choices aloud and review their definitions as necessary.
- Invite students to circle the word they think best describes how Kitten is acting in the pictures displayed on the *Kitten's First Full Moon* chart.
- Direct students' attention to the blank lines in Part II. Tell students to write one or two sentences to describe how Kitten is acting and to explain what, from the pictures, helped them.
- Offer students this sentence frame if necessary:
"I think Kitten is acting _____ because I see _____."
- Tell students to use the word they chose to describe Kitten to fill in the first blank. Tell students they should explain what, from the pictures, helped them pick those words and write that in the second blank.
- As students write, circulate to support, reminding them of the sentence frame they can use.
- Collect students' response sheets and clipboards and remind them they will complete the remaining parts of the response sheet during the next lesson.

Meeting Students' Needs

- Before students begin the Unit 1 Assessment, emphasize process and effort by discussing the purpose of assessments. Say: "What we are doing today is similar to the response sheets you have been completing, but this is called an *assessment*. The purpose of an assessment is to help me know what you are learning and how well I'm teaching you. It is okay if you are not sure about what to write in your paragraph. That will just help me know what I need to teach you. Just try your best." (MME)
- As students begin the assessment, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). (MMAE)
- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.

- For ELLs: Ensure that ELLs clearly understand all assessment directions. Rephrase directions for them. Monitor during the assessment to see that students are completing the assessment correctly. Stop students who are on the wrong track and make sure they understand the directions.

Work Time

B. Role-Play: Character and Setting (10 minutes)

- Give students specific, positive feedback on their hard work during the assessment. (Example: “I noticed that Taryn and Olivia closely examined the pictures on the *Kitten’s First Full Moon* chart as they completed Part II of their response sheets.”)
- Direct students’ attention to the posted learning targets and read the second one aloud:
“I can describe the characters, setting, major events, and central message of *Kitten’s First Full Moon*.”
- Remind students that the *central message* of a story is the main idea the author is trying to share.
- Tell students that in the next lesson they will be writing and drawing about the major events and the central message, and today they will think about, discuss, and role-play these things with a partner so they better understand them in order to do their best writing.
- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out a few of the major events of *Kitten’s First Full Moon*. Remind them that they have been using this protocol in the past few lessons, and review as necessary using the **Role-Play Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Distribute *Kitten’s First Full Moon* puppets and guide students through the protocol for the following sections of text:
 - Pages 1–2
 - Pages 7–8
 - Pages 11–12
 - Pages 19–22
 - Pages 27–28
- Refocus students whole group and offer them specific, positive feedback on their role-playing. (Example: “I noticed all of you really thinking about what the words of the text were saying so that you could act out exactly what you heard.”)
- Tell students that now that they have acted out the major events in the story, they will think about how these events convey the story’s central message.
- Using a total participation technique, invite responses from the group:
“After rereading and acting out these parts of the text, what do you notice about the moon in this story?” (Kitten thinks it is a bowl of milk and she tries to get it, but she can’t. The moon stays in the same place the whole time.)
“Why couldn’t Kitten get the first bowl of milk she saw?” (The bowl of milk was actually the moon and the moon is in the sky, so Kitten couldn’t get it.)

- Tell students that in the next lesson, they will revisit *Kitten's First Full Moon* and use their thinking from this role-play to help with writing and drawing about the major events from the story.

Closing and Assessment

A. Reflecting on Learning (10 minutes)

- Remind students that they did a lot of great thinking to understand, discuss, and write about the story *Kitten's First Full Moon*.
- Tell students that now they will get a chance to reflect on their work toward meeting the learning targets using the Sit, Kneel, Stand protocol. Remind them that they used this protocol in the previous lesson and review as necessary. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Guide students through the protocol using the learning targets.
- Lead the class in a debrief discussion on how the class has rated itself as time allows. Consider asking the following questions:

“How did you rate yourself on the learning targets? Why?” (Responses will vary.)

“What do you think you need to do next time to do even better?” (Responses will vary.)

Closing and Assessment

B. Engaging the Learner: “Sun, Moon, and Stars” Version 2 song (5 minutes)

- Offer students specific, positive feedback on their hard work during the lesson. (Example: “I noticed that everyone listened very closely during the read-aloud of *Kitten's First Full Moon* so that they could understand many of the key details of the story.”)
- Tell students they will end the lesson singing the “Sun, Moon, and Stars” Version 2 song to celebrate their hard work during this lesson and all the previous lessons.
- Direct students’ attention to the **“Sun, Moon, and Stars” Version 2 song** and invite a student volunteer to lead the class in singing and moving to the song.
- Repeat this process with one or two more volunteers as time permits.

Meeting Students’ Needs

- For ELLs: Before introducing the Sit, Kneel, Stand protocol, ask students to give specific examples of how they worked toward achieving the learning targets in this lesson. Invite students who need lighter support to rephrase the learning targets with an example of how they asked and answered questions about the key details and described elements of *Kitten's First Full Moon*.
- As students practice the song with motions, provide options for expression by singing the song several times in different voices. Invite students to try singing the song in a whisper voice, in a giant voice, and/or in an opera voice. (MMAE)

Lesson 15: Unit 1 Assessment, Part II: Reading and Answering Questions about *Kitten's First Full Moon*

CCS Standards

- **RL.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **RL.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Target

- I can describe the characters, setting, major events, and central message from *Kitten's First Full Moon*. (RL.1.2, RL.1.3, RL.1.7, W.1.8, SL.1.2, L.1.6)

Ongoing Assessment

- In Work Time A, collect Unit 1 Assessment response sheets as a work sample to demonstrate progress toward RL.1.2, RL.1.3, RL.1.7, W.1.8, and L.1.6. Use the Unit 1 Assessment Rubric to evaluate students' progress (see Assessment Overview and Resources).
- During Work Time B, circulate and listen as students discuss and share their growing understanding of the Unit 1 guiding question. (RL.1.2)

Agenda

1. Opening

- A. Song and Movement and Language: "Sun, Moon, and Stars" Version 2 song (5 minutes)

2. Work Time

- A. Unit 1 Assessment, Part II: Reading and Answering Questions about *Kitten's First Full Moon* (30 minutes)
- B. Revisiting the Unit 1 Guiding Question (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- During this lesson, students complete Part II of the Unit 1 Assessment, in which they recount major events from the text and identify and describe the text's central message (RL.1.2, RL.1.3, RL.1.7, W.1.8, L.1.6). At this point in the school year, students should be able to write one or two complete sentences in response to the prompts in the assessment. Do not overemphasize the assessment; instead, use this as an opportunity to continue to gather meaningful data.
- Similar to Lesson 14, students discuss their answers to questions about major events and the central message during the read-aloud. Providing this opportunity to orally process information supports students in recalling and synthesizing information.

How this lesson builds on previous work:

- Similar to Lesson 14, to balance the rigor and challenge of listening to a new text read aloud and completing an assessment based on the text, students revisit and engage in several activities from throughout the unit.

Areas in which students may need additional support:

- Students may need additional time to complete the Unit 1 Assessment. Consider your students' comfort and capabilities with independent writing and reallocate instructional time as necessary.

Down the road:

- Students will continue their study of the sun, moon, and stars in the next two units. In Unit 2, students will gain more in-depth understanding of the science content related to the topic. In Unit 3, students will apply their knowledge of narrative texts and their newfound understanding of science content to craft their own narrative about the sun, moon, and stars.

In advance:

- Prepare Unit 1 Assessment response sheets on clipboards for Work Time A.
- Review the Back-to-Back and Face-to-Face protocol. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Post: Learning target, “Sun, Moon, and Stars” Version 2 song, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- If students were recorded singing in the “Sun, Moon, and Stars” Version 2 song during the Openings in Lessons 3 or 12, consider replaying these recordings to remind students of the process.
- Record students as they reflect on respect in the Closing to listen to later to discuss strengths and what they could improve on, or to use as models for the group. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.6, 1.I.C.10, and 1.I.C.12

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in previous lessons, including a response sheet about story elements.
- ELLs may find the assessment challenging, as it is a big leap from the heavily scaffolded classroom interaction. ELLs will be asked not only to independently apply cognitive skills developed throughout the unit, but to independently apply new linguistic knowledge as well.
- Make sure that ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the skill being assessed. See additional support in the lesson.
- After the assessment, ask students to discuss what was easiest and what was most difficult on the assessment, and why. In future lessons, focus on the language skills that will help students address these assessment challenges.
- Consider inviting enthusiastic ELLs to practice the Sun and Moon Movement routines and the “Moon” song with gestures before class, and then lead the group in Opening A and Closing and Assessment. This sort of activity can foster learning, trust, and equity.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** During the Closing, students reflect on how they have demonstrated *respect* throughout the unit. Some students may need additional support in remembering all the ways they have shown respect in Unit 1. Activate background knowledge by posting photographs of students demonstrating respect as they have engaged in the study of sun, moon, and stars.
- **Multiple Means of Action & Expression (MMAE):** Students have a range of fine motor abilities and writing needs. During the assessment, vary methods for

fine motor responses by offering students options for drawing utensils, writing tools, and scaffolds.

- **Multiple Means of Engagement (MME):** When discussing assessments with students, provide feedback that is oriented toward mastery rather than relative performance. Focus on effort and improvement in order to build confidence and minimize risk.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

- N/A

Materials

- ✓ “Sun, Moon, and Stars” Version 2 song (from Lesson 5; one to display)
- ✓ *Kitten’s First Full Moon* (one to display; for teacher read-aloud)
- ✓ Story Elements board (begun in Lesson 14; added to during Work Time A)
- ✓ Story Elements Board Icons: *Kitten’s First Full Moon* (from Lesson 14; three; added during Work Time A)
- ✓ Unit 1 Assessment response sheet (see Assessment Overview and Resources; one per student)
- ✓ Unit 1 Guiding Question anchor chart (begun in Lesson 2; added to in Work Time B; see supporting materials)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)
- ✓ Sun, Moon, and Stars Word Wall (begun in Lesson 1)
- ✓ Working to Become Ethical People anchor chart (begun in Lesson 4)

Opening

A. Song and Movement: “Sun, Moon, and Stars” Version 2 Song (5 minutes)

- Invite students to the whole group area.
- Remind students that throughout the unit they have learned about patterns of the sun, moon, and stars.
- Direct students’ attention to the posted “**Sun, Moon, and Stars**” **Version 2 song** and invite students to join you in singing the song and completing the accompanying movements.
- Repeat the song as time permits and review language standards from previous lessons as needed.

Work Time

A. Unit 1 Assessment, Part II: Reading and Answering Questions about *Kitten's First Full Moon* (30 minutes)

- Refocus students whole group.
- Display ***Kitten's First Full Moon*** and read the title aloud.
- Remind students that in the previous lesson they listened to *Kitten's First Full Moon* and identified and described the character and setting in the story.
- Using a total participation technique, invite responses from the group:
"Who is the main character in Kitten's First Full Moon? Where does the story take place?" (Kitten; outside and night)
- Direct students' attention to the posted learning target and read it aloud:
"I can describe the characters, setting, major events, and central message from Kitten's First Full Moon."
- Tell students that today they will listen to *Kitten's First Full Moon* and then they will describe what happens in the beginning, the middle, and the end of the story.
- While still displaying the text, read *Kitten's First Full Moon* aloud slowly, fluently, and with minimal interruption.
- Stop after reading page 6 and invite students to turn and talk with an elbow partner:
"What happened in the beginning of the story?" (Kitten wanted a bowl of milk.)
- Refocus students whole group and call on one or two students to share out.
- Direct students' attention to the posted **Story Elements board** and place the **Story Elements Board Icon: Kitten's First Full Moon** for beginning on the Story Elements board.
- Draw students' attention back to the text and continue reading through page 16.
- Invite students to turn and talk with an elbow partner:
"What are one or two things that happened in the middle of the story?" (Kitten ran through a field. Kitten climbed a tree.)
- Draw students' attention back to the text and continue reading through page 22.
- Invite students to turn and talk with an elbow partner:
"What are one or two more things that happened in the middle of the story?" (Kitten saw the bowl of milk in the lake. Kitten jumped into the lake.)
- Refocus students whole group and call one or two students to share out.
- Place the Story Elements Board Icon: *Kitten's First Full Moon* for middle on the Story Elements board.
- Draw students' attention back to the text and read the remainder of the text.
- Invite students to turn and talk with an elbow partner:
"What happened at the end of the story?" (Kitten went back home. Kitten saw a bowl of milk on the porch and she drank from it.)
- Refocus students whole group and call one or two students to share out.
- Place the Story Elements Board Icon: *Kitten's First Full Moon* for end on the Story Elements board.
- Using a total participation technique, invite responses from the group:

“What is the central message of this story? Why couldn’t Kitten get the first bowl of milk she saw?” (The bowl of milk was actually the moon.)

- Remind students that just as in the previous lesson, they will have a chance to write and draw about the things they discussed with their partner.
- Distribute prepared clipboards with the **Unit 1 Assessment response sheets**.
- Direct students’ attention to Part III of the Unit 1 Assessment response sheet. Remind them that they should use pictures and words to show their thinking.
- Invite students to point to the first box and write and draw their answers to the prompt: “What happened in the beginning of the story?”
- Repeat this process with the second and third boxes.
- As students write and draw, circulate and support by reviewing the prompts as necessary and directing the students to the Story Elements board as needed.
- Direct students’ attention to Part IV and read the prompt aloud:

“What is the central message of this story?”

- Invite students to use pictures and words to show their answer, using the box in Part IV to draw a picture and writing one or two sentences on the lines at the bottom of the box.
- As students write and draw, circulate to support by repeating the prompt and directing students toward the Story Elements board.
- If necessary, provide an additional question to students to support their writing about the central message:

“Why couldn’t Kitten get the first bowl of milk she saw?”

- Collect students’ response sheets and offer specific, positive feedback on their writing and drawing. (Example: “I noticed that Jeron and Elijah referred back to the Story Elements board while writing to make sure they were recalling the correct details from the story.”)

Meeting Students’ Needs

- Before students begin the Unit 1 Assessment, emphasize process and effort by discussing the purpose of assessments. Say: “What we are doing today is similar to the response sheets you have been completing, but this is called an *assessment*. The purpose of an assessment is to help me know what you are learning and how well I’m teaching you. It is okay if you are not sure about what to write in your paragraph. That will just help me know what I need to teach you. Just try your best.” (MME)
- As students begin the assessment, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). (MMAE)
- In order to minimize distractions during the assessment, vary the level of sensory stimulation as appropriate for individual students (e.g., offering sound-canceling headphones or dividing workspaces). Some students may also need flexibility with the pace of work and length of work sessions. Consider offering time-outs or breaking up the sections of the assessment into separate days or times of day. (MME)

- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.
- For ELLs: Ensure that ELLs clearly understand all assessment directions. Rephrase directions for them. Monitor during the assessment to see that students are completing the assessment correctly. Stop students who are on the wrong track and make sure they understand the directions.

Work Time

B. Revisiting the Unit 1 Guiding Question (15 minutes)

- Refocus students whole group.
- Direct their attention to the **Unit 1 Guiding Question anchor chart** and read it aloud:
“Why do authors write about the sun, moon, and stars?”
- Using a total participation technique, invite responses from the group:
“What did we discover, after reading the various stories, about why authors write about the sun, moon, and stars?” (Authors write about the sun, moon, and stars for a lot of different reasons. Some authors write to explain things about the sun, moon, and stars. Other authors write to imagine or describe things about the sun, moon, and stars.)
- Remind students that because they finished reading another story about the moon, they will add to the Unit 1 Guiding Question anchor chart to show information about that story.
- Tell students they are going to use the Back-to-Back and Face-to-Face protocol to discuss why Kevin Henkes, the author of *Kitten’s First Full Moon*, wrote about the moon. Remind them that they used this protocol in previous lessons, and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of this protocol.)
- Guide students through three rounds of the protocol, each time finding a new partner to answer one of the following questions:
“What are some ways that Kevin Henkes included the moon in his story Kitten’s First Full Moon?” (Kitten saw the moon in the sky. Kitten thought the moon was a bowl of milk. Kitten thought she could get the moon.)
“How did Kevin Henkes describe the moon in this story, or what did the moon look like in this story?” (The moon was big and round, and it was shining bright. The author made the moon look like a bowl of milk.)
“Why do you think Kevin Henkes wrote about the moon in this story?” (to imagine what the moon looks like to a kitten; to imagine what the kitten thinks when she looks at the moon)
- As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group.
- Remind students to make a bridge with their arms after both partners have shared during each round.
- Refocus students whole group and invite them to find their seat in the whole group area.
- Invite a few students to share out.
- As students share out, clarify and capture their ideas on the Unit 1 Guiding Question anchor chart, writing down the language they use as accurately as possible. If possible, model

referring to the Sun, Moon, and Stars Word Wall as a tool to help when spelling content-related words.

Meeting Students' Needs

- For ELLs: Before beginning the Back-to-Back and Face-to-Face protocol, display *Kitten's First Full Moon* and briefly review the Story Elements board, Word Wall, and other unit materials on display. Give students a minute to think about the Unit 1 guiding question to prepare for sharing.

Closing and Assessment

A. Reflecting on Learning (10 minutes)

- Refocus students whole group.
- Offer specific, positive feedback on their reflections of their work toward answering the unit's guiding question. (Example: "We have read and closely studied a lot of texts during this unit to help us better answer the guiding question.")
- Remind students that, in addition to their work answering the unit's guiding question, they have also been focusing on demonstrating respect.
- Direct students' attention to the **Working to Become Ethical People anchor chart**.
- Remind students they have had many opportunities throughout the unit to learn about and show respect. Tell them that now they will get a chance to think about how they showed respect throughout the unit.
- Invite students to turn and talk to an elbow partner:
"How have you shown respect throughout this unit?" (Student responses will vary, but may include: I put away my materials where they belong; I worked with a partner during the role-play; or I took turns during the role-play and made sure my partner had opportunities to speak.)
- As students talk, circulate and listen in. Take note of the ideas they are sharing and identify a few students to share out with the whole group.
- Using a total participation technique, invite responses from the group:
"How have you seen a classmate show respect during this unit?" (Responses will vary.)
- Tell students that you have seen them show respect in many ways and that they will continue to work on this habit in the next unit.
- Tell students that over the next few weeks they will continue learning about the sun, moon, and stars and will read more texts and have more chances to write about, draw, and discuss the sun, moon, and stars.
- Congratulate students on all of their hard work during this unit, including reading and studying a number of different texts, learning about various characters, and finding out why different authors wrote about the sun, moon, and stars!

Meeting Students' Needs

- When reviewing the habit of character respect with students, activate background knowledge by posting photographs of students demonstrating respect throughout the unit on the Working to Become Ethical People anchor chart. Invite students to refer to these photos as they turn and talk to an elbow partner. (MMR)
- When discussing students learning throughout the unit, foster a sense of community and provide options for physical action by inviting the whole class to join in a special applause (e.g., silent cheer, firecracker, hip-hip hooray). (MMAE, MME)
- For ELLs: To provide lighter support, invite students to discuss how showing respect has helped them learn English throughout the unit.

Grade 1: Module 2

Unit 2: Overview and Lessons

Unit 2: Reading to Learn and Writing to Understand: A Study of the Patterns of the Sun, Moon, and Stars

In Unit 2, students delve more deeply into their study of the sun, moon, and stars, focusing specifically on observable patterns in the sky. In this unit, students pivot from reading narrative texts to reading informational texts that build their understanding of the patterns of the sun, moon, and stars. Through a combination of close read-alouds, focused read-alouds, hands-on experiences, authentic writing tasks, and small group discussions, students take on the role of astronomers and learn about these big ideas: The sun and moon appear in different places in the sky during different times of day and year; stars are visible during the night, but not during the day; and patterns of motion of objects in the sky can be described and predicted.

Throughout the unit, students engage in a predictable cycle of instructional activities that include reading a text, engaging in an interactive experience, writing as a class to synthesize understanding, writing independently to answer a specific question, and, finally, engaging in a small group conversation to discuss that question. Students are introduced to the Science Talk protocol and use it to share information and build onto others' ideas. The Unit 2 Assessment is a final Science Talk during which students draw on their reading, note-taking, and discussing from the entire unit as they discuss the Unit 2 guiding question: "What patterns can we observe in the sky?" (SL.1.1a, SL.1.1b, and SL.1.4).

Guiding Questions and Big Ideas

What patterns can we observe in the sky?

- *The sun and moon appear in different places in the sky during different times of day and of the year.*
- *Stars are visible during the night, but not during the day.*
- *Patterns of motion of objects in the sky can be described and predicted.*
- *Scientists use a process of inquiry in order to understand patterns and make predictions and comparisons.*

The 4 T's

TOPIC	TASK
Reading to Learn and Writing to Understand: A Study of the Patterns of the Sun, Moon, and Stars	Science Talk Discussing Observable Patterns in the Sky
TARGETS	TEXT
CCSS explicitly taught and assessed: SL.1.1a, SL.1.1b, SL.1.4	<i>What Makes Day and Night; Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i>

Unit 2 Assessment

Discussing Observable Patterns in the Sky

This formative assessment centers on CCSS ELA SL.1.1a, SL.1.1b, and SL.1.4. Students engage in a Science Talk to discuss possible answers to the unit guiding question: “What patterns can we observe in the sky?” During the conversation, students use sentence starters to share information they have learned and to add on to and say more about explanations from their peers.

Assessment Checklists

Throughout this unit, students independently write observations of the sky in a Sky notebook. These notebooks are collected as evidence of progress toward W.1.8. Teachers also use the Reading Informational Text Checklist to gather data on students’ progress toward RI.1.1, RI.1.2, RI.1.4, RL.1.5, RI.1.6, and RI.1.7, the Language Checklist to gather data on students’ progress toward L.1.1f, L.1.1i, L.1.1j, L.1.5c, and L.1.6, and the Speaking and Listening Checklist to gather data on students’ progress toward SL.1.1a, SL.1.1b, and SL.1.4.

Habits of Character

Social-Emotional Learning Focus

Central to EL Education’s curriculum is a focus on “habits of character” and social-emotional learning. Students work to become effective learners, developing mindsets and skills for success in college, career and life (e.g., initiative, responsibility, perseverance, collaboration); work to become ethical people, treating others well and standing up for what is right (e.g., empathy, integrity, respect, compassion); and work to contribute to a better world, putting their learning to use to improve communities (e.g., citizenship, service).

In this module, students **work to become ethical people**: habits for how we treat others. Throughout Unit 2, students practice the habit of integrity—to do the right thing even when it is hard—as they take more responsibility over their learning by participating in Science Talks in small groups. Students practice using integrity as they stay on task and topic to best enhance their learning even when the teacher is not there to listen to their conversations. Students also continue practicing respect by treating themselves, others, and the environment with care.

Unit-at-a-Glance

This unit is approximately 2.5 weeks or 12 sessions of instruction.

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 1 RL.1.5, RI.1.1, W.1.8, SL.1.2, L.1.1, L.1.1j	Noticing and Wondering: Observing and Asking Questions about the Sun, Moon, and Stars 1. Opening A. Read Aloud: “Elvin, the Boy Who Loved the Sky”, Part 5 (10 minutes) 2. Work Time A. Picture Tea Party Protocol: Pattern Photographs (10 minutes) B. Focused Read-aloud: <i>Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i> , Pages 4-9 (20 minutes) C. Engaging the Scientist: “Observe Sunrise and Sunset” (10 minutes) 3. Closing and Assessment A. Shared Writing: Recording Our Observations and Questions about the Sun, Moon, and Stars (10 minutes)	- I can describe what I observe in pictures and videos of the sun, moon, and stars. (RI.1.1, SL.1.2) - I can ask and record questions about what I notice in pictures and videos of the sun, moon, and stars. (RI.1.1, W.1.8, L.1.1j)	- Use the Reading Literature Checklist to track students’ progress towards RL.1.5. - Use the Reading Informational Text Checklist to assess students’ progress towards RI.1.1.	- Picture Tea Party Anchor Chart - Patterns of the Sun Anchor Chart - Think-Pair-Share Protocol Anchor Chart - Noticing and Wondering Anchor Chart (begun in Unit 1, Lesson 1; added to in Closing)
Lesson 2 RL.1.5, RI.1.1, RI.1.2, RI.1.4, RI.1.7, W.1.8, SL.1.1a, L.1.1f, L.1.5c, L.1.6	Close Read-aloud, Session 1: <i>What Makes Day and Night</i> 1. Opening A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes) 2. Work Time A. Structured Discussion: Introducing the Unit 2 Guiding Question (10 minutes) B. Close Read-aloud, Session 1: <i>What Makes Day and Night</i> , Pages 1-31 (20 minutes) C. Shared Writing: Describing the Sun and the Moon (10 minutes) 3. Closing and Assessment A. Reflecting on Learning (10 minutes)	- I can describe the pattern of light and dark on earth using information from the text <i>What Makes Day and Night</i>. (RI.1.1, RI.1.2, RI.1.4, RI.1.7, W.1.8, SL.1.1a) - I can record my observations about what I notice in pictures and videos of the sun, moon, and stars. (W.1.8, L.1.1f, L.1.6)	- Observe students as they find and use adjectives and make real-life connections with adjectives to track progress towards L.1.1f and L.1.5c. - Use the Reading Literature Checklist to track students’ progress towards RL.1.5. - Use the Reading Informational Text Assessment sheet to track students’ progress towards RI.1.1, RI.1.2, RI.1.4, and RI.1.7	“What We See: The Sun, Moon, and Stars” Poem - Unit 2 Guiding Question Anchor Chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 3 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, W.1.8, SL.1.1a, L.1.1f, L.1.5c, L.1.6	Close Read-aloud, Session 2: <i>What Makes Day and Night</i> 1. Opening A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes) 2. Work Time A. Close Read-aloud Session 2: <i>What Makes Day and Night</i> , Pages 14-15 (20 minutes) B. Back-to-Back and Face-to-Face: Earth’s Rotation (15 minutes) 3. Closing and Assessment A. Shared Writing: Describing the Sun and Moon (10 minutes) B. Reflecting on Learning (5 minutes)	• I can distinguish what I learn from the illustrations and what I learn from the text in the book <i>What Makes Day and Night</i> to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a) • I can record my observations about what I notice in pictures and videos of the sun, moon, and stars. (W.1.8, L.1.1f, L.1.6)	• Observe students as they find and use adjectives and make real-life connections with adjectives to track progress towards L.1.1f and L.1.5c. • Use the Reading Informational Text Assessment sheet to track students’ progress towards RI.1.1, RI.1.2, RI.1.4, and RI.1.7. • Use the Speaking and Listening checklist (SL.1.1) as students engage in the different protocols.	• “What We See: The Sun, Moon, and Stars” poem • <i>What Makes Day and Night</i> Anchor Chart • Back-to-Back, Face-to-Face Anchor Chart
Lesson 4 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, W.1.8, SL.1.1a, L.1.1f, L.1.5c, L.1.6	Close Read-aloud, Session 3: <i>What Makes Day and Night</i> 1. Opening A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes) 2. Work Time A. Close Read-aloud Session 3: <i>What Makes Day and Night</i> , Pages 16-20 (20 minutes) B. Engaging the Scientist: Introducing Integrity and Modeling How the Earth Moves (15 minutes) C. Structured Discussion: Reflecting on Integrity (5 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (10 minutes)	• I can distinguish what I learn from the illustrations and what I learn from the text in the book <i>What Makes Day and Night</i> to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a) • I can record my observations from images and videos of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.6)	• Observe students as they find and use adjectives and make real-life connections with adjectives to track progress towards L.1.1f and L.1.5c. • Observe how students distinguish information from the text and illustrations to track students’ progress towards RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7 and SL.1.1a. • Observe as students’ record observations in the Sky notebook for accurate use of adjectives to describe the sun and moon (W.1.8, L.1.1f)	• “What We See: The Sun, Moon, and Stars” poem • Adjectives Anchor Chart • <i>What Makes Day and Night</i> Anchor Chart • Working to Become an Ethical Person Anchor Chart • Pinky Partners Protocol Anchor Chart • Think-Pair-Share Anchor Chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 5 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, W.1.8, SL.1.1a, L.1.1f, L.1.1i, L.1.6	Close Read-aloud, Session 4: <i>What Makes Day and Night</i> 1. Opening A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes) 2. Work Time A. Close Read-aloud, Session 4: <i>What Makes Day and Night</i> , Pages 24-27 (15 minutes) B. Independent Writing: <i>What Makes Day and Night</i> Notes (15 minutes) C. Shared Writing: Reflecting on Unit 2 Guiding Question (10 minutes) 3. Closing A. Independent Writing: Sky Notebook (10 minutes) B. Shared Writing: Describing the Position of the Sun (5 minutes)	- I can distinguish what I learn from the illustrations and what I learn from the text in the book <i>What Makes Day and Night</i> to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a) - I can record my observations from images and videos of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.6)	- Observe students as they use prepositions for progress towards L.1.1i. - Use the Reading Informational Text Checklist to observe students as they distinguish information they’ve learned from illustrations and from the words in the text. (RI.1.1, RI.1.2, RI.1.4) - Observe as students’ compile individual notes to synthesize learning. (W.1.8, RI.1.2, RI.1.6, RI.1.7)	“Where Are They? The Sun, Moon, and Stars” Poem <i>What Makes Day and Night</i> Anchor Chart - Unit 2 Guiding Question Anchor Chart - Adjectives Anchor Chart
Lesson 6 RI.1.6, RI.1.7, W.1.8, SL.1.1a, SL.1.1b, SL.1.4, SL.1.6, L.1.1f, L.1.1i, L.1.6	Close Read-aloud, Culminating Task: <i>What Makes Day and Night</i> 1. Opening A. Engaging the Learner: “Where Are They? The Sun, Moon and Stars” Poem (5 minutes) 2. Work Time A. Close Read-aloud Culminating Task: <i>What Makes Day and Night</i> , Entire Text (25 minutes) B. Launching Science Talk Protocol (20 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (10 minutes) B. Shared Writing: Describing the Position of the Moon (5 minutes)	- I can participate in a Science Talk about what makes day and night on earth using information from my notes as evidence (RI.1.7, SL.1.1a, SL.1.4, SL.1.6) - I can record my observations from images and videos of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.6)	- Observe students as they use prepositions for progress towards L.1.1i. - Collect student response sheets for the culminating task to use as evidence of progress towards RL.1.1 and RL.1.7. - Use the Reading Informational Text Checklist to observe students as they distinguish information they’ve learned from illustrations and from the words in text. (RI.1.6, RI.1.7) - Use the Speaking and Listening checklist as student participate in the Science Talk protocol to track progress towards SL.1.1b and SL.1.1b.	“Where Are They? The Sun, Moon, and Stars” Poem <i>What Makes Day and Night</i> Anchor Chart - Science Talk Protocol Anchor Chart - Working to Become an Ethical Person Anchor Chart - Adjectives Anchor Chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 7 RL.1.5, RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6	Focused Read-aloud, Session 1: <i>Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i> 1. Opening A. Poem and Movement: “Where Are They? The Sun, Moon, and Stars” Poem Version 2 (10 minutes) 2. Work Time A. Focused Read-aloud: <i>Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i> , Pages 12-15 (20 minutes) B. Engaging the Scientist: Why Does the Moon Seem to Change Shape? (20 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (10 minutes)	- I can distinguish what I learn from the illustrations and what I learn from the text in the book <i>Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i> to describe patterns of the moon. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7) - I can record my observations of images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	- Use the Reading Literature Checklist to track students’ progress towards RL.1.5. - Use the Reading Informational Text Assessment sheet to track students’ progress towards RI.1.1, RI.1.2, RI.1.4, RI.1.6 and RI.1.7. - Collect students’ Sky notebooks as information regarding progress towards W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6.	“Where Are They? The Sun, Moon, and Stars” Poem Version 2 - Prepositions Anchor Chart - Unit 2 Guiding Question Anchor Chart - Patterns of the Moon Anchor Chart - Working to Become an Ethical Person Anchor Chart - Adjective Anchor Chart
Lesson 8 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4, W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6	Speaking and Listening: Patterns of the Moon 1. Opening A. Shared Reading: Reviewing Patterns of the Moon Anchor Chart (5 minutes) 2. Work Time A. Independent Writing: Patterns of the Moon Notes (10 minutes) B. Science Talk: “Why Does the Moon Seem to Change?” (20 minutes) C. Reflecting on Learning (10 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (10 minutes) B. Shared Writing: Describing What People Do During the Day (5 minutes)	- I can build onto others’ ideas while participating in a Science Talk about patterns of the moon. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4) - I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	- Collect students’ individual notes as information regarding progress towards W.1.8, RI.1.1, RI.1.2, RI.1.6, and RI.1.7. - Speaking and Listening checklist (SL.1.1a, SL.1.1b, and SL.1.4) as students participate in the Science Talk.	- Patterns of the Moon Anchor Chart - Science Talk Protocol Anchor Chart - Unit 2 Guiding Question Anchor Chart - Prepositions Anchor Chart - Adjectives Anchor Chart

The Sun, Moon, and Stars

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 9 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6	Focused Read-aloud, Session 2: <i>Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns</i> 1. Opening A. Poem and Movement; “Where Are They? The Sun, Moon, and Stars” Poem (10 minutes) 2. Work Time A. Focused Read-aloud: <i>Does the Sun Sleep?: Noticing Sun, Moon, and Stars Patterns</i> , Pages 16-21 (15 minutes) B. Engaging the Scientist: “Why Can’t We See Stars during the Day?” (15 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (15 minutes) B. Shared Writing: Describing What People Do at Night (5 minutes)	- I can distinguish what I learn from the illustrations and what I learn from the text in the book <i>Does the Sun Sleep?</i> to describe patterns of the stars. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7) - I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	- Use the Reading Informational Text Assessment sheet to track students’ progress towards RI.1.1, RI.1.2, RI.1.4, RI.1.6 and RI.1.7. - Collect students’ Sky notebooks as information regarding progress towards W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6.	“Where Are They? The Sun, Moon, and Stars” Poem - Prepositions Anchor Chart - Working to Become an Ethical Person Anchor Chart - Patterns of the Stars Anchor Chart - Adjectives Anchor Chart
Lesson 10 RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4, W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6	Speaking and Listening: Patterns of the Stars 1. Opening A. Shared Reading: Reviewing Patterns of the Stars Anchor Chart (5 minutes) 2. Work Time A. Independent Writing: Patterns of the Stars Notes (10 minutes) B. Science Talk: “Why Can’t We See the Stars during the Day?” (15 minutes) C. Reflecting on Learning (10 minutes) 3. Closing and Assessment A. Reflecting on Integrity (5 minutes) B. Independent Writing: Sky Notebook (15 minutes)	- I can build onto others’ ideas while participating in a Science Talk about patterns of the stars. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4) - I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	- Collect students’ individual notes as information regarding progress towards W.1.8, RI.1.1, RI.1.2, RI.1.6, and RI.1.7. - Speaking and Listening checklist (SL.1.1a, SL.1.1b, and SL.1.4) as students participate in the Science Talk. - Collect students’ Sky notebooks as information regarding progress towards W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6.	- Patterns of the Stars Anchor Chart - Science Talk Protocol Anchor Chart - Unit 2 Guiding Question Anchor Chart - Prepositions Anchor Chart - Adjectives Anchor Chart - Working to Become an Ethical Person Anchor Chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 11 RI.1.1, RI.1.7, W.1.8, SL.1.1a, SL.1.1b, SL.1.4, L.1.1j, L.1.6	Reading, Writing, and Speaking: Preparing for the Unit 2 Assessment 1. Opening A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes) B. Reviewing Learning Targets (5 minutes) 2. Work Time A. Shared Reading: Revisiting Unit 2 Guiding Question Anchor Chart (10 minutes) B. Reviewing Notes: Preparing for the Unit 2 Assessment (10 minutes) C. Back-to-Back and Face-to-Face: Sharing Information about Patterns in the Sky (15 minutes) 3. Closing and Assessment A. Independent Writing: Sky Notebook (15 minutes)	- I can describe a pattern that can be observed in the sky using evidence from my notes about the sun, moon, or stars. (RI.1.1, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4) - I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	Collect students’ Sky notebooks as information regarding progress towards W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6.	“Where Are They? The Sun, Moon, and Stars” Poem - Unit 2 Guiding Question Anchor Chart - Beck-to-Back and Face-to-Face Protocol Anchor Chart - Adjectives Anchor Chart - Prepositions Anchor Chart
Lesson 12 W.1.8, SL.1.1a, SL.1.1b, SL.1.4, SL.1.6, L.1.1f, L.1.1i, L.1.1j, L.1.6	Unit 2 Assessment: Discussing Observable Patterns in the Sky 1. Opening A. Engaging the Learner: Revisiting Unit 2 Poems (5 minutes) B. Introducing the Unit 2 Assessment (5 minutes) 2. Work Time A. Unit 2 Assessment, Group 1: Science Talk (20 minutes) B. Unit 2 Assessment, Group 2: Science Talk (20 minutes) 3. Closing and Assessment A. Reflecting on Integrity (10 minutes)	- I can build onto others’ ideas while participating in a Science Talk about observable patterns in the sky. (SL.1.1a, SL.1.1b, SL.1.4, SL.1.6) - I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)	- Speaking and Listening checklist (SL.1.1a, SL.1.1b, SL.1.4, SL.1.6) as students participate in the Science Talk protocol. - Collect students’ Sky notebooks as information regarding progress towards W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6.	“What We See: The Sun, Moon, and Stars” Poem “Where Are They? The Sun, Moon, and Stars” Poem - Science Talk Protocol Anchor Chart - Working to Become an Ethical Person Anchor Chart

Accountable Independent Reading

The ability to read and comprehend text is the heart of literacy instruction. Comprehension is taught, reinforced, and assessed across all three components of this primary curriculum: module lessons, Labs, and the Reading Foundations Skills Block. See module overview for details.

For Unit 2, during the independent reading in the Skills Block, reinforce the comprehension skills and standards that students are practicing during the Integrated Literacy block:

- **RI.1.1:** Ask and answer questions about key details in a text.
 - Invite the students to read aloud a portion of an informational text and ask comprehension questions.
 - After a student reads aloud the first few pages of an informational text, ask: “What questions do you have? What are you wondering?”
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.

- When conferencing with a student, have her or him explain how the illustration or details in the text relate to the key ideas in the text.
- Ask:

“How do these illustrations help you understand the text?”

Supporting English Language Learners

The Meeting Students’ Needs column in each lesson contains support for both ELLs and Universal Design for Learning (UDL), and some supports can serve a wide range of student needs. However, ELLs have unique needs that cannot always be met with UDL support. According to federal guidelines, ELLs must be given access to the curriculum with appropriate supports, such as those that are specifically identified as “For ELLs” in the Meeting Students’ Needs column.

- **Prioritizing lessons for classrooms with many ELLs:** Consider prioritizing and expanding instruction in Lessons 6–11 in which students practice the Science Talk protocol. This will afford greater opportunity to prepare for the Unit 2 Assessment. In addition, be sure to complete the Language Dive in Lesson 3. If necessary, place less focus and condense instruction on completing the Sky notebooks. Consider omitting one or two pages of the Sky notebook in favor of more practice with the Science Talk protocol.
- **Language Dives:** All students participate in a Language Dive in Lesson 3. Many lessons also include optional Mini Language Dives for ELLs. To maximize language practice and accommodate time, consider dividing or reviewing each Language Dive over multiple lessons. Beginning in Module 2 and going forward, create a “Language Chunk Wall”—an area in the classroom where students can display and categorize the academic phrases discussed in the Language Dive. At the end of each Language Dive, students are invited to place the Language Dive sentence strip chunks on the Language Chunk Wall into corresponding categories, such as “Nouns and noun phrases” or “Linking language.” Consider color-coding each category. Examples: blue for nouns and subjects; purple for pronouns; red for predicates and verbs; yellow for adjectives; and green for adverbs. See each Language Dive for suggested categories. Students can then refer to the wall during subsequent speaking and writing tasks. For more information on Language Dives, refer to the Supporting English Language Learners Guidance in the Module 1 Appendix.
- **Goal 3 Conversation Cues:** Encourage productive and equitable conversation with Conversation Cues, which are questions teachers can ask students to help achieve four goals: (Goal 1) encourage all students to talk and be understood; (Goal 2) listen carefully to one another and seek to understand; (Goal 3) deepen thinking; and (Goal 4) think with others to expand the conversation (adapted from Michaels, Sarah and O’Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012. http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O’Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Refer to the Module 1 Appendix for the complete set of cues. Goal 3 Conversation Cues are introduced in Lesson 1. Heightened language processing and development is a primary potential benefit for ELLs.

- **Diversity and inclusion:** Investigate the routines, practices, rituals, beliefs, norms, and experiences that are important to ELLs and their families. Integrate this background into the classroom as students explore informational texts taking place across different cultures and countries. During this unit, students will discuss the sun, moon, and stars. Provide students opportunities to share their own experience with stories, beliefs or experiences about the sun, moon, and stars. Consult with a guidance counselor, school social worker, or ESL teacher for further investigation of diversity and inclusion concerns.
- **Strategic grouping:** As students are invited to pair up for various tasks and protocols, seriously consider matching ELLs to a partner who has greater language proficiency. The conversations that happen as a result of such strategic grouping will greatly serve the language development of both partners.
- **Language processing time:** Give ELLs sufficient time to think about what they want to say before they share with other students or write.
- **Close reading and identifying patterns in the sky:** Students will participate in a series of close reading sessions during which they will hone their comprehension and interpretive skills by reading informational text and asking and answering questions about the patterns that occur in the sky, such as the sunrise and sunset. It may seem abstract for some students to make connections between our experience on earth and the planet's movement in space. Frequently reference illustrations and class demonstrations. Help students decipher academic language to clarify these patterns by guiding them through the Language Dives and Mini Language Dives throughout the unit.
- **Writing Sky notebooks:** Students will write daily Sky notebooks in which they use adjectives and prepositions to describe photographs of the sun and moon. This will provide excellent practice for students to apply key language functions. Consider creating Adjectives and Preposition construction boards to provide additional practice applying adjective and prepositions for authentic purposes.
- **Science Talk protocol:** Students will participate in the Science Talk protocol, during which they will respond to and build on one another's ideas. Provide additional practice using the prompts from the Science Talk protocol so students are comfortable using it during the assessment. Strategically model and think aloud using the prompts with students throughout the unit.
- **Celebration:** Celebrate the courage, enthusiasm, diversity, and bilingual skills that ELLs bring to the classroom.

Preparation and Materials

For basic lesson preparation, refer to the materials list and Teaching Notes in each lesson. The following are unusual materials that may take more time or effort to organize or prepare.

- Lesson 1: Sun, Moon, and Stars Word Wall cards: astronomer, horizon; Prepare a class set of equity sticks (popsicle sticks)
- Lesson 2: "What We See: The Sun, Moon, and Stars" poem, Unit 2 Guiding Question Anchor Chart
- Lesson 3: Sun, Moon, and Stars Word Wall cards: spins, light, shadows; *What Makes Day and Night* Anchor Chart (large; on bulletin board or blank wall space)

The Sun, Moon, and Stars

- Lesson 4: Sun, Moon, and Stars Word Wall cards: daylight; “What We See: The Sun, Moon, and Stars” poem version 2, Adjectives Anchor Chart using adjectives from the poem “What We See: The Sun, Moon, and Stars,” create Sky notebooks
- Lesson 6: Science Talk Protocol Anchor Chart
- Lesson 7: Sun, Moon, and Stars Word Wall cards: change, waxing, waning; “Where Are They? The Sun, Moon, and Stars” Poem Version 2, Prepositions Anchor Chart using prepositions from the poem “Where Are They? The Sun, Moon, and Stars”
- Lesson 8: Identify and gather exemplars from *What Makes Day and Night* notes sheets
- Lesson 9: Sun, Moon, and Stars Word Wall cards: star, constellation

Lesson 1: Noticing and Wondering: Observing and Asking Questions about the Sun, Moon, and Stars

CCS Standards

- **RL.1.5:** Know and use various text features (e.g., headings, tables of contents, glossaries, electronic menus, icons) to locate key facts or information in a text.
- **RI.1.1:** Ask and answer questions about key details in a text.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

Daily Learning Targets

- I can describe what I observe in pictures and videos of the sun, moon, and stars. (RI.1.1, SL.1.2)
- I can ask and record questions about what I notice in pictures and videos of the sun, moon, and stars. (RI.1.1, W.1.8, L.1.1j)

Ongoing Assessment

- During the focused read aloud in Work Time B use the Reading Literature checklist to assess students' progress towards RL.1.5 and the Reading Informational Text checklist to assess students' progress towards RI.1.1.

Agenda

1. Opening

- A. Reading Aloud: "Elvin, the Boy Who Loved the Sky," Part 5 (10 minutes)

2. Work Time

- A. Picture Tea Party: Pattern Photographs (10 minutes)
- B. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 4–9 (20 minutes)
- C. Engaging the Scientist: "Observe Sunrise and Sunset" (10 minutes)

3. Closing and Assessment

- A. Shared Writing: Recording Our Observations and Questions about the Sun, Moon, and Stars (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In this unit, students build on their foundational understanding of the sun, moon, and stars as they begin to see that there are patterns in the sky that can be observed and predicted. This first lesson is intended to elicit wonder and curiosity, setting the stage for a more in-depth exploration of the scientific concepts to come throughout the remainder of the unit.
- As in previous units, in almost all lessons, students hear complex texts read aloud. When possible, display the text while reading aloud. And when doing a first read-aloud of a given text, read fluently, with expression, and without interruption. For additional information, refer to the Module Overview.
- In Work Time A, students participate in the Picture Tea Party protocol. Consider how familiar students are with this protocol and reallocate class time spent reviewing it as necessary.
- In Work Time C, students revisit the sun time-lapse video embedded in the website PBS Learning Media, focusing on noticing any patterns.
 - Citation: “Observe Sunrise and Sunset.” Video. *Teachers Domain*. PBS Learning Media, Jan. 2016. Web. 1 June 2016. <<http://www.pbslearningmedia.org/resource/ess05.sci.ess.eiu.riset/observe-sunrise-and-sunset/>> (For display. Used by permission.)
 - Purpose: Revisit a previously watched video, focusing on noticing and sharing patterns with a partner. Prompt students to use sentence frames to support building on others’ ideas and furthering a conversation, a skill they will practice throughout this unit.
- This lesson introduces the use of equity sticks (a stick or card for each student in the class) as a total participation technique for quick response questions. Some other common total participation techniques include cold calling and selecting volunteers.
- This lesson is the first in a series of three that include built-out instruction for the use of Goal 3 Conversation Cues. Conversation Cues are questions teachers can ask students to promote productive and equitable conversation (adapted from Michaels, Sarah and O’Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012. http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O’Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Goal 3 Conversation Cues encourage students to deepen their thinking. Continue drawing on Goal 1 and 2 Conversation Cues, introduced in Module 1, and add Goal 3 Conversation Cues to more strategically promote productive and equitable conversation. In Module 3, Goal 4 Conversation Cues are introduced. Refer to the Module 1 Appendix for additional information on Conversation Cues. Consider providing students with a thinking journal or scrap paper. Examples of the Goal 3 Conversation Cues you will see in the next two units are (with expected responses):
 - To encourage students to provide reasoning or evidence:
 - “**Why do you think that?**”
 - “Because ____.”
 - “**What, in the ____ (sentence/text), makes you think so?**”
 - “If you look at ____, it says ____, which means ____.”
 - To challenge students:
 - “**What if ____ (that word were removed/the main character had done something different/we didn’t write an introduction)? I’ll give you time to think and discuss with a partner.**”

- "If we did that, then ____."

"Can you figure out why ____ (the author used this phrase/we used that strategy/ there's an -ly added to that word)? I'll give you time to think and discuss with a partner."

- "I think it's because ____."

- To encourage students to think about their thinking (metacognition):

"What strategies/habits helped you succeed? I'll give you time to think and discuss with a partner."

- " ____ helped me a lot."

"How does our discussion add to your understanding of ____ (previously discussed topic/text/language)? I'll give you time to think and discuss with a partner."

- "I used to think that ____, and now I think that ____."

How this lesson builds on previous work:

- In this lesson, students return to what they noticed and observed about the sun, moon, and stars during Unit 1 and build a foundational understanding of the scientific concepts behind observable and predictable patterns in the sky.
- Consider how this lesson builds on instructional routines already introduced to students (e.g., learning targets, discussion protocols, drawing to communicate ideas, transitions, use of materials). Make modifications based on what students have experienced during previous modules and units.

Areas in which students may need additional support:

- During Work Time C, students are encouraged to use sentence frames to build onto others' ideas. This is the first of many opportunities students have throughout this unit to use these sentence frames to support furthering a conversation. Consider posting the sentence frames in a location for all students to view and access.

Down the road:

- During Work Time B, students are introduced to the informational text *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*. During this lesson, students listen to just one section of the text. In subsequent lessons, students will listen to other sections of the text.
- In Lesson 2, students will be introduced to the Unit 2 guiding question: "What patterns can we observe in the sky?"
- In many lessons throughout this unit, students practice building onto others' ideas and furthering a conversation through the use of sentence frames, structured discussions, and the Science Talk protocol. This protocol also serves as the structure for their assessment, in Lesson 12.

In advance:

- Prepare:
 - A set of equity sticks for the class (popsicle sticks with the name of one student on each one).
 - Pattern photographs for Picture Tea Party protocol in Work Time A by copying one or two photographs for each student.
 - Sun, Moon, and Stars Word Wall cards for the words *astronomer* and *horizon*. Write or type the word on a card and create or find a visual to accompany each word.

- Patterns of the Sun anchor chart by writing the title on chart paper and finding or creating accompanying visuals.
- Technology necessary to play the “Observe Sunrise and Sunset” video in Work Time C.
- Review the Picture Tea Party and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: “Elvin, the Boy Who Loved the Sky,” Part 5 could be an email.
- Opening A: Create a slideshow of the pattern photographs.
- Work Time B: Create the Patterns of the Sun anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.IA.3, 1.IB.5, 1.IB.6, and 1.IC.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to build background knowledge of the content through watching videos and participating in a read-aloud.
- ELLs may find it challenging to associate the movement of the sun with the definition of the word *pattern*. Spend additional time discussing examples of patterns. Guide students in drawing or arranging images of the sun rising, at midday, and setting. Ask students to predict what comes next in the pattern.

Levels of support

For lighter support:

- During Work Time C, invite student who need lighter support to model using the sentence frames to respond to others’ ideas. (Example: “Rihanna, what does Kevin’s idea make you? Can you show us how you use this sentence frame?”)
- Encourage students to use Conversation Cues with other students to support the use of the sentence frames in Work Time C. (Example: Invite students to clarify their peer’s thinking before adding to their own idea: “So, do you mean ____?”)

For heavier support:

- During the focused read-aloud in Work Time A, provide students with a series of picture cards depicting the sun at the horizon in the morning, the sun high in the sky, and the sun setting. In partners or triads, invite students to arrange the cards in a pattern according to how the sun appears to move in the sky.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In Work Time B, students are introduced to *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* in a focused read-aloud. During this read-aloud, students notice facts about the sun and its patterns, then share those to create the Patterns of the Sun anchor chart together with the teacher. This transfer of information into knowledge that students can use requires metacognitive skills and strategies. Some students may need support in summarizing, connecting, and remembering the information presented. Provide scaffolds to students to support diverse abilities in using these strategies, such as manipulatives, to guide students toward new understanding. For example, provide students with images cut from cardstock of the sun, the horizon, and other key features for understanding from the text. Invite students to show the sun’s pattern with the manipulatives as described in the text with the manipulatives.
- **Multiple Means of Action & Expression (MMAE):** In Work Time A, students participate in a Picture Tea Party, during which they discuss the pattern photographs. Afterward, share their ideas with the whole group before being introduced to the central theme of the photographs (patterns). Students later make connections with the idea of patterns and the sun, exploring the patterns of the sun each day. Some students need support in confirming their understanding of the word *pattern* and connecting the concept to content other than the photographs. Support this understanding by inviting students to show different patterns with physical manipulatives and their body. For example, students can show a pattern of blinking their eyes, a pattern made from building blocks, or a pattern of movement around the classroom. Providing opportunities for students to use their bodies for these active patterns will support understanding of the sun’s patterns throughout the day.
- **Multiple Means of Engagement (MME):** Throughout this lesson, students have multiple opportunities to share ideas and thinking with classmates. Some students may need support for engagement during these activities, so encourage self-regulatory skills by helping them anticipate and manage frustration by modeling what to do if they need help from their partners. For example: “I can remember that if I forget my idea or need help when I’m sharing, I can ask my partner to help me. My partner could help me by giving me prompts that will help me share my thinking.” Consider offering sentence frames to strategically selected peer models, such as: “I noticed ___ in the photograph” or “One thing I noticed about the sun in the video was ___.” Offering this support promotes a safe learning space for all students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- astronomer, pattern (L)
- horizon (T)

Materials

- ✓ “Elvin, the Boy Who Loved the Sky,” Part 1 (from Unit 1, Lesson 1; one to display; for teacher read-aloud)
- ✓ Equity sticks (class set; one per student)
- ✓ “Elvin, the Boy Who Loved the Sky,” Part 5 (one to display; for teacher read-aloud)
- ✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; two)
- ✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1; added to during the Opening and Work Time B; see Teaching Notes)
- ✓ Pattern photographs (one per student and two or three to display)
- ✓ Picture Tea Party Protocol anchor chart (begun in Unit 1, Lesson 1)
- ✓ *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (one to display; for teacher read-aloud)
- ✓ *Summer Sun Risin’* (one to display; from Unit 1)
- ✓ Patterns of the Sun anchor chart (new; co-created with students during Work Time B; see supporting materials)
- ✓ Patterns of the Sun anchor chart (example, for teacher reference)
- ✓ “Observe Sunrise and Sunset”(from Unit 1, Lesson 1; video; play in entirety; see Teaching Notes)
- ✓ Think-Pair-Share Protocol anchor chart (begun in Module 1)
- ✓ Noticing and Wondering anchor chart (begun in Unit 1, Lesson 1; added to during the Closing)

Opening

A. Reading Aloud: “Elvin, the Boy Who Loved the Sky,” Part 5 (5 minutes)

- Gather students whole group.
- Remind them that in the last unit, they were introduced to Elvin, who shared his questions and observations about the sun, moon, and stars with them.
- Tell students that to help them remember all the things Elvin wondered about, you are going to briefly reread part of the story.
- Display **“Elvin, the Boy Who Loved the Sky,” Part 1** and read it aloud slowly, fluently, with expression, and without interruption.
- Explain to students that you are going to begin using **equity sticks** as a way of calling on them to share their ideas with the group. Each of their names is on a different popsicle stick, and you will pull one at random. When you do, that student will share his or her ideas with the class.
- Invite students to turn and talk with an elbow partner, and use equity sticks to select students to share their responses with the whole group:

“What are some things that Elvin wondered about?” (if the sun and moon had stories; if the sun and moon danced and had songs)

“What are some things that Elvin shared with us because he wondered about the sun, moon, and stars?” (photographs, songs, movement routines, books)

- Tell students that today is an exciting day because you have a new story about Elvin to read to them and that you think there are more things Elvin wonders about.
- Display “**Elvin, the Boy Who Loved the Sky,**” **Part 5** and read the first three sentences aloud fluently, with expression, and without interruption.
- Focus students’ attention on the word *astronomer*.
- Invite students to turn and talk with an elbow partner:

“What word does the word astronomer remind you of?” (astronaut, astronomy)

- Using equity sticks, cold call students to share out.
- If productive, use a Goal 3 Conversation Cue to encourage students to provide reasoning:

“Why does the word astronomer remind you of that?” (Responses will vary; e.g., they sound the same.)

- Point out that all of these words—*astronomer*, *astronaut*, and *astronomy*—have a similar beginning, *astro*.
- Tell students that *astro* means having to do with outer space, objects in the sky, and the sun, moon, and stars.
- Show students the Sun, Moon, and Stars Word Wall card for *astronomer*.
- Tell students that an astronomer is a scientist who studies the sky, universe, and beyond.
- Invite students to repeat the word with you and to clap its syllables as they say it.
- Place the Word Wall card and picture for *astronomer* on the **Sun, Moon, and Stars Word Wall**.
- Draw students’ attention back to the text and read the remainder of Part 5.
- With excitement, reveal and then display two or three of the **pattern photographs**.
- Using a total participation technique, invite responses from the group:

“What is Elvin wondering about now?” (He wonders if there are facts about the sun, moon, and stars.)

Meeting Students’ Needs

- When preparing students for the read-aloud, provide options for physical action and sensory input by differentiating seating. Some students might benefit from sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. (MMAE)
- For ELLs: For heavier support, invite students to act out the roles of Elvin and the astronomer during the read-aloud.

Work Time

A. Picture Tea Party: Pattern Photographs (10 minutes)

- Tell students that now they are going to get a chance to closely examine the pattern photographs that Elvin shared with them.
- Explain that they are going to use the Picture Tea Party protocol to view and discuss the pattern photographs. Remind students that they used this protocol in Unit 1, and review as necessary using the **Picture Tea Party Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol.
- After 5–6 minutes, refocus whole group and collect the pattern photographs.
- Using a total participation technique, invite responses from the group:
“What did you notice in your pictures?” (Responses will vary, but may include: things repeating, the sunlight creating a pattern on the ground, the moon in different shapes over and over again, and groups of stars creating a pattern in the sky.)
- Inform students that the photographs they looked at show patterns.
- Using a total participation technique, invite responses from the group:
“What does the word pattern mean?” (an arrangement of shapes, lines, letters, numbers, or colors that can be repeated or used again and again)
- Remind students that when Elvin wondered if the sun, moon, and stars had facts, an astronomer gave him these photographs.
- If productive, use a Goal 3 Conversation Cue to encourage students to provide reasoning.
- Using a total participation technique, invite responses from the group:
“Why do you think the astronomer gave Elvin photographs of patterns when Elvin was wondering if there were facts about the sun, moon, and stars?” (Student responses may vary; if necessary, guide them toward: the sun, moon, and stars follow patterns or there are patterns that have to do with the sun, moon, and stars.)

Meeting Students' Needs

- To activate background knowledge, provide one or two familiar examples of what a pattern looks and sounds like. Example: Display a visual of building cubes arranged in a pattern or invite students to listen to a clapping pattern (e.g., clap hands twice, tap thighs once, repeat). (MMR)
- For ELLs: Invite a small group of volunteers to briefly fish bowl or model the Picture Tea Party protocol for the group. As they model, cold call students to repeat or add to what the volunteers have said, using the sentence frames. This will provide an opportunity to check for comprehension while giving some students practice using the sentence frames before the protocol begins.
- For ELLs: It may take longer for some students to process language and follow the conversation during the Picture Tea Party protocol. Encourage students to speak up when they would like to hear something repeated. Empower them with questions they can ask to regulate the pace of the conversation. (Examples: “Can you please repeat what you said?” “Can you please speak more slowly?”)

Work Time

B. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 4–9 (20 minutes)

- Tell students that today is exciting because you have a new text to share with them!
- Display ***Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*** and read the title aloud.
- Display *Summer Sun Risin'* next to *Does the Sun Sleep: Noticing Sun, Moon, and Star Patterns*.
- Tell students that *Summer Sun Risin'* is a narrative text that tells a story, while the new text *Does the Sun Sleep: Noticing Sun, Moon, and Star Patterns* is an informational text that teaches the reader information.
- Using a total participation technique, invite responses from the group:
“How are these two texts different?” (Summer Sun Risin' tells a story. Does the Sun Sleep teaches the reader)
- Explain to students that in this unit they will be reading informational texts, like *Does the Sun Sleep* to learn more information about the patterns of the sun, moon and stars.
- Read pages 4–7 slowly, fluently, with expression, and without interruption.
- Direct students' attention to the **Patterns of the Sun anchor chart** and read the title aloud. Tell students that as they read this section of the text about the sun they will capture ideas and facts about the sun and its patterns on the chart.
- Reread page 7 and invite students to turn and talk with an elbow partner:
“What is a pattern that the sun follows?” (It shines during the day. We cannot see the sun at night.)
- Use equity sticks to call on one or two students to share out.
- If productive, use a Goal 3 Conversation Cue to encourage students to provide evidence:
“What, in the text, makes you think so?” (Responses will vary.)
- As students share out, clarify and capture their ideas on the Patterns of the Sun anchor chart, writing down the language they use as accurately as possible. Refer to **Patterns of the Sun anchor chart (example, for teacher reference)** as necessary.
- Draw students' attention back to the text and read page 8 fluently and without interruption.
- Focus students' attention on the word horizon.
- Reread the last two lines on page 8 and, using equity sticks, select a student to come to the front of the whole group area and respond:
“Where is the horizon line in the illustration on page 8?”
- Display the Sun, Moon, and Stars Word Wall card for *horizon* and review the definition for it (the line where the sky and the land seem to meet).
- Invite students to repeat the word with you and place the card on the Sun, Moon, and Stars Word Wall.
- Draw students' attention back to the text and read page 9 fluently and without interruption.
- Direct students' attention to the three pictures on pages 8–9. Using a total participation technique, invite responses from the group:
“What do you notice about where the sun is in the sky in these three pictures?” (near the horizon, high in the sky, and then near the horizon again)

“What other patterns does the sun follow?” (it moves across the sky; it is near the horizon early in the morning and in the evening; it rises in the east and sets in the west)

- As students share out, clarify and capture their ideas on the Patterns of the Sun anchor chart, writing down the language they use as accurately as possible. Refer to Patterns of the Sun anchor chart (example, for teacher reference) as necessary.
- Review the information that has been recorded on the Patterns of the Sun anchor chart.
- Invite students to turn and talk with an elbow partner:

“What is one new piece of information you learned about a pattern that the sun follows?”

- Refocus students whole group and offer them specific, positive feedback on their work during the focused read-aloud. (Example: “This section of the text contained a lot of important information about the sun and patterns that it follows, and I noticed you all paid close attention to the text and illustrations to make sure you understood the information.”)
- Tell students that now they will watch the time-lapse video of the sun from Unit 1 again, this time paying attention to any patterns that the sun follows.

Meeting Students' Needs

- Before reading, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active listening for key details. (MMR, MMAE)
- For ELLs: Pair students with a partner who has more advanced or native language proficiency. The partner with greater language proficiency in the pair can serve as a model during the read-aloud, initiating discussions and providing implicit sentence frames.
- For ELLs: During the read-aloud, provide sentence frames for Think-Pair-Shares. (Example: “One thing I learned about a pattern is ...”)
- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.

Work Time

B. Engaging the Scientist: “Observe Sunrise and Sunset” (10 minutes)

- Remind students that during Unit 1 they watched a short video of the sun rising and setting. Tell students that they are going to view the video again and then have the opportunity to discuss what they notice and wonder with a partner.
- Play the **“Observe Sunrise and Sunset” time-lapse video**.
- Tell students they will use the Think-Pair-Share protocol to discuss what they noticed and observed about the sun in the video. Remind them that they’ve used this protocol before. Review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to Think-Pair-Share with an elbow partner:

“What do you notice about the sun in this video? What patterns do you notice the sun following in this video?” (Responses will vary, but may include: The sun is near the horizon

in the morning and evening, the sun seems to move across the sky, and the sun is visible during the day.)

- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Refocus students whole group and invite a few students to share out.
- Prompt students to add on or to build onto others' ideas by using several focusing questions—for example:

“Does anyone have anything to add to what Vernon said?”

“What does what Janice said make you think?”

- As students respond to these questions, prompt them to use a sentence frame:
 - “I’d like to add _____.”
 - “That makes me think _____ because _____.”
- Tell students that now they will revisit their notices and wonderings from Unit 1 and add their new thinking and new questions.

Meeting Students’ Needs

- During the Think-Pair-Share (before refocusing students whole group), increase mastery-oriented feedback by providing feedback that is frequent, timely, and specific to individual pairs of students. (Example: “Great noticing! I heard you mention specifically that you saw that the sun looked like it was moving across the sky during the day. That sounds like part of the pattern each day, because you said that you saw that happen each day.”) (MME)
- For ELLs: Watch the “Sun Time Lapse” video twice. Students will be able to absorb and process more information during their second viewing after they understand the general idea during the first viewing. Consider introducing and displaying the question “What patterns do you notice the sun following in this video?” before watching it.
- For ELLs: Introduce and model using the sentence frames to respond to others’ ideas. Display the sentence frames in speech bubbles. Example: “I have something more to say about Brianna’s idea, so I am going to say, ‘I’d like to add to Brianna’s idea.’”

Closing and Assessment

A. Shared Writing: Recording Our Observations and Questions about the Sun, Moon, and Stars (10 minutes)

- Direct students’ attention to the **Noticing and Wondering anchor chart**.
- Review what students had noticed and wondered about the sun, moon, and stars during Unit 1 by reading the chart aloud.
- Invite students to turn to an elbow partner and talk after providing 30 seconds of wait time for each of the following questions:

“What are some new things you notice about the sun?” (Student responses will vary.)

“What are new questions or wonders you have about the sun?” (Student responses will vary.)

The Sun, Moon, and Stars

- Refocus whole group and call students to share out.
- As students share out, clarify and capture their ideas on the Noticing and Wondering anchor chart, writing down the language they use as accurately as possible. If possible, model referring to the Sun, Moon, and Stars Word Wall as a tool to help when spelling content-related words.
- Share with students that in the next lesson they will continue learning about patterns in the sky that can be observed.

Meeting Students' Needs

- Before inviting students to turn and talk, provide scaffolds to support organization and working memory. Example: Offer an index card divided in two. Include (1) a picture of the sun on one half and (2) a question mark on the other half. Invite students to use this card as a guide for sharing (1) notices about the sun and (2) questions they have about the sun. (MMAE, MMR)

Lesson 2: Close Read-aloud, Session 1: *What Makes Day and Night*

CCS Standards

- **RL.1.5:** Explain major differences between books that tell stories and books that give information, drawing on a wide reading of a range of text types.
- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.5:** With guidance and support from adults, demonstrate understanding of word relationships and nuances in word meanings.
- **L.1.5c:** Identify real-life connections between words and their use (e.g., note places at home that are *cozy*).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can describe the pattern of light and dark on earth using information from the text *What Makes Day and Night*. (RI.1.1, RI.1.2, RI.1.4, RI.1.7, SL.1.1a)
- I can record my observations about what I notice in pictures and videos of the sun, moon, and stars. (W.1.8, L.1.1c, L.1.1f, L.1.6)

Ongoing Assessment

- During the Opening, observe students as they begin to find adjectives to describe the sun, moon, and stars and identify real-life connections with the adjectives. Record student progress on the Language Checklist. (L.1.1f, L.1.5c)
- During the close read-aloud in Work Time B, use the Reading Literature checklist to track students' progress towards RL.1.5 and the Reading Informational Text Checklist to track students' progress toward the reading standards listed for this lesson (see Assessment Overview and Resources).

Agenda

1. Opening

A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)

2. Work Time

A. Structured Discussion: Introducing the Unit 2 Guiding Question (10 minutes)

B. Close Read-aloud, Session 1: *What Makes Day and Night*, Pages 1–31 (20 minutes)

C. Shared Writing: Describing the Sun and Moon (10 minutes)

3. Closing and Assessment

A. Reflecting on Learning (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- During the Opening, students read a new poem about the sun, moon, and stars as a way to introduce them to the use of adjectives. In Lessons 2–4, students will identify and use adjectives to make their writing more descriptive (L.1.1f).
- In Work Time B, students complete Session 1 of the close read-aloud for the unit anchor text, *What Makes Day and Night*. Through this read-aloud, students strengthen their ability to understand and converse with their peers about the text as they hear it read aloud multiple times and engage actively through the use of the *What Makes Day and Night* anchor chart, text-dependent questions, and activities. At the end of Unit 2, students participate in a Science Talk to demonstrate their growing knowledge of the topic of this unit (RI.1.1, RI.1.2, RI.1.3, RI.1.7, SL.1.2, SL.1.5).
- As noted in Module 1, a close read-aloud is an instructional practice that gives beginning readers an opportunity to study a complex text with teacher support, for the purpose of deep comprehension. A close read-aloud of a particular text occurs in a series of short sessions (approximately 20–25 minutes each) across multiple lessons.
- For every close read-aloud, there is a Close Read-aloud Guide (see supporting materials). This material lays out the entire sequence of sessions. Before launching the first session with a given text, review the entire guide to have the big picture of the work students will do with that text across multiple lessons. Keep this guide in hand across the multiple lessons.
- During Work Time C, students participate in a shared writing activity where they begin to describe the sun and moon using adjectives. Shared writing provides students with a highly supportive writing opportunity in which they can practice generating ideas, selecting appropriate vocabulary, and rereading writing for fluency.
- This lesson is the second in a series of three that include built-out instruction for the use of Goal 3 Conversation Cues to promote productive and equitable conversation (adapted from Michaels, Sarah and O'Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012. http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O'Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Goal 3 Conversation Cues encourage students to deepen their thinking. Continue drawing on Goal 1 and 2 Conversation Cues, introduced in Module 1, and add Goal 3 Conversation

Cues to more strategically promote productive and equitable conversation. In Module 3, Goal 4 Conversation Cues are also introduced. Refer to the Module 1 Appendix for additional information on Conversation Cues. Consider providing students with a thinking journal or scrap paper.

How this lesson builds on previous work:

- In Lesson 1, students built interest in the module topic through notices and wonderings. This lesson allows for a more in-depth study of the patterns of light and dark on earth as students begin the close read-aloud of *What Makes Day and Night*.

Areas in which students may need additional support:

- During the Opening, some students may need additional support understanding the definition and use of an adjective. Consider having several simple prewritten sentences available to model the use of adjectives.

Down the road:

- This is the first lesson in a series of five in which students participate in a close read of *What Makes Day and Night*. Preview the Close Read-aloud Guide for *What Makes Day and Night*.
- This is the first lesson in a series of three in which students begin to search for and pull out adjectives used to describe the sun, moon, and stars. In Lesson 2, students locate adjectives in the poem and use them during a shared writing instructional practice. In Lessons 3–4, students will begin to pull out adjectives used to describe the sun, moon, and stars and help co-create an anchor chart of adjectives. Students use this anchor chart when independently writing in their Sky notebook in Lesson 4.
- In the Closing, students are introduced to the Describing the Sun and Moon recording form. The use of this recording form during shared writing times in Lessons 2–3 closely mirrors what students will do in their Sky notebook during independent writing time in Lesson 4.

In advance:

- Preview the entire Close Read-aloud Guide to fully understand the “arc” of these five lessons and to see how the learning and skills build from one lesson to the next. Complete only Session 1 in this lesson.
- Print sun photograph 1 and moon photograph 1 in color if possible.
- Prepare the Unit 2 Guiding Question anchor chart by writing the title, the guiding question, and the labeled table on chart paper.
- Post: Learning targets, “What We See: The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Create the “What We See: The Sun, Moon, and Stars” poem in an online format—for example, a Google Doc—to display and for families to access at home to reinforce.
- Work Time C: Create the Describing the Sun and Moon recording form in an online format—for example, a Google Doc—to display and complete, and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, 1.I.B.5, 1.I.B.6, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to build content knowledge and develop English language skills through multiple modalities, such as reading poetry and using oral language in a structured way.
- ELLs may find it challenging to understand and apply the structure and function of adjectives. Create an Adjectives Construction board to support the development of adjective meaning and structure. On project display board, affix manipulative adjective cards with illustrations on one side of the board (Examples: large, yellow, bright). On the other side, affix illustrated word cards of nouns (Examples: moon, sun, stars), and a sentence frame in the middle. (Example: “I observe a(n) [adjective] [noun] in the sky.”) Model choosing a noun and an adjective that describes it, and place each word card in the correct place in the sentence frame. Add to the adjectives and nouns columns with more words throughout the unit.

Levels of support

For lighter support:

- During Work Time A, encourage students to use Conversation Cues with other students to extend and deepen conversations, think with others, and enhance language development.

For heavier support:

- During Work Time C, support students who have trouble answering the question “What does the moon look like?” After generating sentences with the class, ask the prompt again, and call on students to recite the sentences. Dictate the words as necessary, pointing to words and emphasizing the pronunciation of each word. Point to the accompanying sketches to clarify the meaning of the sentences.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In Opening A, students' interest is piqued with the "What We See: The Sun, Moon, and Stars" poem. This poem is read with a focus on the adjectives used to describe the sun, moon, and stars. Some students may need support in incorporating the most valuable information from the poem into existing knowledge. Providing explicit cues or prompts supports students in attending to the features that matter most as they follow along with the poem. Before reading the poem, activate background knowledge by previewing the question you will ask. (Examples: "After I read the poem, I will ask you what you think it is about," and "When I finish reading each verse, I will ask you to share the adjectives you found in each one.")
- **Multiple Means of Action & Expression (MMAE):** In this lesson, students engage in a close read-aloud of *What Makes Day and Night*. Some students may need support in setting appropriate goals for their effort and the level of difficulty expected. Appropriate goal-setting supports development of executive skills and strategies. Offer scaffolds for students learning to set appropriate personal goals, such as a checklist with three goals for the close read. (Examples: "I can keep my eyes on the text as it is read aloud," "I can listen without leaving my seat space," and "I can raise my hand to answer one question during the read-aloud").
- **Multiple Means of Engagement (MME):** As students engage with the text during the close read-aloud, some may need additional support in linking the information presented back to the first learning target. Invite students to make this connection by explicitly highlighting the utility and relevance of the text to the learning target. (Example: Provide an index card with the unpacked learning target for students to reference during the close read-aloud.) Include opportunities to refocus students' attention on the learning target throughout the close read-aloud, and invite students to respond to how the text is supporting their instructional goal.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- adjective, observation (L)

Review:

- pattern, day, night, sun, earth (L)

Materials

- ✓ "What We See: The Sun, Moon, and Stars" poem (one to display; for teacher read-aloud)
- ✓ "What We See: The Sun, Moon, and Stars" poem (example, for teacher reference)

- ☑ Sun photograph 1 (one to display)
- ☑ Moon photograph 1 (one to display)
- ☑ Unit 2 Guiding Question anchor chart (new; co-created with students during Work Time A; see supporting materials)
- ☑ Equity sticks (class set; one per student)
- ☑ Close Read-aloud Guide: *What Makes Day and Night* (Session 1; for teacher reference)
 - *What Makes Day and Night* (one to display; for teacher read-aloud)
 - *Summer Sun Risin'* (from Unit 1, Lesson 2; one to display)
 - Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Describing the Sun and Moon recording form (one for teaching modeling and one per student)
- ☑ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)

Opening

A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)

- Invite students to the whole group area.
- Display the **“What We See: The Sun, Moon, and Stars” poem** and tell students that today they will learn a new poem that describes the sun, moon, and stars!
- Tell students that you will read the poem first on your own as they listen, then they should echo each verse as you read it a second time. Invite students to think of and use gestures and hand motions that go along with the poem as you read it aloud.
- Read aloud the entire poem, slowly, fluently with expression, and without interruption.
- After reading the final verse of the poem, invite students to turn and talk to an elbow partner: **“What is the poem about?” (what the sun, moon, and stars look like)**
- If productive, use a Goal 3 Conversation Cue to encourage students to provide evidence: **“What, in the poem, makes you think so?” (Responses will vary)**
- Remind students that there are different kinds of words and that they learned about *nouns* and *verbs* in Unit 1. Define the terms noun and verb as needed.
- Invite students to whisper a noun from the poem, “What We See: The Sun, Moon, and Stars”, into their hands. Then invite them to whisper a verb from the poem into their hands.
- Tell students that this poem uses another kind of word as it describes what the sun, moon, and stars look like. Words that describe things like the sun, moon, and stars have a special name, *adjectives*. Define adjectives for students (words that describe a person, place, or thing).
- Display **sun photograph 1** and then **moon photograph 1**.
- Using a total participation technique, invite responses from the group: **“What words would you use to describe how the sun and moon look like in these photographs?” (The sun is yellow; the moon is round.)**

- Direct students' attention back to the poem. Tell students you are going to read the poem again, stopping after each verse to ask them about adjectives they hear that describe how the sun, moon, and stars look.
- Read each verse of the poem aloud and stop at the end of each verse. Using a total participation technique, invite responses from the group:

"What adjectives did you find in this verse?" (round and orange)

"What is something at home or at school that we could describe using this adjective?" (a basketball)

- Circle and/or highlight the adjectives in each verse as you continue to read the poem aloud. Refer to **"What We See: The Sun, Moon, and Stars" poem (example, for teacher reference)** as necessary.
- After reading the final verse of the poem, tell students that they will continue to work with the poem over the next several lessons as they create an anchor chart of adjectives to describe the sun, moon, and stars and as they begin to write about the sun, moon, and stars using clear and accurate descriptions.

Meeting Students' Needs

- When displaying the photographs, support students' expressive skills by offering adjectives and/or picture cues preprinted on index cards for students to select as they share words that describe the sun and the moon (e.g., yellow, round, bright). (MMAE)

Work Time

A. Structured Discussion: Introducing the Unit 2 Guiding Question (10 minutes)

- Direct students' attention to the **Unit 2 Guiding Question anchor chart** and read the guiding question aloud:

"What patterns can we observe in the sky?"

- Point to the table below the guiding question and point to each column as you read the headings aloud:
 - We see a pattern with ...
 - Information about this pattern
 - Diagram of this pattern
- Tell students that throughout the unit, they will learn about several patterns that can be observed in the sky and will use this chart to record information on the patterns they uncover while reading different texts.
- Point out the word *pattern* in the learning target. Using a total participation technique, invite responses from the group:

"What is a pattern?" (something that happens over again)

- Invite students to turn and talk to an elbow partner to discuss what they have noticed when they look at the sky and the patterns that they have noticed in these observations:

"What have you noticed when you look at the sky?" (I see the sun and the moon.)

"What patterns have you noticed in these observations?" (I notice that the sun appears to

move across the sky during the day.)

- Use **equity sticks** to call on students to share out.
- Share with students that today, they will begin reading a new book called *What Makes Day and Night* and will begin to collect information about different patterns that can be observed in the sky. Remind students that they will add this information to the Unit 2 Guiding Question anchor chart and will continue to add new information to the chart throughout the unit.

Meeting Students' Needs

- During the structured discussion, some students may be uncomfortable sharing their own preferences with the entire class. Consider allowing them to share what their partner said so that they still have a chance to speak in front of the class. (MME)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the guiding question: "What patterns / can we observe / in the sky?" Write and display student responses next to the chunks. Examples:
 - Ask:
"What does this sentence mean?" (Responses will vary.)
 - Point to and read aloud the chunk: "What patterns" and ask:
"What is this question about?" (patterns; things that happen over and over again)
 - Point to and read aloud the chunk: "can we observe" ask:
"What will we do with different patterns?" (observe them; see them; look at them carefully)
 - Point to and read aloud the chunk: "in the sky" and ask:
"Where will we find these patterns?" (In the sky; up above)
"What patterns do you think we will find in the sky?" (Responses will vary.)
"Now what do you think this question means?" (What things that happen again and again can we see in the sky?)

Work Time

B. Close Read-aloud, Session 1: What Makes Day and Night, Pages 1–31 (20 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the first one aloud:
"I can describe the pattern of light and dark on earth using information from the text What Makes Day and Night."
- Remind students that a pattern is something that happens over again.
- Tell them that now they will hear an informational text read aloud that describes the pattern of light and dark on earth.
- Tell students that over the next several lessons they will closely read the text while studying the illustrations to describe the pattern of light and dark on earth and to connect this occurrence to our focus question.
"What makes day and night on earth?"

- Display ***What Makes Day and Night***.
- Tell students that *What Makes Day and Night* is an informational text that teaches the reader.
- Using a total participation technique, invite responses from the group:
“How is this text the same as Does the Sun Sleep? which we began yesterday?” (they both teach us about day and night)
- Guide students through the close read-aloud for *What Makes Day and Night* using the **Close Read-aloud Guide: *What Makes Day and Night* (Session 1; for teacher reference)**. Consider using the **Reading Informational Text Checklist** during the close read-aloud (see Assessment Overview and Resources).
- Refer to the guide for the use of *Summer Sun Risin’*.
- Refocus whole group. Give students specific, positive feedback on their close reading skills. (Example: “I saw you listen to the text and study the illustrations to learn about how the earth rotates.”)
- Tell students that in the next lesson they will continue to uncover information about how the rotation of the earth influences the pattern of light and dark on earth.

Meeting Students' Needs

- Before beginning the close read-aloud, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active listening for key details. (MMR, MMAE)
- For ELLs: Pair students with a partner who has more advanced or native language proficiency. The partner with greater language proficiency in the pair can serve as a model during the read-aloud, initiating discussions and providing implicit sentence frames.
- For ELLs: During the read-aloud, provide sentence frames for Think-Pair-Shares. (Example: “_____ makes night and day on earth.”)
- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.
- For ELLs: Some students may find some of the scientific concepts described in this text to be abstract. Encourage students to use the pictures to help them understand what is happening in the story. Tell them that if they do not understand everything right now, it is okay. Remind students that they will read everything again during the unit.

Work Time

C. Shared Writing: Describing the Sun and Moon (10 minutes)

- Refocus students whole group.
- With excitement, share that today students have a new job: to help record their observations of the sky during a shared writing activity.
- Direct students’ attention to the posted learning targets and read the second one aloud:

“I can record my observations about what I notice in pictures and videos of the sun, moon, and stars.”

- Review the definition of *observations* (the act of perceiving the environment through the senses).
- Tell students that today they will look at images of the sun and moon and then record their observations using pictures and words. Remind them that earlier in the lesson they identified adjectives, or words to describe something, to describe what the sun and moon look like.
- Direct students’ attention to the posted sun photograph 1 and moon photograph 1.
- Using a total participation technique, invite responses from the group:

“How would you describe the sun in this photograph? What adjectives could you use to describe it?” (yellow, bright, round)

“How would you describe the moon in this photograph? What adjectives could you use to describe it?” (white, full, round)

- Display the **Describing the Sun and Moon recording form** and tell students that now they will use their ideas of what the sun and moon look like in a class shared writing activity.
- Use the following procedure to complete the shared writing:
- Point to the question on page 1 of the recording form and read it aloud, and using a total participation technique, invite responses from the group:

“What does the sun look like?”

- Prompt students to use the Sun, Moon, and Stars Word Wall and the “What We See: The Sun, Moon, and Stars” poem as resources as they describe the sun.
- As students share responses, use their ideas to complete page 1. Think aloud how to use the words from the question itself as a cue to formulate the answer using a complete sentence. (Example: The sun looks small and yellow.)
- Draw a quick sketch of what the sun looks like.
- Turn to page 2.
- Point to the question on page 2 of the recording form and read it aloud, and using a total participation technique, invite responses from the group:

“What does the moon look like?”

- Prompt students to use the Sun, Moon, and Stars Word Wall and the “What We See: The Sun, Moon, and Stars” poem as resources as they describe the sun.
- As students share responses, use their ideas to complete page 2. Think aloud how to use the words from the question itself as a cue to formulate the answer using a complete sentence. (Example: The moon looks bright and white.)
- Draw a quick sketch of what the moon looks like.
- Tell students that in the next lesson they will look at different photographs of the sun and moon and continue thinking of adjectives to describe them.

Meeting Students’ Needs

- For ELLs: Support students as they formulate sentences for the Describing the Sun and Moon recording form. Invite students to use the Adjectives Construction board (See Supporting English Language Learners column) with the sentence

frame: "The [sun/moon] looks like a(n) [adjective] [noun]." (Example: The sun looks like an orange ball. The sun looks bright and yellow.)

- Support students' expressive skills and sustained engagement by offering words from the Word Wall with picture cues preprinted on index cards for students to select as they share words for the shared writing sentence. (MMAE, MME)

Closing and Assessment

A. Reflecting on Learning (10 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and reread the first one aloud:
"I can describe the pattern of light and dark on earth using information from the text What Makes Day and Night."
- Offer students specific, positive feedback on their work to meet this learning target. (Example: "I noticed that everyone worked to uncover new information about the patterns of light and dark on earth when reading the text.")
- If productive, use a Goal 3 Conversation Cue to encourage students to think about their thinking. Using a total participation technique, invite responses from the group:
"How do our close read-aloud and shared writing add to your understanding of the pattern of light and dark on earth? I'll give you time to think and discuss with a partner." (Responses will vary.)
- Using a total participation technique, invite responses from the group:
"What have you learned about the pattern of light and dark on earth?" (Responses will vary, but may include: that day happens when the sun shines on our part of earth, and night happens when shadow covers our part of earth.)
- Invite a few students to share out.
- Tell students that they will continue to think about this question as the unit progresses.

Meeting Students' Needs

- During the Closing, facilitate personal coping and self-regulation skills by modeling socially appropriate ways to express enthusiasm and/or excitement about this topic (e.g., silent cheer, give yourself a hug, take a deep breath and smile). (MME)
- For ELLs: Check for comprehension by asking students to summarize and then to personalize the learning target. Ask them to paraphrase it and then to say how they feel about it. Example: "Can you put the learning target in your own words?" (I can use what I learned from the text to tell about why we have night and day.) "How do you feel about that target?" (I am excited to learn about it because I love the moon.)

Lesson 3: Close Read-aloud, Session 2: *What Makes Day and Night*

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.5:** With guidance and support from adults, demonstrate understanding of word relationships and nuances in word meanings.
- **L.1.5c:** Identify real-life connections between words and their use (e.g., note places at home that are cozy).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a)
- I can record my observations about what I notice in pictures and videos of the sun, moon, and stars. (W.1.8, L.1.1f, L.1.6)

Ongoing Assessment

- During the Opening and Closing A, observe students as they begin to use adjectives to describe the sun, moon, and stars and identify real-life connections with the adjectives. Record student progress on the Language Checklist. (L.1.1f, L.1.5c)
- During Session 2 of the close read-aloud in Work Time A, use the Reading Informational Text Checklist to track students' progress toward the RI standards listed for this lesson (see Assessment Overview and Resources).
- During Work Time B, monitor students as they engage in the Back-to-Back and Face-to-Face protocol to listen and respond to a classmate's idea. (SL.1.1)

Agenda

1. Opening

A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)

2. Work Time

A. Close Read-aloud, Session 2: What Makes Day and Night, Pages 14–15 (20 minutes)

B. Back-to-Back and Face-to-Face: Earth’s Rotation (15 minutes)

3. Closing and Assessment

A. Shared Writing: Describing the Sun and Moon (10 minutes)

B. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In the Opening, students begin to search for adjectives used to describe the sun, moon, and stars. They use these adjectives from the “What We See: The Sun, Moon, and Stars” poem during shared writing in Closing A.
- In Work Time A, students return to the close read-aloud focus question: “What makes day and night on earth?” For Session 2 of the *What Makes Day and Night* close read-aloud, students focus on distinguishing information that they learn from illustrations and information that they learn from the text in the book to describe the pattern of light and dark on earth (RI.1.7). This text provides rich illustrations and informative text to help the reader make meaning of this complicated scientific topic.
- Close read-alouds support a deep understanding of a worthy text, support students’ mastery of the reading informational or literature standards, and engage students with discussion, movement, and dramatic expression. Monitor both students’ understanding and their engagement; adjust the practice as necessary to support each.
- During the close read-aloud, students participate in a Language Dive conversation that guides them through the meaning of a sentence from the anchor text, *What Makes Day and Night*. The conversation invites students to unpack complex syntax—or “academic phrases”—as a necessary component of building both literacy and habits of mind. This sentence is compelling and complex because it uses the subordinating conjunction *as* to describe two related phenomena, and it uses a nuanced meaning of the preposition *through* to describe patterns in the sky (L.1.5). Students then apply their understanding of the structure of this sentence when using the Science Talk protocol during the Unit 2 Assessment in Lesson 12. Invite students to discuss each chunk briefly, but slow down to focus on the highlighted structure **move through the light**. Note that the chunk *As the earth spins* is presented out of order to first establish the subject of the sentence.
- In Work Time B, students watch a short, eight-second video embedded in the website Visible Earth.
 - Citation: “Blue Marble: Animations.” Video. *Visible Earth*. NASA. 2016. Accessed on 19 July, 2016. <<http://visibleearth.nasa.gov/view.php?id=57760>> (For display. Used by permission.)
 - Purpose: To elicit wonder and curiosity about earth’s rotation.

- This lesson follows the same pattern for shared writing instruction during Closing A. Students continue to share their thinking about how to describe the sun and moon using adjectives.
- This lesson is the third in a series of three that include built-out instruction for the use of Goal 3 Conversation Cues to promote productive and equitable conversation (adapted from Michaels, Sarah and O'Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012. http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O'Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Goal 3 Conversation Cues encourage students to deepen their thinking. Continue drawing on Goal 1 and 2 Conversation Cues, introduced in Module 1, and add Goal 3 Conversation Cues to more strategically promote productive and equitable conversation. In Module 3, Goal 4 Conversation Cues are also introduced. Refer to the Module 1 Appendix for additional information on Conversation Cues. Consider providing students with a thinking journal or scrap paper.

How this lesson builds on previous work:

- In Lesson 2, students were introduced to adjectives in the “What We See: The Sun, Moon, and Stars” poem. This lesson continues to build students’ understanding of adjectives and provides opportunities for students to write with adjectives when describing the sun and moon.
- This lesson invites students to engage in several familiar instructional routines (e.g., Back-to-Back and Face-to-Face, shared writing). Consider your students’ familiarity with these routines and reallocate time to review them as needed.

Areas in which students may need additional support:

- During the Opening, some students may need additional support finding adjectives when the “What We See: The Sun, Moon, and Stars” poem is read aloud. Consider having several printed-out copies available for students to follow along with if needed.
- Throughout the unit, students are asked to distinguish information that they learn from the illustrations and information that they learn from the text in the books read aloud. Some students may need additional support to differentiate what they learned from the illustrations and from the text in the books. Consider creating an anchor chart of what students have learned from each book, and while reviewing a few facts from the anchor chart, ask: “Who else learned this from the book?” Invite students to stand in one corner if they learned it from illustrations and another corner if they learned it from the text. Facilitate a brief discussion about where students learned each fact.
- Students may need additional support during the Back-to-Back and Face-to-Face protocol as they begin to expand on each other’s ideas. Consider providing and posting the sentence frame, “I would like to add ____” in a location for all students to view and access.

Down the road:

- In the Closing, students again participate in shared writing while completing the Describing the Sun and Moon recording form. This activity scaffolds students toward the independent writing work in Lesson 4, where students will receive and write in their Sky notebook, describing the sun and moon using adjectives.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall Cards for the words *spins*, *light*, and *shadow*, introduced in close read-aloud Session 2. Write or type the word on a card and create or find a visual to accompany each word.
 - Technology necessary to play “Blue Marble Animations” in Work Time B.
- Preview the Close Read-aloud Guide: *What Makes Day and Night* (Session 2; for teacher reference).
- Create a “Language Chunk Wall”—an area in the classroom where students can display and categorize the academic phrases discussed in the Language Dive.
- Review the Back-to-Back and Face-to-Face protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, “What We See: The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).
- Prepare the sentence strip chunks for use during the close read-aloud (see supporting materials)

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Record the whole group reciting the “What We See: The Sun, Moon, and Stars” poem and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time A: Create the What Makes Day and Night anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.
- Work Time B: Consider showing students an earth rotation video now: “Blue Marble: Animations.” Video. Visible Earth. NASA. 2016. Accessed on 19 July, 2016. <http://visibleearth.nasa.gov/view.php?id=57760>.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read closely and interpret academic text. Students will also participate in Language Dive discussion, which will support them as they unpack academic phrases.
- ELLs may find some of the concepts described in *What Makes Day and Night* difficult to comprehend, as the text alternates perspectives between the movement of the earth in space and the point of view of people on earth’s surface. When shifts in perspectives occur, make them clear by explicitly pointing it out.

Describe the relationship between the earth moving in space and our experience on its surface using additional models and pictures whenever possible.

Levels of support

For lighter support:

- During the Language Dive, ask more open-ended questions to challenge students, spark discussion, and assess their knowledge. (Example: “What does this chunk tell us about the earth?”)

For heavier support:

- During the close read-aloud, support students who need heavier support by inviting them to act out key parts of the text. (Example: Invite a student to pretend she is an astronaut observing earth.)

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students listen to the “What We See: The Sun, Moon, and Stars” poem. Some students may benefit from having an individual copy of the poem to follow along in near-point as it is read aloud. Support transfer of learning by offering multiple representations of the poem. Consider providing an annotated or illustrated copy of the poem for students as support for information processing strategy development and comprehension.
- **Multiple Means of Action & Expression (MMAE):** During the close read-aloud, some students may benefit from sensory input and opportunities for movement while they are sitting. Provide options for differentiated seating such as sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. In addition, consider providing options for physical action by inviting students to join you in a quick movement break if students seem restless.
- **Multiple Means of Engagement (MME):** During this lesson, students have several opportunities to share with a partner. Foster community and support students in providing each other with positive feedback. Before students share their thinking in Work Time B, discuss strategies for how to give a compliment to a peer about her or his work. Provide sentence frames as needed to support this communication. For example: “Your idea helped me know more about ____ because I heard you say ____.”

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- spins, light, shadow (T)

Review:

- pattern, day, night, sun, earth, darkness (L)

Materials

- ✓ “What We See: The Sun, Moon, and Stars” poem (from Lesson 2; one to display; for teacher read-aloud)
- ✓ Close Read-aloud Guide: *What Makes Day and Night* (Session 2; for teacher reference)
 - Sun, Moon, and Stars Word Wall cards (new; teacher-created; three)
 - Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1; added to during Work Time A)
 - *What Makes Day and Night* (one to display; for teacher read-aloud)
 - *What Makes Day and Night* anchor chart (new; co-created with students during Work Time A; see Close Read-aloud Guide)
 - Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Flashlight (one; used by teacher during the close read-aloud)
- ✓ “Blue Marble Animations” (video; play in entirety; see Technology and Multimedia)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Sun photograph 2 (one to display)
- ✓ Moon photograph 2 (one to display)
- ✓ Describing the Sun and Moon recording form (from Lesson 2; one for teaching modeling and one per student)
- ✓ Sentence strip chunks: *What Makes Day and Night* (one to display, see supporting materials)

Opening**A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)**

- Invite students to the whole group area.
- Display the **“What We See: The Sun, Moon, and Stars” poem**.
- Remind students that in the previous lesson they listened to a poem full of adjectives that describe the sun, moon, and stars. Remind students that an adjective is word that describes a person, place, or thing.
- Using a total participation technique, invite responses from the group:
 - “Why did we circle/highlight some of the words in the poem?” (We circled the adjectives.)**
 - “What were some adjectives that we circled to describe the sun?” (orange, round)**
- Say:
 - “As I reread the poem today, I want you to listen for adjectives used to describe the sun, moon, and stars. When you hear an adjective read aloud, quietly put a thumb out in front of your chest.” Model the hand gesture if necessary.**

- Invite students to quietly push the imaginary button on their brains to show they are ready to listen for adjectives.
- Read aloud poem, fluently and with expression.
- Using a total participation technique, invite responses from the group:

“What were some adjectives that you heard to describe the sun, moon, or stars?” (sun: hot, moon: full, stars: twinkling)

“What is something at home or at school that we could describe using this adjective?” (a bowl of soup; the nightlight)

- Tell students to keep these adjectives tucked away in their brains to use during shared writing later today. Tomorrow the class will create an Adjectives anchor chart to record the adjectives found in the poem.

Meeting Students' Needs

- When using total participation techniques, minimize discomfort and/or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Encourage students to look at the Adjectives Construction board (described in Lesson 2) for clues. Invite them to add any new adjectives they find onto the board. For additional practice, invite students to create sentences with adjectives using the frame “I observe a(n) [adjective] [noun] in the sky.”

Work Time

A. Close Read-aloud, Session 2: *What Makes Day and Night*, Pages 14–15 (20 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the first one aloud:
*I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth.*
- Reread the target, emphasizing these words:
*“I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth.”*
- Define the word *distinguish* (to tell apart by seeing differences).
- Invite students to turn and talk to an elbow partner:
“What does this learning target mean?” (find information that is different in the illustrations and in the text to tell about the pattern of light and dark on earth)
- Gather students back together and invite a few students to share out. Clarify the meaning of the target as needed.
- Invite students to take out their imaginary bow and to take aim at the target.
- Guide students through the close read-aloud for *What Makes Day and Night* using the **Close Read-aloud Guide: *What Makes Day and Night* (Session 2; for teacher reference)**. Consider using the **Reading Informational Text Checklist** during the close read-aloud (see Assessment Overview and Resources).

- Refer to the guide for the use of *What Makes Day and Night*, the **What Makes Day and Night anchor chart**, the **Sun, Moon, and Stars Word Wall cards**, and the **Sun, Moon, and Stars Word Wall**.
- Refocus whole group.
- Tell students that in the next lesson they will conduct an experiment to better see the pattern of light and dark on earth.

Meeting Students' Needs

- To activate background knowledge of familiar concepts and support comprehension of vocabulary, invite students to recall a time they sat in a shadow outside (e.g., under a tree, in the shade of a building, etc.) as the Word Wall card for shadow is added to the Sun, Moon, and Stars Word Wall. (MMR)

Work Time

B. Back-to-Back and Face-to-Face: Earth's Rotation (15 minutes)

- Tell students you have a video of the earth to show them. As they watch the video, they should look carefully to see what they notice about how the earth moves and rotates, and think about the questions they have.
- Model standing and rotating in place for students. While rotating, say: "I am rotating right now."
- Using a total participation technique, invite responses from the group:
 - "What are some words to describe what I am doing?" (turning, spinning, rotating)***
 - "What does it mean to rotate?" (turn in a circle around a center point)***
- As students share responses, confirm thinking: Rotate means to turn in a circle around a center point.
- Play the **"Blue Marble Animations" video**.
- At the completion of the video, tell students that they now have a chance to share their thinking with a partner using the Back-to-Back and Face-to-Face protocol. Remind them that they used this protocol in Module 1, and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through Round 1 of the protocol using the following question:
 - "What do you see?"***
- Provide a sentence frame as necessary:
 - "I would like to add ____."
- Refocus students whole group and play the video again.
- Guide students through Round 2 of the protocol using the following question:
 - "As the earth rotates, which side of the earth has day and which side has night?"***
- Provide a sentence frame as necessary:
 - "I would like to add ____"***
 - If productive, use a Goal 3 Conversation Cue to challenge students:

*“What if the earth didn’t rotate? I’ll give you time to think and discuss with a partner.”
(Responses will vary.)*

- As students share, circulate and continue to use the **Speaking and Listening Checklist** to assess students’ progress toward the learning target.
- Refocus whole group and invite students to quickly and quietly return to their seats.

Meeting Students’ Needs

- To help students anticipate and prepare for sharing during the protocol, identify which partner will share first. For example, provide students with index cards that designate whether they are partner A or B. (MME)
- For ELLs: Introduce and model using the sentence frames to respond to others’ ideas. Display the sentence frames in speech bubbles. Example: “Jason said he saw the earth moving. I also saw the earth moving, but I also saw it rotating. I have something to add to his idea! So what would I say? That’s right, I would like to add that I saw the earth rotating!”)
- For ELLs: Tell students it is common to use the word *that* following the phrase *I would like to add*. Invite students to practice using this expression. (Example: “I would like to add *that* part of the earth is always light and part of the earth is always dark.”)

Closing and Assessment

A. Shared Writing: Describing the Sun and Moon (10 minutes)

- Refocus students whole group.
- Direct students’ attention to the posted learning targets and read the second one aloud:
I can record my observations about what I notice in pictures and videos of the sun, moon, and stars.
- Tell them that today they will look at a new image of the sun and moon and help record their observations using pictures and words during shared writing. Remind students that earlier in today’s lesson they continued to identify adjectives that describe the sun and moon.
- Display **sun photograph 2** and **moon photograph 2**.
- Using a total participation technique, invite responses from the group.
“How would you describe the sun in this photograph? What adjectives could you use to describe it?” (yellow, hidden)
“How would you describe the moon in this photograph? What adjectives could you use to describe it?” (sliver, white)
- Display the **Describing the Sun and Moon recording form**.
- Remind students of the procedure for shared writing from Lesson 2. Review the procedure briefly.
- Point to the question on page 1 and read it aloud, and using a total participation technique, invite responses from the group:
“What does the sun look like?”

- Prompt students to use the Sun, Moon, and Stars Word Wall and the “What We See: The Sun, Moon, and Stars” poem as resources as they describe the sun.
- As students share responses, use their ideas to complete page 1. Think aloud how to use the words from the question itself as a cue to formulate the answer using a complete sentence. (Example: The sun looks yellow and hidden.)
- Draw a quick sketch of what the sun looks like.
- Turn to page 2.
- Point to the question on page 2 and read it aloud:
“What does the moon look like?”
- Prompt students to use the Sun, Moon, and Stars Word Wall and the “What We See: The Sun, Moon, and Stars” poem as resources as they describe the sun.
- As students share responses, use their ideas to complete page 2. Think aloud how to use the words from the question itself as a cue to formulate the answer using a complete sentence. (Example: The moon looks white and little.)
- Draw a quick sketch of what the moon looks like.
- With excitement, tell students that in the next lesson they will receive their very own Sky notebook and will write about the sun and moon using adjectives.

Meeting Students’ Needs

- When displaying the photographs, support students’ expressive skills by offering adjectives and/or picture cues preprinted on index cards for students to select as they share words that describe the sun and the moon (e.g., yellow, hidden, white, silver). (MMAE)
- For ELLs: Support students as they formulate sentences for the Describing the Sun and Moon recording form. Invite students to use the Adjectives Construction board (See Lesson 2) with the sentence frame: “The [sun/moon] looks like a(n) [adjective] [noun].” (Example: The sun looks like an orange ball. The sun looks bright and yellow.) Invite students to identify any new adjectives they might like to add to the board.

Closing and Assessment

B. Reflecting on Learning (5 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the first one aloud:
“I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth.”
- Invite students to turn and talk with an elbow partner:
“What is something you learned from an illustration to describe the pattern of light and dark on earth?” (I saw a picture of the earth spinning. Half of the earth faces the sun, and the other half faces away from the sun.)
“What did you read in the text that confirmed what you saw in the illustration?” (The text said that the earth spins around and light from the sun falls on one-half of the spinning earth.)

- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Refocus students whole group and invite one or two students to share out.

Meeting Students' Needs

- As students share with a partner, increase mastery-oriented feedback by providing feedback that is frequent, timely, and specific to individual pairs of students. (Example: "I hear that you learned some very interesting things from the illustrations in the text. Can you share how what we read in the text confirms what you saw in the illustrations?") (MME, MMAE)
- For ELLs: Review the learning target introduced in Work Time A. Ask students to give specific examples of how they worked toward achieving it in this lesson. Invite students to rephrase the learning target now that they have more experience describing patterns. (Example: I can tell what I learned about patterns in the pictures and words from *What Makes Day and Night*.)

Lesson 4: Close Read-aloud, Session 3: *What Makes Day and Night*

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.5:** With guidance and support from adults, demonstrate understanding of word relationships and nuances in word meanings.
- **L.1.5c:** Identify real-life connections between words and their use (e.g., note places at home that are cozy).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a)
- I can record my observations from images/videos of the sky in my Sky notebook. (W.1.8, L.1.1f, L.1.6)

Ongoing Assessment

- During the Opening and Closing A, observe students as they begin to use adjectives to describe the sun, moon, and stars during shared writing and identify real-life connections with the adjectives. Record student progress on the Language Checklist. (L.1.1f, L.1.5c).
- During Session 3 of the close read-aloud in Work Time A, use the Reading Informational Text Checklist as students answer the focus question, paying attention to how they distinguish information they've learned from illustrations and from the words in text. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a)
- During the Closing, circulate and observe students as they complete the Sky Notebook. Watch for students to observe and accurately use adjectives to describe the sun and moon. (W.1.8, L.1.1f, L.1.1j)

Agenda

1. Opening

A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)

2. Work Time

A. Close Read-aloud, Session 3: *What Makes Day and Night*, Pages 16–20 (20 minutes)

B. Engaging the Scientist: Introducing Integrity and Modeling How the Earth Moves (15 minutes)

C. Structured Discussion: Reflecting on Integrity (5 minutes)

3. Closing and Assessment

A. Independent Writing: Sky Notebook (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In the Opening, students are introduced to the Adjectives anchor chart, which they will use to fill in missing adjectives on the “What We See: The Sun, Moon, and Stars” poem (W.1.8, L.1.1f).
- This lesson contains the third in a series of five close read-aloud sessions. Recall that close read-alouds are distinct from, and do not replace, more typical daily read-alouds. Daily read-alouds are essential so students experience the volume of reading needed to build their world knowledge and vocabulary. Refer to the K–5 Recommended Text List for suggestions of module-related texts to use in more typical read-alouds.
- In Work Time B, students work in pairs on a science activity from the close read-aloud text *What Makes Day and Night*. Students use the illustrations and the words from the book to re-create the activity in the text. (RI.1.1, R.1.7, SL.1.1a, SL.1.6)
- During Work Time B, students revisit the idea of habits of character from Unit 1: working to become an ethical person. In this lesson, students begin to focus on a new habit: integrity. Using the Working to Become Ethical People anchor chart, students learn the definition of integrity and begin to consider how to apply this habit as they work in pairs during the science activity.
- In the Closing, students receive and begin writing independently in their Sky notebook. This notebook is used throughout the unit to capture students’ descriptions of the appearance and location of the sun and moon in the sky.
- As students write in their Sky notebook, they use adjectives and prepositions to describe the sun and moon (L.1.1f,i) and are asked to write in both simple and compound sentences (L.1.1j, L.1.6). Their work in the notebook partially addresses standards L.1.1j and L.1.6. These standards will be revisited during Unit 3.
- Lessons 1–3 featured built-out instruction for Goal 3 Conversation Cues. Moving forward, this will appear only as reminders after select questions. Continue using Goal 1-3 Conversation Cues to promote productive and equitable conversation. Refer to the Module 1 Appendix for additional information on Conversation Cues.

How this lesson builds on previous work:

- Continue to reinforce routines established in Lessons 2–3, including the poem routine and shared writing.
- In this lesson, students learn a new habit of character around how to become an ethical person, specifically showing integrity. Students were introduced to this chart and to the first habit of character for this chart in Unit 1.
- The Sky notebook used in the Closing builds on the work that students did during shared writing in Lessons 2–3 using the recording forms.

Areas in which students may need additional support:

- The concept of “integrity” may feel abstract; students may find it difficult to reflect on how they show integrity. As students collaborate while following a set protocol, continue to name specific behaviors that show integrity and give concrete examples that help students articulate their own progress toward this habit of character. Examples: “I see that everyone is listening to the question. That means you are working with integrity!” and “I can hear lots of good conversations going on. Thank you for working with integrity.”
- Some students may need additional support to transition to writing more independently. Remind students to use the tools around the room such as the Sun, Moon, and Stars Word Wall, the Adjectives anchor chart, and the High-Frequency Word Wall.
- Some students may need additional support with writing a complete sentence when answering a prompt. Consider reviewing with students how to use the words from the question as a cue to formulate the answer using a complete sentence. (Example question: “What does the sun look like?” Answer: The sun looks _____.)

Down the road:

- Throughout Unit 2, students will continue to reflect on their progress toward showing integrity.
- In this lesson, students are introduced to the Sky notebook, which contains pages that students will use across multiple lessons in the unit. The entire notebook is compiled in the supporting materials of this lesson. Based on the needs of your students, consider separating the pages in advance to distribute only as each page is used.
- In Lesson 5, students will continue building their understanding of the observable pattern of light (day) and dark (night) as they transfer information from the *What Makes Day and Night* anchor chart into their own individual notes, which they will use to take part in their first Science Talk in Lesson 6.

In advance:

- Prepare:
 - Sun, Moon, and Stars Word Wall card for the word *daylight* introduced during the close read-aloud. Write or type the word on a card and create or find a visual to accompany each word.
- Adjectives anchor chart using circled/highlighted adjectives from the “What We See: The Sun, Moon, and Stars” poem. Preview the Opening to envision how this material is used.
 - To display sun photograph 3 and moon photograph 3 in color if possible.

- Preview:
 - Close Read-aloud Guide: *What Makes Day and Night* (Session 3; for teacher reference).
 - Pages 1 and 2 of the Sky notebook.
- Pre-distribute materials for the Closing at student workspaces to ensure a smooth transition.
- Gather flashlights for the interactive experience in Work Time B.
- Strategically pair students for the interactive experience in Work Time B.
- Review the Pinky Partners and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, “What We See: The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Create the “What We See: The Sun, Moon, and Stars” poem version 2 in an online format—for example, a Google Doc—to display and for families to access at home.
- Work Time B: Video record students as they complete the close read-aloud follow-up activity to review with students in later lessons as a reminder of what happened. Most devices (cellphones, tablets, laptop computers) come equipped with free video recording apps or software.
- Closing A: Students complete the Sky notebook using a word-processing tool—for example, a Google Doc.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read closely and interpret academic text. Students will apply and deepen their understanding of academic content using multiple modalities, including a hands-on experiment.
- ELLs may find it challenging to make connections between the phenomena described in *What Makes Day and Night* and the experiment performed in Work Time B. Make this connection as explicit as possible. Consider incorporating a globe or a beach ball to make the connection even more apparent.

Levels of support

For lighter support:

- During Work Time C, encourage students to use Conversation Cues with other students to extend and deepen conversations, think with others, and enhance language development.

For heavier support:

- During Closing and Assessment, consider working closely with a small group of students who are not ready to complete their Sky notebooks independently. Complete the activity as a shared or interactive writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** Throughout this lesson, embed support for unfamiliar vocabulary by providing explanation and visual examples. This will help students make connections and support comprehension. For example, prepare index cards with unfamiliar vocabulary and provide them to students before the close read-aloud. When introducing and reading each word, invite students to sketch a quick drawing on the card to support construction of meaning.
- **Multiple Means of Action & Expression (MMAE):** As students begin independent writing, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). Some students may forget their sentence ideas once they begin directing their efforts toward writing. Support strategy development by modeling how to physically touch the words/spaces on the sentence frame and draw lines for additional words you intend to write. This will help students recall their original ideas throughout the writing process.
- **Multiple Means of Expression (MME)** Build a supportive environment to increase sustained engagement for all learners. During the Closing activity, congratulate class members on their writing for the day. Foster a sense of community and provide options for physical action by inviting students to give themselves a special applause.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- rotate (L)
- daylight (T)

Review:

- sunrise, sunset, night, noontime, light, dark (L)

Materials

- ✓ Adjectives anchor chart (new; teacher-created; see supporting materials)
- ✓ “What We See: The Sun, Moon, and Stars” poem version 2 (example, for teacher reference)

- ✓ Close Read-aloud Guide: *What Makes Day and Night* (Session 3; for teacher reference)
 - Sun, Moon, and Stars Word Wall cards (new; teacher-created; one)
 - Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1; added to during Work Time A)
 - *What Makes Day and Night* (one to display; for teacher read-aloud)
 - Globe (one; for teacher modeling)
 - *What Makes Day and Night* anchor chart (begun in Lesson 3; see Close Read-aloud Guide)
 - Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4; added to during Work Time C)
- ✓ Flashlight (one for teacher modeling and one per pair)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Think-Pair-Share Protocol anchor chart (begin in Module 1)
- ✓ Sun photograph 3 (one to display)
- ✓ Moon photograph 3 (one to display)
- ✓ Sky notebook (pages 1–2; one per student)
- ✓ Sky notebook (answers, for teacher reference)
- ✓ Pencils (one per student)
- ✓ Colored pencils (class set; variety of colors per student)
- ✓ Crayons (class set; variety of colors per student)

Opening

A. Engaging the Learner: “What We See: The Sun, Moon, and Stars” Poem (10 minutes)

- Invite students to the whole group area.
- Remind them that in previous lessons they listened to the poem being read aloud and listened for adjectives that describe the sun, moon, and stars.
- Direct students’ attention to the posted **Adjectives anchor chart**. Say: “We did great work finding all the adjectives in the poem. I pulled them out and put them onto a chart.”
- Point to each adjective while reading aloud.
- Display the **“What We See: The Sun, Moon, and Stars” poem version 2**. Ask:
 - “What do you notice that’s different about the poem today?” (There are empty spaces and words missing.)*
 - “What words are missing in the empty spaces?” (adjectives)*
- Tell students that today they will follow along while the poem is read aloud. They should use adjectives from the Adjectives anchor chart to fill in the correct missing adjectives.

- Use the following procedure to complete filling in the missing adjectives in the poem:
 1. Invite students to follow along as you read the poem aloud and track the print: “The sun looks _____.”
 2. Using a total participation technique, invite responses from the group:
“Which adjective fits in the missing space?” (Responses will vary.)
 3. As students share responses, use their ideas to fill in the missing adjective. (Example: “The sun looks large and yellow.”)
 4. Invite students to join you as you read the corrected line of the poem.
 5. When all corrections have been made, read the corrected poem together with students.
- Direct students’ attention back to the Adjectives anchor chart. Ask:
“Can we add any more adjectives to describe the sun, moon, and stars to this chart?” (Responses will vary.)
“What is something at home or at school that we could describe using this adjective?” (Responses will vary.)
- As students share, add any remaining adjectives to the chart.
- Remind students to use the adjective from the Adjectives anchor chart when they write in their Sky notebooks later in today’s lesson.

Meeting Students’ Needs

- To support students’ expressive skills, offer index cards (before reading the poem) preprinted with adjectives from the poem to select as students select missing words. (MMAE)
- For ELLs: Challenge students by displaying the poem without adjectives, but without the blank spaces to indicate where they belong. Invite students to determine where the adjectives should be placed within the poem. Guide them to conclude that adjectives come before people places and things in sentences, not after. (Example: “This says ‘from moon to moon.’ Where should I put an adjective? ‘From moon crescent’? That doesn’t sound right. Right! ‘From crescent moon!’”)

Work Time

A. Close Read-aloud, Session 3: *What Makes Day and Night*, Pages 16–20 (20 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the first one aloud:
*“I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth.”*
- Invite students to turn and talk to an elbow partner:
“What do we notice about how the illustrations and the text in the book help us to understand the pattern of light and dark on earth?” (The pictures and the words match, and they show part of earth in light and some in dark.)
- Invite one or two students to share out.
- Tell students that today they will continue to investigate the pattern of light and dark on earth and see how that affects us on earth.

- Review the focus question by reading it aloud:
“What makes day and night on earth?”
- Invite students to take out their imaginary bows and to take aim at the target.
- Guide students through the close read-aloud of *What Makes Day and Night* using the **Close Read-aloud Guide: What Makes Day and Night (Session 3; for teacher reference)**. Consider using the **Reading Informational Text Checklist** (see Assessment Overview and Resources).
- During Session 3, refer to the guide for the use of *What Makes Day and Night*, the **What Makes Day and Night** anchor **chart**, the **Sun, Moon, and Stars Word Wall cards**, the **Sun, Moon, and Stars Word Wall**, and the **globe**.
- Refocus whole group.

Meeting Students' Needs

- Before reading, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active listening for key details. (MMR, MMAE)

Work Time

B. Engaging the Scientist: Introducing Integrity and Modeling How the Earth Moves (15 minutes)

- Share with students that now that they have learned how the earth moves from daylight to darkness, they are going to explore this occurrence more closely through an experiment.
- Briefly introduce the definition of *rotate* (turn in a circle around a center point).
- Invite students to turn and talk with an elbow partner:
“During the day, is the earth facing toward the sun, or away from the sun? How do you know?” (The earth is facing the sun during daytime. I know because the sun gives us light and warmth.)
- Tell students that today they will work in groups to see how daylight turns into darkness as the earth rotates throughout the day.
- Remind students that in the previous unit they learned one habit of character about how we treat others. Direct students' attention to the posted **Working to Become Ethical People anchor chart** and read it aloud:
“Respect: I treat myself, others, and the environment with care.”
- Invite students to turn and talk with an elbow partner:
“How did you show respect during the Role-Play protocol in the last unit?” (Responses will vary, but may include: I made sure to take turns with my partner so we could be different characters.)
- Invite one or two students to share with the whole group.
- Tell students that today they will learn a new habit of character connected to how we treat each other.
- Direct students' attention to the first row that reads *integrity*. Tell students the next habit of character they will learn about is integrity.
- Point to the column that reads, “What does it mean?” and read the definition of *integrity*:

“I do the right thing even when it’s hard.”

- Using a total participation technique, invite responses from the group:

“Have you experienced a time when you had to do the right thing even when it’s hard? What was the scenario?” (Yes, I had to choose not to play around and distract my friend during a group lesson.)

“Why is it important to do right thing when following directions in a group activity?” (It keeps us on task.)

- Tell students that they can show integrity by working with their group on today’s science activity. They should focus on following directions and avoiding distractions even if it seems hard.
- Invite students to turn and talk to an elbow partner:

“How will you show integrity during the science activity?” (I will follow directions and keep on task.)

- Display pages 22–23 of *What Makes Day and Night*. Say:

“Today you will work in pairs to re-create the illustrations on pages 22 and 23.”

- Move students into pre-determined pairs and point to the first illustration on page 22. Read the text beneath the illustration aloud.

“Stand so that your left side is toward the lamp. Hold your arms out all the way. Your left hand points toward the lamp. This is sunrise.”

- Distribute **flashlights**. Tell students that one partner will model being the earth and the other partner will model being the sun by holding a flashlight.
 1. Invite students to re-create the first illustration on page 22.
 2. Point to the second illustration on page 22. Read the text beneath the illustration aloud.
 3. Invite students to re-create the second illustration on page 22.
 4. Point to the first illustration on page 23. Read the text beneath the illustration aloud.
 5. Invite students to re-create the first illustration on page 23.
 6. Point to the second illustration on page 23. Read the text beneath the illustration aloud.
 7. Invite students to re-create the second illustration on page 23.
- Tell students that they will now talk with a partner using the Pinky Partners protocol to discuss what they noticed about how the earth moves from daylight to darkness. Remind students that they used this protocol in Module 1 and review as necessary, using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol.
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Document progress toward SL.1.1 using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share out.
- Tell students that they will use this activity again in the next lesson.
- If productive, cue students to think about their thinking:

“How does our experiment add to your understanding of what makes day and night? I’ll give you time to think and discuss with a partner.” (Responses will vary.)

Meeting Students' Needs

- To activate background knowledge, provide one or two examples of what integrity looks and sounds like. (Example: "When my son shows integrity, I see him studying for a test while his friends are outside playing basketball. What do you see?") (MMR)
- For ELLs: The concept of integrity may seem abstract for some students. Make it more concrete by telling a brief story about how you show integrity in your life. Provide dialogue that illustrates what showing integrity might sound like. (Examples: "Once, when I was a kid, I was so tired that I wanted to stay in bed. I thought about telling a lie that I had a tummy ache so that I could stay home from school. But I decided to tell the truth instead, even though it was hard. I said, 'I'm going to do the right thing!'")

Work Time

C. Structured Discussion: Reflecting on Integrity (5 minutes)

- Direct students' attention to the Working to Become Ethical People anchor chart. Point to the column that reads, "What does it mean?" and read the definition of *integrity*:
 - "I do the right thing even when it's hard."
- Tell students they are going to use the Think-Pair-Share protocol to discuss how they showed integrity during the science activity. Remind them that they used this protocol in Lesson 3, and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to Think-Pair-Share with an elbow partner:

"How did you show integrity during the science activity?" (Responses will vary.)
- Offer the following sentence stems as necessary:
 - "I showed integrity by _____."
 - "This helped me and my partner because _____."
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Document progress toward SL.1.1 using the Speaking and Listening Checklist.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite a few students to share out.
- Remind students that they will keep working on using this habit of character throughout the unit when working with partners and small groups.

Meeting Students' Needs

- During the Think-Pair-Share, scaffold self-regulatory skills by helping students anticipate and manage frustration. Model what to do if a partner has an idea they do not agree with. (Example: "My partner said she showed integrity by holding the flashlight. If I don't agree with that, I can remember to ask her to say more about how that shows integrity. This will help me better understand her thinking.") (MME)
- For ELLs: Invite students, whole class, to generate ideas about how they showed integrity. Record and display student thinking. Invite students to draw from these

ideas as they think about and discuss ways they showed integrity with their partners (examples: listening carefully, using the flashlight properly, following instructions).

Closing and Assessment

A. Independent Writing: Sky notebook (10 minutes)

- Refocus students whole group.
- Remind them that earlier in the lesson they were introduced to the Adjectives anchor chart. Now they will look at a new set of sun and moon pictures and write about these pictures using adjectives from the anchor chart in their very own Sky notebook.
- Display **sun photograph 3** and **moon photograph 3**.
- Invite students to turn and talk to an elbow partner:

“What adjectives describe the sun?” (Answers will vary, but may include: yellow, bright, fiery, shiny.)

“What adjectives describe the moon?” (Answers will vary, but may include: white, crescent.)
- Display the **Sky notebook**. Tell students that for the remainder of this unit they will capture their observations of the sun and moon in this notebook.
- Direct students to the top of page 1 and read the question aloud: “What does the sun look like?”
- Direct students to the top of page 2 and read the question aloud: “What does the moon look like?”
- Tell students that today they will answer these two questions using pictures and words to show their thinking. Remind students to use the Adjectives anchor chart to describe what the sun and the moon look like. Remind students to use a complete sentence when answering the question.
- Invite students to show a thumbs-up or touch their head if they are ready to begin writing and drawing about the sun and moon.
- Point out the Sky notebooks, **pencils**, **colored pencils**, and **crayons** already at student workspaces.
- Transition students to their workspaces and invite them to begin working on page 1.
- After 3 minutes of work time, recommend that students begin working on page 2.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). Refer to **Sky notebook (answers, for teacher reference)** as necessary.
- After 3 minutes, signal all students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief. Collect the notebooks and tell students they will continue to write in their Sky notebook in upcoming lessons.
- Offer students specific, positive feedback on their use of adjectives. (Example: “I noticed you were thinking about which adjectives best describe today’s moon picture.”)

Meeting Students' Needs

- Minimize distractions during independent writing by providing tools such as sound-canceling headphones or individual dividers. (MME)
- For ELLs: Provide students with a sentence frame to support their writing in their Sky notebooks. (Example: The sun looks ____ and ____.")
- For ELLs: Briefly discuss the photograph to ensure that all students are prepared to write about the different objects in it. Label relevant objects in the photograph to support students as they write. (Example: "Does anyone know what this is? That's right, it is a streetlight. Ingrid, can you label the streetlight? And these are towers. I'll label them.")

Lesson 5: Close Read-aloud, Session 4: *What Makes Day and Night*

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during, beyond, toward*).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a)
- I can record my observations from images/videos of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.6)

Ongoing Assessment

- During the Opening, observe students as they begin to find prepositions to describe where the sun, moon, and stars are in particular photographs. (L.1.1i)
- During Session 4 of the close read-aloud in Work Time A, use the Reading Informational Text Checklist to observe students as they distinguish information they've learned from illustrations and from the words in text. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a)
- During Work Time B, circulate and observe students as they compile their individual notes on *What Makes Day and Night*. Watch for students to begin to synthesize their thinking about the first pattern in the sky they learned: light (day) and dark (night). (RI.1.2, RI.1.6, RI.1.7, W.1.8)

Agenda

1. Opening

- A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes)

2. Work Time

- A. Close Read-aloud, Session 4: *What Makes Day and Night*, Pages 24–27 (15 minutes)
- B. Independent Writing: *What Makes Day and Night* Notes (15 minutes)
- C. Shared Writing: Reflecting on Unit 2 Guiding Question (10 minutes)

3. Closing and Assessment

- A. Independent Writing: Sky Notebook (10 minutes)
- B. Shared Writing: Describing the Position of the Sun (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson contains many similar structures from Lessons 2–4. Take note of this and allocate and adjust time as necessary.
- In Work Time A, students continue to answer the focus question: “What makes day and night on earth?” During Session 4 of the close read-aloud, students begin to synthesize their learning about the first pattern in the sky they learned: light and dark (RL.1.1, RL.1.3, RL.1.7, SL.1.2).
- In Work Time B, students begin to take individual notes (in pictures and words) to capture their thinking in response to the focus question of the close read-aloud. Note-taking is a new and challenging skill, but an important one to start early. In this lesson, students record their notes using the *What Makes Day and Night* notes sheet. Some students may choose to copy from the *What Makes Day and Night* anchor chart and others may use mostly pictures or labels. Encourage all styles of note-taking and remind students about the importance of being able to read and use their notes later.

How this lesson builds on previous work:

- Students are introduced to a new poem, “What Are They? The Sun, Moon, and Stars,” which is used to reinforce the science content and introduce prepositions.
- Continue to reinforce routine established in previous lessons: poem routine, shared writing, independent writing in the Sky notebook.
- Students continue to focus on how to become an ethical person, specifically showing integrity. This builds on their work with respect in Unit 1, and with integrity in Lesson 4.
- In Lesson 4, students began to write independently in their Sky notebook. During this lesson, students continue to write independently in their notebook as they describe the sun and moon using adjectives, but also are reintroduced to the instructional practice of shared writing as they practice writing about the position of the sun and moon using prepositions.
- Students should use their thinking from the previous close read-aloud sessions to complete their independent writing during Work Time B.

Areas in which students may need additional support:

- During the Opening, some students may need additional support understanding the definition of a preposition. Consider having several simple prewritten sentences with illustrations available to model. (Example: The dog was behind the door.)
- Some students may need additional support with making the transition to more independent writing. Remind students to use the tools around the room such as the Sun, Moon, and Stars Word Wall, the Adjectives anchor chart, and the High-Frequency Word Wall.

Down the road:

- In Lesson 6, students will participate in a Science Talk using their notes from this lesson. Encourage students to be as thorough as possible so that their notes will be a helpful tool for the Science Talk.
- In Lesson 8, you will need to display two to three strong student examples from the *What Makes Day and Night* notes sheet. Consider selecting and separating the exemplars ahead of time.
- As students reflect on integrity in subsequent lessons, consider guiding them toward more specific responses (e.g., “I showed integrity by following the protocol and staying on task and not getting distracted.”).

In advance:

- Preview:
 - Close Read-aloud Guide: *What Makes Day and Night* (Session 4; for teacher reference).
 - Page 3 of the Sky notebook.
- Prepare *What Makes Day and Night* notes sheets on clipboards for Work Time C.
- Display sun photograph 4 in color if possible.
- Pre-distribute materials for the Closing at student workspaces to ensure a smooth transition.
- Post: Learning targets, “Where Are They? The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia**Consider using an interactive white board or document camera to display lesson materials.**

- Opening A: Create the “Where Are They? The Sun, Moon, and Stars” poem in an online format—for example, a Google Doc—to display and for families to access at home to reinforce.
- Work Time C: Create the Unit 2 Guiding Question anchor chart in an online format—for example, a Google Doc—to display and for families to access at home to reinforce these skills.
- Closing B: Create the Describing the Position of the Sun recording form in an online format—for example, a Google Doc—to display and complete, and for families.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to read closely and interpret academic text. Students will apply and deepen their understanding of academic content using multiple modalities, including shared writing and note-taking.
- ELLs may find this lesson challenging because it offers fewer opportunities to role-play, experiment, and interact with peers than prior lessons. Guide students in recalling their activities in prior lessons to help contextualize the discussions. Consider briefly modeling the flashlight experiment again to supplement the discussion about patterns in the sky with visuals and experiences.

Levels of support

For lighter support:

- Support students as they distinguish information learned in the text and information learned with illustrations. Ask: “Did you learn how the earth moves from the text, or did you learn that from an illustration? Can you show me which part of the text or which illustration helped you learn that information?”
- During the Mini Language Dive, ask more open-ended questions to challenge students, spark discussion, and assess their knowledge. (Example: “What does this chunk tell us about patterns in the sky?”)

For heavier support:

- During Work Time B, distribute a partially filled-in copy of What Makes Day and Night notes sheet. This will provide students with models for the kind of information they should enter, while relieving the volume of notes required.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** During the close read-aloud, support active information processing skills as students integrate new information with prior knowledge. Provide options for comprehension by linking to and activating relevant prior knowledge. For example, before reading, invite students to recall the information from previous interactions with the text. Consider providing students with a summary of the salient details from the text read thus far.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, students are invited to share ideas with the whole group. Support students in appropriately expressing knowledge and ideas. As students share out, provide options for expression and communication by using sentence frames. For example: “Day happens when the sun ____.” or “Night happens when ____.”
- **Multiple Means of Engagement (MME):** During independent writing, some students may need examples of how to problem-solve when they want to write a word with tricky spelling. Emphasize sustained effort and process by modeling

how to sound out a word with tricky spelling and demonstrate how to use environmental print to support spelling accuracy.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- earth, sun, day, night, spin (L)
- daylight, midnight (T)

Materials

- ✓ “Where Are They? The Sun, Moon, and Stars” poem (one to display; for teacher read-aloud)
- ✓ Close Read-aloud Guide: *What Makes Day and Night* (Session 4; for teacher reference)
 - *What Makes Day and Night* (one to display; for teacher read-aloud)
 - *What Makes Day and Night* anchor chart (begun in Lesson 3; see close read-aloud guide)
 - Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ *What Makes Day and Night* notes sheet (one to display and one per student)
- ✓ Pencils (one per student)
- ✓ Crayons (class set; variety of colors per student)
- ✓ Colored pencils (class set; variety of colors per student)
- ✓ Unit 2 Guiding Question anchor chart (begun in Lesson 2; added to during Work Time C; see supporting materials)
- ✓ Sun photograph 4 (one to display)
- ✓ Sky notebook (from Lesson 4; page 3; one per student)
- ✓ Sky notebook (from Lesson 4; answers, for teacher reference)
- ✓ Adjectives anchor chart (from Lesson 4)
- ✓ Describing the Position of the Sun recording form (one for teaching modeling and one per student)

Opening

A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes)

- Invite students to the whole group area.
- Remind them that in previous lessons they read a poem describing the sun, moon, and stars. Tell them that today, they will learn a new poem about the sun, moon, and stars!

- Direct students' attention to the **"Where Are They? The Sun, Moon, and Stars" poem**.
- Tell students that you will recite the poem first on your own as they listen. Say: "As I read the poem, I want you to think about what the poem is about."
- Read aloud the entire poem, slowly, fluently, with expression, and without interruption.
- After reading the final verse of the poem, invite students to turn and talk to an elbow partner: ***"What is the poem about?" (where the sun, moon, and stars are in location to other things like buildings, ground, trees)***
- Remind students that there are different kinds of words and that they learned about *nouns* and *verbs* in Unit 1, and *adjectives* earlier in Lesson 2. Define the terms noun, verb, and adjective as needed.
- Invite students to whisper a noun from the poem, "Where Are They: The Sun, Moon, and Stars", into their hands. Then invite them to whisper a verb from the poem into their hands.
- Affirm that this poem describes where sun, moon, and stars are in location to other things. Tell students that words that describe where things are located in relation to other things have a special name, *prepositions*. Define preposition (a word that describes the location of one thing in relation to another thing).
- Using a total participation technique, invite responses from the group: ***"What are some hand gestures, motions, or actions that go along with each verse of the poem?" (Answers will vary, but might include: lifting their arms slowly to show the sun rising up over the horizon, sun high in the sky, full moon coming up over buildings.)***
- Reread the poem aloud a second time and invite students to repeat each verse after it is read, using their own chosen gestures and hand motions. Tell students that they will continue to work with this poem over the next several lessons to describe where the sun, moon, and stars are located.

Meeting Students' Needs

- As students practice the poem with gestures, provide options for expression by echoing several times in different voices. (Example: Invite students to try repeating each verse in a whisper voice, in a giant voice, and/or in an opera voice.) (MMAE)
- For ELLs: Prepare students for their work with prepositions by asking them to identify words that tell us where the sun, moon, and stars are located. Example: "What are some words that tell us where the sun is?" (above, below, behind)

Work Time

A. Close Read-aloud, Session 4: *What Makes Day and Night*, Pages 24–27 (15 minutes)

- Direct students' attention to the posted learning targets and read the first one aloud: ***"I can distinguish what I learn from the illustrations and what I learn from the text in the book *What Makes Day and Night* to describe the pattern of light and dark on earth."***
- Tell students that today they will continue to investigate the pattern of light and dark on earth and how it affects our day. Explain that today they will read one last part and prepare to take notes about the pattern of light and dark on earth.
- Invite students to take out their imaginary bow and to take aim at the target.

- Guide students through the close read-aloud for *What Makes Day and Night* using the **Close Read-aloud Guide: *What Makes Day and Night* (Session 4; for teacher reference)**. Consider using the **Reading Informational Text Checklist** (see Assessment Overview and Resources).
- During Session 4, refer to the guide for the use of *What Makes Day and Night* and the **What Makes Day and Night anchor chart**.
- Refocus whole group.
- Tell students that in the next part of the lesson, they will begin to take notes on what they have read.

Meeting Students' Needs

- Reduce barriers to comprehension by activating relevant prior knowledge of the learning target. Invite students to recall previous close read-aloud sessions in which they identified learning from the illustrations and from the text to describe light and dark on earth. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the sentence in the text: "The earth / is moving you / toward the sun." Write and display student responses next to the chunks. Examples:
 - Ask:
"What does this sentence mean?" Responses will vary.
 - Point to and read aloud the chunk: "The earth" and ask:
"What is this sentence about?" (the earth; the planet)
 - Point to and read aloud the chunk: "is moving you" ask:
"What is the earth doing?" (moving us; spinning us around in space)
"How does the earth move us?" (When we stand on the earth, we move with it because it is spinning in space.)
 - Point to and read aloud the chunk: "toward the sun." and ask:
"Where is the earth moving us?" (Toward the sun; closer and closer to the sun)
"What direction words, or prepositions, do you see in this chunk?" (toward; It means in the direction of something or closer to something.)
"What patterns does this sentence help us understand?" (The earth spins and moves us closer to the sun, and away again.)
"What, in the illustrations, help you understand that information? What, in the text, helps you understand that information?" (Responses will vary.)
"Now what do you think this sentence means?" (The earth spins us closer to the sun.)
"Can you use a direction word to complete the sentence frame: The earth is moving you ____?" (around in space; away from the sun; toward the light)

Work Time

B. Independent Writing: What Makes Day and Night Notes (15 minutes)

- Refocus students whole group.

- Direct their attention back to the first learning target and reread it aloud:
“I can distinguish what I learn from the illustrations and what I learn from the text in the book What Makes Day and Night to take notes on the pattern of light and dark on earth.”
- Using a total participation technique, invite responses from group:
“What does it mean to take notes?” (short, written-down words to help us remember something)
“Why are notes important?” (They help us remember important things.)
- Confirm for students that notes are short, written-down words to help us remember important things.
- Display the *What Makes Day and Night* **notes sheet** and tell students that today they will take notes on the text *What Makes Day and Night*.
- Direct students to the prompts at top of the page and read them aloud:
 - “What makes day?”
 - “What makes night?”
- Tell students they will use their own notes sheet to capture quick notes about the pattern of light and dark that we call day and night. Tell students that they will use these notes in the next lesson during the Science Talk protocol. Students can use pictures and words to record their notes.
- Invite students to show a thumbs-up or touch their head if they are ready to begin writing and drawing their notes.
- Distribute:
 - Prepared clipboards with the *What Makes Day and Night* notes sheet
 - **Pencils**
 - **Crayons**
 - **Colored pencils**
- Invite students to begin working.
- As students write and draw, circulate to offer support. Prompt students by referencing the *What Makes Day and Night* anchor chart and asking students to think about the close read-aloud sessions. Remind students that they can draw and write to record their notes.
- Provide sentence frames as needed:
 - “Day happens because_____.”
 - “Night happens because _____.”
- When 3 minutes remain, prompt students to complete the drawing or sentence they are working on and begin cleaning up by placing pencils and crayons back on the tables where they found them.
- Refocus students whole group and invite a few students to share out their notes.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided *What Makes Day and Night* notes sheet to help students know what to record. (MMAE)

- For ELLs: Point out that *take* and *notes* are words we hear a lot together. Example: "Remember, when we take notes, we are not really taking anything. It means we are writing down words or pictures to remember something." Prompt students to practice using the phrase *take care of*. Ask:

"When should you take notes?" (I should take notes when I want to remember something, and when I am listening to informational text.)

- For ELLs: Invite students to use the sentence frame from the Mini Language Dive to support their work completing their *What Makes Day and Night* notes sheet. (Example: Day happens because the earth is moving toward the light.)

Work Time

C. Shared Writing: Reflecting on Unit 2 Guiding Question (10 minutes)

- Invite students to stretch their hands up to the sky as if they are touching the sun as they transition.
- Once students are settled, direct their attention to the **Unit 2 Guiding Question anchor chart** and review it:

"What patterns can we observe in the sky?"

- Tell students now they will have a chance to help add to the anchor chart through shared writing.
- Use the following procedure to complete the shared writing:
 - Point to each column on the anchor chart and read the headings aloud.
 - Ask students to assist in filling out the first column of the anchor chart. Ask:

"What is the pattern?" (light and dark on earth, which we call day and night)
 - Add "light and dark (day and night)" to the chart.
 - Ask students to help fill out the second column of the anchor chart. Ask:

"What information should we record about this pattern?"
 - Using a total participation technique, invite responses from the group.
 - As students share responses, use their ideas to complete the second column. Example: "The earth rotates each day. When the earth faces the sun we have day; when the earth turns away from the sun we have night."
 - Ask students to help fill out the third column of the anchor chart. Ask:

"What diagram or picture should we draw?" (picture of earth rotating and the sun shining on the earth with half dark and half light)
 - Add the diagram or picture to the chart.
- If productive, cue students to think about their thinking:

"How does our discussion add to your understanding of how to answer the guiding question: What patterns can we observe in the sky? I'll give you time to think and discuss with a partner." (Responses will vary.)
- Give students specific, positive feedback on their thoughtful work reflecting on the guiding question and remind them that they will continue to add to this anchor chart throughout the unit as they observe more patterns in the sky. (Example: "Noelle paraphrased Kamir's idea

that the earth should be shown half in light and half in dark when we draw the picture on the anchor chart. Thank you for working together to make sure the idea was clear!”)

Meeting Students' Needs

- As students help complete the anchor chart, provide support for students who may struggle with oral language and processing. Allow ample wait time as students prepare their thinking for sharing orally. (MME, MMAE)

Closing and Assessment

A. Independent Writing: Sky Notebook (10 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the second one aloud:
“I can record my observations from images/videos of the sky in my Sky notebook.”
- Remind students that in the previous lesson they received their Sky notebook where they will record their observations of the sun and moon. Today students will write independently in their Sky notebook to describe a new sun photograph using adjectives from the Adjectives anchor chart.
- Display **sun photograph 4**.
- Invite students to turn and talk to an elbow partner:
“What adjectives describe the sun?” (Answers will vary, but may include: yellow, round.)
- Display page 3 of **Sky notebook** and read aloud the prompt at the top of the page:
“What does the sun look like?”
- Students should answer the question using pictures and words to show their thinking. Remind students to use the **Adjectives anchor chart** to describe what the sun looks like. Remind students to use a complete sentence when answering the question.
- Point out the Sky notebooks already at student workspaces.
- Transition students to their workspaces and invite students to begin working on page 3.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). Refer to **Sky notebook (answers, for teacher reference)** as necessary.
- When 1 minute remains, signal all students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief. Collect the notebooks.

Meeting Students' Needs

- Before giving students a warning before the transition, support self-regulation and independence by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)
- For ELLs: Support students as they formulate sentences for the Describing the Sun and Moon recording form. Invite students to use the Adjectives Construction board (See Lesson 2) or the Adjectives Word Wall with the sentence frame: “The [sun/moon] looks like a(n) [adjective] [noun].” (Example: The sun looks like an

orange ball. The sun looks bright and yellow.) Invite students to identify any new adjectives they might like to add to the board.

Closing and Assessment

B. Shared Writing: Describing the Position of the Sun (5 minutes)

- Refocus students whole group.
- Remind them that in the past few lessons they have described sun and moon pictures using adjectives in their sky notebook. Today students will examine the new sun picture and help write about where they see the sun during shared writing.
- Display sun photograph 4 again.
- Then display the **Describing the Position of the Sun recording form** and using a total participation technique, invite responses from the group.

“Where is the sun located in the photograph?” (over the building)

- Tell students that they will have the opportunity to describe the location of the sun in the picture through shared writing.
- Use the following procedure to complete the shared writing:
 - Point to the prompt at the top and read aloud: “Where do we see the sun?”
 - Using a total participation technique, invite responses from the group:

“Which picture most closely resembles the sun photograph?”

- As students share responses, use their ideas to answer the prompt. Begin by circling one of the pictures that most closely resembles the location of the sun in the photograph and then model writing a complete sentence to describe the location of the sun. (Example: “The sun is over the building.”)
- Give students specific, positive feedback for their work helping to describe the position of the sun and tell them that they will write about the position of the moon during the next lesson.

Meeting Students’ Needs

- During shared writing, provide options for visual perception by offering individual copies of the Describing the Position of the Sun recording form for students who may need support with using far-point display. (MMR)
- For ELLs: Prepare students to learn about directional words by suggesting non-examples and incorrect uses of prepositions. Prepare students for using the Science Talk protocol by inviting them to agree or disagree. (Example: The sun is under the building. Is that correct? Do you agree or disagree?)

Lesson 6: Close Read-aloud, Culminating Task: *What Makes Day and Night*

CCS Standards

- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **SL.1.1b:** Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **SL.1.6:** Produce complete sentences when appropriate to task and situation.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during*, *beyond*, *toward*).
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can participate in a Science Talk about what makes day and night on earth using information from my notes as evidence. (RI.1.7, SL.1.1a, SL.1.4, SL.1.6)
- I can record my observations from images/videos of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.6)

Ongoing Assessment

- During the Opening, observe students as they begin finding prepositions to describe the position of the sun, moon, and stars in the sky. (L.1.1i)
- Collect students' response sheets for the culminating task to serve as evidence of progress toward standards to inform instruction for subsequent lessons. (RI.1.1, RI.1.7)
- During the Culminating Task in Work Time A, use the Reading Informational Text Checklist to observe students as they distinguish information they've learned from illustrations and from the words in text. (RI.1.6, RI.1.7)
- During Work Time B, circulate and listen for students to participate in the Science Talk protocol positively by following the guidelines on the Science Talk Protocol anchor chart. Use the Speaking and Listening Checklist to monitor students' progress toward SL.1.1a,b (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes)

2. Work Time

- A. Close Read-aloud Culminating Task: *What Makes Day and Night*, Entire Text (25 minutes)
- B. Launching Science Talk Protocol (20 minutes)

3. Closing and Assessment

- A. Independent Writing: Sky Notebook (10 minutes)
- B. Shared Writing: Describing the Position of the Moon (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In Work Time B, students participate in a Science Talk. A Science Talk gives students the opportunity to answer questions about science ideas using a structured discussion format. As students speak and listen about science ideas, they build confidence in their language and discussion skills (SL.1.1a, SL.1.1b, L.1.6).

How this lesson builds on previous work:

- Students use their individual *What Makes Day and Night* notes from Lesson 5 during the Science Talk protocol.
- Continue to reinforce routines established in previous lessons: poem routine, shared writing, independent writing in the Sky notebook.
- In Lessons 2–6, students reread parts of the unit’s anchor text as they grappled with the focus question: “What makes day and night on earth?” Now, in the culminating task, students are asked to synthesize their thinking by producing a visual diagram that helps answer the focus question.

Areas in which students may need additional support:

- Some students might find the fine motor aspects of the culminating task challenging. For those students who have difficulty cutting and gluing, consider having precut icons available for students as well as tape for students to attach the icons to their diagram sheet.
- Some students may need additional time to complete the culminating task. Consider reallocating time as necessary to complete the task.
- During the Science Talk, students may find it difficult to wait their turn, listen to others, and stay on topic. If needed, refocus the whole group and remodel a specific desired behavior that is particularly challenging to students.

Down the road:

- In Lessons 7–10, students will complete focused read-alouds of different texts, discussing new patterns in the sky. After each focused read-aloud, students will participate in either a science activity or a Science Talk to grow their knowledge about each of these new patterns.

- Throughout Unit 2, students will continue to reflect on their progress toward showing integrity during group activities and discussions. Guide them toward more specific responses (e.g., “I showed integrity staying on task and listening to my triad during our Science Talk.”).

In advance:

- Preview:
 - Close Read-aloud Guide: *What Makes Day and Night* (Session 5; for teacher reference).
 - Page 4 of the Sky notebook.
- Strategically group students into triads for the Science Talk in Work Time B.
- Review the Science Talk and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Display moon photograph 4, in color if possible.
- Post: Learning targets, “Where Are They? The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Record the whole group reciting the “Where Are They? The Sun, Moon, and Stars” poem and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time B: Video record students as they take part in the Science Talk protocol to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families.
- Closing B: Create the Describing the Position of the Moon recording form in an online format—for example, a Google Doc—to display and complete, and for families.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to synthesize their learning from *What Makes Day and Night* by completing a culminating task.
- ELLs may find it challenging to understand and apply the structure and function of prepositions. Create a Prepositions Construction board to support the development of preposition meaning and structure. On the project display board, affix manipulative preposition cards with illustrations on one side of the board (examples: above, below, behind). On the other side, affix manipulative objects over a horizon, such as a tree, sun, and moon, and a sentence frame in the middle. (Example: “I observe the ____ [preposition] the ____.”) Model manipulating the sun and moon and then choosing a preposition that accurately describes the

position of the objects in relation to one another, and completing the sentence frame. (Example: “I observe the moon above the tree.”)

Levels of support

For lighter support:

- Support students as they distinguish information learned in the text and information learned with illustrations. Ask: “Did you learn how earth moves from the text, or did you learn that from an illustration? Can you show me which part of the text or which illustration helped you learn that information?”
- During the Science Talk protocol in Work Time B, encourage students to use Goal 1 and 2 Conversation Cues with other students to extend and deepen conversations, think with others, and enhance language development. (Example: “Can you give an example?”)

For heavier support:

- During the Science Talk protocol in Work Time B, provide students with individual copies of the anchor chart. In their groups, students can follow along by placing a finger on each step as it occurs. While circulating, ensure that students are following along accurately.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students listen to the poem “Where Are They? The Sun, Moon, and Stars.” Some students may benefit from having an individual copy of the poem to follow along in near-point as it is read aloud. Support transfer of learning by offering multiple representations of the poem. Consider providing an annotated or illustrated copy of the poem for students as support for information processing strategy development and comprehension.
- **Multiple Means of Action & Expression (MMAE):** The close read-aloud session in this lesson includes a rereading of the entire text. During this time, some students may benefit from sensory input and opportunities for movement while they are sitting. Provide options for differentiated seating such as sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs.
- **Multiple Means of Engagement (MME):** In Closing and Assessment A, students write independently in their Sky notebooks. Before students begin writing, consider creating a writing goal that is appropriate for the individual student. Place a star or sticker at the goal point so that they can self-monitor their progress as they write. For students who may need additional support in building writing stamina, consider offering built-in breaks, where students can choose an activity such as getting water or stretching.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- preposition, depict, participate, Science Talk, triad (L)

Review:

- discuss, observe (L)

Materials

- ☒ “Where Are They? The Sun, Moon, and Stars” poem (from Lesson 5; one to display; for teacher read-aloud)
- ☒ “Where Are They? The Sun, Moon, and Stars” poem (example, for teacher reference)
- ☒ Close Read-aloud Guide: *What Makes Day and Night* (Session 5; for teacher reference)
 - *What Makes Day and Night* (one to display; for teacher read-aloud)
 - *What Makes Day and Night* anchor chart (begun in Lesson 3; see Close Read-aloud Guide)
 - *What Makes Day and Night* Culminating Task diagram (from Lesson 2; one for teacher modeling and one per student; see Close Read-aloud Guide)
 - *What Makes Day and Night* Culminating Task icons (one set per student; see Close Read-aloud Guide)
 - Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ☒ Scissors (one per student)
- ☒ Glue stick (one per student)
- ☒ Colored pencils (class set; variety of colors per student)
- ☒ Pencils (one per student)
- ☒ Science Talk Protocol anchor chart (new; teacher-created; see supporting materials)
- ☒ *What Makes Day and Night* notes sheet (from Lesson 5; one per student)
- ☒ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)
- ☒ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ☒ Moon photograph 4 (one to display)
- ☒ Sky notebook (from Lesson 4; page 4; one per student)
- ☒ Sky notebook (from Lesson 4; answers, for teacher reference)
- ☒ Adjectives anchor chart (from Lesson 4)
- ☒ Describing the Position of the Moon recording form (one for teaching modeling and one per student)

Opening

A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes)

- Invite students to the whole group area.
- Display the **“Where Are They? The Sun, Moon, and Stars” poem**; remind students that in the previous lesson they read this new poem about the sun, moon, and stars.
- Tell students that you will read the poem first on your own as they listen, then they should echo each verse as you read it a second time. Remind students of the gestures and hand motions that they created in the previous lesson.
- Read each verse of the poem aloud and stop at the end of each verse. Using a total participation technique, invite responses from the group:

What word(s) describe where we see the sun, moon, and stars in these verses?” (above and below)

- Circle and/or highlight the prepositions in each verse as you continue to read the poem aloud. Refer to **“Where Are They? The Sun, Moon, and Stars” poem (example, for teacher reference)** as necessary.
- After reading the final verse of the poem, tell students that they will continue to work with the poem over the next several lessons as they create an anchor chart of prepositions.
- If time permits, invite students to read the poem with you one last time.

Meeting Students’ Needs

- When teaching students about prepositions, consider varied ways to represent the function of the preposition. In addition to text, have students use an object to demonstrate its relationship to another object such as beside, on, behind, etc. (MMR)
- For ELLs: Introduce students to the Prepositions Construction board (see Supporting English Language Learners column) and model completing the sentence frame. Briefly invite a few students to practice using it. Alternatively, record and display a sentence frame and sketch the sun and moon in different positions for the class to see. Invite students to choose the correct prepositions to complete the sentence frame. (Example: “Is the moon above or below the horizon? Which preposition should I use? Good! So I will write, ‘The moon is [above] the horizon.’”)

Work Time

A. Close Read-aloud Culminating Task: *What Makes Day and Night*, Entire Text (25 minutes)

- Review the focus question by reading it aloud.
- Using a total participation technique, invite responses from the group:

“What makes day and night on earth?” (The sun shines on half of the earth; that half has day. The other half is in the shadow or darkness; that half has night.)

- Tell students that today they will create a diagram that shows day and night on earth.
- Guide students through the close read-aloud for *What Makes Day and Night* using the **Close Read-aloud Guide: *What Makes Day and Night* (Session 5; for teacher reference)**. Consider using the **Reading Informational Text Checklist** (see Assessment Overview and Resources).
- During the culminating task, refer to the guide for the use of:
 - *What Makes Day and Night*
 - ***What Makes Day and Night* anchor chart**
 - ***What Makes Day and Night* Culminating Task diagram**
 - ***What Makes Day and Night* Culminating Task icons**
 - **Scissors, glue stick, colored pencils, and pencils**
- Refocus whole group.
- Offer students specific, positive feedback on the close reading skills they used as they answered the focus question: “What makes day and night on earth?” (Example: “Everyone looked closely at the pictures in the text and listened to the text read aloud to answer the focus question and create their final diagram of day and night on earth.”)

Meeting Students' Needs

- During the culminating task, support fine motor skills and expression of knowledge by providing a scaffolded diagram. (Example: Offer pre-cut labels and shapes and/or include a line to denote the halves of the earth.) (MMR, MMAE)
- For ELLs: Display a teacher or student-made model of the finished product of the culminating task so that students understand their goal. For heavier support, display the model throughout Work Time. For lighter support, display the model while providing instructions, but remove it as students complete their work.

Work Time

B. Launching Science Talk Protocol (20 minutes)

- Invite students to move safely to a spot on the edge of the whole group meeting area.
- Direct students' attention to the learning targets and read the first one aloud:

“I can participate in a Science Talk about what makes day and night on earth using information from my notes as evidence.”
- Reread the target, emphasizing these words:

“I can participate in a Science Talk about what makes day and night on earth using information from my notes as evidence.”
- Define the word *participate* (to take part).
- Explain that talking about a science question with your classmates can help you learn more about science. This is called a *Science Talk*.
- Invite students to turn and talk to an elbow partner:

“What does this learning target mean?” (We are going to have a Science Talk to discuss day and night on earth.)

- Refocus whole group and invite a few students to share out. Clarify the meaning of the target as needed and tell students that they will now discuss “What makes day” and “What makes night” with a small triad using the Science Talk protocol. Tell students that *triad* means group of three.
- Direct students’ attention to the **Science Talk Protocol anchor chart** and explain the expectations:
 1. Point to the first step on the anchor chart. Tell students they will be assigned a triad. The three group members will need to sit in a circle facing one another.
 2. Point to the image of the ear. Explain that you will announce a question for the group to discuss and every group member needs to listen carefully.
 3. Point to the image of a person holding a paper. Tell students that they should consult their notes to find evidence to answer the question.
 4. Point to the image of one group member talking. Tell students that one group member should start by offering an answer to the question with some details.
 5. Point to the image of many group members talking. Tell students that they will use their notes to take turns responding to their group member’s answer. Each time they respond, they should try using a sentence starter.
- Tell students that they will use the notes they completed in the previous lesson about “What makes day” and “What makes night.”
- Distribute **What Makes Day and Night notes sheets**. Invite students to tuck their notes away quietly until they begin the Science Talk protocol.
- Ask two student volunteers to help you model how to build onto a group member’s idea:
 - Sit or stand face-to-face with the volunteers and ask one volunteer:

“What makes day?”
- After the student answers, think aloud: “I heard what she said. I will reread my notes to help me add new details to what she said. Let me think.”
- Practice using the sentence starters to respond to the volunteer’s answer. Say: “I would like to add ____” or “This makes me think ____” or “I think he/she means ____.”
- Turn to the second volunteer. Tell the class: “This partner has heard what Mary said and what I have said. Now he will think about what he wants to add on.”
- Invite the second volunteer to respond using one of the sentence stems.
- Using a total participation technique, invite responses from the group:

“How will you show your partner you are listening to him or her?” (use eye contact; answer the questions they ask me)
- If productive, cue students to listen carefully and seek to understand:

“Who can tell us what your classmate said in your own words?” (Responses will vary.)
- Direct students’ attention to the posted **Working to Become Ethical People anchor chart** and review what is written for integrity by reading it aloud.
- Remind students to focus on showing integrity while participating in the Science Talk protocol. Students should continue to focus on following the steps of the protocol and work to stay on task.
- Move students into pre-determined triads, assigning each group to a different area of the room.

- Guide students through each step of the Science Talk protocol using the question:
“What makes night?”
- Circulate to observe students as they discuss. Gather data on SL.1.1a, SL.1.1b, SL.1.4, and SL.1.6 using the **Speaking and Listening Checklist**. Prompt students with questions to help them expand on their ideas.
- After 3–5 minutes, signal all students to stop talking and direct them to return to the whole group gathering area.
- Briefly review the Science Talk Protocol anchor chart and invite students to turn and talk to an elbow partner:
“What is one thing you did well during your Science Talk triad?” (Responses will vary, but may include: waited my turn, listened when others were speaking, used the sentence stems.)
- Invite a few students to share out.
- Share that today was their first Science Talk of many that they will participate in throughout this unit.

Meeting Students' Needs

- As the Science Talk protocol is introduced, guide students' information processing by inviting student volunteers to help model what this protocol looks like and sounds like. (MMR, MME)
- For ELLs: Create groups with varying levels of language proficiency. The students with greater language proficiency can serve as models in the group, initiating discussions and providing implicit sentence frames. If possible, consider grouping students who speak the same home language together to help one another interpret and comprehend the conversation in their home languages.
- For ELLs: Invite students to use language drawn from the Language Dive and Mini Language Dive practice from Lessons 3 and 5. (Examples: “As the earth spins, _____ move(s) through the _____, and back again.” “The earth is moving you _____.”)
- For ELLs: It may take longer for some students to process language and follow the conversation during the Science Talk. Encourage students to speak up when they would like to hear something repeated. Empower them with questions they can ask to regulate the pace of the conversation. (Examples: “Can you please repeat what you said?” “Can you please speak more slowly?”)

Closing and Assessment

A. Independent Writing: Sky Notebook (10 minutes)

- Refocus students whole group.
- Direct their attention to the posted learning targets and read the second one aloud:
“I can record my observations from images/videos of the sky in my Sky notebook.”
- Tell students that today they will write independently in their Sky notebook to describe a new moon photograph using adjectives from the Adjectives anchor chart.

- Display **moon photograph 4**.
- Invite students to turn and talk to an elbow partner:
“What adjectives describe the moon?” (Answers will vary, but may include: big, orange.)
- Display page 4 of the **Sky notebook** and follow the same process established in Lesson 5 by reading the prompt aloud, encouraging students to use pictures and words to show their thinking, and reminding them to use the **Adjectives anchor chart** for their descriptions.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts). Refer to **Sky notebook (answers, for teacher reference)** as necessary.
- When 1 minute remains, signal all students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief. Collect the notebooks.

Meeting Students' Needs

- Before students begin independent writing, support fine motor development by providing supportive tools for writing. For example, offer pencil grips, slanted desks, or alternate writing utensils. (MMAE)
- For ELLs: As groups of students interact, jot down some verb tense errors that are impeding communication. Briefly review the verb tense for the whole class. Encourage the group to identify the verb that communicates the message clearly and accurately. (Example: I heard some students say, 'I show integrity.' We are talking about earlier in class, so what should we say? That's right, 'I showed integrity.'")

Closing and Assessment

A. Shared Writing: Describing the Position of the Moon (5 minutes)

- Refocus students whole group.
- Remind them that in the previous lesson they observed a sun photograph and helped write about its position in the sky. Today students will examine at the moon photograph and help write about its position in the sky during shared writing.
- Direct students' attention back to moon photograph 4.
- Display the **Describing the Position of the Moon recording form** and using a total participation technique, invite responses from the group.

“Where is the moon located in the photograph?” (over the building)

- Tell students that they will have the opportunity to describe the location of the moon in the picture through shared writing.
- Use the same procedure from Lesson 5 to complete the shared writing:
 1. Point to the prompt at the top and read it aloud: “Where do we see the moon?”
 2. Using a total participation technique, invite responses from the group:

“Which picture most closely resembles the moon photograph?”

3. As students share responses, use their ideas to answer the prompt. Begin by circling one of the pictures that most closely resembles the location of the moon in the photograph and then model writing a complete sentence to describe the location of the moon. (Example: “The moon is behind the branch.”)

- If productive, cue students with a challenge:

“What if the moon was above the branch? How would that change the picture? I’ll give you time to think and discuss with a partner.” (The moon would be higher in the sky and we would not see the branch in front of it.)

- Give students specific, positive feedback for their work helping to describe the position of the moon and tell them that in the next lesson, they will write about the position of the sun and the moon independently in their Sky notebook.

Meeting Students' Needs

- When using total participation techniques, minimize discomfort or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Briefly drill students using different prepositions. Invite students to manipulate the Preposition Construction board or sketch the moon using a dry erase marker. Challenge students to place or sketch the moon in the correct place while dictating prepositions. (Example: “Can you sketch the moon so it is above the branch?”)

Lesson 7: Focused Read-aloud, Session 1: *Does the Sun Sleep?* Noticing Sun, Moon, and Star Patterns

CCS Standards

- **RL.1.5:** Explain major differences between books that tell stories and books that give information, drawing on a wide reading of a range of text types.
- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during*, *beyond*, *toward*).
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can distinguish what I learn from the illustrations and what I learn from the text in the book *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* to describe patterns of the moon. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7)
- I can record my observations of images of the sky in the Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Informational Text Checklist (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7) to track students' progress toward these reading standards and the Reading Literature Checklist to track progress towards RL.1.5. (see Assessment Overview and Resources).
- During the Closing, circulate and observe students independently writing in their Sky notebook. At the end of the lesson, collect students' writing samples to document progress toward W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.

Agenda

1. Opening

- A. Poem and Movement: “Where Are They? The Sun, Moon, and Stars” Poem Version 2 (10 minutes)

2. Work Time

- A. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 12–15 (20 minutes)
- B. Engaging the Scientist: Why Does the Moon Seem to Change Shape? (20 minutes)

3. Closing and Assessment

- A. Independent Writing: Sky Notebook (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the first of two lessons in which students engage in a cycle of inquiry with *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (pages 12–15) to build understanding about the patterns of the moon and why the moon seems to change shape.
- Students work with the idea that the moon seems to change shape. Emphasize that the moon is not changing shape, but rather how much of the moon is visible or in shadow changes as it revolves around earth. The language *seems to* or *appears to* is important because it explains that the moon is not actually changing shape, but it looks like it is.
- In the Opening, students again engage with the “Where Are They? The Sun, Moon, and Stars” poem. The poem is prepared with missing prepositions and students are asked to use the Prepositions anchor chart to complete the poem.
- In Work Time B, students watch a 4-minute video embedded in the website National Science Teachers Association.
 - Citation: “Moon Phases Demonstration.” Video. National Science Teachers Association, 2016. Web. 13 June 2016. <<http://www.nsta.org/publications/press/extras/moon.aspx>> (For display. Used by permission.)
 - Purpose: To solidify students’ understanding of why the moon appears to change shape, and to prepare them to take part in the demonstration during Work Time B.
- Similar to Lessons 4–6, students independently write in their Sky notebooks to show progress toward mastery of W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.
- If possible, give students access to *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* as a paperback or an eBook during the K-2 Labs and K-2 Reading Foundations Skills Block.

How this lesson builds on previous work:

- Students have experienced the cycle of reading a text, engaging in an activity or experience, and synthesizing through Science Talk from the close read-aloud sessions in Lessons 2–6. Students now engage in this cycle with a new text and scientific concept.
- The Prepositions anchor chart used in the Opening is created in advance using the prepositions that students identified in Lesson 6.

- In Work Time B, students review the Working to Become Ethical People anchor chart and focus on upholding integrity for their learning during the simulation.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.
- This is the second lesson in which students independently describe a displayed photograph using adjectives and prepositions in the Sky notebooks. The specific skills of using adjectives to describe the appearance and prepositions to describe the precise location of an object in the sky have been taught and reviewed through shared and independent writing in previous lessons.

Areas in which students may need additional support:

- In order to understand why the moon seems to change shape, students need to have a strong comprehension of what causes light (sunshine) and darkness (shadow) on earth. The idea of the earth’s shadow creating areas of darkness on the moon is integral to this understanding.
- The video in Work Time B includes some scientific terminology that is not explicitly taught at this grade level. Allot time to pause and explain further as you see fit.
- Students may need additional support completing the Sky notebook independently. Remind them to use the tools around the room such as the Sun, Moon, and Stars Word Wall, the Adjectives and Prepositions anchor charts, and the High-Frequency Word Wall.

Down the road:

- In Lesson 8, students will continue building an understanding of the observable pattern of the moon as they transfer information from the Patterns of the Moon anchor chart into their own individual notes, and then use those notes to take part in a Science Talk.
- Students will continue their practice with using adjectives (taught in Lessons 2–4) and prepositions (taught in Lessons 5–7) while writing in the Sky notebook.
- The cycle of reading, experiencing, and discussing is repeated throughout pairs of lessons (Lessons 7–8, Lessons 9–10). This repetition is designed to build students’ skills and comprehension in advance of the Unit 2 Assessment, in which students will select individual notes as evidence when responding to the Unit 2 guiding question: What patterns can we observe in the sky?

In advance:

- Prepare:
 - “Where Are They? The Sun, Moon, and Stars” poem version 2.
 - Sun, Moon, and Stars Word Wall cards for the words *change*, *waxing*, and *waning*. Write or type the word on a card and create or find a visual to accompany each word.
 - Technology necessary to play “Moon Phases Demonstration” in Work Time B.
 - Technology necessary to display *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* as an eBook, if that is how you plan to access it during Work Time A.
 - Moon photograph 5 and sun photograph 5 in color, if possible.
- Gather materials for the science experience during Work Time B:
 - Copy onto cardstock and cut out signs for the moon.
 - Ensure there is a working flashlight.
 - Cover windows ahead of time to ensure the room will be dark enough to see the change in shape.

- Prepare a space in the room to enact the movement of the earth and moon so all students have a clear view.
- Pre-determine groups for the experiment (half will participate while the other half observes; then switch) in Work Time B.
- Pre-distribute materials for the Closing to ensure a smooth transition.
- Post: Learning targets, “Where Are They? The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Create the “Where Are They? The Sun, Moon and Stars” poem version 2 in an online format—for example, a Google Doc—to display and complete, and for families to access at home to reinforce these skills.
- Work Time A: Consider displaying *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* in the eBook format available at amazon.com.
- Work Time B: Show NSTA video clip: “Moon Phases Demonstration.” Video. National Science Teachers Association, 2016. Web. 13 June 2016. <<http://www.nsta.org/publications/press/extras/moon.aspx>> (For display. Used by permission.)
- Video record students as they simulate the phases of the moon in Work Time B to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to participate in and observe a physical simulation representing the waxing and waning moon.
- ELLs may find the explanation of why the moon appears to get bigger and smaller, and how it relates to the simulation, abstract. Support students by making clear the most important points to understand, even if all of the details are not apparent. (Examples: “The moon does not really get bigger and smaller,” “The light from the sun changes the way we see the moon,” and “The way the moon appears in the sky is a pattern.”)

Levels of support*For lighter support:*

- Support students as they distinguish information learned in the text and information learned with illustrations. Ask: “Did you learn how the earth moves from the text, or did you learn that from an illustration? Can you show me which part of the text or which illustration helped you learn that information?”

For heavier support:

- During Work Time B, invite students who need heavier support to observe the simulation first as students who need lighter support perform the simulation.
- During Closing and Assessment, consider working closely with a small group of students who are not ready to complete their Sky notebooks independently. Complete the activity as a shared or interactive writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students again write independently in their Sky notebooks. Support those students with developing spelling skills and would benefit from environmental support to sound out words in their writing. Some students may need explicit prompting to use environmental print when they cannot recall letter sounds or sight words. When modeling writing, emphasize process and effort.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, individual students are asked to share ideas with the whole group. As students share out, provide options for expression and communication by using sentence frames. (Example: “I noticed the part of the moon that was lit up _____ and then it _____.”)
- **Multiple Means of Engagement (MME):** During the focused read-aloud in Work Time A, some students may need explicit prompts to relate to this text. Optimize relevance by making the information in the text personalized and contextualized to students’ lives. (Example: Pause as appropriate and ask students to share connections to the text based on their own lives: “Have you ever looked up to see the moon at night? What did it look like? Did it look the same every time you have looked at it?”)

Vocabulary**Key:**

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- change, seems to, appears to, phase, simulation (L)
- waxing, waning (T)

Review:

- moon, pattern, shine (L)

Materials

- ✓✓ Prepositions anchor chart (new; teacher-created; see supporting materials)
- ✓✓ “Where Are They? The Sun, Moon, and Stars” poem version 2 (one to display; for teacher read-aloud)
- ✓✓ Equity sticks (class set; one per student)
- ✓✓ Unit 2 Guiding Question anchor chart (begun in Lesson 2)
- ✓✓ *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (one to display; for teacher read-aloud)
- ✓✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓✓ Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; 3)
- ✓✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ✓✓ Patterns of the Moon anchor chart (new; co-created with students during Work Time A; see supporting materials)
- ✓✓ Patterns of the Moon anchor chart (answers, for teacher reference)
- ✓✓ “Moon Phases Demonstration” (video; play 2:24 to end; see Teaching Notes)
- ✓✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)
- ✓✓ Light bulb (one for teacher modeling)
- ✓✓ Moon sign (one for teacher modeling)
- ✓✓ Sky notebook (from Lesson 4; pages 5–6; one per student)
- ✓✓ Sun photograph 5 (one to display)
- ✓✓ Moon photograph 5 (one to display)
- ✓✓ Pencils (one per student)
- ✓✓ Colored pencils (class set; variety of colors per student)
- ✓✓ Adjectives anchor chart (begun in Lesson 4)

Opening

A. Poem and Movement: “Where Are They? The Sun, Moon, and Stars” Poem Version 2 (10 minutes)

- Display the **Prepositions anchor chart** and say: “We did great work finding all the prepositions in the poem yesterday. I pulled them out and put them onto this chart.”
- Read the Prepositions anchor chart and invite students to move their hands to show the location (e.g., for “on top of,” put their hands on top of their heads).
- Display **“Where Are They? The Sun, Moon, and Stars” poem version 2** and read it aloud, pausing at the missing prepositions.

- Use **equity sticks** to select students to come up and use the Prepositions anchor chart to fill in the correct word or phrase. Continue to call students until the entire poem is filled in.
- Say: “As I reread the poem today, I want you to listen for prepositions. When you hear a preposition read aloud, quietly put a thumb out in front of your chest.” Model the hand gesture if necessary.
- Invite students to quietly push the imaginary button on their brains to show they are ready to listen for prepositions.
- Reread the completed poem and look for students to put up their thumbs when a preposition is read aloud.
- Invite students to turn and talk with an elbow partner:
“In your own words, what is a preposition?” (a word that tells the position of a person, place, or thing)
- Cold call on two or three students to share out.
- Tell students that they will continue practicing reading and writing with prepositions.

Meeting Students’ Needs

- Before reading the poem, support students’ expressive skills by offering index cards preprinted with prepositions from the poem to select as they participate in selecting missing words. (MMAE)
- For ELLs: Challenge students by displaying the poem without prepositions and without the blank spaces to indicate where they belong. Invite students to determine where the prepositions should be placed within the poem.

Work Time

A. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 12–15 (20 minutes)

- Direct students’ attention to the posted learning targets and read the first target aloud:
*“I can distinguish what I learn from the illustrations and what I learn from the text in the book *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* to describe patterns of the moon.”*
- Display the **Unit 2 Guiding Question anchor chart** and read the question aloud:
“What patterns can we observe in the sky?”
- Share with students that today they will read to find out what patterns they can observe about the moon.
- Display *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* and model using the table of contents to find the chapter titled “The Moon.”
- Using a total participation technique, invite responses from the group:
*“How is this text similar to the close read aloud text, *What Makes Day and Night?*” (they are both informational texts that teach us about the sun and the moon.)*
- As students share their thinking about this question, use the **Reading Literature Checklist** to track students’ progress towards RL 1.5.

- Read pages 12–13 slowly, fluently, with expression, and without interruption.
- Use the **Reading Informational Text Checklist** as students respond to the following series of questions to track students' progress towards the targeted standards.
- Ask students to look closely at the diagram of the phases of the moon. Invite students to turn and talk to an elbow partner:
“What do you notice about the moon’s shape over time? What is this diagram showing us about the moon?” (It changes. Sometimes it is a thin crescent, sometimes it’s a half-moon, sometimes it’s full.)
- Cold call on two to three students to share out.
- Show students the **Sun, Moon, and Stars Word Wall card** for *change* and ask:
“What does it mean if something is changing?” (It is different from how it was before.)
- Cold call on one or two students to share out.
- Define the word *change* (to make different or alter).
- Place the Word Wall card on the **Sun, Moon, and Stars Word Wall**.
- Reread the note on page 12 (“The moon follows a pattern of waxing and waning ...”) and ask:
“What new information does this note provide us? What more have we learned about the moon from the text?” (There are special words used to describe how the moon changes. Waxing is when the moon gets bigger, and waning is when the moon gets smaller.)
- Cold call on two to three students to share out.
- Show students the Sun, Moon, and Stars Word Wall cards for *waxing* and *waning*.
- Invite students to make a hand gesture with you to demonstrate the meaning as you define the words (appearing to become larger; appearing to become smaller).
- Place the Word Wall cards on the Sun, Moon, and Stars Word Wall.
- Reread the Unit 2 guiding question and invite students to give a thumbs-up if they have learned about a pattern of the moon.
- Draw students' attention back to the text and read aloud page 14 fluently and without interruption. Ask:
“What causes the moon to shine at night?” (The moon is lit up by the sun.)
- As students share out, capture their responses on **Patterns of the Moon anchor chart**. Refer to **Patterns of the Moon anchor chart (answers, for teacher reference)** as necessary.
- Draw students' attention back to the text and read aloud page 15 fluently and without interruption. Ask:
“How does the moon move?” (The moon goes around the earth.)
- As students share out, capture their responses on the Patterns of the Moon anchor chart. Refer to Patterns of the Moon anchor chart (answers, for teacher reference) as necessary.
- Draw students' attention back to the text and reread the last two sentences of page 15 and ask:
“Is the moon changing shape?” (We only see what is lit up by the sun, so what we see from earth looks different if the whole moon is not in the light from the sun. The moon isn’t actually changing, but what we can see looks different.)
- As students share out, capture their responses on the Patterns of the Moon anchor chart. Refer to Patterns of the Moon anchor chart (answers, for teacher reference) as necessary.

- Introduce the Sun, Moon, and Stars Word Wall cards for *seems to* and *appears to* and explain that we can use these terms to describe what something looks like. The moon seems to, or appears to, be changing shape, but it's not. Place the Word Wall cards on the Sun, Moon, and Stars Word Wall.
- Invite students to turn and talk with an elbow partner:
“What is one piece of new information you learned about patterns of the moon?” (Responses will vary, but may include: the moon seems to change shape, the moon isn't actually changing.)
- Reread the information added to the Patterns of the Moon anchor chart and tell students that now they will watch a video and do a simulation to understand better why the moon looks like it is changing.

Meeting Students' Needs

- Before the focused read-aloud, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active listening for key details. (MMR, MMAE)
- For ELLs: Invite students to practice using the phrases *seems to* and *appears to*. Prompt students by asking them what else the sun and moon seem to or appear to do. (Examples: The moon appears to move across the sky. The sun seems to disappear under the horizon.)

Work Time

B. Engaging the Scientist: Why Does the Moon Seem to Change Shape? (20 minutes)

- Share with students that now that they have read about the patterns of the moon and why the moon's shape seems to change, they will watch a video demonstration about the phases of the moon and do a simulation.
- Review the Sun, Moon, and Stars Word Wall cards for *full moon*, *half-moon*, and *crescent moon*.
- Play “**Moon Phases Demonstration.**”
- Invite students to turn and talk with an elbow partner:
“What did you notice about the appearance of the moon as it circled around?” (The part of the moon that was lit up grew bigger and bigger until it was a full moon; then it grew smaller and smaller.)
- Cold call on two to three students to share out.
- Tell students that people call this appeared change of the moon the “phases of the moon” and that we see the moon go through one complete phase, or pattern, in about a month.
- Tell students that now they are going to try the demonstration shown in the video. Direct students' attention to the **Working to Become Ethical People anchor chart** and review the big ideas.
- Remind students that integrity means to do the right thing even when it's hard. Tell them that you will be observing during the simulation to look for great examples of integrity.
- Ask students to sit in a circle in the whole group meeting area.

- Place the **lightbulb** in the middle of the meeting area and turn it on. Gather the **moon sign** to hold toward the light during the simulation.
- Prepare students for the simulation by telling them that just as in the video, in order to see the phases, or pattern, of the moon the room needs to be dark. Encourage students to uphold integrity during the experiment and stay on task. Tell them that the class will be split in half: One half will take part in the simulation and the other half will observe. Then they will switch.
- Call up half of the class.
- Have students stand around you as you orbit the moon sign around your head (the earth). Make sure you are standing close enough to the lightbulb (the sun) to ensure good light and shadow.
- Invite students to name the phases of the moon as they see the change occur across the face of the moon.
- As you engage in the simulation, think aloud about how the moon's shape is not changing, but the amount of the moon you can see lit up by the sun seems to grow bigger and smaller as it circles the earth.
- Switch groups and repeat the demonstration.
- Direct students back to their seats in the whole group meeting area.
- Ask students to turn and talk with an elbow partner:
"Why does the moon seem to change?" (because it is circling the earth, and as it does the amount of sunlight shining on it changes as it moves)
- Cold call on two to three students to share out.
- If productive, cue students to clarify the conversation by confirming what they mean and to listen carefully and seek to understand:
"So, do you mean ____?" (Responses will vary.)
"Who can tell us what your classmate said in your own words?" (Responses will vary.)
- Give students specific, positive feedback on upholding their integrity for learning during the demonstration. (Example: "Sophia, I noticed that as you were waiting for your turn to do the experiment, you were watching the other group to understand what to do.")

Meeting Students' Needs

- Facilitate personal coping and self-regulation skills by modeling socially appropriate ways to express enthusiasm and excitement about this simulation. For example, give a silent cheer, give yourself a hug, take a deep breath and smile, or raise the roof. (MME)
- For ELLs: Watch the "Moon Phases Demonstration" video clip twice. Students will be able to absorb and process more information during their second viewing after they understand the general idea during the first viewing. Before watching the video, consider introducing and displaying the question "What did you notice about the appearance of the moon as it circled around?"
- For ELLs: To prepare students to share their answers to the question "Why does the moon seem to change?" ask the question before the first simulation and record and display responses. After the second simulation, review the responses and ask students if they have anything to add before beginning the turn and talk.

Closing and Assessment

A. Independent Writing: Sky notebook (10 minutes)

- Direct students' attention to the second posted learning target and read it aloud:
"I can record my observations of images of the sky in the Sky notebook."
- Remind students that they will be writing in their Sky notebooks to reach this target.
- Display:
 - Pages 5–6 of the **Sky notebook**
 - **Sun photograph 5**
 - **Moon photograph 5**
- Tell students that similar to previous lessons, they will use the sun and moon photographs to complete these pages in their Sky notebook
- Point out the Sky notebooks, **pencils**, and **colored pencils** at students' workspaces.
- Remind them that they should include an adjective to describe the sun and moon, and a preposition to state the precise location. Remind students to use the Sun, Moon, and Stars Word Wall, the Prepositions anchor chart, and the **Adjectives anchor chart** while writing.
- Briefly review the instructions on pages 5 and 6 of the Sky notebook. Invite students to circle the moon on page 6 that looks most like the moon in the photograph.
- Tell students that if they would like to take a closer look at the photographs, they are welcome to quietly get up and move closer during writing time, taking care to be respectful of their classmates.
- Direct students to their seats and tell them to begin writing in their Sky notebooks.
- Circulate and listen in as students write.
- When 2 minutes remain, give students a time reminder.
- Signal all students to stop writing through a designated sound. Ask students to put away their Sky notebooks in the designated turn-in area.
- Collect the Sky notebooks.
- If productive, cue students to think about their thinking:
"How does our Sky notebook add to your understanding of adjectives and prepositions? I'll give you time to think and discuss with a partner." (Responses will vary.)
- Tell students that tomorrow they will use the information they learned about the moon to take part in a Science Talk with their classmates, so they should continue thinking about the pattern of the moon and how its shape seems to change.

Meeting Students' Needs

- Before the transition to clean up, support self-regulation and independence during the transition by providing a clear routine for what to do with unfinished work and using a visual timer. (MME)
- For ELLs: Provide students with a sentence frame to support their writing in their Sky notebooks. (Example: The moon is _____ the horizon.")

Lesson 8: Speaking and Listening: Patterns of the Moon

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **SL.1.1b:** Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during*, *beyond*, *toward*).
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can build onto others' ideas while participating in a Science Talk about patterns of the moon. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4)
- I can record my observations of videos/images of the sky in the Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During Work Time A, circulate and observe students as they write independently. At the end of the lesson, collect students' notes to document progress toward W.1.8, RI.1.1, RI.1.2, RI.1.6, and RI.1.7.
- During Work Time B, circulate and listen for students to use the modeled sentence frames and evidence from their notes as they take part in the Science Talk. Note how students are interacting with one another using the Speaking and Listening Checklist. (SL.1.1a, SL.1.1b, and SL.1.4)

Agenda

1. Opening

A. Shared Reading: Reviewing Patterns of the Moon Anchor Chart (5 minutes)

2. Work Time

A. Independent Writing: Patterns of the Moon Notes (10 minutes)

B. Science Talk: “Why Does the Moon Seem to Change?” (20 minutes)

C. Reflecting on Learning (10 minutes)

3. Closing and Assessment

A. Independent Writing: Sky Notebook (10 minutes)

B. Shared Writing: Describing What People Do during the Day (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the second of two lessons in which students engage in a cycle of inquiry with *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*. Students record their own notes based on information from the focused read-aloud in Lesson 7, and then discuss their understanding of why the moon seems to change shape.
- Note-taking is a new and challenging skill, but an important one to start early. In this lesson, students use a prepared Patterns of the Moon notes sheet to jot down important information to use as evidence during the Science Talk. Some students may choose to copy from the Patterns of the Moon anchor chart and others may use mostly pictures or labels. Encourage all styles of note-taking and remind students about the importance of being able to read and use their notes later.
- During the Science Talk protocol, encourage students to use their individual notes to provide evidence for their scientific claims. Also, remind students to use the sentence frames to add on to, clarify, and extend the thinking of others.
- In Closing A, students independently write in their Sky notebooks, completing familiar prompts for a new image to show progress toward mastery of W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.
- In Closing B, students take part in a shared writing lesson to introduce a new section of the Sky notebook that asks students to relate their observations of the sky to what people are doing.

How this lesson builds on previous work:

- During the Opening, students review the information added to the Patterns of the Moon anchor chart in Lesson 7. This supports students for when they take their own notes during Work Time A.
- This is the second time students use the Science Talk protocol (introduced in Lesson 6). Consider how familiar students are with this protocol and reallocate time during the lesson as necessary.
- The Sky notebook is used in two ways during this lesson. First, students complete independent writing of the same prompts using a different photograph for observation. Then the student

writing is collected and the teacher introduces a new part of the Sky notebook through the shared writing on the Describing What People Do during the Day recording form.

- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need more support in organizing their notes and using them as evidence during the Science Talk protocol. Consider having students use highlighters or sticky notes to designate the most important part(s) of their notes that they would like to share.
- Support students with their oral language during Science Talk by using Conversation Cues, providing sentence stems, and providing wait time for the processing of information.

Down the road:

- Similar to Lessons 7–8, students will follow a similar cycle of inquiry in Lessons 9–10 with a new section of *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* to prepare students for the Unit 2 Assessment in which they select individual notes as evidence when responding to the Unit 2 guiding question: “What patterns can we observe in the sky?”
- In Lesson 9, students will complete a new section of the Sky notebook describing what people do during the day based on the shared writing and will continue their practice with using adjectives (taught in Lessons 2–4) and prepositions (taught in Lessons 5–7).

In advance:

- Prepare:
 - Patterns of the Moon notes sheets on clipboards for Work Time A.
 - Sky notebooks on clipboards for the Closing.
 - Sun photograph 6 in color, if possible.
- Gather and display side by side two or three student exemplars from the What Makes Day and Night notes sheet (completed in Lesson 5) for analysis in Work Time A.
- Pre-distribute colored pencils in the whole group meeting area to ensure a smooth transition to the Closing.
- Strategically group students in small groups of three or four for the Science Talk protocol in Work Time B. Consider grouping students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their groups, initiating discussion and providing implicit sentence frames.
- Review the Science Talk protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Video record students as they take part in the Science Talk protocol in Work Time B to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Create the Describing What People Do during the Day recording form in an online format—for example, a Google Doc—to display and complete, and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to participate in a Science Talk protocol. This will foster content knowledge and English language development through peer interaction.
- ELLs may find the sentence frame “I would like to add to ...” difficult to use. Consider providing additional modeling and think-alouds for using each sentence frame during the Science Talk protocol. Invite students who need lighter support to model using the sentence frames with students who need heavier support. Use Conversation Cues strategically as students prepare to participate in the Science Talk protocol over the next series of lessons and during the assessment. Model using Goal 1–3 Conversation Cues with students that align with the specific Science Talk protocol sentence frames. (Examples: “Do you mean...?” “I think you mean ...” “Who can repeat what your classmate said?”)

Levels of support

For lighter support:

- During the Science Talk protocol in Work Time B, encourage students to use Goal 1 and 2 Conversation Cues with other students to extend and deepen conversations, think with others, and enhance language development. (Example: “Did you mean _____?”)

For heavier support:

- During Work Time A, distribute a partially filled in copy of the Patterns of the Moon student notes. This will provide students with models for the kind of information they should enter, while relieving the volume of writing required.
- During the Science Talk protocol in Work Time B, provide students with individual copies of the anchor chart. In their groups, students can follow along by placing a finger on each step as it occurs. While circulating, ensure that students are following along accurately.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** When reflecting on their learning in Work Time C, students will need to generalize the learning around patterns of the moon. Activate prior knowledge before asking students to share, by recalling learning from previous lessons. For additional support, provide a visual display of the question: “What pattern of the moon have we investigated over the past few lessons?”
- **Multiple Means of Action & Expression (MMAE):** During the Science Talk protocol, individual students are asked to share ideas with a small group. As students share, provide options for expression and communication by using sentence frames. (Example: “I like what Meghan said about _____. It made me think of what I learned about ____.”)
- **Multiple Means of Engagement (MME):** Some students may require support with limiting distractions during independent writing (e.g., sound-canceling headphones or dividers between workspaces). During the writing, provide scaffolds that support executive function skills, self-regulation, and students’ abilities to monitor progress (e.g., visual prompts, reminders checklists, or a rubric).

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- pattern, shine, change, crescent, gibbous, half-moon (L), full moon, seems to, appears to, phase (L)

Materials

- ☑ Patterns of the Moon anchor chart (begun in Lesson 7)
- ☑ Patterns of the Moon notes sheet (one per student and one to display)
- ☑ *What Makes Day and Night* notes sheet (two to display; see Teaching Notes)
- ☑ Pencils (one per student)
- ☑ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ☑ *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (one to display)
- ☑ Science Talk Protocol anchor chart (begun in Lesson 6)
- ☑ Equity sticks (class set; one per student)
- ☑ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ☑ Unit 2 Guiding Question anchor chart (begun in Lesson 2; added to during Work Time C; see supporting materials)

- ☑ Sky notebook (from Lesson 4; page 7; one per student and one to display)
- ☑ Sun photograph 6 (one to display)
- ☑ Colored pencils (class set; variety of colors per student)
- ☑ Prepositions anchor chart (begun in Lesson 7)
- ☑ Adjectives anchor chart (begun in Lesson 4)
- ☑ Describing What People Do during the Day recording form (one for teacher modeling and one to display)

Opening

A. Shared Reading: Reviewing Patterns of the Moon Anchor Chart (5 minutes)

- Direct students' attention to the **Patterns of the Moon anchor chart** and review the big ideas.
- Tell students that today they will use the information from this anchor chart to write their own personal notes about why the moon's shape seems to change. Then they will use these notes to have a Science Talk with their classmates.
- Invite students to turn and talk with an elbow partner:
“What information do you think is most important to know when answering the question ‘Why does the moon seem to change shape?’” (Responses will vary, but may include: that the sun lights the moon and we can see only the part that is lit up; that the moon isn’t changing, but what we see changes because of the sunlight; etc.)
- Circulate and listen in as students share with their partner. Note trends in responses (e.g., everyone is talking about the sun lighting the moon) and mark them on the anchor chart with a star.
- Redirect students' attention to the Patterns of the Moon anchor chart and point out the starred note(s).
- Tell students that next they will record their own notes about why the moon seems to change, and they might want to include a note, or notes, like the one(s) starred on the anchor chart.

Meeting Students' Needs

- When circulating and listening in during the turn and talk, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Examples: “I think it is important to know that the sun ____.” or “I think it is important to know that the moon ____.”) (MMAE)
- For ELLs: Some students may find the following question complex: “What information do you think is most important to know when answering the question: ‘Why does the moon seem to change shape?’” Rephrase the question as necessary to illicit responses. Then invite students to rephrase the question in their own words. (Examples: “Why does the moon seem to change?” “What makes the moon look like it is changing?”)

Work Time

A. Independent Writing: Patterns of the Moon Notes (10 minutes)

- Display the **Patterns of the Moon notes sheet** and read the prompt aloud:
 - “Why does the moon seem to change?”
- Remind students that they need to record their notes in a way that is useful to them, maybe with pictures and only a few words, so they can read from their notes and use them as evidence in the Science Talk. They should record only the information that they think is most important.
- Display the preselected *What Makes Day and Night* notes sheets.
- Give students about a minute to look at the exemplars. Then invite students to turn and talk to an elbow partner:

“What do you notice about these notes that makes them a good example of note-taking?”
(There are a lot of pictures. The pictures have labels. There are words to explain it.)
- If productive, cue students to clarify the conversation by confirming what they mean:

“So, do you mean ____?” (Responses will vary.)
- Using a total participation technique, invite responses from the group.
- Remind students that as they record their notes, they should focus on drawing quick sketches that will help them explain why the moon seems to change, and writing words that are clear and easy to reread.
- Distribute **pencils** and the prepared clipboards with Patterns of the Moon notes sheets.
- Focus students on the prompt. Reread it aloud and invite them to begin writing their individual notes.
- Circulate and support students as they write. Remind them to use the Patterns of the Moon anchor chart and **Sun, Moon, and Stars Word Wall** to help them while writing. If students are having a difficult time explaining their ideas, invite them to look again at *Does the Sun Sleep?: Noticing Sun, Moon, and Stars Patterns* and jot down what they see or hear that they want to record.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up their Patterns of the Moon notes sheet.
- Signal all students to stop writing through the use of a designated sound.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided Patterns of the Moon notes sheet to help students know what to record. (MMAE)
- For ELLs: Consider adding an additional note to the What Makes Day and Night student notes exemplar. Think aloud while modeling adding the note, or complete it as a shared or interactive writing experience.
- For ELLs: It may help some students to verbalize their thinking with peers. Before inviting students to add notes to their Patterns of the Moon notes sheet, invite them to turn to a partner and share one note they are thinking of adding.

Challenge them to explain their reasoning. (Example: "I am adding a picture of the sun because it will help me remember that the sun's light shines on the moon.")

Work Time

B. Science Talk: "Why Does the Moon Seem to Change?" (20 minutes)

- Tell students they will now participate in a Science Talk in small groups to answer the question:
 - "Why does the moon seem to change?"
- Remind them that they used this protocol in Lesson 6 and review as necessary using the **Science Talk Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to take out their Patterns of the Moon notes sheets. Remind them that they will use these notes and take turns responding to their group members' ideas.
- Direct students' attention to the learning targets and read the first one aloud:

"I can build onto others' ideas while participating in a Science Talk about patterns of the moon."

- Remind students that in order to work toward this target, they should try using a sentence frame as they respond to their classmates.
- Review the previously taught sentence frames:
 - "I think he/she means _____."
 - "I'd like to add _____."
 - "This makes me think _____ because _____."
- Use **equity sticks** to select two student volunteers to model how to build onto a group member's idea:
- Sit or stand face-to-face with the volunteers.
- Ask one volunteer:

"Why does the moon seem to change?"

- After the student answers, think aloud: "I heard what she said. I will reread my notes to help me add new details to what he said. Let me think."
- Practice using the sentence frames to respond to the volunteer's answer. Say: "I would like to add ..."
- Turn to the second volunteer. Tell the class: "This partner has heard what ____ said and what I have said. Now he will think about what he wants to add on."
- Invite the second volunteer to respond using one of the sentence frames.
- Using a total participation technique, invite responses from the group:

"How will you show your partner you are listening to him or her?" (use eye contact; answer the questions they ask me)

- Invite students to take their Patterns of the Moon notes sheet and move into pre-determined groups, assigning each group to a different area of the room.
- Guide students through the protocol.

- Circulate to observe students as they discuss and gather data on SL.1.1a, SL.1.1b, SL.1.4, and SL.1.6 using the **Speaking and Listening Checklist**. Prompt students with questions to help them expand on their ideas (Examples: “What is causing the moon to shine?” “Is the moon changing shape?” “Why or why not?” “How does the evidence from your notes help you explain this?”)
- When 2 minutes remain, give students a time reminder and encourage them to finish up their Science Talks.
- Signal all students to stop through the use of a designated sound.
- Collect students’ Patterns of the Moon notes sheets.
- As time permits, provide specific, positive feedback about students’ integrity during the Science Talk. (Example: “Andres, you reminded Ruth that we are talking about the moon to help her stay on task!”)

Meeting Students’ Needs

- For ELLs: Create groups with varying levels of language proficiency. The students with greater language proficiency can serve as models in the group, initiating discussions and providing implicit sentence frames. If possible, consider grouping students who speak the same home language together to help one another interpret and comprehend the conversation in their home languages.
- For ELLs: It may take longer for some students to process language and follow the conversation during the Science Talk. Encourage students to speak up when they would like to hear something repeated. Empower them with questions they can ask to regulate the pace of the conversation. (Examples: “Can you please repeat what you said?” “Can you please speak more slowly?”)
- During the Science Talk, support communication and engagement by organizing students with strategic partners to ensure they have a strong, politely helpful peer model to support their efforts at participation in the protocol using their notes sheet. (MME)

Work Time

C. Reflecting on Learning (10 minutes)

- Tell students they will now add their learning to the **Unit 2 Guiding Question anchor chart**.
- Direct students’ attention to the Unit 2 Guiding Question anchor chart and review the information added in previous lessons.
- Using a total participation technique, invite responses from the group:
“What pattern of the moon have we investigated over the past few lessons?” (The moon seems to change shape.)
- As students share out, clarify and capture their responses on the Unit 2 Guiding Question anchor chart.
- Sketch a quick illustration of this new information on the Unit 2 Guiding Question anchor chart.

- Once the chart is complete, help students synthesize their learning by rereading the previous information and new information added to the anchor chart.
- Give students specific, positive feedback on their ability to work hard and discuss these big scientific ideas. With excitement, share that they will learn about another pattern seen in the sky in the next lesson.

Meeting Students' Needs

- After completing the Unit 2 Guiding Question anchor chart, foster a sense of community and provide options for physical action by inviting the whole class to join you in a special applause (e.g., silent cheer, firecracker, raise the roof, hip-hip hooray). (MMAE, MME)
- For ELLs: Briefly review the Mini Language Dive from Lesson 2. Invite students to rephrase the Unit 2 guiding question in their own words before reviewing the anchor chart. (Example: What happens again and again in the sky?)

Closing and Assessment

A. Independent Writing: Sky Notebook (10 minutes)

- Direct students' attention to the posted learning targets and read the second one aloud:
"I can record my observations of videos/images of the sky in the Sky notebook."
- Remind students that they will be writing in the Sky notebooks to reach this target.
- Display page 7 of the **Sky notebook** and **sun photograph 6**.
- Tell students that similar to previous lessons, they will use the sun photograph to complete this page in their Sky notebook .
- Follow the same process as in previous lessons to distribute notebooks, pencils, and **colored pencils**, and guide students to complete this page. Remind students to use the **Prepositions anchor chart** and **Adjectives anchor chart**, and the Sun, Moon, and Stars Word Wall as necessary.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up.
- Signal all students to stop writing through the use of a designated sound. Collect students' Sky notebooks.

Meeting Students' Needs

- During independent writing, provide options for visual perception by offering individual copies of the Prepositions anchor chart and Adjectives anchor chart for students who may need support with using far-point display. (MMR)
- For ELLs: Provide students with a sentence frame to support their writing in their Sky notebooks. (Example: "The moon is _____ the horizon.")
- For ELLs: Before they begin independent work on Sky notebooks, invite students to briefly practice formulating sentences using adjectives and prepositions using sentence frames, the Preposition and Adjective Construction boards, and the Preposition and Adjectives anchor charts.

Closing and Assessment

B. Shared Writing: Describing What People Do during the Day (5 minutes)

- Tell students that now they will learn a new part of the Sky notebook through shared writing.
- Display the Describing What People Do during the Day recording form and read the prompt aloud:

“What are people doing?”

- Direct students’ attention back to the sun photograph and say: “We are going to use this photograph to think about what people are doing when the sun looks like this and is in this position.”
- Begin writing the words “People are ...” on the recording form. Think aloud about how you can use the word *people* from the prompt to write it correctly in the answer.
- If productive, cue students with a challenge:

“Can you figure out what people are doing when the sun looks like this? I’ll give you time to think and discuss with a partner.” (People are cooking dinner. People are walking home from school.)

- Ask:
“What are people doing when the sun looks like this?” (People are cooking dinner; people are walking home from school; etc.)
- Cold call on one to two students to share out.
- Select one response to record on the paper. Draw a quick sketch to match the written response.
- If time permits, invite students to call out the proper letters and words needed for the sentence and write down the complete response. Model using the Sun, Moon, and Stars Word Wall and High-Frequency Word Wall as a resource while responding.
- Reread the prompt and the written response to clarify any misconceptions.
- Give students specific, positive feedback on their independent and shared writing today (Example: “Eric, I noticed that you were deciding between two adjectives to use, and settled on glowing because it matched the picture best. Diana, you helped find the high-frequency word go during our shared writing—thank you.”)

Meeting Students’ Needs

- Before shared writing, support students’ expressive skills and ability to transfer learning by offering index cards with pictures of what people are doing at different times of the day to select as they participate. (MMAE)
- For ELLs: To make the question “What are people doing?” more concrete, display illustrations from *Summer Sun Risin’*. Briefly discuss what the boy and his family did during different times of the day. Provide some think time before eliciting ideas from the class.

Lesson 9: Focused Read-aloud, Session 2: *Does the Sun Sleep? Noticing Sun, Moon, and Star Patterns*

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Identify the main topic and retell key details of a text.
- **RI.1.4:** Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
- **RI.1.6:** Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during*, *beyond*, *toward*).
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can distinguish what I learn from the illustrations and what I learn from the text in the book *Does the Sun Sleep? Noticing Sun, Moon, and Star Patterns* to describe patterns of the stars. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7)
- I can record my observations of videos/images of the sky in the Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Informational Text Checklist (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7) to track students' progress toward these reading standards (see Assessment Overview and Resources).
- During the Closing, circulate and observe students independently writing in their Sky notebook. At the end of the lesson, collect students' writing samples to document progress toward W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.

Agenda

1. Opening

- A. Poem and Movement: “Where Are They? The Sun, Moon, and Stars” Poem (10 minutes)

2. Work Time

- A. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 16–21 (15 minutes)
- B. Engaging the Scientist: “Why Can’t We See Stars during the Day?” (15 minutes)

3. Closing and Assessment

- A. Independent Writing: Sky Notebook (15 minutes)
- B. Shared Writing: Describing What People Do at Night (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows the same pattern as Lesson 7. This is the first of two lessons in which students engage in a cycle of inquiry with *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (pages 16–21) to build understanding about the patterns of the stars.
- Students work with the idea that the stars are visible only at night. Emphasize that the stars are not disappearing, but rather how the light from the sun, our nearest star, outshines the starlight during the day. The language *seems to* or *appears to* is important because it explains that the stars are not disappearing and reappearing, but that they look as though they are.
- In the Opening, students are given Sun, Moon, and Stars signs to use while the “Where Are They? The Sun, Moon, and Stars” poem is read aloud. Students use these signs to place in relation to their bodies as they hear different prepositions being read from the poem.
- In Work Time B, students watch a 20-second video embedded in the PBS Learning Media website.
 - Citation: “Time-lapse of Starry Night Sky.” Video. PBS Learning Media, 2016. Web. 13 June 2016. < <http://www.pbslearningmedia.org/resource/bb09.res.vid.timelapse/time-lapse-of-starry-night-sky/> > (For display. Used by permission.)
 - Purpose: To provide context for the appearance of stars in the night sky, and to prepare students to take part in the simulation during Work Time B.

How this lesson builds on previous work:

- The Opening of this lesson uses the same poem as in Lessons 5–7, but now students are invited to show their understanding of prepositions through a kinesthetic activity. The Working to Become Ethical People anchor chart is reviewed with a focus on respect for the environment as students prepare to use the Sun, Moon, and Stars signs.
- The cycle of inquiry with a new section of *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* is the same cycle as Lessons 7–8. The routine of activities should be familiar and engaging for students.
- The use of shared writing to create the Patterns of the Stars anchor chart is similar to what was done in Lesson 7.

- The Sky notebook is used in two ways during this lesson. First, students complete independent writing of the same prompts using a different photograph for observation. Then the student writing is collected and the teacher introduces a new part of the Sky notebook through shared writing.
- Throughout Units 1 and 2, students were introduced to various total participation techniques. When following the directive to “Use a total participation technique, invite responses from the group,” use one of these techniques or another familiar technique to encourage all students to participate.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- In order to understand why stars cannot be seen during the day, students must have a strong understanding that all stars give off light, and that the sun is our nearest star, which makes its light the brightest. So when we face the sun during day, the light from the sun outshines the other stars because it is much closer and brighter.
- The time-lapse video in Work Time B shows images of not just stars, but also the Milky Way galaxy, meteors, and other celestial phenomena. Some students may find this very interesting. Consider allocating time for questions and research during another part of the day or in Labs for students to follow their personal inquiries.
- Students may need additional support completing the Sky notebook independently. Remind students to use the tools around the room such as the Sun, Moon, and Stars Word Wall, the Prepositions anchor chart, and the High-Frequency Word Wall.

Down the road:

- In Lesson 10, students will continue building an understanding of the observable pattern of the stars as they transfer information from the Patterns of the Stars anchor chart to their own individual notes, and then use those notes to take part in a Science Talk.
- Students will continue their practice with using prepositions (taught in Lessons 5–7) and adjectives (taught in Lessons 2–4) while writing in the Sky notebook.
- This cycle of inquiry in Lessons 7–8 and 9–10 serves as a way to build comprehension and confidence with using scientific evidence in discussions, which will be assessed in the Unit 2 Assessment.

In advance:

- Prepare:
 - Materials for the Poem and Movement in the Opening as described in the supporting materials.
 - Sun, Moon, and Stars Word Wall cards for the words *star* and *constellation*. Write or type the word on a card and create or find a visual to accompany each word.
 - Technology necessary to play “Time-lapse of Starry Night Sky” in Work Time B.
 - Technology necessary to display *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* as an eBook, if that is how you plan to access it during Work Time A.
 - Clipboards with students’ Sky notebooks for the Closing.
 - Moon photograph 6 in color, if possible.

- Pre-distribute colored pencils and crayons in the whole group meeting area to ensure a smooth transition to the Closing.
- Gather materials for the science experience during Work Time B:
 - Cover windows ahead of time to ensure the room will be dark enough to see the change in light.
 - Prepare a flashlight (or flashlights) to demonstrate starlight.
 - Gather a piece of white cardstock to shine the flashlight on.
- Post: Learning targets, “Where Are They? The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Record the whole group reading the “Where Are They? The Sun, Moon, and Stars” poem and post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time B: Show PBS Learning Media clip: “Time-lapse of Starry Night Sky.” Video. PBS Learning Media, 2016. Web. 13 June 2016. <<http://www.pbslearningmedia.org/resource/bb09.res.vid.timelapse/time-lapse-of-starry-night-sky/>> (For display. Used by permission.)
- Video record students as they simulate the starlight in Work Time B to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Create the Describing What People Do at Night recording form in an online format—for example, a Google Doc—to display and complete, and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to experience a demonstration representing the visibility of the stars in the sky.
- ELLs may find the explanation of why the stars are invisible during the day, and how it relates to the demonstration, abstract. To make the process and purpose of the demonstration more transparent, prepare students for what they are going to see before beginning the presentation. Display a photograph of the sky at night and the sky during the daytime during the corresponding parts of the demonstration. (Example: First, we’re going to see how bright the flashlight is

when the lights are off. Then we will see how it looks when the lights are on. Think about how it is just like seeing the stars in the day and in the night.”)

Levels of support

For lighter support:

- Support students as they distinguish information learned in the text and information learned with illustrations. Ask: “Did you learn how the earth moves from the text, or did you learn that from an illustration? Can you show me which part of the text or which illustration helped you learn that information?”

For heavier support:

- During the Closing, consider working closely with a small group of students who are not ready to complete their Sky notebooks independently. Complete the activity as a shared or interactive writing experience.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** During independent writing, students are reminded to use the Prepositions anchor chart and the Adjectives anchor chart as they record observations of the moon photograph. Provide options for visual perception by offering individual copies of these anchor charts for students who may need support with using far-point display as they write.
- **Multiple Means of Action & Expression (MMAE):** Support students’ ability to appropriately express knowledge about the content by varying the options for composition and communication. Match students’ abilities and the demands of the independent writing task by offering alternatives for students to articulate their observations of the moon. (Example: Offer partial or full dictation as students verbally share their observations.)
- **Multiple Means of Engagement (MME):** During the focused read-aloud of *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, some students may need explicit prompts to relate to this text. Optimize relevance by making the information in the text personalized and contextualized to students’ lives. (Example: Pause as appropriate and ask students to share connections to the text based on their own lives: “When have you seen stars in the sky?” “Do all stars look the same?” “What did you notice about the stars you saw?”)

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- stars, constellation (L)

Review:

- shine, sun (L)

Materials

- ✓✓ Prepositions anchor chart (begun in Lesson 7)
- ✓✓ “Where Are They? The Sun, Moon, and Stars” poem (from Lesson 5; one to display)
- ✓✓ Sun, Moon, and Stars signs (one per student)
- ✓✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)
- ✓✓ Unit 2 Guiding Question anchor chart (begun in Lesson 2)
- ✓✓ *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (one to display; for teacher read-aloud)
- ✓✓ Sun, Moon, and Stars Word Wall cards (new; teacher-created; two)
- ✓✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ✓✓ Reading Informational Text Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓✓ Patterns of the Stars anchor chart (new; co-created with students during Work Time A; see supporting materials)
- ✓✓ Patterns of the Stars anchor chart (answers, for teacher reference)
- ✓✓ “Time-lapse of Starry Night Sky” (video; play in entirety; see Technology and Multimedia)
- ✓✓ Flashlight (one for teacher modeling)
- ✓✓ White cardstock (one for teacher modeling)
- ✓✓ Sky notebook (from Lesson 4; page 8; one per student and one to display)
- ✓✓ Moon photograph 6 (one to display; color if possible)
- ✓✓ Pencils (one per student)
- ✓✓ Adjectives anchor chart (begun in Lesson 4)
- ✓✓ Describing What People Do at Night recording form (one for teacher modeling and one to display)

Opening

A. Poem and Movement: “Where Are They? The Sun, Moon, and Stars” Poem (10 minutes)

- Display the **Prepositions anchor chart** and **“Where Are They? The Sun, Moon, and Stars” poem** and say: “Last time, we filled in the missing prepositions using the Prepositions anchor chart. Today we are going to use our bodies to show our understanding of the prepositions in this poem.”
- Invite students to turn and talk with an elbow partner:
“What do prepositions tell us?” (precisely where a person, place, or thing is)
- Display the **Sun, Moon, and Stars signs** and model how to move the signs safely when a preposition is read (e.g., when the moon is described as behind, put the moon behind your body).

- Tell students that they need to listen carefully for their specific part of the poem (sun, moon, or stars) and move their sign in the precise location that the preposition states (i.e., above, below, beside, etc.).
- Display the **Working to Become Ethical People anchor chart** and review the big ideas. Remind students that they should show respect for themselves, others, and the environment.
- Distribute the Sun, Moon, and Stars signs. Remind students that taking care of their signs and classmates around them are two ways to show respect right now.
- Invite students to stand up and spread out in the meeting area, making sure there is room for everyone.
- Tell students you are going to read aloud the poem and as you do, they should move the signs safely when you say a preposition.
- Begin reading the poem aloud fluently.
- If time permits, complete the poem and actions once more.
- Provide specific, positive feedback on students' care and respect of others and the environment. (Example: "I saw that Sheila respectfully asked Ahmed to move over and create more room. Joey accidentally knocked Neveah's sign, but was respectful by apologizing and picking it up off the floor.")

Meeting Students' Needs

- Activate background knowledge by providing one or two examples of what *respect* looks and sounds like. For example: "When students show respect, I see them asking each other to spread out for more space to move. What do you see?" (MMR)
- For ELLs: Before reading the poem, briefly review each preposition. Assess students' familiarity with each as they demonstrate their meanings by moving the sign according to the proposition that is read in a "dry run" of the activity.

Work Time

A. Focused Read-aloud: *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns*, Pages 16–21 (15 minutes)

- Direct students' attention to the posted learning targets and read the first one aloud:
"I can distinguish what I learn from the illustrations and what I learn from the text in the book Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns to describe patterns of the stars."
- Direct students' attention to the **Unit 2 Guiding Question anchor chart** and read the question aloud:
"What patterns can we observe in the sky?"
- Share that today they will read to find out what patterns they can observe with the stars.
- Display *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* and model using the table of contents to find the chapter titled "The Stars."
- Display the **Sun, Moon, and Stars Word Wall card** for *stars*.

"What is the translation of star in our home languages?" (hoshi in Japanese) Call on student volunteers to share. Ask other students to choose one translation in a home language

other than their own to quietly repeat. Invite students to say their chosen translation out loud when you give the signal. Choral repeat the translations and the word in English. Invite self- and peer correction of the pronunciation of the translations and the English.

- Using a total participation technique, invite responses from the group:
“What is a star?” (Possible responses include: a bright shining thing in the sky or a light in the night sky.)
- Define *star* (an object in space that looks like a bright light).
- Place the Word Wall card for *star* on the **Sun, Moon, and Stars Word Wall**.
- Draw students’ attention back to the text and read aloud pages 16–17 fluently and without interruption.
- Use the Reading Informational Text Checklist as students respond to the following series of questions to track students’ progress towards the targeted standards.
- Reread the first sentence on page 17 and ask:
“What information are we learning about stars from this sentence?” (that stars shine all the time)
- As students share out, clarify and capture their responses on the **Patterns of the Stars anchor chart**. Refer to **Patterns of the Stars anchor chart (answers, for teacher reference)** as necessary.
- Reread the next two sentences on page 17 and invite students to turn and talk with an elbow partner:
“Why can’t we see stars during the day? What new information does the text teach us?” (because stars are very far away their light is dim; the sun shines so bright that you cannot see the starlight during the day)
- As students share out, clarify and capture their responses on the **Patterns of the Stars anchor chart**.
- Draw students’ attention back to the text and read aloud pages 18–21 fluently and without interruption.
Return to pages 18–19 and invite students to look closely at the illustrations. Ask:
“What new information can we learn from the illustration on this page? What new information can we learn from the text?” (The stars can form shapes, and those shapes are called constellations.)
- Confirm students’ thinking by showing them the Sun, Moon, and Stars Word Wall card for *constellation*.
- Using a total participation technique, invite responses from the group:
“Based on the information from both the text and the illustrations, what is a constellation?” (a group of stars that forms a shape)
- Confirm students’ thinking and place *constellation* on the Sun, Moon, and Stars Word Wall.
- With excitement, tell students that they have learned about another pattern they can observe in the sky.
- Invite students to turn and talk with an elbow partner:
“What is one piece of new information you have learned about patterns of the stars?” (Responses will vary, but may include: Stars shine only at night; starlight is not as bright as sunlight.)

- Reread the information added to the Patterns of the Stars anchor chart.

Meeting Students' Needs

- Reduce barriers to comprehension by activating relevant prior knowledge of the learning target. Invite students to recall previous focused read-aloud sessions in which they identified learning from the illustrations and from the text to describe other patterns. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from the sentence in the text: "But the stars / are very far away, / so their light is dim." Write and display student responses next to the chunks. Examples:
 - Ask:
"What does this sentence mean?" Responses will vary.)
 - Point to and read aloud the chunk: "But the stars" and ask:
"What is this sentence about?" (the stars)
 - Point to and read aloud the chunk: "are very far away" ask:
"What information does this sentence tell us about the stars?" (they are very far away.)
"How far away? As far as the library is?" (Very, very far. Far from the earth. Farther than the moon and farther than the sun.)
 - Point to and read aloud the chunk: "so their light is dim." and ask:
"What does so mean in this chunk?" (It tells us so what; it's telling us the effect of the stars being so far away.)
"What is the effect of the stars being so far way. We know the stars are far way. So what?" (Their light is harder to see; their light is not very bright.)
"What patterns does this sentence help us understand?" (why the stars are easy to see in the dark and always seem to go away in the daytime)
"What, in the illustrations, helps you understand that information? What, in the text, helps you understand that information?" (Responses will vary.)
"Now what do you think this sentence means?" (The stars are far away, so their light is harder to see.)
"Can you use a noun and an adjective to complete this sentence frame? The ____ is ____, so its light is ____." (Responses will vary, but may include: sun; close; bright).

Work Time

B. Engaging the Scientist: "Why Can't We See Stars during the Day?" (15 minutes)

- Share with students that now that they have read about the patterns of the stars and why they are visible only at night, they will watch a time-lapse video of stars and a demonstration about starlight.
- Explain that this is a video of the night sky that was filmed through an entire night and then sped up so people can watch the changes of stars in a short amount of time.
- Play **"Time-lapse of Starry Night Sky."**

- Invite students to turn and talk with an elbow partner:
“What did you notice about the stars in the night sky?” (Some stars shine more brightly than others; the stars seem to move across the sky; there are shapes or constellations in the stars.)
- Explain that the sun is actually a star. The sun is our nearest star, much closer than any other star. That is why sunshine is so bright and starlight is so dim.
- Tell students that now they will observe a demonstration of how sunlight outshines starlight.
- Ask students to sit in a circle in the whole group meeting area.
- Turn off the lights and darken the windows.
- Place the **flashlight** in the middle of the meeting area, turn it on, and aim it at the **white cardstock**. Explain to students that they will pretend this is a star.
- Invite students to turn and talk with an elbow partner:
“How would you describe the light from the star (flashlight)?” (It is shining brightly; it shines through the darkness; it makes a bright circle on the cardstock.)
- Turn on the overhead light and keep the flashlight aimed at the cardstock. Explain that they will pretend that the overhead light is the sun.
- Invite students to turn and talk with an elbow partner:
“How would you describe the light from the star (flashlight) now?” (It looks dimmer; it’s hard to see.)
“Did the light from the star (flashlight) change? What caused it to seem dimmer or harder to see?” (No, the starlight did not change, but when the sun shone it was hard to see the light from the star because the sunlight was so bright.)
“Why can’t we see stars during the day?” (because the sunlight outshines the starlight; stars are far away so their light is very dim)
- If productive, cue students with a challenge. Invite them to turn and talk to an elbow partner:
“Can you figure out why we can’t see stars during the day? I’ll give you time to think and discuss with a partner.” (because the sunlight outshines the starlight; because stars are far away so their light is very dim)
- Circulate and listen in as students share.
- Refocus whole group, and invite a few students to share their responses with the group.
- Give students specific, positive feedback on upholding their integrity for learning during the demonstration. (Example: “Will, I noticed that when the lights turned off you remained in your seat ready for the demonstration.”)

Meeting Students' Needs

- Reduce potential threats and distractions in the learning environment by providing an alert to help students anticipate and prepare for the darkening of the room during this demonstration. For example: “I am going to turn off the lights and darken the room for this demonstration. When the demonstration is over, I will turn the lights back on.”
- For ELLs: Watch the “Time-lapse of Starry Night Sky” video clip twice. Students will be able to absorb and process more information during their second viewing after they understand the general idea during the first viewing. Before watching

the video, consider introducing and displaying the question “What did you notice about the stars in the night sky?”

- For ELLs: To make the process and purpose of the demonstration more transparent, prepare students for what they are going to see before beginning the presentation. Display a photograph of the sky at night and the sky during the daytime during the corresponding parts of the demonstration. (Example: First, we’re going to see how bright the flashlight is when the lights are off. Then we will see how it looks when the lights are on. Think about how it is just like seeing the stars in the day and in the night.”)

Closing and Assessment

A. Independent Writing: Sky Notebook (15 minutes)

- Direct students’ attention to the second posted learning target and read it aloud:
“I can record my observations of videos/images of the sky in the Sky notebook.”
- Remind students that they will be writing in their Sky notebooks to reach this target.
- Display page 8 of the **Sky notebook** as well as **moon photograph 6**.
 - Tell students that similar to previous lessons, they will use the moon photograph to complete this page in their Sky notebook
 - Follow the same process as in previous lessons to distribute notebooks and **pencils** and to guide students to complete this page. Remind students to use the Prepositions anchor chart, the **Adjectives anchor chart**, and the Sun, Moon, and Stars Word Wall as necessary.
 - When 2 minutes remain, provide students with a time reminder and encourage them to finish up.
- Signal all students to stop writing through the use of a designated sound and collect their Sky notebooks.

Meeting Students’ Needs

- Emphasize process and effort by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print to support spelling accuracy. (MME)
- For ELLs: Provide students with a sentence frame to support their writing in their Sky notebooks. (Example: “The moon is ____.”)
- For ELLs: It may be difficult for some students to describe the location of the moon in moon photograph 6 because there are no other objects in the picture to provide a point of reference. If students become frustrated, guide them to possible responses. Example: “Where do we know we can always find the moon, even if we can’t see it?” (in the sky; in space)

Closing and Assessment

B. Shared Writing: Describing What People Do at Night (5 minutes)

- Tell students that now they will practice writing what people do at night.
- Display the Describing What People Do at Night recording form and read aloud the prompt:
“What do people do at night?”
- Follow the same process from Lesson 8 to complete the recording form:
- Direct students’ attention back to moon photograph 6.
- If productive, cue students with a challenge:
“Can you figure out what people are doing when the sun looks like this? I’ll give you time to think and discuss with a partner.”
- Using a total participation technique, invite responses from the group:
“What are people doing when the moon is out?” (People are sleeping, dreaming, going to bed.)
- Select one response to record on the paper. Draw a quick sketch of what people might be doing.
- If time permits, invite students to call out the proper letters and words needed for the sentence and write down the complete response. Model using the Sun, Moon, and Stars Word Wall and High-Frequency Word Wall as a resource while responding.
- Reread the prompt and the written response, clarifying any misconceptions.
- Give students specific, positive feedback on their independent and shared writing today. (Example: “Leticia used the Adjectives anchor chart to write the word crescent to describe the shape of the moon. David used the word above from the Prepositions anchor chart.”)

Meeting Students’ Needs

- Before the shared writing begins, support students’ expressive skills and ability to transfer learning by offering index cards with pictures of what people are doing at different times of the day to select as they participate. (MMAE)

Lesson 10: Speaking and Listening: Patterns of the Stars

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.2:** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RI.1.4:** Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
- **RI.1.6:** Identify who is telling the story at various points in a text.
- **RI.1.7:** Use illustrations and details in a story to describe its characters, setting, or events.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can build onto others' ideas while participating in a Science Talk about patterns of the stars. (RI.1.1, RI.1.2, RI.1.4, RI.1.6, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4)
- I can record my observations of videos/images of the sky in the Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During Work Time A, circulate and observe students independently writing their individual notes. At the end of the lesson, collect students' notes to document progress toward W.1.8, RI.1.1, RI.1.2, RI.1.6, and RI.1.7.
- During Work Time B, circulate and listen for students to use the modeled sentence frames and evidence from their notes as they take part in the Science Talk. Note how students are interacting with one another using the Speaking and Listening Checklist to specifically focus on SL.1.1a, SL.1.1b, and SL.1.4 (see Assessment Overview and Resources).
- During the Closing, circulate and observe students independently writing in their Sky notebook. At the end of the lesson, collect students' writing samples to document progress toward W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.

Agenda

1. Opening

- A. Shared Reading: Reviewing Patterns of the Stars Anchor Chart (5 minutes)

2. Work Time

- A. Independent Writing: Patterns of the Stars Notes (10 minutes)
- B. Science Talk: “Why Can’t We See the Stars during the Day?” (15 minutes)
- C. Reflecting on Learning (10 minutes)

3. Closing and Assessment

- A. Reflecting on Integrity (5 minutes)
- B. Independent Writing: Sky Notebook (15 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows the pattern of Lesson 8. This is the second of two lessons in which students engage in a cycle of inquiry with *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (pages 16–21). Students record their own notes based on information from the focused read-aloud in Lesson 9, and then discuss their understanding of why stars are not visible during the day.
- During the Science Talk protocol, students use their individual notes to provide evidence for their scientific claims. Students also use the sentence frames to add on to, clarify, and extend the thinking of others.
- In Work Time C, students reflect on their understanding of stars and continue to add to the Unit 2 Guiding Question anchor chart through shared writing.

How this lesson builds on previous work:

- During the Opening, students review the class notes from Lesson 9 to support their own note-taking practice in Work Time A.
- This is the third time students have taken part in the Science Talk protocol—previously used in Lessons 6 and 8. Expect them to contribute more openly and fluidly to the conversations and continue to encourage the use of sentence frames.
- In Closing A, students Think-Pair-Share to reflect on their use of integrity during the lesson. This self-reflection builds upon students’ understanding and experience with integrity in past lessons.
- This is the first lesson in which students independently complete all parts of the Sky notebook. Throughout the unit, each part has been introduced through shared writing and practiced independently.
- Throughout Units 1 and 2, students were introduced to various total participation techniques. When following the directive to “Use a total participation technique, invite responses from the group,” use one of these techniques or another familiar technique to encourage all students to participate.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need more support in organizing their notes and using them as evidence during the Science Talk protocol. Consider having students use highlighters or sticky notes to designate the most important part(s) of their notes that they would like to share.
- Support students with their oral language during Science Talk by using Conversation Cues, providing sentence stems, and providing wait time for the processing of information.
- Students may need additional support completing the Sky notebook independently. Remind them to use the tools around the room such as the Sun, Moon, and Stars Word Wall, the Prepositions anchor chart, and the High-Frequency Word Wall.

Down the road:

- In future lessons, students will continue their practice with using prepositions (taught in Lessons 5–7) and adjectives (taught in Lessons 2–4) while writing in the Sky notebook.
- In Lesson 12, students participate in the Unit 2 Assessment. They will follow a similar process by first selecting notes as evidence in response to the Unit 2 guiding question—“What patterns can we observe in the sky?”—and then using those notes as references in a small group Science Talk protocol.

In advance:

- Prepare:
 - Patterns of the Stars notes sheets on clipboards for Work Time A.
 - Sky notebooks on clipboards for the Closing.
 - Sun photograph 7 in color, if possible.
- Pre-distribute colored pencils at student workspaces to ensure a smooth transition to independent writing in the Closing.
- Strategically group students in groups of three or four for the Science Talk protocol in Work Time B. Consider grouping students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their groups, initiating discussion and providing implicit sentence frames.
- Review the Science Talk protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia**Consider using an interactive white board or document camera to display lesson materials.**

- Video record students as they take part in the Science Talk protocol in Work Time B to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, 1.I.B.6, 1.I.C.10, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to participate in a Science Talk protocol. This will foster content knowledge and English language development through peer interaction.
- ELLs may find it challenging to understand the explanation and intention behind taking notes. Make this transparent as possible by reminding students of the purpose. Model trying to participate in a Science Talk without notes, then model and think aloud using notes to formulate ideas to share.

Levels of support

For lighter support:

- During the Science Talk protocol in Work Time B, encourage students to use Goal 1 and 2 Conversation Cues with other students to extend and deepen conversations, think with others, and enhance language development. (Example: “Did you mean ____?”)
- During the Science Talk protocol in Work Time B, if students are grouped with others of varied proficiency levels, consider changing groups so students are placed in groups of similar proficiency. This will foster independence while providing the opportunity to assess progress in speaking and listening.

For heavier support:

- During Work Time A, distribute a partially filled-in copy of the Patterns of the Stars student notes. This will provide students with models for the kind of information they should enter, while relieving the volume of writing required.
- During the Science Talk protocol in Work Time B, provide students with individual copies of the anchor chart. In their groups, students can follow along by placing a finger on each step as it occurs. While circulating, ensure that students are following along accurately.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In order to set themselves up for success for the independent writing during Work Time A, students will need to generalize the skills that they learned from previous lessons. To activate prior knowledge before students begin writing, recall the learning from the previous sessions and the similar independent writing that they have already completed. Additionally, present the directions both visually and verbally and support comprehension by displaying an exemplar notes sheet.
- **Multiple Means of Action & Expression (MMAE):** During the Science Talk protocol, students may need support in setting appropriate goals for their effort and the level of difficulty expected. Appropriate goal-setting supports development of executive skills and strategies. Offer scaffolds for students learning to set appropriate personal goals, such as a checklist with three goals for the Science Talk. (Examples: “I can listen to group members without

interrupting” “I can share my ideas by using my notes” “I can add one idea after a group member shares.”)

- **Multiple Means of Engagement (MME):** Although holding high expectations is important, be aware that sometimes these expectations can raise student anxiety. During independent writing, emphasize the importance of process and effort by discussing how even when you try your best to write neatly, you can sometimes make a mistake and that is okay.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- pattern, stars, sun, shine (L)

Materials

- ✓ Patterns of the Stars anchor chart (begun in Lesson 7)
- ✓ Patterns of the Stars notes sheet (one per student and one to display)
- ✓ Pencils (one per student)
- ✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ✓ *Does the Sun Sleep?: Noticing Sun, Moon, and Star Patterns* (one to display)
- ✓ Science Talk Protocol anchor chart (begun in Lesson 6)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Unit 2 Guiding Question anchor chart (begun in Lesson 2; added to during Work Time C; see supporting materials)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)
- ✓ Sky notebook (from Lesson 4; pages 9–10; one per student and one to display)
- ✓ Sun photograph 7 (one to display)
- ✓ Prepositions anchor chart (begun in Lesson 7)
- ✓ Colored pencils (class set; variety of colors per student)
- ✓ Adjectives anchor chart (begun in Lesson 4)

Opening

A. Shared Reading: Reviewing Patterns of the Stars Anchor Chart (5 minutes)

- Direct students’ attention to the **Patterns of the Stars anchor chart** and review the big ideas.

- Remind students that, as in previous lessons, they will use the information from this anchor chart to write their own notes about why we cannot see stars during the day. Then they will use these notes to have a Science Talk with their classmates.
- Invite students to turn and talk with an elbow partner:
“What information do you think is most important to know when answering the question ‘Why can’t we see stars during the day?’” (Responses will vary, but may include: Stars are very far away, so their light is dim; the sun’s light is so bright that it outshines the starlight, etc.)
- Circulate and listen in as students share with their partner. Note trends in responses (e.g., everyone is talking about the sun outshining the stars) and mark those trends on the anchor chart with a star.
- Redirect students’ attention to the Patterns of the Stars anchor chart and point out the starred note(s).
- Tell students that now they will record their own notes about why we can’t see stars during the day, and they might want to include a note, or notes, like the one starred on the anchor chart.

Meeting Students’ Needs

- As students turn and talk, support communication and engagement by pairing students with strategic partners to ensure they have a strong, politely helpful partner to support their efforts at sharing the information they think is most important in answering the question. (MME)
- For ELLs: Some students may find the following question complex: “What information do you think is most important to know when answering the question: ‘Why can’t we see stars during the day?’” Rephrase the question as necessary to illicit responses. Then invite students to rephrase the question in their own words. (Examples: “Why can’t we see stars in the sky?” “What makes the stars disappear in day and reappear at night?”)

Work Time

A. Independent Writing: Patterns of the Stars Notes (10 minutes)

- Display the **Patterns of the Stars notes sheet** and read the prompt aloud:
 - “Why can’t we see stars during the day?”
- Remind students that they need to record their notes in a way that is useful to them so that they can read from their notes and use them as evidence in the Science Talk. They should record only the information that they think is most important.
- Invite students to whisper a response into their hand:
“What is one important piece of information you plan to write on your Patterns of the Stars notes sheet?” (Responses will vary.)
- Remind students that as they record their notes, they should draw quick sketches that will help them explain why we can’t see stars during the day, and write words that are clear and easy to reread.

- Distribute **pencils** and the prepared clipboards with Patterns of the Stars notes sheets.
- Tell students they may begin writing their own notes to answer the question:
Why can't we see stars during the day?
- Focus students on the prompt. Reread it aloud and invite them to begin writing their individual notes.
- Circulate and support students as they write. Remind them to use the Patterns of the Moon anchor chart and **Sun, Moon, and Stars Word Wall** to help them while writing. If students are having a difficult time explaining their ideas, invite them to look again at *Does the Sun Sleep?: Noticing Sun, Moon, and Stars Patterns* and jot down what they see or hear that they want to record.
- When 2 minutes remain, provide students with a time reminder and encourage them to finish up their Patterns of the Stars notes sheet.
- Signal all students to stop writing through the use of a designated sound.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided Patterns of the Stars notes sheet to help students know what to record. (MMAE)
- For ELLs: Consider reviewing the What Makes Day and Night student notes exemplar and adding an additional note to it. Think aloud while modeling adding the note, or complete it as a shared or interactive writing experience.
- For ELLs: It may help some students to verbalize their thinking with peers. Before inviting students to add notes to their Patterns of the Stars student notes, invite them to turn to a partner and share one note they are thinking of adding. Challenge them to explain their reasoning. (Example: "I am adding a picture of a flashlight because it will help me remember our demonstration.")

Work Time

B. Science Talk: "Why Can't We See the Stars during the Day?" (15 minutes)

- Tell students they will now use their notes to participate in a Science Talk in small groups to answer the question:
 - "Why can't we see stars during the day?"
- Remind them that they used this protocol in Lessons 6 and 8 and review as necessary using the **Science Talk Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Direct students' attention to the learning targets and read the first one aloud:
"I can build onto others' ideas while participating in a science talk about patterns of the stars."
- Remind students of the sentence frames during the previous Science Talks:
 - "I think he/she means _____."
 - "I'd like to add _____."
 - "This makes me think _____."

- Invite students to repeat each sentence frame as you read it aloud.
- Invite students to take their Patterns of the Stars notes sheets and move into pre-determined groups, assigning each group to a different area of the room.
- Guide students through the protocol. Circulate and use the **Speaking and Listening Checklist** to track student progress. Prompt students with questions to help them expand on their ideas. (Examples: “Do stars disappear during the day?” “Why is starlight so dim compared to the sun?” “Why is sunlight so bright?”)
- Refocus whole group and collect students’ notes sheets.
- If productive, cue students to think about their thinking:
“What things did you do today that will help you succeed during the Science Talk in the Unit 2 Assessment? I’ll give you time to think and discuss with a partner.” (Responses will vary.)
- Provide specific, positive feedback about students’ use of evidence during the Science Talk protocol. (Example: “Aisha, I saw you show a diagram that you had drawn to your group members to demonstrate how the sun is close to earth and other stars are very far away.”)

Meeting Students’ Needs

- Before students begin the Science Talk, help them anticipate and manage frustration by modeling what to do if they get stuck on building onto others’ ideas. Consider providing index cards of previously taught sentence frames as support for communication and frustration. (MMR, MMAE, MME)
- For ELLs: Create groups with varying levels of language proficiency. The students with greater language proficiency can serve as models in the group, initiating discussions and modeling the sentence frames. If possible, consider grouping students who speak the same home language together to help one another interpret and comprehend the conversation in their home languages.
- For ELLs: It may take longer for some students to process language and follow the conversation during the Science Talk. Encourage students to speak up when they would like to hear something repeated. Empower them with questions they can ask to regulate the pace of the conversation. (Examples: “Can you please repeat what you said?” “Can you please speak more slowly?”)

Work Time

C. Reflecting on Learning (10 minutes)

- Tell students that they will now add their learning to the **Unit 2 Guiding Question anchor chart**.
- Follow the same process used in Lesson 8 to:
 - Review the current anchor chart.
 - Ask students to consider:
“What is a pattern?” (something that repeats again and again)
“What pattern of the stars have we investigated over the past few lessons?” (We can see stars at night, but not during the day.)

- Add students’ responses and sketches to the anchor chart.
- Reread the entire anchor chart.
- With excitement, share that they will get a chance to show what they know as they prepare for a final Science Talk in the next few lessons.

Meeting Students’ Needs

- When using a total participation technique, minimize discomfort and/or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Briefly review the Mini Language Dive from Lesson 2. Invite students to rephrase the Unit 2 guiding question in their own words before reviewing the anchor chart. (Example: What happens again and again in the sky?)

Closing and Assessment

A. Reflecting on Integrity (5 minutes)

- Direct students’ attention to the **Working to Become Ethical People anchor chart** and review the big ideas.
- Tell students that today they are going to reflect on their use of integrity during the Science Talk protocol.
- Using a total participation technique, invite responses from the group:
“What does it mean to have integrity?” (to do the right thing even when it’s hard)
- Invite students to Think-Pair-Share with an elbow partner:
“What is one way you noticed yourself or a classmate showing integrity during the Science Talk protocol?” (Answers will vary, but may include something like: I showed integrity when I stayed with my group instead of going to talk with my other friends.)
- Circulate and listen in as students share with one another.
- Ask students to return to their seats. Share a few great examples of integrity that you heard while listening to students talk. (Example: “Juan said he noticed Amelia showing integrity when she focused on his response and added on with more information.”)
- If productive, cue students to think about their thinking:
“How does our Sky notebook add to your understanding of adjectives and prepositions? I’ll give you time to think and discuss with a partner.” (Responses will vary.)

Meeting Students’ Needs

- After the Think-Pair-Share, foster a sense of community and provide options for physical action by inviting the whole class to join you in a special appreciation and recognition for the integrity they showed during the Science Talk (e.g., silent cheer, raise the roof, firecracker, hip-hip hooray). (MMAE, MME)
- For ELLs: Provide options for responding to the prompt by offering different sentence frames. (Examples: “One way I showed integrity was ____.” “I showed

integrity by ____." "It was hard to do the right thing because _____. But did the right thing because _____.")

Closing and Assessment

B. Independent Writing: Sky notebook (15 minutes)

- Direct students' attention to the learning targets and read the second one aloud:
"I can record my observations of videos/images of the sky in the Sky notebook."
- Remind students that they will be writing in their Sky notebooks to reach this target
- Display pages 9–10 of the **Sky notebook** and **sun photograph 7** and use the same process as in previous lessons to distribute notebooks and **colored pencils** and to guide students to complete this page. Remind students to use the **Prepositions anchor chart**, the **Adjectives anchor chart**, and the Sun, Moon, and Stars Word Wall as necessary.
- Signal all students to stop writing through the use of a designated sound and collect their Sky notebooks.
- Share with students that in the next lesson they are going to gather their notes and plan to discuss the different patterns they have learned about and observed in the sky.

Meeting Students' Needs

- Before students begin independent writing, support fine motor development by providing supportive tools for writing (e.g., pencil grips, slanted desks, or alternate writing utensils). (MMAE)
- For ELLs: Briefly discuss the photograph to ensure that all students are prepared to write about the different objects in it. Label relevant objects in the photograph to support students as they write. (Example: "Does anyone know what this is? That's right, it is a bridge. Alfonso, can you label the bridge? And how about the water? I think it is a river. And these are buildings.")

Lesson 11: Reading, Writing, and Speaking: Preparing for the Unit 2 Assessment

CCS Standards

- **RI.1.1:** Ask and answer questions about key details in a text.
- **RI.1.7:** Use the illustrations and details in a text to describe its key ideas.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **SL.1.1b:** Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can describe a pattern that can be observed in the sky using evidence from my notes about the sun, moon, or stars. (RI.1.1, RI.1.7, SL.1.1a, SL.1.1b, SL.1.4)
- I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During the Closing, circulate and observe students independently writing in their Sky notebook. At the end of the lesson, collect students' notebooks to serve as writing samples demonstrating progress toward W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.

Agenda

1. Opening

- A. Engaging the Learner: “Where Are They? The Sun, Moon, and Stars” Poem (5 minutes)
- B. Reviewing Learning Targets (5 minutes)

2. Work Time

- A. Shared Reading: Revisiting Unit 2 Guiding Question Anchor Chart (10 minutes)
- B. Reviewing Notes: Preparing for the Unit 2 Assessment (10 minutes)
- C. Back-to-Back and Face-to-Face: Sharing Information about Patterns in the Sky (15 minutes)

3. Closing and Assessment

- A. Independent Writing: Sky Notebook (15 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- Throughout the unit, students participated in focused read-aloud, shared writing, independent writing, and Science Talks to gather information and evidence to support answering the Unit 2 guiding question: “What patterns can we observe in the sky?” This lesson invites students to revisit and review all of this information in order to prepare for the Unit 2 Assessment—a final Science Talk—in the next lesson.
- This lesson offers students a variety of opportunities to prepare for the Unit 2 Assessment, including reviewing anchor charts, reviewing independent notes, and practicing sharing information with a partner.

How this lesson builds on previous work:

- Students review their knowledge about observable patterns in the sky that they have developed throughout the course of this unit.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need additional support as they reread and review their own notes sheets during Work Time B. Encourage them to “read” the pictures and labels on their notes sheets and prompt them with questions about the specific pattern in the sky.

Down the road:

- In Lesson 12, students will complete the Unit 2 Assessment by engaging in a final Science Talk.
- Also in Lesson 12, students will complete a final entry in their Sky notebook, independently observing new photographs of the sun and moon and writing about both.

In advance:

- Pre-distribute all of students’ notes sheets at their workspaces to ensure a smooth transition to Work Time B.

- Prepare clipboards with Sky notebooks for the Closing.
- Preview the Unit 2 Assessment to familiarize yourself with what is expected of students in this lesson and the next.
- Review Back-to-Back and Face-to-Face protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, “Where Are They? The Sun, Moon, and Stars” poem, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Video record students as they take part in the Back-to-Back and Face-to-Face protocol in Work Time C to watch with students to evaluate strengths and areas for improvement before the assessment Science Talk protocol. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.B.5, and 1.I.C.10

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to prepare for their assessment by choosing which pattern they would like to discuss during the Science Talk protocol. This will allow students to enter the assessment feeling more comfortable and confident.
- ELLs may find it confusing or abstract to prepare for an event that will be taking place on the following day. Consider doing a short practice round of the Science Talk protocol after students choose the pattern they would like to discuss.

Levels of support

For lighter support:

- Before providing sentence frames or additional modeling throughout this lesson, observe student interaction and allow students to grapple. Provide supportive frames and demonstrations only after students have grappled with the task. Observe the areas in which they struggle to determine which anchor charts and environmental resources they will most benefit from using during the assessment.

For heavier support:

- If students are having difficulty selecting a pattern in the sky to discuss during the assessment, consider selecting one for them based on your observation of their strengths in prior lessons.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** To facilitate effective learning during this lesson, ensure that all students have access to the directions in each session, and that they feel comfortable with the expectations. Vary the ways in which you convey expectations for each activity or task. Consider engaging in a clarifying discussion about the directions, or creating an outline of the steps in the Work Time. Example: (1) Revisit guiding question, (2) review notes to prepare for sharing, (3) share information with a partner.
- **Multiple Means of Action & Expression (MMAE):** During Work Time B, students select one note about a pattern in the sky that they will share during the Back-to-Back and Face-to-Face protocol in Work Time C. Support planning and management of information by inviting students to highlight two pieces of information on their notes sheet that they will share with their partner. This will help students keep information organized and “in mind.”
- **Multiple Means of Engagement (MME):** During independent writing, students may need examples of how to problem-solve when they want to write a word with tricky spelling. Emphasize process and effort by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print, such as the Word Walls and anchor charts, to support spelling accuracy.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- evidence (L)

Materials

- ✓ “Where Are They? The Sun, Moon, and Stars” poem (from Lesson 8, one to display)
- ✓ Unit 2 Guiding Question anchor chart (begun in Lesson 2)
- ✓ Equity sticks (class set; one per student)
- ✓ *What Makes Day and Night* notes sheet (from Lesson 6; one per student)
- ✓ Patterns of the Moon notes sheet (from Lesson 8; one per student)
- ✓ Patterns of the Stars notes sheet (from Lesson 10; one per student)
- ✓ Pencils (one per student)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)
- ✓ Sky notebook (from Lesson 4; pages 11–12; one per student and one to display)
- ✓ Sky notebook (from Lesson 4; answers, for teacher reference)
- ✓ Moon photograph 7 (one to display)

- ✓ Prepositions anchor chart (begun in Lesson 7)
- ✓ Adjectives anchor chart (begun in Lesson 4)

Opening

A. Engaging the Learner: “Where Are They? The Sun Moon, and Stars” Poem (5 minutes)

- Invite students to the whole group area.
- Direct their attention to the **“Where Are They? The Sun, Moon, and Stars” poem.**
- Remind them that they have done a lot of hard work learning and reciting this poem and today they will get a chance to practice it.
- Invite a student volunteer to lead the class in reciting the poem and doing any accompanying hand motions or gestures. Repeat as time allows with other student volunteers.
- Invite students to be seated.

Meeting Students’ Needs

- Some students may be uncomfortable with individually leading the class in reciting the poem. Support engagement by inviting them to co-lead with a partner so that they still have a chance to lead in front of the class. (MME)
- For ELLs: Invite an ELL to read the poem for the class. This will boost the student’s confidence while providing a strong model for students who need heavier support.

Opening

B. Reviewing Learning Targets (5 minutes)

- Direct students’ attention to the posted learning targets and read the first one aloud:
“I can describe a pattern that can be observed in the sky using evidence from my notes about the sun, moon, or stars.”
- Using a total participation technique, invite responses from the group:
“What do you remember about what the word evidence means?” (proof or facts that show something is true)
- Tell students that throughout the course of the unit, they have gathered a lot of evidence to help them describe a number of patterns that can be observed in the sky.
- Invite students to turn and talk with an elbow partner:
“What patterns in the sky have we learned about from reading, writing, and discussing throughout the unit?” (the pattern of light and dark; the pattern of the sun rising and setting; the pattern of the moon seeming to change shape; the pattern of seeing stars only at night)
- Share with students that during today’s lesson, they will have a chance to review all of the learning they have done about the various patterns in the sky.

Meeting Students' Needs

- To support expressive skills and activate prior knowledge, offer index cards with pictures or key words (e.g., sun, moon, stars) to scaffold students' participation before they turn and talk. (MMR, MMAE, MME)
- For ELLs: Briefly review the Language Dive and Mini Language Dive sentences from the unit. Invite students to share what evidence the sentences offer for helping them describe patterns in the sky.

Work Time

A. Shared Reading: Revisiting Unit 2 Guiding Question Anchor Chart (10 minutes)

- Remind students that over the course of the unit they have gathered a lot of information to help answer the unit's guiding question. They have done so by reading texts, viewing photographs and videos, discussing and sharing with partners, and writing as a class and independently.
- Tell students that now they have a chance to review their thinking on the unit's guiding question.
- Direct students' attention to the posted **Unit 2 Guiding Question anchor chart** and read it aloud.
- Tell students that to help them remember the patterns in the sky that they have learned about, they will now think of a hand motion, gesture, or action to go along with each pattern.
- Ask students to turn and talk, and use **equity sticks** to select students to share their responses with the whole group:

“What is something we can do safely and respectfully with our hands or bodies to show the pattern of light and dark and how it makes day and night on earth?” (Responses will vary, but may include: standing in place and turning in a circle like the earth rotating or spinning, or a motion to show people awake during the day coupled with a motion to show people sleeping at night.)

- Select one of the suggested motions and invite the class to join you in doing it.
- Repeat this process for each of the following questions:

“What is something we can do safely and respectfully with our hands or bodies to show the pattern of the sun rising and setting?” (Student responses will vary, but may include: placing arms straight out to one side of body and creating an arc to the other side of body.)

“What is something we can do safely and respectfully with our hands or bodies to show the pattern of the moon seeming to change shape?” (Student responses will vary, but may include: holding both arms above the head in a circle shape to show a full moon, or holding one arm above the head to show a crescent shape.)

“What is something we can do safely and respectfully with our hands or bodies to show the pattern of the stars?” (Student responses will vary, but may include: opening and closing hands from fist to show stars twinkling.)

- Invite students to safely and quickly stand up and repeat all of the selected motions as you read the information on the Unit 2 Guiding Question anchor chart for each pattern in the sky.
- Invite students to safely and respectfully twinkle like stars as they return to their workspaces.

Meeting Students' Needs

- Support expression and engagement by removing barriers and providing alternatives for physical movement. (Example: Offer photographs of possible gestures or motions that show the patterns of light and dark, the sun, the moon, and stars.) (MMAE, MME)

Work Time

B. Reviewing Notes: Preparing for the Unit 2 Assessment (10 minutes)

- Refocus students whole group and offer specific, positive feedback on their shared reading of the Unit 2 Guiding Question anchor chart. (Example: “There is a lot of information on our Unit 2 Guiding Question anchor chart, and everyone worked hard to read it aloud or follow along as I read it.”)
- Tell students that in the next lesson, they will participate in a Science Talk with a small group to discuss the Unit 2 Guiding Question: “What patterns can we observe in the sky?”
- Remind students of the detailed notes they have taken about each pattern in the sky by pointing out the following at their workspaces:
 - ***What Makes Day and Night notes sheet***
 - ***Patterns of the Moon notes sheet***
 - ***Patterns of the Stars notes sheet***
- Tell students that they will now review their notes on each of the patterns in the sky and decide which pattern they would like to speak about during the Science Talk in the next lesson.
- Invite students to review and reread each of their notes sheets. Circulate and remind students to think about which pattern in the sky they would like to speak about during the Science Talk in the next lesson.
- If students are having difficulty selecting a pattern in the sky, prompt them with further questions:
 - “For which pattern do you have the most information?”***
 - “For which pattern do your notes feel the most clear and helpful?”***
- When 2 minutes remain, refocus students whole group.
- Invite students to use a **pencil** to mark a star on the top of the notes sheet for the pattern in the sky they will speak about during the Science Talk in the next lesson and to keep that notes sheet in their hands.
- Invite students to return their other two notes sheets to a neat pile in the center of their workspaces.
- Tell students they will now use the notes sheet they have in their hand to share with a partner information about the pattern in the sky they selected.

Meeting Students' Needs

- To support self-regulation and independence before students review their notes, use a visual timer and provide a checklist of steps. Example: (1) Read day and night

notes, (2) read moon notes, (3) read stars notes, (4) choose one notes sheet for sharing. (MMR, MME)

- For ELLs: If students are having difficulty selecting a pattern in the sky, invite them to practice discussing two of them. Help them determine which one they felt more comfortable and successful speaking about.

Work Time

C. Back-to-Back and Face-to-Face: Sharing Information about Patterns in the Sky (15 minutes)

- Invite students back to the whole group area.
- Tell them they are going to use the Back-to-Back and Face-to-Face protocol to share information about their selected pattern. Remind them that they used this protocol in Unit 1, and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Lead students through three rounds of the Back-to-Back and Face-to-Face protocol, reminding them to use their notes sheet as they answer the following questions:

“What pattern in the sky are you sharing about?” (Responses will vary, depending on chosen pattern.)

“What are one or two pieces of information you learned about this pattern in the sky?” (Responses will vary, depending on chosen pattern.)

“What is one thing you still wonder about for this pattern in the sky?” (Responses will vary, depending on chosen pattern.)

- Circulate to support students as they use their notes, prompting them to use the pictures and labels on their notes sheets to help recall information about their selected pattern in the sky. Take note of the ideas students are sharing and target a few students to share out with the whole group.
- Refocus whole group and invite a few students to share out.
- If productive, cue students to clarify the conversation by confirming what they mean and to listen carefully and seek to understand:
“So, do you mean ____?” (Responses will vary.)
- “Who can tell us what your classmate said in your own words?” (Responses will vary.)

Meeting Students' Needs

- During the Back-to-Back and Face-to-Face protocol, increase mastery-oriented feedback by providing feedback that is frequent, timely, and specific to individual pairs of students. (Example: “I hear that you clearly shared two interesting facts from what you learned about the pattern of the moon. Can you share something that you still wonder about the pattern of the moon?”) (MME)
- For ELLs: Provide students with sentence frames to prompt their speech for each question. (Examples: “I am sharing about ...” “One thing I learned about ____ is” “I wonder ...”)

Closing and Assessment

A. Independent Writing: Sky Notebook (15 minutes)

- Refocus students whole group and offer specific, positive feedback on students' use of their notes to share information. (Example: "I noticed that Jontue and Arturo used the drawings and labels on their notes sheet to share information about the pattern in the sky they selected with their partner.")
- Remind students that in the next lesson, they will participate in a Science Talk with a small group, discussing the pattern in the sky they have selected.
- Tell students that now they will have a chance to complete another entry in their Sky notebook, this time focusing on the moon. Remind students that throughout the unit, they have completed many entries in their Sky notebooks.
- Direct students' attention to the posted learning targets and read the second one aloud:
"I can record my observations from videos/images of the sky in my Sky notebook."
- Using a total participation technique, invite responses from the group:
"What are some observations from images of the sun and moon you have recorded thus far in your Sky notebook?" (Responses will vary, but may include: the sun in different places in the sky; the sun looking yellow and high in the sky; a crescent moon; a full moon; the different places in the sky we can see the sun and the moon.)
- Display pages 11–12 of the **Sky notebook** and **moon photograph 7** and use the same process as in previous lessons to distribute notebooks and pencils and to guide students to complete this page. Remind students to use the **Prepositions anchor chart**, **Adjectives anchor chart**, and the Sun, Moon, and Stars Word Wall as necessary.
- Circulate to support students as they write. Refer to **Sky notebook (answers, for teacher reference)** as necessary.
- Collect the Sky notebooks.
- If productive, cue students to think about their thinking:
"How does our Sky notebook add to your understanding of adjectives and prepositions? I'll give you time to think and discuss with a partner." (Responses will vary.)
- Tell students that in the next lesson, they will get to complete another, final entry in their Sky notebook, this time writing about the sun and the moon.

Meeting Students' Needs

- After independent writing, foster a sense of community and provide options for physical action by inviting the whole class to join you in a special recognition for their efforts (e.g., high-fives, silent cheer, or a stadium-style wave). (MMAE, MME)
- For ELLs: Briefly discuss the photograph to ensure that all students are prepared to write about the different objects in it. Label relevant objects in the photograph to support students as they write. (Example: "Does anyone know what this is? That's right, it looks like a hill. Mina, can you label the hill? I also see some grass and dirt.")

Lesson 12: Unit 2 Assessment: Discussing Observable Patterns in the Sky

CCS Standards

- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.1a:** Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion).
- **SL.1.1b:** Build on others' talk in conversations by responding to the comments of others through multiple exchanges.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **SL.1.6:** Produce complete sentences when appropriate to task and situation.
- **L.1.1:** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1i:** Use frequently occurring prepositions (e.g., *during, beyond, toward*).
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can build onto others' ideas while participating in a Science Talk about observable patterns in the sky. (SL.1.1a, SL.1.1b, SL.1.4, SL.1.6)
- I can record my observations from videos/images of the sky in my Sky Notebook. (W.1.8, L.1.1f, L.1.1i, L.1.1j, L.1.6)

Ongoing Assessment

- During Work Times A and B, circulate as students participate in the Science Talk protocol. Using the Speaking and Listening Checklist, document progress toward SL.1.1a, SL.1.1b, SL.1.4, and SL.1.6 (see Assessment Overview and Resources).
- Collect students' Sky notebooks completed during Work Times A and B to serve as a work sample demonstrating progress toward W.1.8, L.1.1f, L.1.1i, L.1.1j, and L.1.6.

Agenda

1. Opening

- A. Engaging the Learner: Revisiting Unit 2 Poems (5 minutes)
- B. Introducing the Unit 2 Assessment (5 minutes)

2. Work Time

- A. Unit 2 Assessment, Group 1: Science Talk (20 minutes)
- B. Unit 2 Assessment, Group 2: Science Talk (20 minutes)

3. Closing and Assessment

- A. Reflecting on Integrity (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- Throughout the unit, students practiced participating in structured discussions to share information about a question (SL.1.1a, SL.1.4, SL.1.6) and have furthered a conversation by building and adding on to others' ideas (SL.1.1b). The Unit 2 Assessment gives students an opportunity to demonstrate progress toward these skills.
- The unit assessment provides data of progress toward a number of speaking and listening standards (SL.1.1a, SL.1.1b, SL.1.4, and SL.1.6), some of which were just introduced in this unit. Students are not expected to have obtained full mastery of these standards at this point in the school year. They will have additional opportunities to practice them in later modules. Students should experience the assessment as a routine lesson.
- During Work Times A and B, as one small group of students works with the teacher to complete the unit assessment, the other small group engages in an independent task, completing a final entry in their Sky notebooks. Having students complete the unit assessment in small groups allows for focused observation of students' speaking and listening conversation skills, as required by the assessment.

How this lesson builds on previous work:

- Students demonstrate their ability to share information, listen as others share information, and add on to another's ideas and thoughts—skills they have been practicing throughout this unit.

Areas in which students may need additional support:

- Look for opportunities to support students as they engage in the Science Talk protocol in Work Times A and B. Encourage them to consult their notes sheets as they share and prompt them to use a sentence frame to further the conversation. Direct students to the Science Talk Protocol anchor chart as necessary.
- Based on the needs of your class, consider spreading out the Unit 2 Assessment over the course of two lessons to allow for smaller groups and more opportunities to observe and collect assessment data on all students.

Down the road:

- Students will continue their study of the sun, moon, and stars in Unit 3. They will apply their knowledge of narrative texts from Unit 1 and their newfound understanding of science content from this unit to craft their own narrative about the sun and moon.

In advance:

- Prepare for the Unit 2 Assessment in Work Times A and B:
 - Review the Unit 2 Assessment to familiarize yourself with what is expected of students.
 - Divide the class into two: Group 1 and Group 2. Within these two halves, determine small groups (three to four students) for the unit assessment in Work Times A and B. During Work Time A, small groups in Group 1 will work on the unit assessment while Group 2 completes an independent task. During Work Time B, small groups in Group 2 will work on the unit assessment while Group 1 completes an independent task. Consider strategically grouping students by their pre-selected pattern in the sky to ensure variety within small groups. Designate each student in the small group as A, B, C, or D.
 - Based on their selections in Lesson 11, attach students' *What Makes Day and Night* notes sheets, *Patterns of the Moon* notes sheets, or *Patterns of the Stars* notes sheets to clipboards. Keep clipboards ready near the whole group area to easily distribute during Work Times A and B.
- Pre-distribute Sky notebooks, pencils, and crayons at student workspaces to ensure a smooth transition to the independent task during Work Times A and B.
- Review the Science Talk protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, poems, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- If students were recorded reciting the “What We See: The Sun, Moon, and Stars” and “Where Are They? The Sun, Moon, and Stars” poems in Lessons 2 and 9, consider replaying these recordings to remind students of the poems.
- Video record students as they take part in Group A and Group B Science Talk protocol in Work Times A and B to watch with students to evaluate strengths and areas for improvement. Post it on a teacher webpage or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.C.12, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in previous lessons, including a discussion using the Science Talk protocol.

- ELLs may find the assessment challenging, because it is a big leap from the heavily scaffolded classroom interaction. ELLs will be asked not only to independently apply cognitive skills developed throughout the unit, but to independently apply new linguistic knowledge as well.
- Make sure that ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the skill being assessed. See additional support in the lesson.
- After the assessment, ask students to discuss what was easiest and what was most difficult on the assessment, and why. In future lessons, focus on the language skills that will help students address these assessment challenges.
- Consider inviting enthusiastic ELLs to practice the Unit 2 poems with gestures before class, and then lead the group in Opening A and Closing and Assessment B. This sort of activity can foster learning, trust, and equity.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In order to set themselves up for success for the assessment, students will need to generalize the skills they learned from the previous lessons in this unit. Before the assessment, activate prior knowledge by recalling the learning targets from the unit, and review the Science Talks and independent writing that they have already completed. Offer directions for the assessment both visually and verbally. Support comprehension by displaying a visual schedule of how the groups will switch tasks during the assessment.
- **Multiple Means of Action & Expression (MMAE):** Before students begin the independent writing section of the assessment, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). Some students may forget their sentence ideas once they begin directing their efforts toward writing. Support strategy development by modeling how to draw lines for words you intend to write. This will help students recall their original ideas throughout the writing process.
- **Multiple Means of Engagement (MME):** Some students may require support with limiting distractions during the assessment. For example, offer sound-canceling headphones or dividers between workspaces. Similarly, some students may require variations in time for the assessment. Consider breaking the assessment into more manageable parts and offering breaks at certain times. During the assessment, provide scaffolds that support executive function skills, self-regulation, and students' abilities to monitor progress before and after the assessment. For example, offer a visual checklist for completion of the assessment tasks.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- build onto others' ideas, adjective, preposition (L)

Materials

- ✓ "What We See: The Sun, Moon, and Stars" poem (from Lesson 2; one to display)
- ✓ "Where Are They? The Sun, Moon, and Stars" poem (from Lesson 7; one to display)
- ✓ Sun photograph 8 (one to display)
- ✓ Moon photograph 8 (one to display)
- ✓ Sky notebook (from Lesson 4; pages 13–16; one per student)
- ✓ Pencils (one per student)
- ✓ Crayons (class set; variety of colors per student)
- ✓ Patterns of the Moon notes sheet (from Lesson 8; one per student)
- ✓ Patterns of the Stars notes sheet (from Lesson 10; one per student)
- ✓ *What Makes Day and Night* notes sheet (from Lesson 6; one per student)
- ✓ Science Talk Protocol anchor chart (begun in Lesson 6)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)

Opening

A. Engaging the Learner: Revisiting Unit 2 Poems (5 minutes)

- Invite students to the whole group area.
- Remind them that they have worked hard to learn two poems throughout the course of the unit. Tell them that today is an exciting day because they will recite both of the poems!
- Direct students' attention to the **"What We See: The Sun, Moon, and Stars" poem**.
- Using a total participation technique, invite responses from the group:
"In this poem, we found a lot of adjectives. What are adjectives?" (words that describe a person, place, or thing)
- Invite a student volunteer to lead the class in reciting the poem and doing any accompanying hand gestures and actions. Repeat as time allows with one or two more student volunteers.
- Repeat this process with the **"Where Are They? The Sun, Moon, and Stars" poem** and the question:
"In this poem, we found a lot of prepositions. What is a preposition?" (a word that describes the location of something)
- Refocus whole group and offer students specific, positive feedback on learning the poems. (Example: "We all worked hard to learn a lot of new words in these two poems.")

Meeting Students' Needs

- Provide options for visual perception by offering individual copies of the poems for students who may need support with using far-point display as they follow along. (MMR)

Opening

B. Introducing the Unit 2 Assessment (5 minutes)

- Direct students' attention to the posted learning targets and read the first one aloud:
"I can build onto others' ideas while participating in a Science Talk about observable patterns in the sky."
- Using a total participation technique, invite responses from the group:
"What are the observable patterns in the sky that we have learned about?" (the pattern of light and dark; the pattern of the sun rising and setting; the pattern of the moon seeming to change shape; the pattern of only seeing stars at night)
- Remind students:
 - They have gathered a lot of evidence throughout the unit to help them describe a number of patterns that can be observed in the sky.
 - They have participated in three Science Talks to discuss different questions related to these patterns in the sky.
- Focus students on the phrase *build onto others' ideas* in the learning target.
- Using a total participation technique, invite responses from the group:
"What does it mean to build onto others' ideas? What are some ways you can do that while participating in the Science Talk protocol?" (adding on to what someone else said; add new information to an idea that someone else shared; use sentence frames to share your thinking and how it relates to what others have already said)
- Share with students that during today's lesson, they will have a chance to participate in a Science Talk to discuss the Unit 2 guiding question. Review the guiding question by reading it aloud:
"What patterns can we observe in the sky?"
- Tell students that half the class will participate in the Science Talk protocol while the other half completes another entry in their Sky notebooks. Then they will switch so that everyone completes both activities.

Meeting Students' Needs

- As students share patterns learned in previous lessons, scaffold recall and engagement with prompts or sentence frames to encourage participation. (MMAE, MME)

Work Time

A. Unit 2 Assessment, Group 1: Science Talk (20 minutes)

- Review the assessment directions and explain where each group will work and what they will do.
- Invite students in Group 2 to return to their workspaces:
 - Display **sun photograph 8** and **moon photograph 8** and point out that the other materials they need to complete their individual task are already at their workspaces:
 - Sky notebook
 - Pencils
 - Crayons
 - Direct students in Group 2 to open to page 13 in their Sky notebook.
 - Invite students in Group 2 to observe the photographs closely before using the pencils and crayons to complete pages 13–16 in their Sky notebook.
- Move students in Group 1 into pre-determined small groups and invite them to label themselves A, B, C, and D, and move seats in the whole group area into small circles.
 - Distribute **Patterns of the Moon notes sheets**, **Patterns of the Stars notes sheets**, and **What Makes Day and Night notes sheets** accordingly.
 - Tell students in Group 1 that they are going to use the Science Talk protocol to discuss the Unit 2 guiding question. Remind them that they used this protocol in Lesson 10, and review as necessary using the **Science Talk Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
 - Post and review sentences frames as necessary:
 - “I think he/she means _____.”
 - “I’d like to add _____.”
 - “This makes me think _____ because _____.”
 - Invite group member A to begin the Science Talk protocol:

“What patterns can we observe in the sky?”
 - Circulate as students discuss. Observe students sharing information about their selected pattern in the sky, using sentence frames to add on to the discussion, and using their notes as a resource as they share and discuss. Use the **Speaking and Listening Checklist** to make note of observations and progress toward SL.1.1a, SL.1.1b, SL.1.4, and SL.1.6.
 - Allow students to complete the Science Talk protocol without teacher involvement. Only provide reminders about directions.
 - While Group 1 is completing the Unit 2 Assessment, redirect and refocus Group 2 on their independent task as necessary. When 2 minutes remain, invite Group 2 to clean up and return their Sky notebooks, pencils, and crayons to their places.
 - Give Group 1 students specific, positive feedback on engaging in meaningful discussions. (Example: “I saw many of you consult your notes sheet during your discussions to make sure you were sharing accurate information with your classmates.”)
- Refocus whole group and assist Group 2 in transitioning to the whole group area and Group 1 in transitioning back to their seats.

Meeting Students' Needs

- Before students begin the Unit 2 Assessment, emphasize process and effort by discussing the purpose of assessments. (Example: "What we are doing today is similar to the Science Talk and Sky notebook writing from previous lessons, but this is called an *assessment*. The purpose of an assessment is to help me know what you are learning and how well I'm teaching you. Give your best effort!") (MME)
- For ELLs: Support students in processing the language in the learning target by inviting them to restate it in their own words. Ask students to recall an example of how they achieved the learning target throughout the unit. (Example: I can say more about my friend's idea when we talk about patterns in the sky.)

Work Time

B. Unit 2 Assessment, Group 2: Science Talk (20 minutes)

- Once students are settled, repeat the process from Work Time A with each group.

Meeting Students' Needs

- To support personal coping and self-regulation skills, model appropriate ways to manage frustration and/or anxiety before students begin their independent writing (e.g., take a few deep breaths, pause to stretch, or close your eyes and silently count to 10). (MME)
- For ELLs: Ensure that ELLs clearly understand all assessment directions. Rephrase directions for them. Monitor during the assessment to see that students are completing the assessment correctly. Stop those who are on the wrong track and make sure they understand the directions.

Closing and Assessment

A. Reflecting on Integrity (10 minutes)

- Invite all students back to the whole group meeting area and refocus students whole group.
- Remind them that, in addition to their work answering the Unit 2 guiding question, they also have been focusing on demonstrating integrity.
- Direct students' attention to the **Working to Become Ethical People anchor chart**. Tell students they have had many opportunities to learn about and show integrity throughout the unit. Tell them that now they will get a chance to think about how they showed integrity.
- Invite students to turn and talk to an elbow partner:
"How have you shown integrity throughout this unit?" (Responses will vary, but may include: I stayed on task during our Science Talk protocols; I shared information about the topic even if the teacher wasn't listen to our conversation.)
- As students talk, circulate and listen in. Take note of the ideas they are sharing and identify a few students to share out with the whole group.
- Using a total participation technique, invite responses from the group:
"How have you seen a classmate show integrity during this unit?" (Responses will vary.)

- Tell students that you have seen them show integrity in many ways and that they will continue to work on this habit in the next unit.
- Tell students that over the next few weeks they will continue learning about the sun, moon, and stars and will read more texts and have more chances to write, draw, and discuss this topic. With excitement, share that they will even get to write an original narrative about the sun.
- Give students specific, positive feedback on all of their hard work during this unit, including reading and studying a number of texts, learning about different patterns that can be observed in the sky, and engaging in rich discussions with their classmates!

Meeting Students' Needs

- When circulating and listening in, scaffold partner conversations as needed. Some students may benefit from explicit prompting or a sentence frame. (Example: "I showed integrity during the Science Talk when I ____.") (MMAE)
- For ELLs: Provide options for responding to the prompt by offering different sentence frames. (Examples: "One way I showed integrity was ____." "I showed integrity by ____." "It was hard to do the right thing because _____. But I did the right thing because _____.")

Grade 1: Module 2

Unit 3:

Overview and Lessons

Unit 3: Writing Narratives: Using Observations of the Sun to Write Narrative Poems

In Unit 3, students continue to reflect on where the sun and moon appear in the sky and what happens when the sun and moon are at different places in the sky. They read the book *What the Sun Sees, What the Moon Sees* by Nancy Tafuri first to understand the content as readers, and then again as a mentor text to study the author's craft. Students also closely view images and videos of urban, suburban, and rural areas at night and during the day to strengthen their schema around what the sun might "see." Students work with one another to draft a class narrative poem titled "What the Moon Sees," which describes the moon, its position, and what is happening with animals and people during that time of night.

In the second half of the unit, students begin the Unit 3 Assessment as they plan and write their own individual narrative poem, "What the Sun Sees" (with a beginning, middle, and end) (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b, L.1.15d). The assessment is broken up into three lessons, during which students draft and write each of the three verses. For their final performance task, students revise and edit their poems based on teacher feedback. They then prepare for a celebration of learning as they practice reading their original narrative poems as well as presenting the songs and Sky notebooks from previous units. In the final lesson, students share what they have learned with families and friends during the celebration.

Guiding Questions and Big Ideas

How do authors use their knowledge and observations to write a story?

- *Authors select a topic and observe and study it.*
- *Authors plan out what they want to write by talking about it and trying it out.*
- *Authors use beautiful language to show, not tell about the topic of their choice.*
- *Authors write a narrative with a beginning, middle, and end.*

The 4 T's

TOPIC	TASK
Reading to Learn and Writing to Understand: A Study of the Patterns of the Sun, Moon, and Stars	Using Observations of the Sun to Write a Narrative Poem
TARGETS	TEXT
CCSS explicitly taught and assessed: W.1.3, W.1.8, SL.1.4, L.1.1f, L.1.1j, L.1.2b, L.1.15d	<i>What the Sun Sees, What the Moon Sees</i>

Unit 3 Assessment

Using Observations of the Sun to Write a Narrative Poem

This assessment centers on W.1.3, L.1.1f, L.1.1j, and L.1.2b and requires students to plan and write a narrative poem with a beginning, middle, and end describing the sun and what the sun “sees.” This three-verse narrative poem, titled “What the Sun Sees,” is modeled closely after the structure of the text *What the Sun Sees, What the Moon Sees*. Students plan, draft, and independently write one verse per lesson across Lessons 8–10. Each verse focuses on a specific time of day, describing the sun and its position at that time of day, as well as the movements and actions of people and animals during that time of day.

Assessment Checklists

Teachers use the Speaking and Listening Checklist to gather data on students’ progress toward SL.1.1a, SL.1.1b, and SL.1.4. Assess students’ progress toward W.1.5 during the performance task as students revise and edit their work in preparation for the end of module celebration.

Habits of Character

Social-Emotional Learning Focus

Central to EL Education’s curriculum is a focus on “habits of character” and social-emotional learning. Students work to become effective learners, developing mindsets and skills for success in college, career and life (e.g., initiative, responsibility, perseverance, collaboration); work to become ethical people, treating others well and standing up for what is right (e.g., empathy, integrity, respect, compassion); and work to contribute to a better world, putting their learning to use to improve communities (e.g., citizenship, service).

In this module, students **work to become ethical people**: habits for how we treat others. Throughout Unit 3, students continue to demonstrate the habits of integrity and respect—to do the right thing even when it is hard and to treat others with kindness and care—in a variety of activities and lessons. Students practice integrity and respect as they give and receive feedback on one another’s writing and take more responsibility over their learning.

Unit-at-a-Glance

This unit is approximately 2.5 weeks or 13 sessions of instruction.

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 1 RL.1.1, RL.1.10, SL.1.1, SL.1.2	Noticing and Wondering: What Happens During the Day and Night 1. Opening A. Read-aloud: “Elvin, the Boy Who Loved the Sky”, Part 6 (10 minutes) 2. Work Time A. Read-aloud: <i>What the Sun Sees, What the Moon Sees</i> (10 minutes) B. Sorting Protocol: Daytime and Nighttime Activities (15 minutes) C. Back-to-Back, Face-to-Face Protocol: What Happens During the Day and Night (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can ask and answer questions about day and night based on the text <i>What the Sun Sees, What the Moon Sees</i>. (RL.1.1, RL.1.10) - I can describe what animals and people do during the day and night based on observations of pictures and videos. (SL.1.1, SL.1.2)	Use the Reading Literature Checklist to track students’ progress towards RL.1.1 and RL.1.10.	- Sorting Protocol - Back-to-Back, Face-to-Face Protocol - Working to Become an Ethical Person anchor chart

The Sun, Moon, and Stars

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 2 RL.1.1, RL.1.10, SL.1.2, SL.1.4	Reading, Speaking, and Listening: Describing the Moon and What It “Sees” 1. Opening A. Building Vocabulary: Interactive Word Wall (10 minutes) 2. Work Time A. Focused Read-aloud: <i>What the Moon Sees</i> , Pages 17-30 (15 minutes) B. Role-play: <i>What the Moon Sees</i> , Selected Pages (10 minutes) C. Close Viewing: What the Moon “Sees” (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (10 minutes)	- I can ask and answer questions about night based on the text <i>What the Sun Sees</i>, <i>What the Moon Sees</i>. (RL.1.1, RL.1.10) - I can describe what the moon “sees” using evidence from pictures, videos, and the text. (SL.1.2, SL.1.4)	- Use the Reading Literature Checklist to track students’ progress towards RL.1.1 and RL.1.10. - Use the Speaking and Listening checklist (SL.1.1, SL.1.2) as students role-play.	- Interactive Word Wall Protocol anchor chart - Adjectives anchor chart - What the Moon Sees anchor chart - Role-Play Protocol anchor chart - Pinky Partners Protocol
Lesson 3 SL.1.1, SL.1.2	Speaking and Listening: Introduction to High Quality Work 1. Opening A. Building Vocabulary: Interactive Word Wall (10 minutes) 2. Work Time A. Read-aloud: Model of Excellence 1 (10 minutes) B. Noticing and Wondering: Analyzing High Quality Work (15 minutes) C. Shared Writing: High Quality Work anchor chart (10 minutes) 3. Closing and Assessment A. Back-to-Back, Face-to-Face: Model of Excellence #2 (10 minutes)	- I can define what it means for work to be “high quality.” (SL.1.1, SL.1.2) - I can analyze a model of high quality work. (SL.1.1, SL.1.2)	Speaking and Listening checklist (SL.1.1, SL.1.2) as students engage the Back-to-Back, Face-to-Face protocol.	- Interactive Word Wall Protocol anchor chart - High Quality Work anchor chart - Noticing and Wondering: Models of Excellence anchor chart - Back-to-Back, Face-to-Face protocol
Lesson 4 W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Speaking and Listening: Planning and Writing “What the Moon Sees” Poem 1. Opening A. Building Vocabulary: Interactive Word Wall (10 minutes) 2. Work Time A. Shared Reading: “What the Moon Sees” Poem, Verse 1 (10 minutes) B. Preparing for Writing: “What the Moon Sees” Verse Planner Verse 2 (15 minutes) C. Shared Writing: “What the Moon Sees” Poem Template Verse 2 (15 minutes) 3. Closing and Assessment A. Engaging the Writer: High Quality Work Anchor Chart	- I can write a narrative poem using a model and evidence. (W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4) - I can plan my writing by discussing ideas with classmates. (W.1.3, SL.1.4)	Use the Speaking and Listening checklist (SL.1.4) as students engage in a discussion about the High Quality Work anchor chart.	- Interactive Word Wall Protocol anchor chart - Time of Night anchor chart - Adjective anchor chart - High Quality Work anchor chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 5 W.1.3, W.1.5, W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Speaking and Listening: Planning and Writing “What the Moon Sees” Poem and Introducing Peer Feedback 1. Opening A. Shared Reading: “What the Moon Sees” Poem Template Verses 1 and 2 (5 minutes) 2. Work Time A. Preparing for Writing: “What the Moon Sees” Verse Planner – Verse 3 (15 minutes) B. Independent Writing: “What the Moon Sees” Poem Verse 3 (10 minutes) C. Launching Peer Critique (15 minutes) 3. Closing A. Reflecting on Learning: (5 minutes)	- I can write a narrative poem using a model and evidence (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b) - I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)	Use the Narrative Writing rubric to track students’ progress towards W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b.	- Time of Night anchor chart - Adjective anchor chart - High Quality Work anchor chart - Pinky Partners protocol
Lesson 6 RL.1.1, RL.1.10, SL.1.2, SL.1.4	Reading, Speaking, and Listening: Describing the Sun and What It “Sees” 1. Opening A. Building Vocabulary: Interactive Word Wall (10 minutes) 2. Work Time A. Focused Read-aloud: <i>What the Sun Sees</i> , Pages 1-16 (15 minutes) B. Role-Play: <i>What the Sun Sees</i> , Selected Pages (10 minutes) C. Making Observations What the Sun “Sees” (15 minutes) 3. Closing and Assessment A. Reflecting on Learning	- I can ask and answer question about day based on the text <i>What the Sun Sees</i>, <i>What the Moon Sees</i>. (RL.1.1, RL.1.10) - I can describe what the sun “sees” using evidence from pictures, videos, and the text. (SL.1.2, SL.1.4)	- Use the Reading Literature Formative Assessment sheet to track students’ progress towards RL.1.1 and RL.1.10. - Use the Speaking and Listening checklist (SL.1.1, SL.1.2) as students role-play.	- Interactive Word Wall Protocol anchor chart - Adjective anchor chart <i>What the Sun Sees</i> anchor chart - Role-Play Protocol anchor chart - Sit, Kneel, Stand Protocol - Working to Become an Ethical Person anchor chart
Lesson 7 W.1.3, W.1.8, L.1.1f, SL.1.4	Speaking and Listening: Analyzing a Model of High Quality Work 1. Opening A. Building Vocabulary: Interactive Word Wall (10 minutes) 2. Work Time A. Engaging the Writer: Reviewing the Sky Notebook (15 minutes) B. Analyzing an Example and Non-Example: “What the Moon Sees” Class Poem (15 minutes) C. Developing Language: Temporal Line Game (10 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can plan my writing by discussing ideas with classmates. (W.1.3, SL.1.4) - I can analyze a model of high quality work. (SL.1.1, SL.1.2)	- Monitor students’ ability to participate in the Interactive Word Wall protocol for progress towards SL.1.4 and L.1.1f. - Listen to students’ use of temporal phrases during the Temporal Phrase Game as progress towards W.1.3.	- Interactive Word Wall Protocol anchor chart “What the Moon Sees” model “What the Moon Sees” non-model - High Quality Work anchor chart - Working to Become an Ethical Person anchor chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 8 W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Unit 3 Assessment, Part I: Using Observations of the Sun to Write Narrative Poems 1. Opening A. Engaging the Learner: “Sun, Moon, and Stars” Song 2. Work Time A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 1 (15 minutes) B. Unit 3 Assessment, Part I: “What the Sun Sees” Poem, Verse 1 (20 minutes) C. Peer Feedback: “What the Sun Sees” Poem, Verse 1 (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b) - I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)	- Collect students’ verse planners and poem templates to track progress towards W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b. - Use the Speaking and Listening checklist (SL.1.4) as students discuss and plan their writing.	“Sun, Moon, and Stars” song “What the Moon Sees” verse planner; model “What the Moon Sees” model - Time of Day anchor chart - Adjectives anchor chart - What the Sun Sees anchor chart - High Quality Work anchor chart - Pinky Partners Protocol anchor chart - Think-Pair-Share Protocol anchor chart
Lesson 9 W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Unit 3 Assessment, Part II: Using Observations of the Sun to Write Narratives 1. Opening A. Engaging the Learner: “Sun, Moon, and Stars” Song (5 minutes) 2. Work Time A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 2 (15 minutes) B. Unit 3 Assessment, Part II: “What the Sun Sees” Poem, Verse 2 (20 minutes) C. Peer Feedback: “What the Sun Sees” Poem, Verse 2 (15 minutes) 3. Closing and Assessment A. Reflecting on Learning (5 minutes)	- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b) - I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)	- Collect students’ verse planners and poem templates to track progress towards W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b. - Use the Speaking and Listening checklist (SL.1.4) as students discuss and plan their writing.	“Sun, Moon, and Stars” Song “What the Sun Sees” model - Time of Day anchor chart - Adjectives anchor chart <i>What the Sun Sees</i> anchor chart - High Quality Work anchor chart - Pinky Partners Protocol anchor chart - Think-Pair-Share Protocol anchor chart
Lesson 10 W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Unit 3 Assessment, Part III: Using Observations of the Sun to Write Narrative Poems 1. Opening A. Engaging the Learner: Sun Movement Routine (5 minutes) 2. Work Time A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes) B. Unit 3 Assessment, Part III: “What the Sun Sees” Poem, Verse 3 and Closing (20 minutes) C. Peer Feedback: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes) 3. Closing A. Reflecting on Learning (5 minutes)	- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b) - I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)	- Collect students’ verse planners and poem templates to track progress towards W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b. - Use the Speaking and Listening checklist (SL.1.4) as students discuss and plan their writing.	- Sun Movement chart - Time of Day anchor chart - Adjectives anchor chart <i>What the Sun Sees</i> anchor chart - High Quality Work anchor chart - Pinky Partners Protocol anchor chart - Think-Pair-Share Protocol anchor chart

Lesson and CCSS	Agenda	Daily Learning Targets	Ongoing Assessment	Anchor Charts & Protocols
Lesson 11 W.1.5, L.1.1f, L.1.1j, L.1.2b, SL.1.4	Unit 3 Performance Task: Revising and Editing My “What the Sun Sees” Poem 1. Opening A. Engaging the Learner: Moon Movement (5 minutes) 2. Work Time A. Reviewing Criteria for High-Quality Work (5 minutes) B. Revising and Editing: Using the High Quality Narrative Poem checklist (15 minutes) C. Revising and Editing: “What the Sun Sees” Poem (30 minutes) 3. Closing and Assessment A. Pinky Partners: Sharing Our Work (5 minutes)	- I can revise my work for details. (W.1.5, L.1.1f, L.1.1j) - I can edit my work for conventions. (W.1.5, L.1.1j, L.1.2b)	Collect students’ narrative poems and completed High Quality Work checklist as information regarding progress towards W.1.5.	- Moon Movement chart “What the Sun Sees” teacher model - High Quality Work checklist teacher model - High Quality Work anchor chart - Pinky Partners anchor chart
Lesson 12 SL.1.4, SL.1.6, L.1.6	Speaking and Listening: Preparing for the End of Module Celebration 1. Opening A. Engaging the Learner: Ways We Share Our Work anchor chart (10 minutes) 2. Work Time A. Preparing to Present: Selecting Information from Our Sky Notebooks to Share (15 minutes) B. Back-to-Back and Face-to-Face: Discussing Patterns in the Sky (15 minutes) C. Pinky Partners: Sharing our Work (15 minutes) 3. Closing A. Engaging the Learner: Revisiting “Sun, Moon, and Stars” Song (10 minutes)	- I can present information about the sun, moon, and stars to others. (SL.1.4, SL.1.6, L.1.6) - I can read my writing aloud using a strong and clear voice. (SL.1.4)	Speaking and Listening checklist (SL.1.1a, SL.1.1b, SL.1.4, SL.1.6) as students prepare for the end of module celebration.	- Ways We Share Our Work anchor chart - Back-to-Back, Face-to-Face protocol anchor chart - Pinky Partners protocol anchor chart “Sun, Moon, and Stars” song
Lesson 13 SL.1.4, SL.1.6, L.1.6	Speaking and Listening: Sharing and Celebrating Our Work 1. Opening A. Engaging the Learner: Sharing the “Sun, Moon, and Stars” song (5 minutes) 2. Work Time A. Speaking and Listening: Sharing Information About Patterns in the Sky (10 minutes) B. Reading Aloud: Sharing Our “What the Sun Sees” Poems (20 minutes) C. Reading Aloud: Sharing Our Sky Notebooks (15 minutes) 3. Closing and Assessment A. End of Module Reflection (15 minutes)	- I can present information about the sun, moon, and stars to others. (SL.1.4, SL.1.6, L.1.6) - I can read my writing aloud using a strong and clear voice. (SL.1.4)	Observe students as they engage with visitors and present their work to document progress towards SL.1.4, SL.1.6, and L.1.6.	“Sun, Moon, and Stars” song - Presentation Groups chart - Ways We Share Our Work anchor chart - Sun Movement chart - Moon Movement chart

Accountable Independent Reading

The ability to read and comprehend text is the heart of literacy instruction. Comprehension is taught, reinforced, and assessed across all three components of this primary curriculum: module lessons, Labs, and the Reading Foundations Skills Block. See the module overview for details.

For Unit 3, during the independent reading in the Skills Block, reinforce the comprehension skills and standards that students are practicing during the Integrated Literacy block:

- **RL.1.1:** Ask and answer questions about key details in a text.
 - Invite the students to read aloud a portion of a narrative text and ask comprehension questions.
 - After a student reads aloud the first few pages of an informational text, ask:

What questions do you have? What are you wondering?"

Supporting English Language Learners

The Meeting Students' Needs column in each lesson contains support for both ELLs and Universal Design for Learning (UDL), and some supports can serve a wide range of student needs. However, ELLs have unique needs that cannot always be met with UDL support. According to federal guidelines, ELLs must be given access to the curriculum with appropriate supports, such as those that are specifically identified as "For ELLs" in the Meeting Students' Needs column.

- **Prioritizing lesson for classrooms with many ELLs:** Consider prioritizing and expanding instruction in Lessons 8–10 in which students write and revise their "What the Sun Sees" Poem, as some students may find using a model and sources to write independently particularly challenging. This will afford greater opportunity to prepare for Lesson 11, in which they revise their writing using feedback from the teacher. If necessary, place less focus and condense instruction in Lessons 1–3, focusing primarily on scaffolding toward the culminating task, writing a narrative poem using a model and evidence.
- **Language Dives:** This unit includes one optional Language Dive for ELLs and several optional Mini Language Dives for ELLs. Beginning in Module 2 and going forward, create a "Language Chunk Wall"—an area in the classroom where students can display and categorize the academic phrases discussed in the Language Dive. At the end of each Language Dive, students are invited to place the Language Dive sentence strip chunks on the Language Chunk Wall into corresponding categories, such as "Nouns and noun phrases" or "Linking language." Consider color-coding each category. Examples: blue for nouns and subjects; purple for pronouns; red for predicates and verbs; yellow for adjectives; and green for adverbs. See each Language Dive for suggested categories. Students can then refer to the wall during subsequent speaking and writing tasks. For more information on Language Dives, refer to the Supporting English Language Learners Guidance in the Module 1 Appendix.
- **Goal 3 Conversation Cues:** Continue using Goal 1–3 Conversation Cues, which are questions teachers can ask students to help achieve four goals: (Goal 1) encourage all students to talk and be understood; (Goal 2) listen carefully to one another and seek to understand; (Goal 3) deepen thinking; and (Goal 4) think with others to expand the conversation (adapted from Michaels, Sarah and O'Connor, Cathy. *Talk Science Primer*. Cambridge, MA: TERC, 2012.

http://inquiryproject.terc.edu/shared/pd/TalkScience_Primer.pdf. Based on Chapin, S., O'Connor, C., and Anderson, N. [2009]. *Classroom Discussions: Using Math Talk to Help Students Learn, Grades K–6*. Second Edition. Sausalito, CA: Math Solutions Publications). Refer to the Module 1 Appendix for the complete set of cues. Goal 3 Conversation Cues are introduced in Unit 2, Lesson 1. Heightened language processing and development is a primary potential benefit for ELLs.

- **Diversity and inclusion:** Investigate the routines, practices, rituals, beliefs, norms, and experiences that are important to ELLs and their families. Integrate this background into the classroom as students explore informational texts taking place across different cultures and countries. During this unit, students will discuss the sun and the moon. Provide students opportunities to share their own experience with stories, beliefs, or legends about the sun and moon. Consult with a guidance counselor, school social worker, or ESL teacher for further investigation of diversity and inclusion concerns.
- **Strategic grouping:** As students are invited to pair up for various tasks and protocols, seriously consider matching ELLs to a partner who has greater language proficiency. The conversations that happen as a result of such strategic grouping will greatly serve the language development of both partners.
- **Language processing time:** Give ELLs sufficient time to think about what they want to say before they share with other students or write.
- **Read-alouds and close read-alouds:** Students will participate in a series of read-aloud and focused read-aloud sessions of the text *What the Sun Sees*, *What the Moon Sees*, during which they will look closely at the structure of the text and use it as a model for writing their three-verse narrative poem titled, “What the Sun Sees.” Consider providing realia, models, representative objects, or videos that will help students understand concepts and vocabulary like barnyard, bustling streets, and hooting owls, and invite them to use this language as they play with and discuss these things.
- **Role-play:** Students will participate in the Role-Play protocol, during which they will act out some sections of *What the Sun Sees*, *What the Moon Sees* to deepen their comprehension. Although this activity is inherently supportive of ELLs, some students may be hesitant to perform. Empower students to speak up if they need support from teachers or peers. Allow students opportunities to observe the protocol before participating.
- **Celebration:** Celebrate the courage, enthusiasm, diversity, and bilingual skills that ELLs bring to the classroom.
- **Writing poems:** Students will write poems about the sun and moon, first with heavier support and then gradually with lighter support. Focus students on the language patterns elicited by the questions in the Verse Planner (e.g., It is ____; adjective-noun patterns; The moon sees ____.) and provide plentiful practice. In addition, see supports throughout the lessons for helping students understand what complete English sentences are and how to form them.
- **Celebration:** Celebrate the courage, enthusiasm, diversity, and bilingual skills that ELLs bring to the classroom.

Preparation and Materials

For basic lesson preparation, refer to the materials list and Teaching Notes in each lesson. The following are unusual materials that may take more time or effort to organize or prepare.

The Sun, Moon, and Stars

- Lesson 2: Interactive Word Wall cards: sliver, crescent, full, half, arrow cards
- Lesson 3: Interactive Word Wall cards: bright, white, silver; Model of Excellence #1, Model of Excellence #2
- Lesson 4: Interactive Word Wall cards: red, orange, large, round, bright
- Lesson 6: Interactive Word Wall cards: dim, fiery
- Lesson 7: Temporal Line card sets
- Lesson 10: “What the Moon Sees” example
- Lesson 11: “What the Sun Sees” example, High-Quality Narrative Poem Checklist example
- Lesson 13: Presentation Group chart, Questions sheet

Lesson 1: Noticing and Wondering: What Happens during the Day and Night?

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.10:** With prompting and support, read prose and poetry of appropriate complexity for grade 1.
- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.

Daily Learning Targets

- I can ask and answer questions about day and night based on the text *What the Sun Sees, What the Moon Sees*. (RL.1.1, RL.1.10)
- I can describe what animals and people do during the day and night based on observations of pictures and videos. (SL.1.1, SL.1.2)

Ongoing Assessment

- During Work Time A, consider using the Reading Literature Checklist to document students' progress toward RL.1.1 and RL.1.10 (see Assessment Overview and Resources).
- During Work Time C, consider using the Speaking and Listening Checklist to document students' progress towards SL.1.1 and SL.1.2 (see Assessment Overview and Resources).

Agenda

1. Opening

A. Reading Aloud: "Elvin, the Boy Who Loved the Sky," Part 6 (10 minutes)

2. Work Time

A. Reading Aloud: *What the Sun Sees, What the Moon Sees* (15 minutes)

B. Sorting Protocol: Daytime and Nighttime Activities (15 minutes)

C. Video and Back-to-Back and Face-to-Face: What Happens during the Day and Night? (15 minutes)

3. Closing and Assessment

A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson begins the final unit of this module on the sun, moon, and stars. Students return to making connections between scientific content (describing the sun and its position) and

imagination related to narrative writing (describing what the sun or moon might “see”) (RL.1.1 and RL.1.10).

- Students are introduced to and listen to a first read of *What the Sun Sees, What the Moon Sees*, which serves as a mentor text for students’ narrative writing.
- In Work Time B, students participate in the Sorting protocol, introduced during Module 1. Consider how familiar students are with this protocol and reallocate class time spent reviewing it as necessary.
- During Work Time C, students watch two short videos depicting daytime and nighttime scenes in urban settings embedded in the websites, “Videezy,” and “Youtube.”
 - Citation: “City Street Time Lapse Stock Video.” Video. < <https://www.videezy.com/time-lapse/211-city-street-time-lapse-stock-video>> (For display. Used by permission.)
 - Citation: “Downtown Boston at Night.” Video. < <https://www.youtube.com/watch?v=2uiuBVF7n9I>> (For display. Used by permission.)
 - Purpose: To gain a better understanding of the activities animals and people engage in during various times of day.
- During Work Time C, after watching each video, students discuss with a partner what they notice. They then compare what is the same about what people and animals do in each video, and contrast what is different. During student discussions, prompt them to use sentence frames to support building on others’ ideas and furthering a conversation (SL.1.1, SL.1.2).
- Consider how this lesson builds on instructional routines already introduced to students (e.g., learning targets, discussion protocols, drawing to communicate ideas, transitions, use of materials). Make modifications as needed.

How this lesson builds on previous work:

- This lesson acts as an introductory synthesis of the factual information learning in Unit 2 with the important understandings of narrative structure solidified in Unit 1
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- During Work Time B, students may need additional support to determine categories into which to sort their picture cards. Consider providing more focused prompts for these students (such as inviting them to sort into named categories or a limited number of categories).

Down the road:

- Students will revisit *What the Sun Sees, What the Moon Sees* in Lesson 2 (moon) and Lesson 6 (sun), using it to gather information about what animals and people do during the daytime and nighttime, and, eventually, as a mentor text and inspiration for writing their own narrative poems.

In advance:

- Prepare for the Sorting protocol during Work Time B:
 - Pre-determine pairs for Work Time B.
 - Copy and cut out one set of Sorting protocol picture cards per pair of students.
 - Review the Sorting protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)

- Prepare technology necessary to play “Daytime Time Lapse” and “Nighttime Time Lapse” in Work Time C.
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Students take pictures of the categories they sorted during Work Time B using devices. Post on a teacher web page, class blog, or portfolio app such as Seesaw (<http://web.seesaw.me>) for students to talk about at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free camera apps or software.
- Work Time C: Show daytime and nighttime videos.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1 and 1.I.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to more deeply understand the language of *What the Sun Sees*, *What the Moon Sees* and supporting videos by categorizing the associated pictures. This activity helps ELLs make meaningful connections between language and meaning and use the language in various contexts.
- ELLs may find it challenging to think of appropriate language to name the various categories and pictures. See “Levels of support” for suggestions.

Levels of support

For lighter support:

- Invite students to create category labels for Work Time B that other students can use. Consider asking them to write a phrase on the back of each picture to cue students who need lighter support. Challenge them to think of additional pictures or phrases that might fit each category.

For heavier support:

- Watch the videos twice. Students will be able to absorb and comprehend more information during their second viewing after they understand the general idea during the first viewing. Consider making the task more manageable by asking some students to focus on observing one thing the humans do and some students to focus on observing one thing the animals do.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In Work Time A, students are introduced to *What the Sun Sees*, *What the Moon Sees* in a read-aloud. During this read-aloud, students notice facts about the sun and the moon, then share

their understanding of the author’s use of imagination and details from the text. Students will need strong flexible thinking and metacognitive skills for this understanding. Provide scaffolds to support diverse abilities in using these skills, such as explicit highlighting of information in the text to guide students in new understandings.

- **Multiple Means of Action & Expression (MMAE):** During the read-alouds, some students may benefit from sensory input and opportunities for movement while they are sitting. Provide options for differentiated seating (e.g., sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs). In addition, consider providing options for physical action by inviting students to join you in a quick movement break if they seem restless during the read-alouds.
- **Multiple Means of Engagement (MME):** Throughout this lesson, students have opportunities to share ideas and thinking with classmates. Some may need support for engagement during these activities, so encourage self-regulatory skills by helping them anticipate and manage frustration by modeling what to do if they need help from their classmates. (Example: “I can remember when I’m sharing that if I forget my idea or need help, I can ask my partner to help me. My partner could help me by giving me prompts that will help me share my thinking.”) Consider offering sentence frames to strategically selected peer models. (Examples: “I noticed ___ in the text” or “One thing I noticed about the sun in the video was ___”.) Offering these supports for engagement promotes a safe learning space for all students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- writer, inspired, initiative, collaboration (L)

Review:

- category, evidence (L)

Materials

- ✓ “Elvin, the Boy Who Loved the Sky,” Part 1 (from Unit 1, Lesson 1; one to display)
- ✓ “Elvin, the Boy Who Loved the Sky,” Part 6 (one to display; for teacher read-aloud)
- ✓ *What the Sun Sees, What the Moon Sees* (one to display; for teacher read-aloud)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Sorting Protocol anchor chart (begun in Module 1)

- ✓ Picture cards (one set per pair)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)
- ✓ “City Street Time Lapse Stock Video” (video; play in entirety; see Teaching Notes)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ “Downtown Boston at Night” (video; play in entirety; see Teaching Notes)

Opening

A. Reading Aloud: “Elvin, the Boy Who Loved the Sky,” Part 6 (10 minutes)

- Gather students whole group.
- Tell students that in the last two units, they heard stories about Elvin, who shared his questions and observations about the sun, moon, and stars with them.
- Tell students that to help them remember all of the things Elvin wondered about, you are going to briefly reread part of the story.
- Display **“Elvin, the Boy Who Loved the Sky,” Part 1** and read it aloud fluently, with expression, and without interruption.
- Using a total participation technique, invite responses from the group:
“What are some things that Elvin wondered about?” (if the sun and moon had stories; if the sun and moon danced and had songs)
“What are some things that Elvin shared with us because he wondered about the sun, moon, and stars?” (photographs, songs, movement routines, books)
- Tell students that today is an exciting day because you have a new story about Elvin to read to them and that you think there are more things Elvin wonders about.
- Display **“Elvin, the Boy Who Loved the Sky,” Part 6** and read aloud the first three sentences fluently, with expression, and without interruption.
- Focus students on the word *writer*.
- Using a total participation technique, invite responses from the group:
“What does a writer do? Why do you think Elvin is sharing his wonderings about the sun, moon, and stars with a writer?” (A writer tells stories and shares information. Elvin wonders if he can tell stories and write about the sun, moon, and stars.)
- If productive, cue students to provide evidence:
“What, in the story, makes you think so?” (Responses will vary.)
- Draw students’ attention back to the text and finish reading Part 6.
- Using a total participation technique, invite responses from the group:
“What is Elvin wondering about now?” (if he can write about the sun and moon)

Meeting Students’ Needs

- When using a total participation technique, minimize discomfort or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)

- For ELLs: During the read-aloud, display the text on a document camera or an enlarged copy of the text to help direct students to the appropriate sentences on each page.
- For ELLs: To provide heavier support of comprehension, invite students to act or sketch Elvin's activities. Invite students who need lighter support to paraphrase the story in simpler language.

Work Time

A. Reading Aloud: *What the Sun Sees, What the Moon Sees* (15 minutes)

- With excitement, reveal and then display *What the Sun Sees, What the Moon Sees*.
- Tell students that they are going to listen to *What the Sun Sees, What the Moon Sees* to help Elvin better understand if he can write about the sun, moon, and stars.
- Direct students' attention to the posted learning targets and read the first one aloud:
"I can ask and answer questions about day and night based on the text *What the Sun Sees, What the Moon Sees*."
- Focus students on the title of the text within the learning target.
- Using a total participation technique, invite responses from the group:
"What do you think the author means when she writes 'what the sun sees' and 'what the moon sees'?" (Responses will vary.)
"When the author uses 'what the sun sees' or 'what the moon sees' in the title of the text, does she mean the moon has eyes and can actually see things?" (no)
"Why do you think the author describes the sun and moon in this way?" (to show imagination)
- Tell students that sometimes writers use their imagination to write about what an animal or thing might see or do. Explain that in the case of this story, the author is using her imagination to think about what the sun or the moon, looking down on earth from the sky, might see.
- While still displaying the text, complete a first read of the text, reading slowly, fluently, with expression, and without interruption.
- Use the **Reading Literature Checklist** as students respond to the following series of
- questions to track students' progress towards RL 1.1 and RL 1.10.
- Using a total participation technique, invite responses from the group:
"When the author wrote about what the sun sees, was she writing about daytime or nighttime?" (daytime)
- Invite students to turn and talk with an elbow partner:
"What did the sun 'see' animals and people doing during the daytime?" (busy children, crowded streets, animals in the barn)
- Circulate as students talk and target a few students to share out with the whole group.
- Using a total participation technique, invite responses from the group:
"When the author wrote about what the moon sees, was she writing about daytime or nighttime?" (nighttime)
- Invite students to turn and talk with an elbow partner:

“What did the moon ‘see’ animals and people doing during the nighttime?” (sleeping children, quiet streets, empty barnyards)

- Tell students that now they will sort pictures and words of activities that might happen during the day or during nighttime.

Meeting Students' Needs

- To activate prior knowledge and support expressive skills, offer index cards with text and images as possible responses for students to use as they share their response (e.g., busy children, crowded streets, animals in the barn). (MMR, MMAE)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from key sentences from the *What the Sun Sees*, *What the Moon Sees*: “The sun sees / blue skies. The sun sees / crowded barnyards.” Write and display student responses next to the chunks. Point to pictures in the text on display, or quickly sketch and display the meaning of the sentences and refer to the sky outside. Examples:
 - Read the chunks aloud in sequence. Ask:

“What is the meaning of these sentences?” (Responses will vary.)
 - Place your finger on the chunk: blue skies. Ask:

“What kind of skies does the sun see?” (blue)
 - Point to blue. Say:

“Sometimes we want to say more about something, like the skies. We want to say what color they are. We can add a word before the thing to say more about it.” Consider demonstrating by removing blue and reading the sentence. “Now I want to say that the skies are blue.” Then add blue back in again and reread the sentence to emphasize.

“Can we say, The sun sees skies blue?” (No.)
- Repeat the sequence above with the chunk *crowded barnyards*.

“Can you find another sentence in this book where the writer added a word to say more about something?” Tell students you will give them time to think and discuss with their partner. (All of the sentences follow this pattern, e.g., sleeping owls.)

“As we read this book and others, I want you to think about how a writer puts in another word to say more about the next word.”
- Display this sentence frame: “I see ____ books.”

“Can you put in a word before books to say more about the books?”

Work Time

B. Sorting Protocol: Daytime and Nighttime Activities (15 minutes)

- Refocus students whole group.
- Tell students they are going to use the Sorting protocol to sort pictures of different activities into different categories. Remind them that they used this protocol in Module 1 and review as necessary using the **Sorting Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Using a total participation technique, invite responses from the group:

“What does it mean to sort pictures into different categories?” (We will put pictures that go together in one group or category and other pictures that go together in another group or category.)

- Briefly review the definition of *category* as necessary.
- Move students into pre-determined pairs and distribute the **Picture Cards**.
- Invite students to begin the Sorting protocol.
- As students circulate and share, prompt them to explain the categories they chose by asking:
“Can you explain what is the same about the pictures in this categories?” (Responses will vary.)

“What are you sorting into the daytime category? Why?” (Responses will vary.)

“What are you sorting into the nighttime category? Why?” (Responses will vary.)

- After 7–8 minutes, refocus students and invite one or two pairs to share what they sorted into the daytime category and what they sorted into the nighttime category.
- If productive, cue students to think about their thinking:
“What is something you did that helped you succeed in the Sorting protocol? I’ll give you time to think and discuss with a partner.” (Responses will vary.)
- Refocus students whole group and offer specific, positive feedback on their sorting. (Example: “I noticed that Janelle and Siobhan sorted and re-sorted their picture cards to see if they could come up with different categories.”)

Meeting Students' Needs

- For students who may need additional support anticipating and managing frustration: Before students begin sorting, model what to do if their partner has an idea they do not agree with. (Example: “My partner may suggest an idea for sorting that I don’t agree with. If that happens, I can remember that we can listen to each other and come to a decision together.”) (MME)
- For ELLs: To provide lighter support, consider inviting students to create sentence frames to use as they respond to your questions. (Example: “One thing that is the same about the pictures in this category is that they all ____.”)

Work Time

C. Video and Back-to-Back and Face-to-Face: What Happens during the Day and Night? (15 minutes)

- Tell students you have a couple videos of the daytime and nighttime to show them.
- Direct students’ attention to the posted learning targets and read the second one aloud:
“I can describe what animals and people do during the day and night based on observations of pictures and videos.”
- Using a total participation technique, invite responses from the group:
“What are some activities that people might do during the day when the sun is out? What are some activities that people might do during the night when the moon is out?” (During the day, people might play, walk outside, and go to school. During the night, people might watch television at home, take a bath, and go to bed.)

- Tell students that as they watch the videos, they should look carefully to see what they notice and observe about the sky, the sun, the moon, and what animals and people are doing during the daytime and during the nighttime. Tell students they should also think about the questions they have as they watch the videos.
- Inform students that after they watch each video, they will have a chance to share their thinking with a partner using the Back-to-Back and Face-to-Face protocol. Remind them that they used this protocol in Module 1 and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Play **“City Street Time Lapse Stock Video.”**
- Guide students through the Back-to-Back and Face-to-Face protocol using this question:
“What is one thing you noticed about what people and animals do during the day?”
- Provide a sentence frame if necessary:
 - “I noticed that during the day, people and animals _____.”
- As students share, circulate and continue to use the **Speaking and Listening Checklist** to assess their progress toward the learning target.
- Refocus students whole group and play **“Downtown Boston at Night.”**
- Repeat the process above for the protocol, using the following question and sentence stem:
 - “What is one thing you noticed about what people and animals do during the night?”
 - “I noticed that during the night, people and animals _____.”
- As students share, circulate and continue to use the Speaking and Listening Checklist to assess students’ progress toward the learning target.
- Refocus students whole group and invite a few volunteers to share out to the whole group.

Meeting Students’ Needs

- For students who may be uncomfortable sharing their own ideas with the entire class: Consider allowing them to share what their partner said so that they still have a chance to speak in front of the class. (MME)
- For ELLs: Before initiating the Back-to-Back and Face-to-Face protocol, brainstorm two or three things that the people and animals do during the day in the video. Record and display student ideas. Practice using the sentence frame with the ideas. If students have trouble thinking of things to say during their partner discussions, invite them to use one of the ideas generated by the class.
- For ELLs: If students have trouble communicating their ideas about what people and animals are doing during the day, invite them to mime their thoughts about something they saw. Teach them the word or phrase for the actions they signal and invite them to repeat. Display the word or phrase. (Example: “It looks like you are eating. Can you say, ‘I noticed that during the day, people and animals are eating’?”)
- For ELLs: To provide lighter support, invite students to compare and contrast what they see in the videos with what they do.

- For ELLs: Jot down examples of successful communication as well as any common, important language errors to share with students during Closing and Assessment A. For example, check whether students are using verb tense correctly

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Invite students to turn and talk:
“What do you and your family do during the daytime?”
“What do you and your family do during nighttime?”
- Circulate and listen as students share out. Select two or three students to share their responses with the whole group.
- Offer students specific, positive feedback on their work during the lesson to answer questions about daytime and nighttime. (Example: “Haiyan related what she saw in the video clip during the night to her father because he goes to work at night; RaShawn noticed that during the day, there are a lot more people, but at night there were a lot more animals.”)

Meeting Students' Needs

- For ELLs: Share successful communication as well as one or two common, important language errors. For example, if students made errors with verb tense, discuss an example and guide the students to correct it. Example: “Some of you were saying, ‘I noticed that during the night, people and animals sleeping.’ We need to add one more word before *sleeping* so that this is a complete sentence. What are the people and animals doing?”

Lesson 2: Reading, Speaking, and Listening: Describing the Moon and What It “Sees”

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.10:** With prompting and support, read informational texts appropriately complex for grade 1.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

Daily Learning Targets

- I can ask and answer questions about night based on the text *What the Sun Sees*, *What the Moon Sees*. (RL.1.1, RL.1.10)
- I can describe what the moon “sees” using evidence from pictures, videos, and the text. (SL.1.2, SL.1.4)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Literature Checklist to track students’ progress toward RL.1.1 and RL.1.10 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Building Vocabulary: Interactive Word Wall (10 minutes)

2. Work Time

- A. Focused Read-aloud: *What the Moon Sees*, Pages 17–30 (15 minutes)
- B. Role-Play: *What the Moon Sees*, Selected Pages (10 minutes)
- C. Close Viewing: What the Moon “Sees” (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson gives students multiple opportunities to build their schema around what happens at night through reading and close viewing of pictures and video. This schema will aid students' understanding, ability to gather evidence, and inclusion of detail in future writing.
- Young learners' comprehension is enhanced through routine and the opportunity to interact with new information in kinesthetic ways. The familiar routine of the Role-Play protocol and the introduction of the Interactive Word Wall promote student comprehension and engagement.
- In Work Time C, students watch two 2-minute videos from YouTube.com.
 - Citation: MyBackyardBirding. "Wildlife in the Backyard at Night!" *YouTube*. 06 Aug. 2014. Web. 16 June 2016. <<https://www.youtube.com/watch?v=KQSM8kjIPW0>>. (For display. Used by permission.)
 - Purpose: to observe what goes on at night in a wildlife setting
 - Citation: Truslow, Will. "Downtown Boston at Night." *YouTube*. 29 Mar. 2012. Web. 16 June 2016. <<https://www.youtube.com/watch?v=2uiuBVF7n9I>>. (For display. Used by permission.)
 - Purpose: to observe what goes on at night in an urban setting
- In the Closing, students discuss the Unit 3 guiding question—"How do writers use their knowledge and observations to write a story?"—to begin building a context for future writing.
- If possible, give students access to *What the Sun Sees*, *What the Moon Sees* during the K-2 Labs and the K-2 Reading Foundations Skills Block.

How this lesson builds on previous work:

- In Lesson 1, students were introduced to the text *What the Sun Sees*, *What the Moon Sees*. In this lesson, students zoom in on the details in the section *What the Moon Sees* and view pictures and videos of scenes at night to gather ideas and strengthen comprehension.
- In Lesson 1, students learned how authors may choose to use their imagination to write about what an animal or thing might "see." In this lesson, students continue to build their understanding of this writing craft as they focus on the section *What the Moon Sees*.

Areas in which students may need additional support:

- The Interactive Word Wall is a new protocol introduced in this lesson. Encourage all students to try the new protocol and assure them that this routine will be practiced again and again.
- Although the Role-Play protocol is familiar from Unit 1, some students may continue to need support with their oral language. Continue to look for opportunities for support by providing sentence stems, modeled actions, and props.
- Students may grapple with the idea of personification and that the moon does not actually "see." Continue to reinforce student understanding by asking questions like: "Does the moon really see things? Does the moon have eyes? Why do you think the author described the moon this way?"

Down the road:

- Beginning in Lesson 4, students will begin to plan a class narrative poem. They will use the observations and knowledge gathered from this lesson, as well as from Units 1 and 2, to help them write a narrative class poem, “What the Moon Sees.”
- Students will then each plan and write an individual poem, “What the Sun Sees,” as their assessment (Lessons 8–10).
- In Lessons 11–13, students will revise and edit their poems, prepare for the end of module celebration, and present their poems to friends and family during the end of module celebration.
- The structure and flow of this lesson will be used again in Lesson 6, when students begin gathering knowledge and observations around what the sun “sees” as preparation for their independent writing.

In advance:

- Prepare materials for the Interactive Word Wall protocol:
 - Strategically place students in groups of three or four.
 - Prepare envelopes or baggies with one set of word cards and one set of arrow cards (see supporting materials).
 - Prepare Interactive Word Wall cards for *sliver*, *crescent*, *full*, and *half* (see supporting materials). These four words make one set.
 - Display Night photograph 1 and Night photograph 2 in color, if possible.
- Prepare technology necessary to view videos and photographs in Work Time C.
- Strategically pair students for the Role-Play protocol in Work Time B. Consider pairing students with varying levels of language proficiency. Those with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Review the Interactive Word Wall and Pinky Partners protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- If you recorded students participating in the Role-Play protocol in Unit 1, play this video for them to remind them of what to do.
- Work Time C: Show nighttime videos:
 - MyBackyardBirding. “Wildlife in the Backyard at Night!” YouTube. 06 Aug. 2014. Web. 16 June 2016. <<https://www.youtube.com/watch?v=KQSM8kJIPW0>>. (For display. Used by permission.)
 - Truslow, Will. “Downtown Boston at Night.” YouTube. 29 Mar. 2012. Web. 16 June 2016. <<https://www.youtube.com/watch?v=2uiuBVF7n9I>>. (For display. Used by permission.)

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1 and 1.I.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to act out as one way of understanding the meaning of the text and explicitly discuss the term *adjective* and its function. Consider asking students how they might translate a similar phrase (e.g., sleeping children) in their home language, and whether the adjective system is the same (i.e., adjective + noun/thing).
- ELLs may find making connections in the Interactive Word Wall challenging, because they may not know the meaning of the words to begin with. See suggestions in “Levels of support” and the Meeting Students’ Needs column.

Levels of support

For lighter support:

- Consider inviting students to add sketches to represent the meaning of the Interactive Word Wall cards in Opening A.
- During the Mini Language Dive, challenge students to generate questions about the sentence before asking the prepared questions, based on their experience with the Mini Language Dive in Lesson 1. Example: “What questions can we ask about this sentence? Let’s see if we can answer them together.” (Why did the writer put *quiet* before *barnyards*?)

For heavier support:

- During the focused read-aloud, help students who need heavier support by inviting a more proficient student to dictate lines for them to recite so that they practice using verbal language.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In Work Time A, students listen to a focused read-aloud of *What the Moon Sees*. This text is read with a focus on the adjectives used to describe things the moon sees. Some students may need support in incorporating the most valuable information from the text into existing knowledge. Providing explicit cues or prompts to support students in attending to the features that matter most. Before reading, activate background knowledge by previewing the question you will ask. (Example: “As I read, I will pause and ask you to share the meaning of adjectives the author uses.”)
- **Multiple Means of Action & Expression (MMAE):** In this lesson, some students may need support in setting appropriate goals for their effort and the level of difficulty expected. Appropriate goal-setting supports development of executive skills and strategies. Offer scaffolds for students learning to set appropriate personal goals, such as a checklist with three goals for the lesson. (Examples: I can connect four word cards; I can play my part during the Role-Play protocol; I can share two ideas of what the moon might observe.)
- **Multiple Means of Engagement (MME):** During the focused read-aloud in Work Time A, some students may need explicit prompts to relate to this text. Optimize relevance by making the information in the text personalized

and contextualized to students' lives. (Example: Pause as appropriate and ask students to share connections to the text based on their own lives.)

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- connect (L)
- quiet, empty, silent (T)

Review:

- adjective, sliver, crescent, moon, night (L)
- bright (T)

Materials

- ✓ Interactive Word Wall Protocol anchor chart (new; teacher-created; see supporting materials)
- ✓ Interactive Word Wall cards (one set per group)
- ✓ Arrow cards (one set per group)
- ✓ *What the Sun Sees, What the Moon Sees* (one to display; for focused read-aloud)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4; added to during Work Time A; see supporting materials)
- ✓ What the Moon Sees anchor chart (new; co-created with students during Work Time A; see supporting materials)
- ✓ What the Moon Sees anchor chart (answers, for teacher reference)
- ✓ Role-Play Protocol anchor chart (begun in Unit 1, Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Close Viewing Protocol anchor chart (begun in Module 1)
- ✓ Night photograph 1 (one to display)
- ✓ Night photograph 2 (one to display)
- ✓ "Wildlife in the Backyard at Night!" (video; play in entirety; see Teaching Notes)
- ✓ "Downtown Boston at Night" (video; play in entirety; see Teaching Notes)
- ✓ Unit 3 guiding question (new; teacher-created; see supporting materials)
- ✓ Pinky Partners Protocol anchor chart (begun in Unit 2, Lesson 2)

Opening

A. Building Vocabulary: Interactive Word Wall (10 minutes)

- With excitement, share with students that today they will practice using and connecting vocabulary from the Sun, Moon, and Stars Word Wall and the Adjectives anchor chart using the Interactive Word Wall protocol.
- Referring to the **Interactive Word Wall Protocol anchor chart**, read aloud the steps. Tell students you will now show them how to participate in the Interactive Word Wall protocol.
- Invite students to move to a spot around the edge of the whole group meeting area. As needed, remind them to move safely and make space for everyone.
- Lay the **Interactive Word Wall cards** and **arrow cards** on the floor in the middle of the whole group area, leaving space between the cards.
- Invite students to look at the cards laid out on the floor, and then point to the place in the classroom where they have seen the same words (e.g., the Sun, Moon, and Stars Word Wall and Adjectives anchor chart).
- Hold up each Interactive Word Wall card, reading the word aloud and explaining that all the words are adjectives, or descriptive words, from Units 1 and 2. Make sure all students can see the word.
- Define *connect* (to join together) and explain that now, the class will connect two Interactive Word Wall cards using the arrow cards.
- Model making a connection between two Word Wall card adjectives. Refer to the Interactive Word Wall Protocol anchor chart.
 1. Choose an Interactive Word Wall card. Read the word on the card aloud (e.g., *sliver*).
 2. Using an arrow card, connect this card to another Interactive Word Wall card (e.g., *sliver* -> *crescent*).
 3. Read the word on the second card aloud (e.g., *crescent*).
 4. Explain why the two Interactive Word Wall cards belong together (e.g., “These two adjectives belong together because they both can be used to describe a crescent moon”).
 - Read the remaining Interactive Word Wall cards aloud: *full*, *half*.
 - Answer clarifying questions about the protocol or the steps students will follow to engage in it.
- Move students into the pre-determined small groups and distribute the sets of Interactive Word Wall cards and arrow cards.
- Invite students to begin the Interactive Word Wall protocol.
- Circulate and listen in as students discuss the vocabulary. Provide support and guidance as needed by reminding students of the definitions and encouraging them to use the word in a sentence.
- When 2 minutes remain, provide students with a time reminder.
- Signal students to stop the protocol with the use of a designated sound. Invite them to put away the word cards and arrow cards in the designated area.
- If time permits, debrief with students by inviting them to show a thumbs-up to indicate a positive response to these questions:

“Did we put the word cards and arrow cards in the middle of our group?”

“Did we choose one word to connect to another word by using an arrow card?”

“Did we explain why the words connect together?”

- Give students specific, positive feedback on their ability to think of how these different words connect. (Example: “Alicia connected the words *full* and *silver* because she remembers observing a full, silver moon and writing about it in the Sky notebook.”) With excitement, share that next time they will get to participate in the Interactive Word Wall with their classmates in small groups!

Meeting Students’ Needs

- As students explain the connections between words, provide sentence frames to support oral language processing. (Example: “I connected ___ and ___ because they ___.”) (MMAE)
- For ELLs: Consider inviting students to discuss the meaning of the Interactive Word Wall cards in home language groups before beginning the Interactive Word Wall protocol.
- For ELLs: Check for comprehension by inviting students to paraphrase the rationale for each connection in their own words. Restate or rephrase as necessary. (Example: “A silver moon is a narrow, curved shape. Vishal, can you tell me, in your own words, why we connected *silver* and *crescent*?”)

Work Time

A. Focused Read-aloud: *What the Moon Sees*, Pages 17–30 (15 minutes)

- Direct students’ attention to the posted learning targets and read them aloud:

*“I can ask and answer questions about night based on the text *What the Sun Sees*, *What the Moon Sees*.”*

“I can describe what the moon ‘sees’ using evidence from pictures, videos, and the text.”
- Display *What the Sun Sees*, *What the Moon Sees*. Model using the back cover of the text to decide where to begin reading. Say: “Today we are going to read just the part of the book about the moon. I can find that section of the book by looking at the cover and finding the picture of the moon.”
- Consider using the **Reading Literature Checklist** during the focused read-aloud to track students’ progress toward RL.1.1 and RL.1.10.
- Remind students that the moon does not actually “see,” but the author chose to write it this way to help us imagine what is happening on earth if we looked down from the sky.
- Read pages 17–20 slowly, fluently, with expression, and without interruption.
- Pause at page 18. Using a total participation technique, invite responses from the group:

“What do you see in the illustrations that helps you know it is a quiet barnyard?” (Animals are sleeping; the animals are not moving.)

“What does quiet mean?” (There is very little noise.)
- Confirm students’ definition of *quiet* and point out how it is being used as an adjective because it describes a sound.
- Add the word *quiet* to the **Adjectives anchor chart**.

- Draw students' attention back to the text and begin reading aloud pages 21–24 fluently.
- Pause at page 22. Using a total participation technique, invite responses from the group:
“What do you see in the illustrations that helps you know it is an empty street?” (There are no people or cars in the street.)
“What does empty mean?” (containing nothing)
- Confirm students' definition of *empty* and explain how it is being used as an adjective because it describes what the street looks like.
- Add the word *empty* to the Adjectives anchor chart.
- Draw students' attention back to the text and begin reading aloud pages 25–26 fluently.
- Pause at page 24. Using a total participation technique, invite responses from the group:
“What do you see in the illustrations that helps you know it is a silent playground?” (There are no kids playing and talking.)
“What does silent mean?” (There is no sound.)
- Confirm students' definition of *silent* and explain how it is being used an adjective because it describes how the playground sounds.
- Add the word *silent* to the Adjectives anchor chart
- If productive, cue students with a challenge:
“What if we remove the words quiet, empty, and silent? I'll give you time to think and discuss with a partner.” Reread the sentences, omitting the adjectives. (Responses will vary.)
- Draw students' attention back to the text and read aloud pages 27–30 fluently and without interruption.
- Display the **What the Moon Sees anchor chart** and tell students that they are now going to look back at the illustrations to generate ideas of what the moon sees at night during this story.
- Flip through the illustrations on pages 15–28. Pause at each page and invite students to say out loud what the moon sees on that page and add it to the What the Moon Sees anchor chart. Refer to **What the Moon Sees anchor chart (answers, for teacher reference)** as necessary.
- Tell students that they are going to continue generating ideas about what the moon might see by observing some photographs and videos of the world at night.
- But first, they are going to use the Role-Play protocol to act out some selected pages from *What the Sun Sees*, *What the Moon Sees*.

Meeting Students' Needs

- To activating relevant prior knowledge, invite students to recall previous focused read-aloud sessions in which they identified learning from the illustrations and from the text to describe other evidence. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of the chunks from key sentences from the *What the Sun Sees*, *What the Moon Sees*: “The moon sees/ bright stars. The moon sees/quiet barnyards.” Write and display student responses next to the chunks. Point to pictures in the text on display, use the icon pictures from the supporting materials in this lesson, or quickly sketch and display the meaning of the sentences. Examples:

- Read the chunks aloud in sequence. Ask:
“What is the meaning of these sentences?” (Responses will vary.)
- Place your finger on the chunk: *bright stars*. Ask:
“What kind of stars does the moon see?” (bright)
- Point to *bright*. Say:
“Think about our Language Dive in Lesson 1 with blue skies and crowded barnyards. What does the writer do to say more about the skies, barnyards, and stars?” (adds a word before a thing)
“Who knows what this kind of word is called? What does it do?” (adjective; describes a thing like skies or barnyards)
“Sometimes we want to say more about something, like the stars. We want to say what they look like. We can add an adjective before the thing to say more about it, to describe it.” Consider demonstrating by removing bright and reading the sentence. “Now I want to say that the stars are bright.” Then add bright back in again and reread the sentence to emphasize.
“Can we say, ‘The moon sees stars bright?’” (No.)
- Repeat the sequence above with the chunk *quiet barnyards*.
“Can you find another sentence in this book where the writer added a word to say more about the moon?” Tell students you will give them time to think and discuss with their partner. (All of the sentences follow this pattern, e.g., hooting owls.)
“As we read this book and others, I want you to think about how a writer puts in another word to say more about the next word.”
- Display this sentence frame: “I see ____ crayons.”
“Can you put in a word before crayons to say more about the crayons?”

Work Time

B. Role-Play: *What the Moon Sees*, Selected Pages (10 minutes)

- Move students into pre-determined pairs and tell them they are going to use the Role-Play protocol to act out some sections of *What the Sun Sees*, *What the Moon Sees*. Remind them that they used this protocol in Unit 1 and review the **Role-Play Protocol anchor chart** as needed. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to begin role-playing the following sections of text:
 - Pages 17–18 (quiet barnyards)
 - Pages 19–20 (hooting owls)
 - Pages 25–26 (sleeping children)
- Circulate as students role-play. Use the **Speaking and Listening Checklist** to track students’ progress toward SL.1.2 and SL.1.4.
- Give students specific, positive feedback on their ability to role-play sections of *What the Sun Sees*, *What the Moon Sees*. (Example: “Lila, you demonstrated how lively and active hooting owls would be during the night.”)

Meeting Students' Needs

- To facilitate personal coping and self-regulation skills, model socially appropriate ways to express enthusiasm and excitement during the Role-Play protocol (e.g., give yourself a hug or take a deep breath and smile). (MME)
- For ELLs: Ensure that students put words to their role-plays. If students can't verbalize, remind them of the word or phrase and have them repeat it. Prompt them to repeat the word or phrase as they role-play.

Work Time

C. Close Viewing: What the Moon "Sees" (15 minutes)

- With excitement, tell students that they will now participate in a close viewing of some photographs and videos to brainstorm more ideas of what the moon might "see" throughout the night. Tell students they are going to use the Close Viewing protocol. Remind them that they used this protocol in Module 1 and review as necessary using the **Close Viewing Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Display **night photograph 1** and provide time for students to silently view it.
- Invite students to turn and talk with an elbow partner:
"What could the moon 'see' or observe?" (a raccoon; dark, leafy trees)
- Circulate and listen in as students share with each other. Record a selection of their ideas on the What the Moon Sees anchor chart.
- Display **night photograph 2** and provide time for students to silently view it. Repeat the question from above and add a selection of student ideas to the What the Moon Sees anchor chart.
- Tell students that now that they have made observations from photographs, they are going to make observations from video clips.
- Play **"Wildlife in the Backyard at Night."**
- Invite students to turn and talk with an elbow partner:
"What could the moon 'see' or observe?" (raccoons, deer, bears, possums)
- Circulate and listen in as students share with each other. Record a selection of their ideas on the What the Moon Sees anchor chart.
- Play **"Downtown Boston at Night."**
- Repeat the process from the first video, using the same question.
- Direct students' attention to the completed What the Moon Sees anchor chart and read through the multitude of responses.
- Explain that students will use these observations to write a class narrative poem describing what the moon "sees" beginning in the next lesson.

Meeting Students' Needs

- Before the Close Viewing protocol, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active viewing and listening for key details. (MMR, MMAE)
- For ELLs: Encourage students to use adjective + noun as they describe what the moon could see or observe in the photographs and videos. (Example: The moon could observe small bats flying, dark, leafy trees, curious raccoons, etc.)

Closing and Assessment

A. Reflecting on Learning (10 minutes)

- Direct students' attention to the **Unit 3 guiding question** and read the question aloud:
 - “How do writers use their knowledge and observations to write a story?”
- Tell students they are going to use the Pinky Partners protocol to answer this question. Remind them that they used this protocol earlier in Module 2 and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- If productive, cue students to think about their thinking:

“How will our role-play and close viewing of the photographs and videos help you write a story? I'll give you time to think and discuss with a partner.” (Responses will vary.)
- Guide students through the protocol to answer the following question:

“How can we use our knowledge of the moon and observations of the night to write a story?” (Responses will vary, but may include: We could describe the moon and what it sees; we could write our own version of What the Sun Sees, What the Moon Sees.)
- Tell students that they will use their knowledge and observations of the moon and sun to write narrative poems with a similar structure to the text *What the Sun Sees, What the Moon Sees*.
- Provide specific, positive feedback about students' discussion of the Unit 3 guiding question. (Example: “Nassir, I heard you talk about how you would write a story where the moon is watching you at school.”) With excitement, tell students that tomorrow they will start writing a class narrative poem.

Meeting Students' Needs

- To help students anticipate and manage possible frustration while they share with pinky partners, model what to do if they don't understand their partner's idea. (Example: “If I don't understand my partner's idea, I can ask for him or her to say it a different way or add more detail that might help me understand.”) (MME)
- For ELLs: Repeat and rephrase the questions. Give students a minute to think about their response before beginning the protocol. Consider allowing students to discuss the question in home language groups before they continue in English.

Lesson 3: Speaking and Listening: Introduction to High-Quality Work

CCS Standards

- **SL.1.1:** Participate in collaborative conversations with diverse partners about *grade 1 topics and texts* with peers and adults in small and larger groups.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.

Daily Learning Targets

- I can define what it means for work to be “high quality.” (SL.1.1, SL.1.2)
- I can analyze models of high-quality work. (SL.1.1, SL.1.2)

Ongoing Assessment

- During the Closing, use the Speaking and Listening Checklist to monitor student progress toward SL.1.1 and SL.1.2 (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Building Vocabulary: Interactive Word Wall (10 minutes)

2. Work Time

- A. Reading Aloud: Model of Excellence #1 (10 minutes)
- B. Noticing and Wondering: Analyzing High-Quality Work (15 minutes)
- C. Shared Writing: High-Quality Work Anchor Chart (10 minutes)

3. Closing and Assessment

- A. Back-to-Back and Face-to Face: Model of Excellence #2 (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson provides multiple opportunities for students to build their understanding and analysis of what makes a first-grade writing piece high quality. It lays the foundation for the expectations of high-quality work for first grade.
- To help them take ownership of the expectations for future writing, students help to create the High-Quality Work anchor chart. The chart has been designed generally to apply to many genres of writing; the specifics of high-quality work for each writing genre will be introduced within the units and lessons themselves.
- Students use models of excellence (downloaded from EL Education’s website, “Models of Excellence: The Center for High-Quality Student Work”) to analyze what makes first-grade writing high quality. Take time to look through the website to find other helpful exemplars of student work.

- Citation: “Models of Excellence: The Center for High-Quality Student Work.” EL Education, 2016. Web. 21 June 2016. <modelsofexcellence.ededucation.org>. (For display. Used by permission.)
- Purpose: to provide examples of high-quality work for students to notice and wonder about and examine closely

How this lesson builds on previous work:

- Students continue to use the Interactive Word Wall protocol introduced in Lesson 2.
- High-quality work is another dimension of student achievement alongside habits of character and mastery of knowledge and skills. The introduction of the High-Quality Work anchor chart builds upon the foundation of student achievement from previous units and modules.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- During the Interactive Word Wall protocol, encourage all students to interact with their classmates and the vocabulary and assure them that this routine will be practiced again and again.
- Analyzing and pulling out the most important aspects of what makes a piece of writing “high quality” may be challenging for students. Consider allotting more time to delve into the big idea of quality and provide students with more examples of high-quality student work.

Down the road:

- The High-Quality Work anchor chart has been designed generally so that it may be applied to all genres of writing. In this unit, the High-Quality Work anchor chart will be applied specifically to narrative poetry. The bullet “includes details” is specified for narrative poetry as word choice and the use of imagery in writing to “show, not tell.” The bullet “follows conventions” refers to the grade level conventions that are expected at each stage of learning to write. For this writing piece, they are correctly using end punctuation, writing in complete sentences, and spelling taught words correctly.
- Students continue to develop an understanding of high-quality work as they are introduced to giving and receiving feedback for one another in Lesson 5 and compare and contrast examples and non-examples of high-quality work in Lessons 7 and 11.
- Students will continue using the Interactive Word Wall to reinforce the understanding of adjectives and fluidity in using them in context.

In advance:

- Determine groups of three or four students for the Interactive Word Wall protocol.
- Prepare Interactive Word Wall cards for *bright*, *white*, and *silver* and add them to the set begun in Lesson 2 (see supporting materials).
- Review the Interactive Word Wall protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, Model of Excellence #1, Model of Excellence #2, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Students take pictures of the Interactive Word Wall connections using devices. Post on a teacher web page, class blog, or portfolio app such as Seesaw (<http://web.seesaw.me>) for students to talk about at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free camera apps or software.
- Create a slideshow of the Models of Excellence #1 and #2 to display.
- Create the High-Quality Work anchor chart in an online format, such as a Google Doc, for display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.3, and 1.I.B.5, 1.I.B.6

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing two models of high-quality work, analyzing them verbally, and recording aspects of high-quality work on an anchor chart to refer back to.
- ELLs may find it challenging to understand the meaning of the language in the models. Support students by ensuring they understand the sentences in the models before they attempt to evaluate the quality of the models. See specific suggestions in “Levels of support” and the Meeting Students’ Needs column.

Levels of support

For lighter support:

- Consider inviting students to add sketches to represent the meaning of the Interactive Word Wall cards in Opening A.
- Challenge students to append the anchor chart with specific examples of what “details” and “conventions” are.

For heavier support:

- Show a brief video or a series of photographs to set the stage for Model of Excellence #1. Example: Show a video of the lifecycle of a chrysalis. Invite students to act out the lifecycle, providing simple narration for them to repeat.
- To help students identify details in support of Work Time C, consider beginning with simpler language. Prepare a set of cards, some with generic nouns and some with detailed nouns (e.g., *girl/girl wearing blue pants*). Invite students to collect the detail cards, explaining how they include details.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** To facilitate effective learning during this lesson, ensure that all students have access to the directions and feel comfortable with the expectations. Vary the ways in which you convey

expectations for each activity or task. Consider engaging in a clarifying discussion about the directions or creating an outline of the steps in Work Time.

- **Multiple Means of Action & Expression (MMAE):** To support students' planning and management of information during the Back-to-Back and Face-to-Face protocol, invite students to identify one or two criteria from the High-Quality Work anchor chart to use as they discuss the model. (Example: Invite students to write the selected criteria on a notecard for reference during the protocol.) This will help students keep information organized and "in mind."
- **Multiple Means of Engagement (MME):** After the Closing, give students specific, positive feedback on their hard work and effort for the day. Foster a sense of community and provide options for physical action by inviting students to give themselves a special applause.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- high quality, analyze (L)

Materials

- ✓ Interactive Word Wall Protocol anchor chart (begun in Lesson 2)
- ✓ Interactive Word Wall cards (from Lesson 2 and new; teacher-created; one set per group)
- ✓ Arrow cards (from Lesson 2; one set per group)
- ✓ Model of Excellence #1 (one to display)
- ✓ High-Quality Work anchor chart (new; co-created with students during Work Time C; see supporting materials)
- ✓ High-Quality Work anchor chart (answers, for teacher reference)
- ✓ Model of Excellence #2 (one to display)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Unit 2, Lesson 7)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)

Opening

A. Building Vocabulary: Interactive Word Wall (10 minutes)

- Tell students they are going to use the Interactive Word Wall protocol with new words added to the set to continue strengthening their comprehension and build their knowledge of vocabulary. Remind them that they used this protocol in Lesson 2 and review as necessary

using the **Interactive Word Wall Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)

- Move students into the pre-determined small groups and distribute the **Interactive Word Wall cards** and **arrow cards**.
- Invite students to begin the Interactive Word Wall protocol.
- Circulate and listen in as students discuss the vocabulary. Provide support and guidance as needed by reminding students of the definitions and encouraging them to use the word in a sentence.
- When 2 minutes remain, provide students with a time reminder.
- Signal students to stop the protocol with the use of a designated sound. Ask them to put away the word cards and arrow cards in the designated area.
- Direct students to move to the whole group meeting area.
- Using a total participation technique, invite responses from the group:
“What is one connection you made during the Interactive Word Wall protocol?” (Responses will vary.)
- Remind students that by continuing to practice and use these words, they are building knowledge that helps them become better readers, writers, and learners.

Meeting Students' Needs

- To support self-regulation and independence, provide a visual time timer and remind students that everyone may not have an equal number of turns during the protocol. Say: “I know we would like to have more turns today in making word connections, and that’s great! Even though everyone might not get the same number of turns this time, we will have many more times to make connections with our words!” (MME)
- For ELLs: Consider inviting students to discuss the meaning of the Interactive Word Wall cards in home language groups before beginning the Interactive Word Wall protocol.
- For ELLs: Check for comprehension by inviting students to paraphrase the rationale for each connection in their own words. Restate or rephrase as necessary.

Work Time

A. Reading Aloud: Model of Excellence #1 (10 minutes)

- With excitement, tell students that they will soon begin a new writing piece, a narrative poem! Explain that to write the narrative poem, they need to think about what makes writing high quality, so today they will look at examples of high-quality writing from other first-graders.
- Direct students’ attention to the posted learning targets and read both aloud:
“I can define what it means for work to be ‘high quality.’”
“I can analyze models of high-quality work.”
- Underline the words *high quality* in the learning target and invite students to turn and talk with an elbow partner:

“What does it mean if something is high quality?” (It is really good; it’s the best.)

- Define high quality (something that is viewed as excellent). With excitement, tell students that you have an example of high-quality writing to share today from another first-grade class!
- Direct students’ attention back to the second learning target and underline the word analyze. Share that to analyze something means to examine it closely.
- Display **Model of Excellence #1** and read it aloud slowly, fluently, with expression, and without interruption.
- After reading, invite students to give a quick thumbs-up to show if they think that writing was high quality, or excellent.

Meeting Students’ Needs

- When using a total participation technique, minimize discomfort and/or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Help build interest by telling students they will have a lot of freedom to express themselves as they write a narrative poem. In poems, there are fewer rules, so encourage ELLs to take greater risks and not worry as much about language errors.
- For ELLs: To provide heavier support during the read-aloud, invite students to act out key sentences. Dictate lines for them to recite so that they practice using verbal language.

Work Time

B. Noticing and Wondering: Analyzing High-Quality Work (15 minutes)

- Tell students that now they are going to analyze the writing, or examine it closely, to determine what makes it high quality.
- If productive, cue students to provide evidence and to listen carefully and seek to understand:
“What, in the Model of Excellence #1, makes you think so?” (Responses will vary.)
“Who can tell us what your classmate said in your own words?” (Responses will vary.)
- Flip back through the pages of Model of Excellence #1 and invite students to give a thumbs-up when they notice something that makes this writing high quality, or excellent.
- Ask students to turn and talk with an elbow partner:
“What do you notice about this writing that makes it high quality? What do you notice about how the sentences start and end?” (Responses will vary, but may include: It has complete sentences. The words explain the pictures. The words are written carefully.)
- Flip back through the pages of Model of Excellence #1 and invite students to give a thumbs-up if they see or hear something that makes them wonder or question.
- Ask students to turn and talk with an elbow partner:
“What do you wonder about this writing?” (Responses will vary.)
- Synthesize students’ noticings and wonderings by paraphrasing important aspects of high-quality work that were unearthed during the discussion. Clarify with students as needed.

- Give students specific, positive feedback on their ability to notice and wonder about what made that writing high quality. (Example: “Lamar noticed that the illustrations were beautiful, with lots of colors. Valeria wonders why the writing was done on purple paper.”)
- Tell students that now they will use what they’ve noticed and wondered to create a High-Quality Work anchor chart that they can use when doing their own excellent writing!

Meeting Students' Needs

- For ELLs and students who need additional support: As students share what they noticed and wondered about the writing, provide sentence frames to support oral language processing. (MMAE)
- For ELLs: Invite students to elaborate on one or two of the important aspects of high-quality work, such as *complete sentences* and *words are written carefully*. Examples: “Why is this sentence a complete sentence? What if I remove the verb?” “Are these words written carefully? Why? How do they help you imagine the chrysalis?”

Work Time

C. Shared Writing: High-Quality Work Anchor Chart (10 minutes)

- Direct students’ attention to the **High-Quality Work anchor chart** and invite them to turn and talk with an elbow partner:
“If we want to write down a few ideas to remind us what makes something high quality, what do you think we should include?” (Responses will vary.)
- Circulate and listen in as students share ideas with one another. As you listen, select three or four students to share out their ideas.
- Summarize student thinking and say something like, “Wow, we all have such great ideas about what makes first-grade work high quality! I think we can put all those ideas into two categories on our High-Quality Work anchor chart”:
 - “Includes details”
 - “Follows conventions”
- Write “includes details” on the High-Quality Work anchor chart and ask:
“What does it mean to include details in our work? What is an example of a detail?” (to say more; to show, not tell; an example is including adjectives to describe something)
- Confirm students’ thinking and share with them that for the writing they will do in this unit, narrative poetry, they will include details by using strong adjectives, choosing appropriate words from the Sun, Moon, and Stars Word Wall, and writing sentences that let the reader imagine the scene.
- Reread the sentence on the third page of Model of Excellence #1 and invite students to close their eyes and imagine what the butterfly is doing and what it looks like: “A butterfly has legs with claws so they can grasp on flowers.” Explain how the sentence includes details that allow you to imagine the butterfly landing on a flower and using its claws to grasp and hold on.
- Write “follows conventions” on the High-Quality Work anchor chart and explain that by following conventions, writers ensure that their writing looks good and is readable. Tell

students that in this unit, they will follow conventions by using end punctuation (periods), writing in complete sentences, and spelling words from the Word Wall and anchor charts correctly. Refer to the **High-Quality Work anchor chart (answers, for teacher reference)** as necessary.

- Reread the completed High-Quality Work anchor chart for comprehension and thank students for their hard work in analyzing what it means to do high-quality work in first grade. Share that they will use this anchor chart to make sure their work continues to be high quality!

Meeting Students' Needs

- For ELLs: Consider modeling the turn and talk with an enthusiastic student, writing, and displaying key phrases to help guide other students.
- For ELLs: Invite students to identify key details and conventions in *What the Sun Sees*, *What the Moon Sees* and the Model of Excellence #1.

Closing and Assessment

A. Back-to-Back and Face-to Face Protocol: Model of Excellence #2 (10 minutes)

- Tell students that you have one more piece of writing to share with them today, but that now they have a job to do! They are going to use the High-Quality Work anchor chart to analyze the work and decide if it is of high quality.
- Display **Model of Excellence #2** and read it aloud fluently and without interruption.
- Tell students they are going to use the Back-to-Back and Face-to-Face protocol to discuss what makes this writing high quality. Remind them that they used this protocol in past lessons and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- As students discuss, circulate the room and listen in. As needed, refer students to the High-Quality Work anchor chart to back up their claims.
- Use the **Speaking and Listening Checklist** to keep track of student progress.
- Signal students to stop the protocol with the use of a designated sound.
- Direct students back to the whole group meeting area.
- Using a total participation technique, invite responses from the group:
“What did you see and hear in the writing that makes it high quality?” (Responses will vary, but may include: “The writer told us exactly what each person liked to play with. Each sentence starts with a capital letter.”)
- If productive, cue students to think about their thinking:
“How does our Back-to-Back and Face-to Face protocol add to your understanding of high-quality work? I’ll give you time to think and discuss with a partner.” (Responses will vary.)
- Provide specific, positive feedback on student analysis using the High-Quality Work anchor chart. (Example: “Mia, I heard you say that the writer used lots of details by describing what happened at the park.”)

- Tell students that later in the unit, they will use the High-Quality Work anchor chart as they write narrative poems together and independently.

Meeting Students' Needs

- To reduce barriers to metacognition as students share, provide a visual reminder of the focus for what they are sharing during the protocol. (Example: Display the question on chart paper or a sentence strip or offer an index card with the question to individual students: "What makes this writing high quality?") (MMR)
- For ELLs: Review the learning target introduced in Work Time A. Ask students to give specific examples of how they worked toward achieving it in this lesson. Invite students to rephrase the learning target now that they have more experience analyzing models of high-quality work.
- For ELLs: Before beginning the Back-to-Back and Face-to-Face protocol, focus students on the display of Model of Excellence #2 and the High-Quality Work anchor charts. Give students a minute to think about and discuss in home language groups what makes Model of Excellence #2 high quality work.

Lesson 4: Speaking and Listening: Planning and Writing “What the Moon Sees” Poem

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

Daily Learning Targets

- I can write a narrative poem using a model and evidence. (W.1.8, L.1.1f, L.1.1j, L.1.2b, SL.1.4)
- I can plan my writing by discussing ideas with classmates. (W.1.3, SL.1.4)

Ongoing Assessment

- During the Closing, use the Speaking and Listening Checklist to monitor students’ progress toward SL.1.4 (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Building Vocabulary: Interactive Word Wall (10 minutes)

2. Work Time

- A. Shared Reading: “What the Moon Sees” Poem, Verse 1 (10 minutes)
- B. Preparing for Writing: “What the Moon Sees” Verse Planner, Verse 2 (15 minutes)
- C. Shared Writing: “What the Moon Sees” Poem, Verse 2 (15 minutes)

3. Closing

- A. Engaging the Writer: High-Quality Work Anchor Chart (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In this lesson, students examine their first example of narrative poetry. Scaffolding and gradual release are built into the lesson to help students gain more independence and mastery of the writing task at hand.

How this lesson builds on previous work:

- Students build their understanding of the poetic structure of this specific type of narrative writing. Reinforce this understanding by connecting the poem to the text *What the Sun Sees*, *What the Moon Sees* from Lessons 1–2.
- In Lesson 3, students co-created the High-Quality Work anchor chart; now students use this chart as they analyze the newly written verse 2.
- Students continue working on the speaking and listening discussion norms from previous lessons.
- Students continue to build comprehension and fluidity with adjectives through the Interactive Word Wall protocol.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need additional support when using the verse planner with their partner to plan verse 2. Consider strategically pairing students with varying levels of language proficiency so the students with greater language proficiency can serve as models and supports to their partner.

Down the road:

- In Lesson 5, students use the verse planner to plan verse 3 and the closing with a partner, then they turn their planning into complete sentences. This pattern of planning, then writing is done again as students write their independent “What the Sun Sees” poems.
- Students will continue to take part in the Interactive Word Wall protocol to reinforce the understanding of adjectives and fluidity in using them in context.

In advance:

- Prepare:
 - New Interactive Word Wall cards for *red*, *orange*, *large*, *round*, and *bright* and add them to the set from Lessons 2–3 (see supporting materials).
 - Time of Night anchor chart with vocabulary from previous read-alouds.
- Write “What the Moon Sees” poem template verse 1 for shared reading in Work Time A.
- Distribute the “What the Moon Sees” verse planners at student workspaces to ensure a smooth transition to Work Time B.
- Determine:
 - Groups of three or four students for the Interactive Word Wall protocol.
 - Pairs for completing the “What the Moon Sees” verse planner in Work Time B for Lessons 4–6. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Post: Learning targets and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Create the “What the Moon Sees” poem in an online format, such as a Google Doc, for display and for families to access at home to reinforce these skills.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.2, 1.I.A.3, 1.I.C.10, 1.I.C.11, 1.I.C.12, 1.II.A.1, 1.II.A.2, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing a model of language and a format for writing their own narrative poem. Students are invited to negotiate the models and the writing process as part of shared writing, an ideal environment for language development.
- ELLs may find forming complete sentences challenging, especially if their home language system specifies different rules for communicating. See “Levels of support” and the Meeting Students’ Needs column to help students prepare for the requirements of writing complete sentences in the Unit 3 Assessment.

Levels of support

For lighter support:

- Consider inviting students to add sketches to represent the meaning of the Interactive Word Wall cards in Opening A.
- During the Mini Language Dive, challenge students to generate questions about the sentence before asking the prepared questions, based on their experience with the Mini Language Dive in Lesson 1. Example: “What questions can we ask about this sentence? Let’s see if we can answer them together.” (What are the words before *moon* in the first line? What happened to these words in the second line?)

For heavier support:

- Consider copying and cutting into strips some or all of the sentences from “What the Moon Sees” poem, Verse 1. (Example: The moon/sees/delicious dinner/ on the kitchen table.) Scramble them and invite students to resequence them into complete sentences, identifying in each the “main character” (subject: the moon) with the corresponding “what the main character does” (verb: *sees*) or “more about the main character” (predicate: *sees delicious dinner on the table*).

Universal Design or Learning

- **Multiple Means of Representation (MMR):** In Work Time A, students interact with the poem *What the Moon Sees* in a shared reading. Students are invited to notice facts about the moon, then share their understanding of the author's use of imagination and details from the text. Students will need strong flexible thinking and metacognitive skills for this understanding. Provide scaffolds to support diverse abilities in using these skills, such as explicit highlighting of information in the text to guide students in new understandings.
- **Multiple Means of Action & Expression (MMAE):** During this lesson, some students may benefit from sensory input and opportunities for movement while they are sitting. Provide options for differentiated seating, such as sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs. In addition, consider providing options for physical action by inviting students to join you in a quick movement break if they seem restless during the read-alouds.
- **Multiple Means of Engagement (MME):** Throughout this lesson, students have opportunities to share ideas and thinking with classmates. Some may need support for engagement during these activities, so encourage self-regulatory skills by helping them anticipate and manage frustration by modeling what to do if they need help from their classmates. Example: "I can remember when I'm sharing that if I forget my idea or need help, I can ask my partner to help me. My partner could help me by giving me prompts that will help me share my thinking." Consider offering sentence frames to strategically selected peer models, such as, "I think verse 1 is high-quality work because I see ___ in it" or "One thing I noticed about verse 2 was ___." Offering these supports for engagement promotes a safe learning space for all students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- narrative poem, twilight, dusk (L)

Review:

- evening, midnight, high quality (L)

Materials

- ✓ Interactive Word Wall Protocol anchor chart (begun in Lesson 2)
- ✓ Interactive Word Wall cards (from Lessons 2–3 and new; teacher-created; one set per group)
- ✓ Arrow cards (from Lesson 2; one set per group)

- ✓ “What the Moon Sees” poem (one to display)
- ✓ “What the Moon Sees” poem (example, for teacher reference)
- ✓ Time of Night anchor chart (new; teacher-created; see supporting materials)
- ✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ✓ “What the Moon Sees” verse planner (one per student and one to display)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4)
- ✓ Pencils (one per student)
- ✓ “What the Moon Sees” verse planner (example, for teacher reference)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)

Opening

A. Building Vocabulary: Interactive Word Wall (10 minutes)

- Tell students they are going to use the Interactive Word Wall protocol again to make more connections between words, grow their brains, and become even stronger readers and writers. Today they will use adjectives that describe the sun.
- Remind students that they used this protocol in Lessons 2–3 and review as necessary using the **Interactive Word Wall Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Move students into the pre-determined small groups and distribute the sets of **Interactive Word Wall cards** and **arrow cards**. Use the same process from Lesson 3 to guide students through the protocol.
- Direct students to move to the whole group meeting area.
- Using a total participation technique, invite responses from the group:
“What is one connection you made during the Interactive Word Wall protocol?” (Responses will vary.)
- Provide students specific, positive feedback about the connections they made between words. (Example: “Joel, I heard you connect *orange* with *large* because at sunrise the sun often looks large and orange.”)

Meeting Students' Needs

- When using a total participation technique, minimize discomfort and/or perceived threats and distractions by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Consider inviting students to discuss the meaning of the Interactive Word Wall cards in home language groups before beginning the Interactive Word Wall protocol.
- For ELLs: Check for comprehension by inviting students to paraphrase the rationale for each connection in their own words. Restate or rephrase as necessary.

Work Time

A. Shared Reading: “What the Moon Sees” Poem, Verse 1 (10 minutes)

- Direct students’ attention to the learning targets and read the first one aloud:
“I can write a narrative poem using a model and evidence.”
- Point out the term *narrative poem* in the learning target and define it for students (a poem that tells a story).
- Tell students they will write a class narrative poem titled “What the Moon Sees.”
- Using a total participation technique, invite responses from the group:
“Using the title as evidence, what do you think this poem will be about?” (the moon and what it “sees” at night)
- Tell students they are now going to read the model verse, which they will use as a reference to plan and write. Underline the word *model* in the learning target.
- Display the **“What the Moon Sees” poem** and read it aloud fluently and without interruption.
- Invite students to turn and talk with an elbow partner as you point to each line of the verse and ask:
“What does the first line of the verse tell us?” (what time it is)
“What does the second line of the verse tell us? (what the moon looks like and what it is doing)
“What does the third line of the verse tell us?” (what the moon “sees”)
- Cold call two or three students to share out. Refer to **“What the Moon Sees” poem (example, for teacher reference)** as necessary.
- Remind students that the moon is not actually “seeing,” but the poem uses that language, just like in the book *What the Sun Sees*, *What the Moon Sees*, to help readers create a picture in their mind and to make the poem beautiful.
- Direct students’ attention to the **Time of Night anchor chart** and tell them that the words on this chart can be used to plan and write the verses of the poem. The words were taken from the books read throughout the module. Some of the words are on the **Sun, Moon, and Stars Word Wall**, but some are new.
- Direct students’ attention to the word *twilight* and say: “This word gives us clues to what it means. Listen closely: ‘twi - light.’”
- Using a total participation technique, invite responses from the group:
“What time of night do you think twilight is describing?” (Responses may vary.)
- Tell students that *twilight* is the time of night when the sun is just below the horizon, so there is both darkness and light. Twilight happens when the sun sets, but also when it rises.
- Direct students’ attention to the word *dusk* and refer to the Time of Night anchor chart as you ask:
“If dusk comes after twilight, how would you describe that time of night?” (darker than twilight)
- Tell students that *dusk* is when there is more darkness than light. It comes after twilight but before night (refer to the order on the Time of Night anchor chart).

- With excitement, tell students that they will now get to help write verse 2 of “What the Moon Sees” using the “What the Moon Sees” verse planner to do their planning and the Time of Night anchor chart as a tool for planning!

Meeting Students' Needs

- For students who may need additional support constructing meaning for the words on the Time of Night anchor chart: Provide visuals (e.g., photographs) for each word on the chart. (MMR)
- For ELLs: Mini Language Dive. Ask students about the meaning of chunks from the “What the Moon Sees” poem. Write and display student responses next to the chunks. Examples:
 - Point to the chunk *The thin, silver moon*. Ask:
“What are thin and silver, and what are they doing?” (adjectives describing moon; details)
“Can we say The moon thin, silver? Why?” (No. The adjectives should come before the thing/noun.)
“Can we say silver, thin moon? Why?” (No. The shape adjective should come before the color adjective.)
 - Read and point to the chunk *above the hill* and sketch a hill.
“Can you sketch the moon above the hill?” (Look for students to sketch the moon above the hill.)
 - Read and point to the chunk *on the kitchen table* and sketch a kitchen table.
“Can you sketch dinner on the kitchen table?” (Look for students to sketch as much.)
 - Reread both prepositional phrases and say:
“Why did the writer use the words above and on?” (to tell us where the moon and dinner are; to add detail)
“How can you use words like above and on when you write?” (to tell readers where things are; to add detail)

Work Time

B. Preparing for Writing: “What the Moon Sees” Verse Planner, Verse 2 (15 minutes)

- Direct students’ attention to the learning targets and read the second one aloud:
“I can plan my writing by discussing ideas with classmates.”
- Display the **“What the Moon Sees” verse planner** and tell students that this is the planner they will use to prepare verse 2. Read the labels for each row aloud.
- Invite students to turn and talk with an elbow partner:
“What do you notice about the information included on the verse planner?” (It asks for the time, what the moon looks like, what the moon does, and what the moon sees, just like the parts of verse 1.)
- Confirm students’ understanding that the verse planner is just to *plan* the writing, and point out that it does not contain complete sentences.

- Tell them that they should record the most important part of the idea, just as they did when taking notes in Unit 2.
- Tell students that they will first work with a partner to talk about and write their ideas for the “What the Moon Sees” verse planner for verse 2.
- Move students into pre-determined pairs and ask them to remain in the whole group meeting area.
- Invite students to turn and talk with their partner:
“What do you want to write in verse 2? Why?” (Responses will vary.)
- Circulate and listen in as students discuss. As needed, remind students to show respect for one another’s ideas by listening intently and taking turns to speak.
- Direct students’ attention back to the “What the Moon Sees” verse planner. Tell them that now they will decide on which ideas to add to the verse planner as they fill it out.
- Display the **Adjectives anchor chart** beside the Time of Night anchor chart. Tell students that these will both be important tools to use while planning the verse.
- Tell students that at their workspace, they will find the “What the Moon Sees” verse planner and pencils.
- Dismiss students to their workspaces and invite them to begin writing.
- As students write, circulate and provide guidance by referring them to the Time of Night anchor chart, the Adjectives anchor chart, the Sun, Moon, and Stars Word Wall, etc. Take note of trends in students’ verse planners to inform the shared writing of verse 2 in Work Time C.
- When 2 minutes remain, provide students with a time reminder.
- Signal students to stop writing with the use of a designated sound. Ask them to put away the verse planners in the designated area.
- Give students specific, positive feedback on their ability to plan with a partner. (“Example: Ana, I heard you and Danny respectfully come to an agreement about what the moon “sees” by combining your two ideas.)

Meeting Students’ Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided “What the Moon Sees” verse planner to help students know what to record. (MMAE)
- For ELLs: Ask: “How do you know when you are not writing complete sentences?” (I do not include a “main character”/subject, or I do not include what the main character does/verb.)
- For ELLs: Consider inviting students to discuss their ideas for the planner first in home language groups.
- For ELLs: Jot down examples of successful communication as well as any language errors related to adjectives and taking notes to share with students at the end of Work Time B. Invite students to celebrate the successes and correct the errors.

Work Time

C. Shared Writing: “What the Moon Sees” Poem, Verse 2 (15 minutes)

- Redirect students’ attention to the displayed “What the Moon Sees” poem and reread verse 1 aloud.
- Tell students that you were listening in as they talked and planned using the verse planner, and you were inspired by their creative ideas.
- Display the “What the Moon Sees” verse planner. Refer to **“What the Moon Sees” verse planner (example, for teacher reference)** to complete the plans for verse 2.
- Think aloud as you write to model how you use information in the room to help you fill in the verse planner (e.g., the Time of Night anchor chart; Sun, Moon, and Stars Word Wall; Adjectives anchor chart).
- Tell students that now that they have helped to plan verse 2, you are going to model how to write it in complete sentences on the “What the Moon Sees” poem underneath verse 1.
- Redirect students’ attention to the “What the Moon Sees” poem and point to the section titled “Verse 2.” Think aloud and model how to turn the ideas from the verse planner into complete sentences (e.g., “Midnight. Hmm, I wrote that because it was the time of night. So I write it as a complete sentence: ‘It is midnight.’ I want to make sure I use a period at the end of my sentence and spell *midnight* correctly using the Time of Night anchor chart.”).
- If time permits, invite students to call out the proper letters and words needed for the sentences and model how to use the tools in the classroom to support high-quality writing.
- When verse 2 is complete, reread verses 1 and 2 of the poem without interruption to support comprehension.
- If productive, cue students to think about their thinking:
“How does our shared writing add to your understanding of how to write a verse for the “What the Moon Sees” poem? I’ll give you time to think and discuss with a partner.” (Responses will vary.)
- Give students specific, positive feedback on how they helped to take the ideas from the verse planner and turn them into complete sentences. (Example: “Kai, you reminded us that the adjectives *big* and *round* were describing the moon. That helped me to write the sentence: ‘The big, round moon is high in the sky.’”)

Meeting Students’ Needs

- Consider highlighting words from anchor charts to use during shared writing. (MMR)
- For ELLs: As you model, color-code the verse planner and the corresponding phrases in the “What the Moon Sees” poem. For example, if the planner says “raccoon looking for food,” highlight it in green. In the “What the Moon Sees” poem, write, “The moon sees a curious raccoon looking for food,” highlighting in green “looking for food.”
- For ELLs: Ask: “How do you know that I am writing complete sentences?” (You include a “main character”/subject with what a main character does/verb.) Invite students to point out examples of each subject and verb.
- For ELLs: Ask students how the completed Verse 2 answers the planner questions.

Closing and Assessment

A. Engaging the Writer: High-Quality Work Anchor Chart (10 minutes)

- Remind students that today they learned how to plan a verse of the narrative poem “What the Moon Sees” and to turn the ideas from the verse planner into a complete verse.
- Direct students’ attention to the **High-Quality Work anchor chart** and the “What the Moon Sees” poem with verses 1 and 2 complete.
- Tell students that just as they did in Lesson 3, they are going to analyze these two verses to determine what makes them high quality.
- Invite students to turn and talk with an elbow partner:
“Do verses 1 and 2 of ‘What the Moon Sees’ meet the expectations for high-quality work? Why or why not?” (Answers may vary.)
- Circulate and listen in as students share their thoughts. Use the **Speaking and Listening Checklist** to track students’ progress toward SL.1.4.
- Refocus whole group and confirm with students that this writing is high quality because it includes details and follows conventions.
- Give students specific, positive feedback on their ability to use the High-Quality Work anchor chart. (Example: “Vinay, you pointed out that using adjectives added details to the writing.”)
- If productive, cue students to provide evidence:
“What, in the poem, makes you think so?” (Responses will vary.)
- Emphasize that as students continue writing, they should work toward high quality by including details and following writing conventions.

Meeting Students’ Needs

- For students who may be uncomfortable sharing their own preferences with the entire class: Consider allowing them to share what their partner said so that they still have a chance to speak in front of the class. (MME)
- For ELLs: Review the learning target introduced in Work Time A. Ask students to give specific examples of how they worked toward achieving it in this lesson. Invite students to rephrase the learning target now that they have more experience writing a narrative poem using a model and evidence.

Lesson 5: Speaking and Listening: Planning and Writing “What the Moon Sees” Poem and Introducing Peer Feedback

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.5:** With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.

Daily Learning Targets

- I can write a narrative poem using a model and evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b)
- I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)

Ongoing Assessment

- Refer to the Narrative Writing Rubric to track students’ progress toward W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b as they independently write during Work Time B (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Shared Reading: “What the Moon Sees” Poem, Verses 1 and 2 (5 minutes)

2. Work Time

- A. Preparing for Writing: “What the Moon Sees” Verse Planner, Verse 3 (15 minutes)
- B. Independent Writing: “What the Moon Sees” Poem, Verse 3 (10 minutes)
- C. Launching Peer Critique (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows a similar pattern to Lesson 4, but with more student responsibility. Students engage in a shared reading of the “What the Moon Sees” class poem (verses 1 and 2), prepare for writing (using the verse planner), and then independently write verse 3 and the closing statement.
- This lesson introduces giving and receiving feedback as students practice giving and receiving feedback that is kind, helpful, and specific about one another’s writing.

How this lesson builds on previous work:

- In Lesson 4, students were introduced to the process of planning and writing the narrative poem “What the Moon Sees.” The process continues in this lesson, but students take more ownership.
- Students continue working on the speaking and listening discussion norms from previous lessons as they practice giving and receiving supportive feedback.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need additional support independently writing verse 3 of “What the Moon Sees.” Circulate during Work Time B and encourage them to use the classroom resources such as the verse planner, Sun, Moon, and Stars Word Wall, “What the Moon Sees” anchor chart, Time of Night anchor chart, Adjectives anchor chart, and verses 1 and 2 of the class poem.
- The process of giving and receiving feedback was introduced in kindergarten but may be new to some students. The use of the feedback sentence starters will help all students frame their feedback in a kind, helpful, and supportive way. Consider strategically pairing students of varying language proficiency so that those with greater language proficiency can serve as a model for their partner.

Down the road:

- During this lesson, students independently write “What the Moon Sees” verse 3 and the closing using their verse planner. The pattern of planning and writing is revisited during Lessons 8–10 as students synthesize their understanding of the sun and daytime to write their own narrative poems.
- The process of giving and receiving feedback will be revisited throughout first grade. Consider providing more opportunities for students to practice giving and receiving kind, helpful, and specific feedback for all kinds of student work in many different subject areas.
- Consider keeping student partnerships consistent over the course of Lessons 8–10 to maintain consistency while learning to meaningfully plan for writing.

In advance:

- Distribute “What the Moon Sees” verse planners and “What the Moon Sees” poem verse 3 at student workspaces to ensure a smooth transition to Work Time.
- Post: Learning targets and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.A.1, 1.I.A.2, 1.I.A.3, 1.I.C.10, 1.I.C.11, 1.I.C.12, 1.II.A.1, 1.II.A.2, 1.II.B.4, and 1.II.B.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs by providing continued practice with a format for writing their own narrative poem. Students are invited to negotiate a plan for their Verse 3 of the poem with a partner, an ideal environment for language development.
- ELLs may find peer feedback challenging. The process may conflict with home culture norms, where students are expected to receive feedback only from a teacher. Receiving and giving feedback with other students may be perceived as unproductive. Consider discussing with students and families the culturally bound value that peer feedback is an essential contributor to student learning and autonomy in this curriculum, acknowledging that teacher and parent feedback is equally valued.

Levels of support

For lighter support:

- Encourage students to add detail to their sentences by inserting adjectives or prepositional phrases. Example: The moon is rising up. > The *shiny* moon is rising up *between the hills*.

For heavier support:

- Consider copying and cutting into strips some or all of the sentences from “What the Moon Sees” poem, Verse 2. Scramble them and invite students to resequence them into complete sentences, identifying in each the “main character” (subject) with the corresponding “what the main character does” (verb) or “more about the main character” (predicate).

Universal Design for Learning

- **Multiple Means of Representation (MME):** During shared reading, support active information processing skills as students integrate new information with prior knowledge. Provide options for comprehension by linking to and activating

relevant prior knowledge. (Example: Prior to reading, invite students to recall information from previous interactions with the text.)

- **Multiple Means of Action & Expression (MMAE):** During shared reading, students are invited to read sentences aloud with you. Students may not feel confident in their reading skills and may benefit from modeling and supported practice. Provide differentiated mentors by seating students who may be more confident reading aloud near students who may not feel as confident.
- **Multiple Means of Engagement (MME):** During independent writing, some students may need examples of how to problem-solve when they want to write a word with tricky spelling. Emphasize sustained effort and process by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print to support spelling accuracy.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- closing, feedback (L)

Review:

- evening, midnight, twilight, dusk

Materials

- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ “What the Moon Sees” poem (begun in Lesson 4; one to display)
- ✓ “What the Moon Sees” verse planner (from Lesson 4; one per student and one to display)
- ✓ Pencils (one per student)
- ✓ Time of Night anchor chart (begun in Lesson 4)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4)
- ✓ Sun, Moon, and Stars Word Wall (begun in Unit 1, Lesson 1)
- ✓ “What the Moon Sees” poem verse 3 (one per student)
- ✓ Pinky Partners Protocol anchor chart (begun in Unit 2, Lesson 2)
- ✓ Narrative Writing Rubric (for teacher reference; see Assessment Overview and Resources)

Opening

A. Shared Reading: “What the Moon Sees” Poem, Verses 1 and 2 (5 minutes)

- Direct students’ attention to the posted learning targets and read the first one aloud:
“I can write a narrative poem using a model and evidence.”
- Tell students that in a moment, they are going to read verses 1 and 2 of “What the Moon Sees” to refresh their memories and prepare for verse 3.
- Direct students’ attention to the **High-Quality Work anchor chart** and reread the big ideas. Remind them that in the previous lesson, they analyzed these verses for evidence of high-quality writing.
- Say: “As I read the poem today, I want you to look and listen for the parts that make this poem high quality. When you hear or see something, quietly put a thumb out in front of your chest.”
- Invite students to quietly push the imaginary button on their brains to show they are ready to look and listen for high-quality writing in “What the Moon Sees.”
- Display the **“What the Moon Sees” poem** and read it aloud.
- Invite students to turn and talk with an elbow partner:
“What is something you saw or heard in the poem that let you know the poem is high quality?”
- Select two to three students to share out the aspects of high-quality work they noticed.

Meeting Students’ Needs

- For students who may need additional support with expressive skills: Consider offering the option for students to point to the evidence in the poem. (MMAE)

Work Time

A. Preparing for Writing: “What the Moon Sees” Verse Planner, Verse 3 (15 minutes)

- Display the **“What the Moon Sees” verse planner**. Remind students that they took time to plan and write verse 2 together in Lesson 4. Now, they will plan verse 3 with a partner and then write verse 3 and the closing independently.
- Explain that the *closing* is a sentence to end the poem. It should tell the reader that night is coming to an end.
- Invite students to turn and talk with an elbow partner:
“How can you say that night is ending in different ways?” (Night ends; The moon sets; Night is done; etc.)
- Move students into pre-determined pairs and ask them to remain in the whole group gathering area.
- Invite students to turn and talk with their partner:
“What do you want to write in verse 3? Why?” (Answers will vary.)
- Circulate and listen in as students discuss. As needed, remind them to show respect for one another’s ideas by listening intently and taking turns to speak.

- Tell students that at their workspace they will find the “What the Moon Sees” verse planners from Lesson 4 and **pencils**.
- Dismiss students to their workspace and invite them to complete the planner.
- As students write, circulate and provide guidance by referring students to look at verses 1 and 2, the **Time of Night anchor chart**, the **Adjectives anchor chart**, the **Sun, Moon, and Stars Word Wall**, etc.
- Signal students to stop writing with the use of a designated sound. Tell them to keep their verse planners because they will use them next when they write verse 3 in complete sentences.
- Give students specific, positive feedback on their ability to plan with a partner. (Example: “Patrick, I heard you and Julia respectfully come to an agreement about how to describe the moon by using the Adjectives anchor chart.”) Tell students that they are now going to write their own version of verse 3 independently.

Meeting Students' Needs

- To support self-regulation and independence when students transition from one activity to another, provide a clear routine for what to do with unfinished work and use a visual time timer. (MME)
- For ELLs: Write and display student ideas for the closing.
- For ELLs: Consider inviting students to discuss their ideas for the planner first in home language groups.
- For ELLs: Jot down examples of successful communication as well as any language errors related to adjectives and taking notes to share with students at the end of Work Time B. Invite students to celebrate the successes and correct the errors.

Work Time

B. Independent Writing: “What the Moon Sees” Poem, Verse 3 (10 minutes)

- Display the “What the Moon Sees” poem and read verses 1 and 2 aloud.
- Tell students that now they will write their own version of verse 3 and the closing independently on the **“What the Moon Sees” poem verse 3**.
- Point out this material at their workspaces.
- Answer clarifying questions and invite students to begin writing.
- Circulate and support students as they write. When 2 minutes remain, provide them with a time reminder.
- Signal students to stop writing with the use of a designated sound. Ask them to put away the verse planners in the designated area but to keep their “What the Moon Sees” poem verse 3 with them.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided "What the Moon Sees" verse planner to help students know what to record. (MMAE)
- For ELLs: Encourage students to color-code the verse planner and the corresponding phrases in their "What the Moon Sees," Verse 3. For example, if their planner says "gibbous moon," they can highlight it in red. In "What the Moon Sees," Verse 3, they can write, "The gibbous moon disappears behind the hill," highlighting in red "gibbous moon."
- For ELLs: To check for complete sentences, students can write a "C" above each "main character"/subject and a "D" above what each main character does. Invite students to make sure they have a "C" with a "D" in every complete sentence.
- For ELLs: Ask students how their completed Verse 3 answers the planner questions.

Work Time

C. Launching Peer Critique (15 minutes)

- Give students specific, positive feedback on their ability to turn their ideas from the verse planner into complete sentences on the "What the Moon Sees" poem verse 3. (Example: "Ryan, you were able to take your idea that the moon saw a howling wolf and turn it into a complete sentence.")
- Invite students to bring their "What the Moon Sees" poem verse 3 and return to the whole group meeting area.
- Direct students' attention to the posted learning targets and read the second one aloud:
 - I can provide kind, helpful, and specific feedback to my classmates.
- Tell students that they are now going to use the High-Quality Work anchor chart to provide feedback on a classmate's writing.
- Remind them that when you give feedback on someone's work, you point out something they did well and something they might want to change or add to make their work even better.
- Remind students that when giving feedback, it is important to be kind, helpful, and specific.
- Using a total participation technique, invite responses from the group:

"What does it mean to be kind, helpful, and specific?" (You say it in a nice way; you say something that will help the writer; you talk about a precise part.)
- If productive, cue students to expand the conversation by giving an example and to listen carefully:

"Can you give an example?" (Responses will vary.)

"Who can repeat what your classmate said?" (Responses will vary.)
- Display the High-Quality Work anchor chart and explain that students will focus their feedback on the big ideas of high-quality writing, including details and following conventions.
- Tell students they are going to use the Pinky Partners protocol to provide feedback on their partners' writing. Remind them that they used this protocol in Unit 2 and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)

- Guide students through the protocol using their “What the Moon Sees” poem verse 3.
- Circulate and listen in as students receive and give feedback on each other’s writing. As needed, remind them to be kind, specific, and helpful and to use the sentence starters.
- Refocus whole group and invite students to return to their seats.
- Collect students’ verse 3 to monitor progress toward W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b using the **Narrative Writing Rubric**.
- Give students specific, positive feedback about giving feedback to each other. (Example: “Lia, I heard you give very kind, helpful, and specific feedback to Jin when you said that you think he should include another adjective to describe the moon.”)

Meeting Students’ Needs

- For students who may need additional support with self-regulating taking turns or remembering their partner designation: Consider providing an index card with an A or a B and explain that partner A will share first, followed by partner B. (MMR, MME)
- For ELLs: Consider modeling peer feedback with an enthusiastic ELL, using think-aloud, the Peer Feedback sentence starters, and the High-Quality Work anchor chart.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Share that today students independently wrote verse 3 of “What the Moon Sees” and gave each other feedback on their writing, which is preparing them to write a complete poem, “What the Sun Sees.”
- Remind students that the best learning happens when learners check to see how well they are doing and what they can do to be even better and tell students that now they are going to reflect on the feedback process.
- Using a total participation technique, invite responses from the group:
 - “What went well when giving and receiving feedback today?” (Responses will vary, but may include: We used the sentence starters to be kind, specific, and helpful; my partner gave me good advice to change ____ about my writing.)*
 - “What can we do differently to make giving and receiving feedback even better next time?” (Responses will vary, but may include: We could be more respectful when the other person is reading so we don’t interrupt each other; we could say two things we liked instead of just one.)*
- If productive, cue students with a challenge:
 - “What if we didn’t give feedback to one another on Verse 3? I’ll give you time to think and discuss with a partner.” (Responses will vary.)*
- Give specific, positive feedback to students on their ability to respectfully give and receive kind, specific, and helpful feedback and tell them that they will continue to give and receive feedback as they begin writing a new poem about what the sun sees.

Meeting Students' Needs

- As students share, provide options for expression and communication by using sentence frames. Examples:
 - "It was helpful when my partner said ____."
 - "Next time, we could be more helpful if we say ____." (MMAE)

Lesson 6: Reading, Speaking, and Listening: Describing the Sun and What It “Sees”

CCS Standards

- **RL.1.1:** Ask and answer questions about key details in a text.
- **RL.1.10:** With prompting and support, read prose and poetry of appropriate complexity for grade 1.
- **SL.1.2:** Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

Daily Learning Targets

- I can ask and answer questions about day based on the text *What the Sun Sees, What the Moon Sees*. (RL.1.1, RL.1.10)
- I can describe what the sun “sees” using evidence from pictures, videos, and the text. (SL.1.2, SL.1.4)

Ongoing Assessment

- During the focused read-aloud in Work Time A, use the Reading Literature Checklist to track students’ progress toward RL.1.1 and RL.1.10 (see Assessment Overview and Resources).
- During Work Time B, circulate and listen for students to use words and phrases acquired through the read-aloud during the Role-Play protocol. Note how students are interacting with one another using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Building Vocabulary: Interactive Word Wall (10 minutes)

2. Work Time

- A. Focused Read-aloud: *What the Sun Sees*, Pages 1–16 (15 minutes)
- B. Role-Play: *What the Sun Sees*, Selected Pages (10 minutes)
- C. Making Observations What the Sun “Sees” (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson follows a similar pattern to Lesson 2. Students have multiple opportunities to build their schema around what happens during the day through reading and the close

viewing of pictures and video. This schema aids students' understanding and their use of evidence and detail in writing.

- Young learners' comprehension is enhanced through routine and the opportunity to interact with new information in kinesthetic ways. The familiar routines of the Role-Play and Interactive Word Wall protocols will promote student comprehension and engagement.
- In Work Time C, students watch two 2-minute videos from YouTube and Videezy.
 - Citation: Whitmarsh, Andrew. "British Wildlife Filmed on a DSLR." *YouTube*. 30 June 2014. Web. 16 June 2016. <<https://www.youtube.com/watch?v=cg5wfzqJ7fE>>. (For display. Used by permission.)
 - Purpose: to observe what goes on during the day in a wildlife setting
 - Citation: bk-vids. "Street Time Lapse." *Videezy*. < <https://www.videezy.com/time-lapse/2739-street-time-lapse-free-stock-footage>>. (For display. Used by permission.)
 - Purpose: to observe what goes on during the day in an urban setting

How this lesson builds on previous work:

- In Lesson 2, students focused on the section about the moon from *What the Sun Sees*, *What the Moon Sees*. In this lesson, students zoom in on details about the sun in the section *What the Sun Sees* and ideas are gathered on the What the Sun Sees anchor chart and Adjectives anchor chart.
- In the Closing, students reflect on habits of character, specially their use of respect throughout the lesson. They use the Working to Become Ethical People anchor chart and the Sit, Kneel, Stand protocol. Review the anchor chart and protocol as needed.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Although the Role-Play protocol is familiar from Unit 1, some students may continue to need support with their oral language. Provide sentence stems, modeled actions, and props as needed.
- As noted in Lesson 2, students may grapple with the idea of personification and that the sun does not actually "see." Continue to reinforce student understanding by asking questions like: "Does the sun really see things? Does the sun have eyes? Why do you think the author described the sun this way?"

Down the road:

- This lesson lays the foundation (observations and knowledge) that students will use when writing their individual "What the Sun Sees" narrative poems.

In advance:

- Prepare:
 - New Interactive Word Wall cards for *dim* and *fiery* and add them to the set from Lessons 2–4 (see supporting materials).
 - Day photograph 1 and day photograph 2 in color, if possible.
 - Technology necessary to play "British Wildlife Filmed on a DSLR" and "Times Square—Manhattan, New York" in Work Time C.

- Pre-determine:
 - Small groups of 2-3 students for the Interactive Word Wall protocol.
 - Pairs for the Role-Play protocol. Consider pairing students with varying levels of language proficiency. The students with greater language proficiency can serve as models in their partnership, initiating discussion and providing implicit sentence frames.
- Review the Role-Play and Sit, Kneel, Stand protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- If you recorded students participating in the Role-Play protocol in Unit 1, play this video to remind them of what to do.
- Work Time C: Show daytime videos:
 - Citation: Whitmarsh, Andrew. “British Wildlife Filmed on a DSLR.” *YouTube*. 30 June 2014. Web. 16 June 2016. <<https://www.youtube.com/watch?v=cg5wfwzqJ7fE>>. (For display. Used by permission.)
 - Citation: bk-vids. “Street Time Lapse.” *Videezy*. <<https://www.videezy.com/time-lapse/2739-street-time-lapse-free-stock-footage>>.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.IA.1 and 1.IB.5

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to act out as one way of understanding the meaning of the text and explicitly discuss adjectives. Consider asking students how they might translate a similar phrase (e.g., sleeping children) in their home language, and whether the adjective system is the same (i.e., adjective + noun/thing).
- ELLs may find forming complete sentences challenging, because their home language system may specify different rules for communicating. See the Language Dive for suggestions to help students prepare for the requirements of writing complete sentences in the Unit 3 Assessment.
- In Work Time A of this lesson, ELLs may participate in an optional Language Dive that guides them through the meaning of a sentence from *What the Sun Sees*, *What the Moon Sees*. The focus of this Language Dive is examining adjectives and their function in a sentence. Students then apply their understanding of the meaning and structure of this sentence when writing their narrative poems for their Unit 3 assessment. Preview the Language Dive Guide and consider how to invite conversation among students to address the language goals suggested under each sentence strip chunk (see supporting materials). Refer to the Module 1 Appendix for additional information regarding a consistent Language Dive routine. Create a “Language Chunk Wall”—an area in the classroom where

students can display and categorize the academic phrases discussed in the Language Dive.

Levels of support

For lighter support:

- Consider inviting students to add sketches to represent the meaning of the Interactive Word Wall cards in Opening A.
- During the Language Dive, challenge students to generate questions about the sentence before asking the prepared questions, based on their experience with the Mini Language Dive in Lesson 1. Example: “What questions can we ask about this sentence? Let’s see if we can answer them together.” (Why did the writer put *quiet* before *barnyards*?)

For heavier support:

- During the focused read-aloud, help students who need heavier support by inviting a more proficient student to dictate lines for them to recite so that they practice using verbal language.
- Consider copying and cutting into strips some or all of the sentences from *What the Sun Sees*, *What the Moon Sees*. (Example: The sun/sees/blue skies.) Scramble them and invite students to resequence them into complete sentences, identifying in each the “main character” (subject) with the corresponding “what the main character does” (verb) or “more about the main character” (predicate).

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In this lesson, students reflect on how they upheld respect for themselves and their classmates. Some students may struggle to recall all the aspects of the lesson if it is only presented orally. Offer alternatives for auditory information by listing the activities completed in this lesson on chart paper or a white board for students to refer to.
- **Multiple Means of Action & Expression (MMAE):** As students begin independent writing, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). Some students may forget their sentence ideas once they begin directing their efforts toward writing. Support strategy development by modeling how to physically touch the words/spaces on the sentence frame and draw lines for additional words you intend to write. This will help students recall their original ideas throughout the writing process.
- **Multiple Means of Engagement (MME):** During the focused read aloud of *What the Sun Sees*, some students may need explicit prompts to relate to the text. Optimize relevance by making the information in the text personalized and contextualized to students’ lives. For example, pause as appropriate and ask students to share connections to the text based on their own lives: “What is one thing you are doing that the sun might be seeing? What time of day does the sun see you playing outside?”

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- crowded, bustling, noisy (T)

Review:

- adjective, sun, day (L)

Materials

- ✓ Interactive Word Wall Protocol anchor chart (begun in Lesson 2)
- ✓ Interactive Word Wall cards (from Lesson 4 and new; teacher-created; one set per group)
- ✓ Arrow cards (from Lesson 2; one set per group)
- ✓ *What the Sun Sees, What the Moon Sees* (one to display; for teacher read-aloud)
- ✓ Reading Literature Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4; added to during Work Time A; see supporting materials)
- ✓ What the Sun Sees anchor chart (new; co-created with students during Work Time A; see supporting materials)
- ✓ What the Sun Sees anchor chart (answers, for teacher reference)
- ✓ Language Dive Guide: *What the Sun Sees, What the Moon Sees* (optional; for ELLs; for teacher reference)
- ✓ Sentence Strip Chunks: *What the Sun Sees, What the Moon Sees* (optional; for ELLs; one to display)
- ✓ Role-Play Protocol anchor chart (begun in Unit 1, Lesson 4)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Day photograph 1 (one to display)
- ✓ Day photograph 2 (one to display)
- ✓ “British Wildlife Filmed on a DSLR” (video; play 5:45–7:45; see Teaching Notes)
- ✓ “Street Time Lapse” (video; play in entirety; see Teaching Notes)
- ✓ Sit, Kneel, Stand Protocol anchor chart (begun in Unit 1, Lesson 5)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)

Opening

A. Building Vocabulary: Interactive Word Wall (10 minutes)

- Tell students that they are going to use the Interactive Word Wall protocol again to make more connections between words, grow their brains, and become even stronger readers and writers. Today they will add to the set some adjectives that describe the sun.
- Remind students that they used this protocol in Lessons 2–4 and review as necessary using the **Interactive Word Wall Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Move students into the pre-determined small groups and distribute the sets of **Interactive Word Wall cards** and **arrow cards**. Use the same process from Lesson 3 to guide students through the protocol.
- Direct students to move to the whole group meeting area.
- Using a total participation technique, invite responses from the group:

“What is one connection you made during the Interactive Word Wall protocol?” (Responses will vary.)

- Give students specific, positive feedback about the connections they made between words. (Example: “Joel, I heard you connect *orange* with *large* because at sunrise the sun often looks large and orange.”)

Meeting Students’ Needs

- As students explain the connection between words, provide sentence frames to support oral language processing. (MMAE)
- For ELLs: Consider inviting students to discuss the meaning of the Interactive Word Wall cards in home language groups before beginning the Interactive Word Wall protocol.
- For ELLs: Check for comprehension by inviting students to paraphrase the rationale for each connection in their own words. Restate or rephrase as necessary.

Work Time

A. Focused Read-aloud: *What the Sun Sees*, Pages 1–16 (15 minutes)

- Direct students’ attention to the posted learning targets and read them aloud:
*“I can ask and answer questions about day based on the text *What the Sun Sees*, *What the Moon Sees*.”*
“I can describe what the sun ‘sees’ using evidence from pictures, videos, and the text.”
- Display ***What the Sun Sees*, *What the Moon Sees***. Model using the front cover of the text to decide where to begin reading. Say: “Today we are going to read just the part of the book about the sun. I can find that section of the book by looking at the cover and finding the picture of the sun.”
- Consider using the **Reading Literature Checklist** during the focused read-aloud to track students’ progress toward RL.1.1 and RL.1.10.
- Read pages 1–4 fluently and without interruption.

- Pause after reading page 4. Using a total participation technique, invite responses from the group:
*“What do you see in the illustrations that helps you know it is a crowded barnyard?”
 (There are a lot of animals and very little space.)*
“What does crowded mean?” (full; no space)
- Confirm students’ definition of *crowded* and point out that it is being used as an adjective because it describes what the barnyard looks like.
- Add *crowded* to the **Adjectives anchor chart**.
- Draw students’ attention back to the text and read aloud pages 5–8 fluently and without interruption.
- Pause after reading page 8. Using a total participation technique, invite responses from the group:
“What do you see in the illustrations that could show the street is bustling?” (There are a lot of taxis and people; it looks busy.)
“What do you think bustling means?” (busy)
- Confirm students’ definition of *bustling* and point out that it is being used as an adjective because it describes the street.
- Add *bustling* to the Adjectives anchor chart.
- Draw students’ attention back to the text and read aloud pages 9–10 fluently and without interruption.
- Pause after reading page 10. Using a total participation technique, invite responses from the group:
“Why do you think the author describes the playground as noisy?” (When kids play, they make a lot of noise.)
“What do you think noisy means?” (a lot of noise; very loud)
- Confirm students’ definition of *noisy* and point out that it is being used as an adjective because it describes the sounds of the playground.
- Add *noisy* to the Adjectives anchor chart.
- If productive, cue students with a challenge:
“What if we remove the words crowded, bustling, and noisy? I’ll give you time to think and discuss with a partner.” Reread the sentences, omitting the adjectives. (Responses will vary.)
“Can you figure out the connection between these adjectives and the adjectives quiet, empty, and silent?”
I’ll give you time to think and discuss with a partner. (Responses will vary, but could include: They are opposites, or near opposites.)
- Draw students’ attention back to the text and read aloud pages 11–16 fluently and without interruption.
- Direct students’ attention to the **What the Sun Sees anchor chart** and tell them that they are now going to look back at the illustrations to generate ideas of what the sun sees in daytime during this story.

- Flip through the illustrations on pages 1–16. Pause at each page and invite students to say out loud what the sun sees on each page and add it to the What the Sun Sees anchor chart. Refer to the **What the Sun Sees anchor chart (answers, for teacher reference)** as necessary.
- Tell students that they are going to continue generating ideas about what the sun might see as they observe some photographs and videos of the world during the day, but first they are going to use the Role-Play protocol to act out some selected pages from *What the Sun Sees*, *What the Moon Sees*.

Meeting Students' Needs

- As students are invited to share their thinking, support oral language and processing by allowing ample wait time. (MME, MMAE)
- For ELLs: During or after Work Time A, guide students through a Language Dive. Refer to **Language Dive Guide: What the Sun Sees, What the Moon Sees**. Display **Sentence Strip Chunks: What the Sun Sees, What the Moon Sees**.

Work Time

B. Role-Play: *What the Sun Sees*, Selected Pages (10 minutes)

- Share with students that they will now get a chance to show their understanding of some of the different things the sun “sees” in *What the Sun Sees*, *What the Moon Sees* using the Role-Play protocol. Remind students that they used this protocol in Lesson 2 and review using the **Role-Play protocol anchor chart** as needed. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to begin role-playing the following sections of text:
 - Pages 3–4 (crowded barnyards)
 - Pages 7–8 (bustling streets)
 - Pages 13–14 (busy children)
- Circulate as students role-play and use the **Speaking and Listening Checklist** to track students’ progress toward SL.1.2 and SL.1.4.
- Give students specific, positive feedback on their ability to role-play sections of *What the Sun Sees*, *What the Moon Sees*. (Example: “Carlos, you demonstrated how a street can be bustling by pretending to be in a traffic jam with Benjamin.”)

Meeting Students' Needs

- Facilitate personal coping and self-regulation skills by modeling socially appropriate ways to express enthusiasm and excitement during the role-play. Examples: give yourself a hug or take a deep breath and smile. (MME)
- For ELLs: Ensure that students put words to their role-plays. If students can’t verbalize, remind them of the word or phrase and have them repeat it. Prompt them to repeat the word or phrase as they role-play.

Work Time

C. Making Observations: What the Sun “Sees” (15 minutes)

- With excitement, tell students that they will now participate in a close viewing of some photographs and videos to brainstorm some ideas of what the sun might “see” throughout the day.
- Display **day photograph 1** and provide time for students to silently view it.
- Invite students to turn and talk with an elbow partner:
“What could the sun ‘see’ or observe?” (an elephant walking through a forest or jungle)
- Circulate and listen in as students share with each other. Record a selection of students’ ideas on the What the Sun Sees anchor chart.
- Display **day photograph 2** and provide time for students to silently view it. Repeat the question from above and add a selection of student ideas to the What the Sun Sees anchor chart.
- Tell students that now that they have made observations from photographs, they are going to make observations from video clips.
- Play **“British Wildlife Filmed on a DSLR.”**
- Invite students to turn and talk with an elbow partner:
“What could the sun ‘see’ or observe?” (birds flying around, deer eating grass)
- Circulate and listen in as students share with each other. Record a selection of students’ ideas on the What the Sun Sees anchor chart.
- Play **“Street Time Lapse.”**
- Repeat the process from the first video, using the same question.
- Direct students’ attention to the completed What the Sun Sees anchor chart and read through the multitude of responses.
- Explain that students will use these observations to write a narrative poem describing what the sun sees beginning in the next lesson.
- If productive, cue students to think about their thinking:
“How do our photographs and video add to your understanding of how to write a narrative poem? I’ll give you time to think and discuss with a partner.” (Responses will vary.)

Meeting Students’ Needs

- Before making observations, provide white boards and dry-erase markers as an option for students to record (in drawing or writing) their ideas. This will also help scaffold active viewing and listening for key details. (MMR, MMAE)
- For ELLs: Encourage students to use complete sentences with adjectives as they describe what the sun could see or observe in the photographs and videos. (Examples: The moon could observe hungry birds eating squirming worms/a watchful deer drinking from a calm pond.)

Closing and Assessment

A. Reflecting on Learning (10 minutes)

- Remind students that the best learning happens when learners check to see how well they are doing and what they can do to be even better. Tell students they will use the Sit, Kneel, Stand protocol to assess how they upheld respect for themselves and their classmates throughout the lesson. Remind them that they used this protocol in Module 1 and review the **Sit, Kneel, Stand Protocol anchor chart** as necessary. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Direct students' attention to the **Working to Become Ethical People anchor chart** and review the habit of respect.
- Guide students through the protocol using the question:
"How did you uphold respect during today's lesson?"
- Invite students to return to their seats and cold call two to three students to share their thoughts.
- Prompt students to clarify and justify their thinking with questions such as:
"Why do you think the class showed respect?"
"What can our class do a little better next time?"
- Provide specific, positive feedback to students on their ability to uphold a respectful classroom. Tell them that in the next few lessons, they will begin writing their independent "What the Sun Sees" poems and that it will be important to uphold the habits of character as they work to create a beautiful, high-quality poem.

Meeting Students' Needs

- After students share their reflections, foster a sense of community and provide options for physical action by inviting them to give themselves a special applause. (MME)
- For ELLs: Before introducing the Sit, Kneel, Stand protocol, ask students to brainstorm a few ways they showed respect during parts of this lesson. Write and display these ideas to reinforce language.

Lesson 7: Speaking and Listening: Analyzing a Model of High Quality Work

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1f:** Use frequently occurring adjectives.

Daily Learning Targets

- I can plan my writing by discussing ideas with classmates. (W.1.3, SL.1.4)
- I can analyze a model of high-quality work. (SL.1.1, SL.1.2)

Ongoing Assessment

- During the Opening, monitor students' ability to participate in the Interactive Word Wall protocol and as they work to connect adjectives. (SL.1.4, L.1.1f)
- During the temporal line game in Work Time C, circulate and listen to how students use temporal lines to signal event order. (W.1.3)

Agenda

1. Opening

- A. Building Vocabulary: Interactive Word Wall (10 minutes)

2. Work Time

- A. Engaging the Writer: Reviewing the Sky Notebook (15 minutes)
- B. Analyzing an Example and Non-Example: "What the Moon Sees" Class Poem (15 minutes)
- C. Developing Language: Temporal Line Game (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson invites students to analyze the "What the Moon Sees" class poem based on criteria for high-quality work. This analysis helps students to build their understanding and ability to produce high-quality narrative writing (W.1.3).

- In Work Time C, the use of temporal lines in poems is just one aspect of how to use temporal words to signal event order. For the purposes of this unit, the temporal lines follow the model: “It is time of day.” Examples of temporal lines that could be used include: “It is morning.” “It is afternoon.” “It is evening.” Practicing using and ordering these temporal lines aids students as they begin writing their narrative poem in Lesson 8 (W.1.3).

How this lesson builds on previous work:

- Students will continue to use and connect adjectives to describe the sun during the Interactive Word Wall protocol. As needed, re-model the steps of the protocol.
- In Unit 2, students used their Sky notebook to write down observations about the description and location of the sun and moon. In Work Time B, students read and review their Sky notebook to select three pages that describe the appearance and location of the sun at three different times of day. These pages will be used as the research base for their narrative poem.
- In Lessons 4–5, students helped write the class “What the Moon Sees” poem. Today, students will analyze the poem in relation to the High-Quality Work anchor chart.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need additional support as they reread their Sky notebook during Work Time A. Encourage them to “read” the pictures and labels. Students also may need support selecting and marking the three pages that they will use in Lessons 8–10. Remind them that they should search for pages that describe the sun at morning, midday, and evening. Encourage students to begin the selection process by locating these times of day in their Sky notebook.
- For many young learners, grasping the idea of high quality may be a challenge. An example and non-example support students’ understanding of the tangible application of this idea, but also consider referring back to Model of Excellence #1 from Lesson 3 as an additional example.
- In Work Time C, students participate in the temporal line game in triads. Some students may be challenged to both follow the steps of the game and engage in the cognitive work the task involves. Consider involving another adult to host a group of students who need extra scaffolding.

Down the road:

- This lesson prepares students for the Unit 3 Assessment, which will take place in three parts across Lessons 8–10: Students will independently write a three-verse narrative poem. When writing their narrative poem, students will use their Sky notebook as research, the “What the Moon Sees” example as a model, and the High-Quality Work anchor chart as support.
- The temporal line game in Work Time C helps students build their bank of temporal lines that they will use when writing their narrative poem in Lessons 8–10.

In advance:

- Determine:
 - Triads for the Interactive Word Wall protocol in the Opening.
 - Triads for the temporal line game in Work Time C.

- Prepare the temporal line cards (see supporting materials).
- Distribute materials for Work Time A at student workspaces to ensure a smooth transition.
- Review the Interactive Word Wall protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Record students as they participate in the Interactive Word Wall protocol to listen to later to discuss strengths and what they could improve on or to use as models for the group. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time B: Create the “What the Moon Sees” example and the “What the Moon Sees” non-example in an online format, such as a Google Doc, for display and for families to access at home to review.
- Work Time C: Video-record students playing the temporal line game to review with students in later lessons as a reminder of what happened. Most devices (cellphones, tablets, laptop computers) come equipped with free video recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.10 and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs with opportunities to practice using temporal lines orally as a way to plan their writing of a poem. Consider asking students how they might translate a similar phrase (e.g., it is nighttime) in their home language, and whether the structure of the sentence is the same (e.g., noun + verb + time of day).
- ELLs might find it challenging to choose three entries from their Sky notebook. Consider quickly modeling for students how to choose three entries. Think aloud as you decide which one to select. (Example: “I am looking for an entry that describes the sun at midday. I know this entry describes the sun at midday because I drew the sun high up in the sky. I will put my sticky note here, to mark this page”.)

Levels of support

For lighter support:

- Consider inviting students to add sketches to represent the meaning of the Interactive Word Wall cards in Opening A.

For heavier support:

- Consider creating a list of the steps students have taken in previous lessons and today as they prepare for writing their poem: Interactive Word Wall protocol, analyzing an exemplar, choosing entries that describe the sun at morning, midday, and evening from their Sky notebook, and practicing using temporal lines. Draw a small icon by each and keep displayed to support students as they move into writing their piece as well as to reflect on learning.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** Throughout this lesson, embed support for unfamiliar vocabulary by providing explanation and visual examples. This helps students make connections and supports comprehension. Additionally, support auditory processing by posting discussion questions during each activity.
- **Multiple Means of Action & Expression (MMAE):** In this lesson, some students may need additional support in setting appropriate goals for their effort and the level of difficulty expected. Appropriate goal-setting supports development of executive skills and strategies. Offer scaffolds for students' learning to set appropriate personal goals, such as a checklist with three goals for the lesson.
- **Multiple Means of Engagement (MME):** In Work Time C, students play the temporal line game, in which they physically move around to order themselves as a group according to their temporal phrases. Facilitate personal coping and self-regulation skills by modeling appropriate ways to express enthusiasm or excitement about the game and appropriate physical movement around classmates. (Example: Encourage students to stand next to their classmate while respecting personal space.)

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- temporal, dawn, first, then, next, finally, last (L)

Review:

- analyze, model, morning, midday, noon, afternoon (L)

Materials

- ✓ Interactive Word Wall Protocol anchor chart (begun in Lesson 2)
- ✓ Interactive Word Wall cards (from Lesson 6; one set per triad)

- ✓ Arrow cards (from Lesson 2; one set per triad)
- ✓ Sky notebook (completed in Unit 2; one per student)
- ✓ Sticky notes (three per student)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ “What the Moon Sees” example (one to display)
- ✓ “What the Moon Sees” non-example (one to display)
- ✓ Temporal line cards (two sets per triad)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)

Opening

A. Building Vocabulary: Interactive Word Wall (10 minutes)

- Invite students to the whole group area.
- Tell students that they are going to use the Interactive Word Wall protocol again to make more connections between words, grow their brains, and become even stronger readers and writers. Today they will use adjectives that describe the sun.
- Remind students that they used this protocol in the first half of the unit and review as necessary using the **Interactive Word Wall Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Move students into pre-determined triads and distribute the sets of **Interactive Word Wall cards** and **arrow cards**. Use the same process from Lesson 3 to guide students through the protocol.
- Gather students back together and offer specific, positive feedback on their participation in the protocol. (Example: “I noticed that Sophia waited her turn and made a connection between two words.”)
- Invite students to turn and talk with an elbow partner:
 - “What word connections did you make, and why?” (I connected red and blazing because that’s what the sun looks like.)*
 - “What step in this protocol did you do well?” (I sat in my triad. I waited my turn. I connected two cards. I explained my connection.)*
- Invite several students to share out and correct any misconceptions regarding word connections.
- If there is a particularly challenging step in the protocol for all groups, consider re-modeling that portion briefly.

Meeting Students’ Needs

- For students who may need additional support with self-regulating, taking turns, and remembering their partner designation: Consider giving them an index card with an A, B, or C and tell them partner A will share first, then partner B, then partner C. (MMR, MME)

- For ELLs: Consider inviting students to discuss the meaning of the Interactive Word Wall cards in home language groups before beginning the Interactive Word Wall protocol.
- For ELLs: Check for comprehension by inviting students to paraphrase the rationale for each connection in their own words. Restate or rephrase as necessary.

Work Time

A. Engaging the Writer: Reviewing the Sky Notebook (15 minutes)

- Refocus students whole group.
- Tell students that in the next lesson, they will begin to plan and write their “What the Sun Sees” poem that describes what the sun might “see” at different times of day.
- Remind students that in the last unit, they did a lot of work to record their observations and descriptions of the sun in their **Sky notebook**. Remind them that they described what the sun looked like at different times of day using descriptive adjectives.
- Tell student that they will now review their Sky notebook and pick three entries, one each that describes the sun at morning, midday, and evening.
- Point out the Sky notebook and the **sticky notes** located at their workspaces.
- Tell students they will use the sticky notes to mark the three entries.
- Transition students to their workspaces and invite them to begin working.
- Circulate and remind students to find entries that describe the sun during morning, midday, and evening.
- If students are having difficulty selecting pages in their Sky notebook, prompt them with further focusing questions:

“Which illustration in your Sky notebook shows the sun at morning? Midday? Evening?”

“Where was the location of the sun during morning? Midday? Evening?”

- When 5 minutes remain, signal students to stop working and direct them to return to the whole group gathering area with their Sky notebooks.
- Invite students to turn and talk to an elbow partner:

“What page did you select?” (I chose a page that describes the sun at midday.)

“How did you know that the page selected represented morning, midday, or evening?” (It was midday because the sun was high in the sky and bright and round. It was evening because the sun was orange and setting over the horizon.)

- Invite a few students to share out.
- Tell students that they will refer back to these selected pages as research for their “What the Sun Sees” poems.

Meeting Students' Needs

- To support self-regulation and independence, provide a clear routine for what to do with unfinished work and use a visual time timer. (MME)
- For ELLs: When reminding students of the work they did in their Sky notebook, consider using an actual example of a descriptive adjective from a student's Sky

notebook. (Example: I was looking at Jasmine's Sky notebook, and as you can see, she wrote that the moon was bright. Nice adjective, Jasmine!")

- For ELLs: Consider inviting an ELL student who had difficulty finding pages in his or her Sky notebook to share select pages with the whole class. This can validate the work and effort of the student and give an opportunity to practice oral language.

Work Time

B. Analyzing an Example and Non-Example: "What the Moon Sees" Class Poem (15 minutes)

- Direct students' attention to the posted learning targets and read the second one aloud:
"I can analyze a model of high-quality work."
- Review the words *analyze* (to examine or study closely) and *model* (a strong example).
- Remind students that when they analyze a model of high-quality work, they study a strong example to get criteria for high quality.
- Direct students' attention to the **High-Quality Work anchor chart** and read the title aloud: "High-Quality work ..."
- Point to the criteria listed below the title and read them aloud:
 - "Includes details in writing"
 - "Follows conventions"
- Using a total participation technique, invite responses from the group:
"What does it mean to include details in writing?" (It means that the writing is not plain, but is interesting; the writing is descriptive.)
"What does it mean to follow conventions?" (You use complete sentences and punctuation and spell words correctly.)
- Confirm students' thinking and explain that including details in writing means that you write with descriptive details about your topic. Explain that following conventions means that you write with complete sentences, use end punctuation, and spell Word Wall words correctly.
- Share that today students will use the High-Quality Work anchor chart to analyze two models to determine which one best exemplifies high-quality work.
- Display the **"What the Moon Sees" example** and the **"What the Moon Sees" non-example**.
- Invite students to compare the example and the non-example, paying attention to the two criteria on the High-Quality Work anchor chart.
- Pointing to the non-example, ask:
"What do you notice about the details used to describe the moon in this poem?" (The details aren't that interesting; it seems boring; they seem plain.)
"What do you notice about the use of conventions in this poem?" (It is missing periods. Some words are spelled incorrectly.)
- Pointing to the example, ask:
"What do you notice about the details used to describe the moon in this poem?" (The details are interesting; it's more descriptive; I get a picture in my mind as I read it.)
"What do you notice about the use of conventions in this poem?" (It has complete sentences. It uses periods. Words are spelled correctly.)

- Using a total participation technique, invite responses from the group:
“Which example best shows high-quality work, and why?” (the second one, because it has descriptive details and follows conventions the best)
- If productive, cue students with a challenge:
“What if we remove the lines about the dinner, raccoon, or children? I’ll give you time to think and discuss with a partner.” (Responses will vary, but students should discuss that the example would lack detail and thus would possibly be of lesser quality.)
- Share that in the subsequent lesson, they will begin to write their “What the Sun Sees” poem. Explain that these poems will be evaluated using the criteria for high-quality work that is found on the High-Quality Work anchor chart and that students should keep these criteria in mind as they begin writing.

Meeting Students’ Needs

- For students who may need additional support with working memory and/or vocabulary: Provide a drawing or photograph as a visual cue for each criterion. (MMR, MMAE)
- For ELLs: When reviewing the words *analyze* and *model* in the learning target, consider displaying the Models of Excellence #1 and #2 used in Lesson 3 and reminding students that in that lesson they analyzed the writing in those models: They examined them closely to determine what makes them high quality. Tell students they will do the same today with different models.
- For ELLs: Invite students to refer to Models of Excellence #1 and #2, used in Lesson 3, to think of high-quality examples of details and conventions in writing. (Example: “What do you remember about the writing in this model of excellence that made it high quality?”)
- For ELLs: To add a visual support to the analysis of both examples, consider underlining the details in each example and then comparing them to give a clear picture of what interesting, descriptive details look like as opposed to boring and plain.

Work Time

C. Developing Language: Temporal Line Game (15 minutes)

- Give students specific, positive feedback on their ability to analyze and compare two different poems for details used in writing. (Example: “I noticed that you all looked very closely at the details to figure out the differences between the two poems.”)
- Tell students that they will now participate in a new word game that will introduce them to *temporal* lines used in poems.
- Define *temporal* (about time). Tell students that temporal lines are groups of words that show time.
- Demonstrate each step of the game with two student volunteers:
 1. Tell students they will be assigned to a group of three (triad). One person will be A, another person B, and the third person C.
 2. Each triad will receive two sets of **temporal line cards**.

3. From the first set, distribute one temporal line card to each person in the triad.
 4. Each person should read and review his or her card.
 5. When every person in the triad is ready, they work together to arrange themselves in order according to their temporal line card. (Example: first, “It is morning”; second, “It is noon”; third, “It is evening.”)
- Repeat the steps above with the second set of temporal line cards.
 - Using a total participation technique, invite responses from the group:
“How will you show your group you are listening to them?” (use eye contact; stay on task)
 - If productive, cue students to listen carefully:
“Who can repeat what your classmate said?” (Responses will vary.)
 - Direct students’ attention to the posted **Working to Become Ethical People anchor chart** and read aloud what is written for *integrity*.
 - Remind students to focus on showing integrity while participating in this new word game. Students should continue to focus on following directions and staying on task.
 - Distribute temporal line cards and move students into pre-determined triads. Invite triads to find a quiet location in the classroom to complete the game.
 - After 5–7 minutes, signal students to stop talking and direct them to return to the whole group gathering area.
 - Using a total participation technique, invite responses from the group:
“What were some of the temporal lines that you heard?” (It is morning. It is noon. It is dusk.)
 - Remind students to keep these temporal lines tucked inside their minds as they prepare to begin writing their “What the Sun Sees” poem.

Meeting Students’ Needs

- To support vocabulary development before students begin the game: Offer cards with a drawing or photograph as a visual cue for each temporal word. (MMR, MME)
- For ELLs: Display all temporal line cards for the game and ask students what they notice about the sentences (they all start with the phrase *it is*). Clarify for students that *it is* in these sentences refers to the time of day: midday, noon, night, etc.
- For ELLs: Display all temporal line cards for the Temporal Line Game. Ask students about the meaning of the temporal line “It is morning.” Draw a picture on the card based on student responses (example: a picture of the sun coming up behind a hill, with an arrow that shows it is coming up). Repeat with the other temporal line cards using the apparent position of the sun in the sky to draw simple pictures that show where the sun can be seen or not seen at that time.

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Refocus students whole group.
- Direct students’ attention to the posted learning targets and read them aloud:

“I can plan my writing by discussing ideas with classmates.”

“I can analyze a model of high-quality work.”

- Invite students to turn and talk with an elbow partner:

“How did your Sky notebook help you begin to plan your ‘What the Sun Sees’ poem?” (It had descriptions of the sun at different times of the day that I already wrote.)

“What criteria should our writing include to make it high quality?” (descriptive details; it should follow conventions)

- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group.
- Refocus students whole group and invite the selected students to share out.
- With excitement, tell students that in the next lesson, they will begin writing their own high-quality “What the Sun Sees” poem.

Meeting Students’ Needs

- For students who may be uncomfortable sharing their own reflections with the entire class: Consider allowing them to share what their partner said so that they still have a chance to speak in front of the class. (MME)
- For ELLs: Ask students whom you invite to share with the whole group to show the descriptions from their Sky notebook they used to begin planning their poem.

Lesson 8: Unit 3 Assessment, Part I: Using Observations of the Sun to Write Narrative Poems

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.

Daily Learning Targets

- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b)
- I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)

Ongoing Assessment

- At the end of Work Times A and B, collect students' "What the Sun Sees" poem verse planner and "What the Sun Sees" poem to serve as work samples demonstrating progress toward W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b.
- During Work Time A, circulate as students discuss and plan their writing with a partner. Use the Speaking and Listening Checklist to monitor progress toward SL.1.4 (see Assessment Overview and Resources). Consider using the Speaking and Listening Checklist again during the Closing as students debrief their feedback experience.

Agenda

1. Opening

- A. Engaging the Learner: "Sun" Song (5 minutes)

2. Work Time

- A. Preparing for Independent Writing: "What the Sun Sees" Poem, Verse 1 (15 minutes)
- B. Unit 3 Assessment, Part I: "What the Sun Sees" Poem, Verse 1 (20 minutes)
- C. Peer Feedback: "What the Sun Sees" Poem, Verse 1 (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson is the first of three during which students plan and write a new narrative poem. During Work Time, students use resources from past lessons to plan, write, and give feedback to a peer on verse 1 of their “What the Sun Sees” poem. Verse 1 serves as Part I of the Unit 3 Assessment (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b). It is crucial that students complete this part of the assessment before moving on. If necessary, build in extra writing time in the day or consider adding another writing lesson before moving on to Lesson 9.
- During this unit, students build their understanding of the process of giving feedback. There is less concern for the content of the feedback during this unit and a prioritized focus on the feedback being specific, kind, and helpful (W.1.5).

How this lesson builds on previous work:

- In Lessons 4–5, students helped plan and write the “What the Moon Sees” poem, which served as a class model for how to write a narrative poem. For the Unit 3 assessment, students will closely follow a similar process for planning and writing their “What the Sun Sees” poem.
- In Lesson 7, students analyzed the “What the Moon Sees” example and compared it against the criteria on the High-Quality Work anchor chart. This analysis served to help focus students on criteria for high-quality writing as they begin to independently write their “What the Sun Sees” poem.
- Similar to Lesson 5, this lesson includes giving kind and specific feedback to a partner, but in today’s lesson students will focus their feedback on the criteria for high-quality work.
- As they begin to write about what the sun “sees,” students will again have an opportunity to grapple with the idea of personification, as they did in previous lessons.

Areas in which students may need additional support:

- Students may need additional time to complete verse 1 of their narrative poem. Reallocate instructional time to provide more time for the assessment as necessary.
- Some students may need additional support completing the independent writing portion of the Unit 3 Assessment. Consider providing those students with a written sentence frame for each verse (e.g., “It is _____. The _____ sun is _____. The sun sees _____.”)
- For students who encounter a very high level of frustration with writing, consider offering support before the assessment or in a private location during the independent writing time. Invite struggling writers to orally process each sentence aloud and, if needed, take dictation for all or part of the piece. Although not a valid measure of the students’ ability to write a narrative poem, this scaffolded assessment will provide valuable evidence of their ability to apply what they have learned in this module.
- Some students may find it difficult to transfer the planning from their “What the Sun Sees” poem verse planner to the “What the Sun Sees” poem. Consider having models available that show how the class transferred the information from the “What the Moon Sees” poem verse planner to the “What the Moon Sees” poem. You might also consider offering support in a small group setting to re-model this process.

Down the road:

- Students will complete Parts II and III of the Unit 3 Assessment in Lessons 9–10.
- Consider keeping the same partners for the planning part of the poem in Lessons 9–10.
- During Lessons 9–11, students are reintroduced to activities that they learned in Units 1 and 2. Students will review and practice each of the activities in preparation for the end of module celebration in Lesson 13.

In advance:

- Strategically pair students for Work Time A. Consider keeping the same partnerships across Lessons 8–10.
- Distribute materials for Work Time B at student workspaces to ensure a smooth transition.
- Prepare the Unit 3 Assessment (see Assessment Overview and Resources).
- Review the Pinky Partners and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, “Sun, Moon, and Stars” song, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students singing the “Sun, Moon, and Stars” song in Unit 1, play this recording for them to join in with.
- Work Time A: Create the Time of Day anchor chart, Adjectives anchor chart, and What the Sun Sees anchor chart in an online format, such as a Google Doc, for display and for families to access at home to reinforce these skills.
- Work Time A: Students complete the “What the Sun Sees” poem verse planner using a word-processing tool, such as a Google Doc.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.10 and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in Lessons 4–6. Students use a planner like the one they used to plan for writing in those lessons, and they also use familiar resources during the assessment (“What the Sun Sees” anchor chart, “What the Moon Sees” class poem, Adjectives anchor chart, Time of Day anchor chart, and Sky notebook).
- Consider allowing time for students to review the language in the “What the Sun Sees” anchor chart, Adjectives anchor chart, and Time of Day anchor chart.
- The assessment may be challenging for ELLs, because it is a big leap from the heavily scaffolded lessons. ELLs will be asked not only to independently apply writing skills developed throughout the unit, but to use resources as well.

- Make sure ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the writing skill being assessed. See additional support in the lesson.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** Developing spellers will benefit from environmental support to sound out words in their writing. Some students may need explicit prompting to use environmental print when they cannot recall letter sounds or sight words. When modeling writing, emphasize process and effort by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print.
- **Multiple Means of Action & Expression (MMAE):** Because this is an assessment, all students need to complete the writing of verse 1 in Work Time B. However, consider flexible technologies to support the writing process. Consider offering high-tech options such as a word processor or a dictation device or low-tech options such as pencil grips or slanted desks to help with fine motor needs.
- **Multiple Means of Engagement (MME):** Some students may require support with limiting distractions during the assessment (e.g., using sound-canceling headphones or dividers between workspaces). Similarly, some students may require variations in time for the assessment. Consider breaking the assessment into more manageable parts and offering breaks at certain times. During the assessment, provide scaffolds that support executive function skills, self-regulation, and students' ability to monitor progress before and after the assessment (e.g., visual prompts, reminders, checklists, or rubrics).

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- criteria, illustration, feedback (L)

Review:

- adjective (L)

Materials

- ✓ "Sun, Moon, and Stars" song (from Unit 1, Lesson 3; one to display)
- ✓ "What the Sun Sees" verse planner (one per student and one to display)
- ✓ Time of Day anchor chart (begun in Lesson 4)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4)
- ✓ What the Sun Sees anchor chart (begun in Lesson 4)

- ✓ Sky notebook (completed in Unit 2; one per student)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ “What the Moon Sees” verse planner example (one to display)
- ✓ “What the Moon Sees” example (from Lesson 7; one to display)
- ✓ “What the Sun Sees” poem (one per student and one to display; see Assessment Overview and Resources)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ Pencils (one per student)
- ✓ Working to Become Ethical People anchor chart (begun in Unit 1, Lesson 4)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)
- ✓ Think-Pair-Share Protocol anchor chart (begin in Module 1)

Opening

A. Engaging the Learner: “Sun, Moon, and Stars” Song (5 minutes)

- Invite students to the whole group area.
- Remind students that throughout Unit 1, they learned two songs about the sun and moon. Tell them that now they will get to review and practice singing the “Sun, Moon, and Stars” song in preparation for the end of module celebration.
- Direct students’ attention to the **“Sun, Moon, and Stars” song**.
- Using a total participation technique, invite responses from the group:

“What is the ‘Sun, Moon, and Stars’ song about?” (It’s about the position and description of the sun at different parts of the day.)

“What are some accompanying movements that we used as we sang the song?” (Answers will vary, but may include: beginning with their arms straight in the air, centered above their heads and slowly having their arms and fist lower to show the sun sinking lower.)
- Invite students to quietly and quickly stand up.
- Invite students to join you in singing the “Sun, Moon, and Stars” and completing the accompanying movements.
- Repeat the song one or two times as time permits.

Meeting Students’ Needs

- Provide options for physical movement as students sing the “Sun” song. (Example: Invite students to join in singing with movements as appropriate from a seated position.) (MMAE)
- For ELLs: Identify students who might be mouthing the words or not singing while the class sings chorally. If students seem to be avoiding singing, encourage them to sing without pressuring them. If students are comfortable, invite them to sing “duets” with more confident students so they can more easily hear themselves as they practice.

Work Time

A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 1 (15 minutes)

- Refocus students whole group.
- Remind students that earlier in the unit, they wrote a poem that personified the moon.
- Tell students that today they will begin to plan and write their “What the Sun Sees” poem that describes what the sun might “see” at different times of day.
- Display the **“What the Sun Sees” verse planner**.
- Tell students that now they will work with a partner to begin planning the first verse of their “What the Sun Sees” poem using the “What the Sun Sees” verse planner.
- Point to the heading that says “Verse 1” and read each question in Column 1 aloud:
 - “What time is it?”
 - “What does the sun look like?”
 - “What is the sun doing?”
 - “What does the sun see?”
- Tell students that they will work with a partner to discuss each of these questions.
- Prompt students to use their resources as support:
 - **Time of Day anchor chart** to help them find words to describe a particular time of day
 - **Adjectives anchor chart** to help them find words to describe what the sun looks like during a particular time of day
 - **What the Sun Sees anchor chart** to help them find words to describe what the sun “sees” at a particular time of day
 - The pages in their **Sky notebook** that describe the sun in the morning
- Distribute Sky notebooks and “What the Sun Sees” verse planners.
- Move students into pre-determined pairs. Invite pairs to find a quiet location to discuss the questions on the verse planner for verse 1.
- Circulate and support students to reference their notebooks and the various anchor charts. Prompt students with questions such as:
 - “What time of day will you write about?”***
 - “What adjectives describe the sun at this time of day?”***
 - “What is the sun doing at this time of day?”***
 - “What does the sun ‘see’ at this time of day?”***
- Consider using the **Speaking and Listening Checklist** to track students’ progress towards the targeted standard.
- After 5–7 minutes, refocus students whole group. Using a total participation technique, invite responses from the group:
 - “What time of day will your first verse be about?” (morning)***
 - “What does the sun ‘see’ at this time of day?” (The sun sees me waking up.)***
- Again, display the “What the Sun Sees” verse planner and tell students that they will now have a chance to independently capture their thinking for verse 1 on the “What the Sun Sees” verse planner.

- Direct students' attention to Verse 1 and review the prompt questions as necessary.
- Point to the box below the prompt questions. Tell students that after they are done writing an answer to each of the questions, they should draw a quick sketch in the box that shows the location and description of the sun at the specific time.
- Transition students to their workspaces and invite them to begin writing and drawing.
- Circulate and support students as necessary. Prompt students to use the Time of Day anchor chart, Adjectives anchor chart, What the Sun Sees anchor chart, and their Sky notebooks as resources as they write.
- When 1 minute remains, signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Tell students that they will use this verse planner as they begin to write the first verse of their poem in the next part of the lesson.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided "What the Sun Sees" verse planner to help students know what to record. (MMAE)
- For ELLs: If students are paired with a partner of a more advanced proficiency level, consider changing partners so students are placed in pairs of similar proficiency. This will foster independence while providing the opportunity to assess whether they are ready to move on to writing.
- For ELLs: Remind students that the sun doesn't actually "see" but that the author of the poem chose to use this to make his writing more interesting. Tell students they will get to try this in their own writing.

Work Time

B. Unit 3 Assessment, Part I: "What the Sun Sees" Poem, Verse 1 (20 minutes)

- Refocus students whole group.
- Direct students' attention to the posted learning targets and read the first one aloud:
"I can write a narrative poem based on a model and using evidence."
- Tell students that their narrative poem will be three verses long and will describe what the sun might "see" at different times of day.
- Right now, students will begin writing verse 1 of their poem, using their verse planner as research and the "What the Moon Sees" class poem as a model for their writing.
- Display the **"What the Moon Sees" verse planner example** and **"What the Moon Sees" example**.
- Using a total participation technique, invite responses from the group:
"What is different between the 'What the Moon Sees' verse planner and the final 'What the Moon Sees' poem?" (The final poem doesn't have prompts or questions. The final poem is written out in complete sentences.)
- Display the **"What the Sun Sees" poem**.

- Tell students that now they will take the information from their “What the Sun Sees” verse planner and write verse 1 of their “What the Sun Sees” poem.
- Direct students’ attention to the posted **High-Quality Work anchor chart** and read aloud the criteria for high-quality work.
- Invite students to turn and talk with an elbow partner:
*“What is one thing that you are going to focus on to make your writing high quality?”
 (make sure I have descriptive details; make sure I write neatly and spell high-frequency words correctly)*
- Point out the “What the Sun Sees” poem sheets and **pencils** already at the workspaces, transition students to their workspaces, and invite them to begin working.
- Remind students to use their “What the Sun Sees” verse planner to help them write verse 1 and to write using complete sentences and correct punctuation.
- Circulate and support students as necessary. Encourage them to use classroom resources (Word Walls, high-frequency word lists, and alphabet or letter sound combination charts).
- When 1 minute remains, signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Collect students’ “What the Sun Sees” poems and tell them they will complete the remaining verses during the next two lessons.

Meeting Students’ Needs

- Before students begin the Unit 3 Assessment, emphasize process and effort by discussing the purpose of assessments. Say: “What we are doing today is similar to the poem writing from previous lessons, but this is called an *assessment*. The purpose of an assessment is to help me know what you are learning and how well I’m teaching you. Give your best effort!” (MME)
- For ELLs: Consider having students paraphrase what they need to do to meet the learning target. Make sure they understand what evidence they will use to write the poem.
- For ELLs: If students can’t complete the work independently, consider providing them with a written sentence frame: “It is _____. The _____ sun is _____. The sun sees _____.” Allow time for students to grapple with completing this independent writing portion of the Unit 3 Assessment before providing the support. Grappling will help students build independence and offer an opportunity to assess what they are able to do independently.

Work Time

C. Peer Feedback: “What the Sun Sees” Poem, Verse 1 (15 minutes)

- Invite students to join in giving some silent applause for their hard work today as writers!
- Direct students’ attention to the posted learning targets and read the second one aloud:
“I can provide kind, helpful, and specific feedback to my classmates.”
- Tell students that giving feedback to classmates is a new skill that they are learning and is one way to ensure that their work is high quality.

- Tell them that they are now going to share their poems with a partner and give feedback to their partner about his or her poem.
- Tell students that today when a partner shares his or her work, they are going to give *kind, helpful, and specific feedback*. That is feedback that tells the writer one thing that he or she did a good job with in the writing and one thing he or she could do a better job with, while still being kind.
- Direct students' attention to the posted **Working to Become Ethical People anchor chart** and read aloud what is written for *respect*. Remind students to focus on showing respect while giving feedback.
- Remind students that they have all worked hard on their writing, and it is important to remember that when they are giving feedback so they don't hurt people's feelings. It is also important to remember that we all have ways in which our writing could be better. Tell students that you are going to model giving helpful and specific feedback to a classmate, and you want them to watch how the feedback is helpful AND kind.
- Invite a student volunteer to help you model giving kind, specific, and helpful feedback:
 1. Invite the student volunteer to share his or her work with you.
 2. Model giving kind feedback by pointing out something that your partner did well using the sentence frame: "You did a good job of _____."
 3. Model giving helpful and specific feedback by pointing out something you think the partner could add to or change about the verse using the sentence frame: "I think you should _____ because _____."
 4. Model referring to the **High-Quality Work anchor chart** to provide the criteria for your feedback.
 5. Thank your partner for sharing his or her work with you.
- Using a total participation technique, invite responses from the group:

***"What did you notice about the way I gave feedback to my partner on his/her writing?"
(You were nice about it; you pointed out something specific; you suggested something your partner could change.)***

- Tell students that they will now use the Pinky Partners protocol to share their work and give feedback to a partner. Remind them that they used this protocol in Unit 2 and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol, encouraging them to use the following frames:
 - "You did a good job of _____."
 - "I think you should _____ because _____."
- Circulate as students share and prompt them to use the criteria on the High-Quality Work anchor chart when providing feedback. Take note of how students are interacting with one another using the **Speaking and Listening Checklist**.
- Remind students to make a bridge with their arms after both partners have shared.
- After both partners have shared and offered feedback, refocus students whole group.

Meeting Students' Needs

- For ELLs: Consider inviting an ELL student volunteer to help you model giving kind, specific, and helpful feedback using think-aloud, the Peer Feedback sentence starters and the High-Quality Work anchor chart.
- For students who may need additional support with auditory processing: Display a checklist for peer feedback. Example:
 - Be kind.
 - Point out something specific.
 - Suggest something your partner could change. (MMR)

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Offer students specific positive feedback on their conversations giving feedback to one another. (Example: “I heard Lupe giving Steven kind feedback. She told him that he did a good job of describing the morning sun with lots of details, and she suggested that he become more specific about what the sun ‘sees’ at morning time.”)
- Remind students that throughout this unit, they are learning and practicing how to give and receive feedback that is kind, helpful, and specific.
- Tell students they are going to use the Think-Pair-Share protocol to reflect on how well they gave and received feedback in this lesson. Remind them that they used this protocol in many previous lessons and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite partners to Think-Pair-Share with an elbow partner:
 - “How did you do giving and receiving feedback?” (Responses will vary.)*
 - “What worked well?” (Responses will vary.)*
 - “What could you improve?” (Responses will vary.)*
- As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group. Document progress toward SL.1.4 using the Speaking and Listening Checklist.
- Remind students to make a bridge with their arms after both partners have shared.
- Gather students back together and invite the selected students to share with the whole group.
- Remind students that they will continue to reflect on the process of giving feedback over the next several lessons.

Meeting Students' Needs

- After students share their reflections, foster a sense of community and provide options for physical action by inviting students to give themselves a special applause. (MME)
- For ELLs: Consider making a T chart to capture students' ideas of “what worked well” and “what I could improve” that students could refer to and also add to as they continue to reflect on the process of giving feedback over the next several lessons.

Lesson 9: Unit 3 Assessment, Part II: Using Observations of the Sun to Write Narratives

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.

Daily Learning Targets

- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b)
- I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)

Ongoing Assessment

- At the end of Work Times A and B, collect students' "What the Sun Sees" verse planner and "What the Sun Sees" poem to serve as work samples demonstrating progress toward W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b.
- During Work Time A, circulate as students discuss and plan their writing with a partner. Use the Speaking and Listening Checklist to monitor progress toward SL.1.4 (see Assessment Overview and Resources). Consider using the Speaking and Listening Checklist again during Work Time C and the Closing as students participate in and debrief a peer feedback experience.

Agenda

1. Opening

- A. Engaging the Learner: "Sun, "Moon, and Stars" Song (5 minutes)

2. Work Time

- A. Preparing for Independent Writing: "What the Sun Sees" Poem, Verse 2 (15 minutes)
- B. Unit 3 Assessment, Part II: "What the Sun Sees" Poem, Verse 2 (20 minutes)
- C. Peer Feedback: "What the Sun Sees" Poem, Verse 2 (15 minutes)

3. Closing and Assessment

- A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson is the second of three during which students create a narrative poem. It follows a similar structure to Lesson 8. During Work Time, students use resources from past lessons to plan, write, and give feedback to a peer on verse 2 of their “What the Sun Sees” poem. Verse 2 serves as Part II of the Unit 3 Assessment (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b). It is crucial that students complete this part of the assessment before moving on. If necessary, build in extra writing time in the day or consider adding another writing lesson before moving on to Lesson 10.

How this lesson builds on previous work:

- As in Lesson 8, students plan with a partner, plan independently, and independently write for the Unit 3 Assessment portion of this lesson.
- Students continue to practice giving kind and specific feedback to a partner.

Areas in which students may need additional support:

- Students may need additional time to complete verse 2 of their narrative poem. Reallocate instructional time to provide more time for the assessment as necessary.
- Some students may need additional support completing the independent writing portion of the Unit 3 Assessment. Consider providing them with a written sentence frame for each verse: “It is _____. The _____ sun is _____. The sun sees _____.”
- Some students may need additional support providing specific feedback during Work Time C. Consider providing and posting sentence frames: “You did a good job of _____.” “I think you should _____.”

Down the road:

- Students will complete Part III of the Unit 3 Assessment in Lesson 10.
- Consider keeping the same partners for the planning part of Work Time A in Lesson 10.
- During Lessons 10–11, students are reintroduced to the Sun and Moon Movement routines that they learned in Units 1–2. Students will review and practice each of these movements in preparation for the end of module celebration in Lesson 13.
- Between Lessons 10 and 11, allow time to give students feedback on their “What the Sun Sees” poems (see High-Quality Narrative Poem Checklist material in Lesson 10).

In advance:

- Distribute materials for Work Time B at student workspaces to ensure a smooth transition.
- Review the Pinky Partners and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, “Sun, Moon, and Stars” song, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students singing the “Sun, Moon, and Stars” song in Unit 1, play this recording for them to join in with.
- Work Time C: Video-record students participating in the Pinky Partners protocol to watch with students later to evaluate strengths and areas for improvement. Post it on a teacher web page or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.10 and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in Lessons 4–6. Students use a planner like the one they used to plan for writing in those lessons, and they also use familiar resources during the assessment (“What the Sun Sees” anchor chart, “What the Moon Sees” class poem, Adjectives anchor chart, Time of Day anchor chart, and Sky notebook).
- The assessment may be challenging for ELLs, because it is a big leap from the heavily scaffolded lessons. ELLs will be asked not only to independently apply writing skills developed throughout the unit, but to use resources as well.
- Consider allowing time for students to review the language in the “What the Sun Sees” anchor chart, Adjectives anchor chart, and Time of Day anchor chart.
- Make sure ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the writing skill being assessed. See additional support in the lesson.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** To get the most informative data from the assessment, ensure that all students have access to the directions and feel comfortable with the expectations. Vary the ways in which you convey expectations for each step in the assessment. Consider engaging in a clarifying discussion about the directions or creating an outline of the steps for Work Time B.
- **Multiple Means of Action & Expression (MMAE):** Because this is an assessment, all students plan and write verse 2 in Work Times A and B. However, consider flexible technologies to support the writing process. Consider offering high-tech options such as a word processor or a dictation device or low-tech options such as pencil grips or slanted desks to help with fine motor needs.

- **Multiple Means of Engagement (MME):** Some students may require support with limiting distractions during the assessment (e.g., using sound-canceling headphones or dividers between workspaces). Similarly, some students may require variations in time for the assessment. Consider breaking the assessment into more manageable parts and offering breaks at certain times. During the assessment, provide scaffolds that support executive function skills, self-regulation, and students' abilities to monitor progress before and after the assessment (e.g., visual prompts, reminders, checklists, or rubrics).

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- adjective, criteria, illustration, feedback (L)

Materials

- ✓ "Sun, Moon, and Stars" song (from Unit 1, Lesson 43; one to display)
- ✓ "What the Sun Sees" verse planner (begun in Lesson 8; added to during Work Time A; one per student)
- ✓ Time of Day anchor chart (begun in Lesson 4)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4)
- ✓ What the Sun Sees anchor chart (begun in Lesson 4)
- ✓ Sky notebook (completed in Unit 2; one per student)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ "What the Sun Sees" poem (begun in Lesson 8; added to during Work Time B; one per student; see Assessment Overview and Resources)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ Think-Pair-Share Protocol anchor chart (begin in Module 1)

Opening

A. Engaging the Learner: "Sun, Moon, and Stars" Song (5 minutes)

- Invite students to the whole group area.
- Display the "Sun, Moon, and Stars" song.
- Invite students to quietly and quickly stand up.

- Invite students to join you in singing the “Sun, Moon, and Stars” song and completing the accompanying movements.
- Repeat the song one or two times as time permits.

Meeting Students' Needs

- Provide options for physical movement as students sing the “Moon” song. (Example: Invite students to join in singing with movements as appropriate from a seated position.) (MMAE)
- For ELLs: Identify students who might be mouthing the words or not singing while the class sings chorally. If students seem to be avoiding singing, encourage them to sing without pressuring them. If students are comfortable, invite them to sing “duets” with more confident students so they can more easily hear themselves as they practice.

Work Time

A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 2 (15 minutes)

- Refocus students whole group.
- Remind them that yesterday they began writing the first verse of their “What the Sun Sees” poem. Today they will work with the same partner to plan the second verse.
- Display the **“What the Sun Sees” verse planner** and focus students on page 2. Review each prompt question by reading them aloud.
- Remind students that they will first work with a partner to discuss each of these questions.
- Prompt students to use their resources as support:
 - **Time of Day anchor chart**
 - **Adjectives anchor chart**
 - **What the Sun Sees anchor chart**
 - Pages in their **Sky notebook** that describe the sun at midday
- Distribute Sky notebooks and “What the Sun Sees” verse planners.
- Move students into pre-determined pairs and invite pairs to find a quiet location to plan together.
- Circulate and support students to reference their notebooks and the various anchor charts.
- Consider using the Speaking and Listening Checklist to track students’ progress towards the targeted standard.
- After 5–7 minutes, refocus whole group. Using a total participation technique, invite responses from the group:
 - “What time of day will your second verse be about?” (It’s going to be about lunchtime.)***
 - “What does the sun ‘see’ at this time of day?” (The sun sees kids playing on the playground at recess.)***
- Tell students that now they will have a chance to independently capture their thinking for verse 2 on the “What the Sun Sees” verse planner.

- Transition students to their workspaces and invite them to begin working.
- Circulate and support students to reference their notebooks and the various anchor charts.
- When 1 minute remains, signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Tell students that they will use this verse planner as they begin to write the second verse of their poem.

Meeting Students' Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided "What the Sun Sees" verse planner to help students know what to record. (MMAE)
- For ELLs: Some students might not remember how to use each resource during the assessment. Consider quickly reviewing as a class. Examples:
 - "What can the Time of Day anchor chart help you with?" (find words to describe a particular time of day)
 - "What can the Adjectives anchor chart help you with?" (find words to describe what the sun looks like during a particular time of day)
 - "What can the What the Sun Sees anchor chart help you with?" (find words to describe what the sun "sees" at a particular time of day)
 - "What can the pages you marked in your Sky notebook help you with?" (tell what the sun is doing at that time of day)
- For ELLs: Some students might find it difficult to transfer the information from their Sky notebook to their Verse 2 planner. As students share with a partner, prompt them to reference their Sky notebook and verbalize what information they will use. (Example: "What time of day are you writing about in your second verse?" "What does the sun look like at that time of the day?" "Can you show me a picture in your Sky notebook of what the sun looks like?")

Work Time

B. Unit 3 Assessment, Part II: "What the Sun Sees" Poem, Verse 2 (20 minutes)

- Refocus students whole group.
- Tell students that today they will write verse 2 of their poem, describing what the sun might "see" during a different time of day.
- Direct students' attention to the posted learning targets and read the first one aloud:

"I can write a narrative poem based on a model and using evidence."
- Invite students to turn and talk with an elbow partner:

"How did you use your research about the sun to help you write your poem?" (My verse planner and my Sky notebook helped me find adjectives to describe the sun.)

"What did you need to remember when writing the first verse of your 'What the Sun Sees' poem?" (We need to write the poem in complete sentences and make sure we include all of the information on the verse planner in our poem.)
- Display the **"What the Sun Sees" poem.**

- Remind students to use their “What the Sun Sees” verse planner to help them write verse 2 using complete sentences and correct punctuation.
- Invite students to begin writing and circulate to support them as necessary.
- When 1 minute remains, signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Remind students that they will complete the last verse and the closing during the next lesson.

Meeting Students' Needs

- To minimize distractions as students write independently, provide tools such as sound-canceling headphones or individual dividers. (MME)
- For ELLs: Consider having students paraphrase what they need to do to meet the learning target. Make sure they understand what evidence they will use to write the poem.
- For ELLs: If students can't complete the work independently, consider providing students with a written sentence frame for the second verse: “It is _____. The _____ sun is _____. The sun sees _____.” Allow time for students to grapple with completing this independent writing portion of the Unit 3 Assessment before providing this support. Grappling will help students build independence and offer an opportunity to assess what they are able to do independently.

Work Time

C. Peer Feedback: “What the Sun Sees” Poem, Verse 2 (15 minutes)

- Offer students specific, positive feedback on their focus when writing verse 2 of their poems. (Example: “I noticed that Emily took time to describe what the sun looked like at midday with descriptive adjectives. I noticed that she referenced the Adjectives anchor chart to get suggestions for adjectives to use in her verse.”)
- Direct students to the posted learning targets and read the second one aloud:
“I can provide kind, helpful, and specific feedback to my classmates.”
- Tell the writers that today they will share verse 2 of their poem with a partner.
- Remind students that when a partner shares his or her work, they are going to give *kind, helpful and specific feedback*. This feedback should include one thing the writer did a good job of in the writing and one thing that they might want to consider revising, while still being kind.
- Remind students that they have all worked very hard on their writing, and it is important to show respect to their partner when they are giving feedback.
- Tell students that they are going to use the Pinky Partners protocol to provide feedback to a partner on verse 2. Remind them that they used this protocol in Lesson 8 and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol, encouraging them to use the following frames:
 - “You did a good job of _____.”
 - “I think you should _____ because _____.”

- Circulate as students share; prompt them to use the criteria on the **High-Quality Work anchor chart** when providing feedback. Take note of how students are interacting with one another using the Speaking and Listening Checklist.
- Refocus whole group and tell students that they will continue practicing giving kind, helpful, and specific feedback to each other in the next lesson.

Meeting Students' Needs

- For students who may need additional support with auditory processing: Display a checklist for peer feedback. Example:
 - Be kind.
 - Point out something specific.
 - Suggest something your partner could change. (MMR)

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Offer students specific, positive feedback on their conversations giving feedback to one another. (Example: “I heard Ty giving Jamal helpful feedback. He told him that he did a good job of describing the midday sun with lots of details, and he suggested that Jamal go back to check his poem for correct punctuation because some of his sentences did not end with a period.”)
- Tell students they again will use the Think-Pair-Share protocol to reflect on how well they gave and received feedback in this lesson. Remind them that they used this protocol in many previous lessons and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to Think-Pair-Share with an elbow partner:
 - “How did you do giving and receiving feedback?” (Responses will vary.)*
 - “What worked well?” (Responses will vary.)*
 - “What could you improve?” (Responses will vary.)*
- As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group. Document progress toward SL.1.4 using the Speaking and Listening Checklist.
- Refocus whole group and remind students that they will continue to reflect on the process of giving feedback in the next lesson.

Meeting Students' Needs

- For students who may feel uncomfortable sharing their reflections with the whole group: Minimize discomfort and/or perceived threats by alerting individual students that you are going to call on them next. (MME)
- For ELLs: Consider giving feedback on what an ELL student did well. This will help enable the student to identify and repeat his or her success next time.

Refer to the Assessment Overview and Resources for supporting materials for this lesson.

Lesson 10: Unit 3 Assessment, Part III: Using Observations of the Sun to Write Narrative Poems

CCS Standards

- **W.1.3:** Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
- **W.1.8:** With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

Daily Learning Targets

- I can write a narrative poem based on a model and using evidence. (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b)
- I can provide kind, helpful, and specific feedback to my classmates. (W.1.5, SL.1.4)

Ongoing Assessment

- At the end of Work Times A and B, collect students' "What the Sun Sees" verse planner and "What the Sun Sees" poem to serve as work samples demonstrating progress toward W.1.3, W.1.8, L.1.1f, L.1.1j, and L.1.2b.
- During Work Time A, circulate as students discuss and plan their writing with a partner. Use the Speaking and Listening Checklist to monitor progress toward SL.1.4 (see Assessment Overview and Resources). Consider using the Speaking and Listening Checklist again during Work Time C and the Closing as students participate in and debrief a peer feedback experience.

Agenda

1. Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

2. Work Time

A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes)

B. Unit 3 Assessment, Part III: “What the Sun Sees” Poem, Verse 3 and Closing (20 minutes)

C. Peer Feedback: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes)

3. Closing and Assessment

A. Reflecting on Learning (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This is the final lesson in a series of three in which students write a narrative poem. It follows a similar structure to Lessons 8–9. Students plan, write, and give feedback on verse 3 and the closing of their poem. This serves as the final part of the Unit 3 Assessment (W.1.3, W.1.8, L.1.1f, L.1.1j, L.1.2b).

How this lesson builds on previous work:

- During Work Time B, students revisit the “What the Moon Sees” example to analyze the closing sentence of the poem.
- Similar to Lessons 8–9, during Work Time C, students give kind and specific feedback to their classmates based on the writing they have done during this lesson (W.1.5). This lesson’s feedback is specifically grounded in criteria from the High-Quality Work anchor chart.

Areas in which students may need additional support:

- Students may need additional time to complete verse 3 of their narrative poem. Reallocate instructional time as necessary.
- Some students may need additional support completing the independent writing portion of the Unit 3 Assessment. Consider providing those students with a written sentence frame for each verse: “It is _____. The _____ sun is _____. The sun sees _____.”
- Some students may need additional support providing specific feedback during Work Time C. Consider providing and posting sentence frames for students to reference: “You did a good job of _____.” “I think you should _____.”

Down the road:

- In Lesson 11, students will revise and edit their “What the Sun Sees” poem using feedback from the teacher. Prepare feedback for each student using the High-Quality Narrative Poem Checklist.
- In Lesson 11, students will examine a teacher model and learn steps for revising and editing their own writing.

- In Lesson 12, students will practice sharing their “What the Sun Sees” poems for the celebration of learning in Lesson 13.
- In Lesson 13, students will share learning from all three units during the end of module celebration. Consider extending invitations to the principal, families, community members, and other teachers and their classes to attend.

In advance:

- Distribute materials for Work Time B at student workspaces to ensure a smooth transition.
- Review the Pinky Partners and Think-Pair-Share protocols. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, Sun Movement chart, and applicable anchor charts (see materials list).

Technology & Multimedia

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students participating in the Sun Movement routine in Unit 1, play this video to remind them of what to do.
- Work Time C: If students were recorded during Work Time C in Lesson 9, consider replaying the recording to remind them of the process.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.10, 1.II.B.4

Important points in the lesson itself:

- The basic design of this lesson supports ELLs by inviting them to complete assessment tasks similar to the classroom tasks completed in Lessons 4–6. Students use a planner like the one they used to plan for writing in those lessons and they also use familiar resources during the assessment (“What the Sun Sees” anchor chart, “What the Moon Sees” class poem, Adjectives anchor chart, Time of Day anchor chart, and Sky notebook).
- Consider allowing time for students to review the entries they chose from their Sky notebook to describe the sun at different parts of the day as well as the language in the “What the Sun Sees” anchor chart, Adjectives anchor chart, and Time of Day anchor chart.
- The assessment may be challenging for ELLs, because it is a big leap from the heavily scaffolded lessons. ELLs will be asked not only to independently apply writing skills developed throughout the unit, but to use resources as well.
- Make sure ELLs understand the assessment directions. Answer their questions, refraining from supporting them with the writing skill being assessed. See additional support in the lesson.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** Developing spellers will benefit from environmental support to sound out words in their writing. Some students may need explicit prompting to use environmental print when they cannot recall letter sounds or sight words. As you model writing, emphasize process and effort by modeling how to sound out a word with tricky spelling and demonstrate how to use environmental print.
- **Multiple Means of Action & Expression (MMAE):** As students begin independent writing, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). Some students may forget their sentence ideas once they begin directing their efforts toward writing. Support strategy development by modeling how to physically touch the words/spaces on the sentence frame and draw lines for additional words you intend to write. This helps students recall their original ideas throughout the writing process.
- **Multiple Means of Engagement (MME):** Although holding high expectations is important, be aware that sometimes these expectations can raise student anxiety. During the assessment, emphasize the importance of process and effort by discussing how even when you try your best and give your best effort, you can sometimes get stuck as you think of what you want to write, and that is okay. Support development of problem-solving skills and sustained engagement by offering explicit scaffolding for what to do when you get stuck. (Example: “When I get stuck in my writing, sometimes I feel like I just want to rush or give up. But I can remember that I can take a deep breath and relax, then go back to my writing and give my best effort.”)

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

- N/A

Materials

- ✓ Sun Movement chart (from Unit 1, Lesson 2; one to display)
- ✓ “What the Sun Sees” verse planner (begun in Lesson 8; added to during Work Time A; one per student)
- ✓ “What the Moon Sees” example (from Lesson 7; one to display)
- ✓ Sky notebook (completed in Unit 2; one per student)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)

- ✓ Time of Day anchor chart (begun in Lesson 4)
- ✓ Adjectives anchor chart (begun in Unit 2, Lesson 4)
- ✓ What the Sun Sees anchor chart (begun in Lesson 4)
- ✓ “What the Sun Sees” poem (begun in Lesson 8; added to during Work Time B; one per student)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)
- ✓ Think-Pair-Share Protocol anchor chart (begin in Module 1)

Opening

A. Engaging the Learner: Sun Movement Routine (5 minutes)

- Invite students to the whole group area.
- Remind students that throughout Unit 1, they learned a series of stretches and movements about the sun and moon to energize and activate their bodies. Tell them that today they will review and practice the steps of the Sun Movement routine in preparation for the end of module celebration.
- Direct students’ attention to the **Sun Movement chart** and invite a student volunteer to lead the class through the routine.
- Repeat the process with more student volunteers as time permits.
- Tell students that in the next lesson, they will review and practice the Moon Movement routine.

Meeting Students’ Needs

- Provide options for physical movement during the Sun Movement routine. (Example: Invite students to join in with movements as appropriate from a seated position.) (MMAE)
- For ELLs: Some students might not remember the steps of this routine from Unit 1. Before starting, briefly review some of the verbal directives involved in the Sun Movement routine and how they correspond to the Sun Movement chart before beginning the routine. (Example: “This is how you *crouch down*. Can someone show me what it looks like to *crouch*?”)

Work Time

A. Preparing for Independent Writing: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes)

- Remind students that during the past two lessons, they have written verses 1 and 2 of their poems. Today, they will work with the same partner to plan the third verse and closing.
- Display the **“What the Sun Sees” verse planner** and focus students on page 3. Review each prompt question by reading them aloud.
- Tell students that today they will not only discuss the prompt questions, but will also discuss ideas for the closing of their poem.

- Display the **“What the Moon Sees” example**.
- Move students into pairs and invite them to turn and talk:
“After closely examining the closing sentence of the poem, what ideas do you have for how to end your own poem?” (Responses will vary.)
- Distribute **Sky notebooks** and “What the Sun Sees” verse planners.
- Follow the same process used in Lessons 8–9 to guide students through planning their final verse and closing with their partner. Prompt them to use the following resources as necessary:
 - **Time of Day anchor chart**
 - **Adjectives anchor chart**
 - **What the Sun Sees anchor chart**
 - Pages in Sky notebooks that describe the sun at dusk
- Consider using the Speaking and Listening Checklist to track students’ progress towards the targeted standard
- After 5–7 minutes, refocus students whole group. Using a total participation technique, invite responses from the group:
“What time of day will your third verse be about?” (It’s going to be about dusk.)
“What does the sun ‘see’ at this time of day?” (The sun sees kids getting ready for bed.)
“What is an idea for your closing?” (Day is over, and the sun goes to sleep.)
- Transition students to their workspaces and invite them to begin completing their “What the Sun Sees” verse planner.
- Circulate and support students as necessary.
- When 1 minute remains, signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Tell students that they will use this verse planner as they begin to write the final verse and closing of their poem in the next part of the lesson.

Meeting Students’ Needs

- For students who may need additional support recording their ideas in writing: Provide a partially filled-in or guided “What the Sun Sees” verse planner to help students know what to record. (MMAE)
- For ELLs: Some students might be challenged to have to think on the spot about an idea for how they might end their poem. Support these students by providing time to process ideas orally. Example: “How can you say that day is ending in different ways?” (day ends; the sun sets; day is done; etc.)
- For ELLs: To remind students of the resources available during the assessment, quickly review them by asking volunteers to name them, point to where they are in the room, and tell how each can help write Verse 3. (Example: “I can use the Adjectives anchor chart to find words to describe the sun in the morning, because that is what I am writing about.”)

Work Time

B. Unit 3 Assessment, Part III: “What the Sun Sees” Poem, Verse 3 and Closing (20 minutes)

- Display page 2 of the “**What the Sun Sees**” poem.
- Remind students that in the previous lessons, they wrote verses 1 and 2 of their “What the Sun Sees” poem. Tell students that today they will write the final verse and closing of their poem.
- Using a total participation technique, invite responses from the group:
“When we wrote our poem about the moon, what did you notice about the closing in the ‘What the Moon Sees’ poem?” (The poem doesn’t just end. The moon goes to sleep, and the sun comes up.)
“What do you need to remember as you write the closing?” (I need to make sure the poem feels complete. I need to think about what happens when the sun goes away.)
- Follow the same process used in Lessons 8–9 to guide students through completing verse 3 and the closing at their workspaces. Circulate to support them as they work and refer them to their verse planners and the **High-Quality Work anchor chart** as necessary.

Meeting Students’ Needs

- To minimize distractions as students write independently, provide tools such as sound-canceling headphones or individual dividers. (MME)
- For ELLs: Consider having students paraphrase what they need to do to meet the learning target. Make sure they understand what evidence they will use to write the poem.
- For ELLs: If students can’t complete the work independently, consider providing students with a written sentence frame for the second verse: “It is _____. The _____ sun is _____. The sun sees _____.” Allow time for students to grapple with completing this independent writing portion of the Unit 3 Assessment before providing the support. Grappling will help students build independence and offer an opportunity to assess what they are able to do independently.

Work Time

C. Peer Feedback: “What the Sun Sees” Poem, Verse 3 and Closing (15 minutes)

- Offer specific, positive feedback on students’ planning and writing processes. (Example: “I noticed that Jack took time to describe what the sun looked like at the evening time with descriptive adjectives. I also noticed that he wrote a closing that described what happens at the end of the day.”)
- Tell the writers that today they will share verse 3 and the closing of their poem with a partner using the Pinky Partner protocol. Remind students that they used this protocol in Lessons 8–9 and review using the **Pinky Partners Protocol anchor chart** as necessary. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol using the following sentence frames:
 - “You did a good job of _____.”
 - “I think you should _____ because _____.”

- Circulate as students share; prompt them to use the criteria on the High-Quality Work anchor chart when providing feedback. Take note of how students are interacting with one another using the Speaking and Listening Checklist.
- Refocus whole group and collect students' poems. Share with students that you will spend time reading their poems and will provide kind, helpful, and specific feedback to each student to use during the next lesson.

Meeting Students' Needs

- For students who may need additional support with auditory processing: Display a checklist for peer feedback. Example:
 - Be kind.
 - Point out something specific.
 - Suggest something your partner could change. (MMR)

Closing and Assessment

A. Reflecting on Learning (5 minutes)

- Refocus whole group and offer students specific, positive feedback on their work providing feedback over the past several lessons to one another. (Example: "I heard Angel giving Damien specific feedback on his closing. He told Damien to describe what happens at the very end of the day.")
- Tell students they will again use the Think-Pair-Share protocol to reflect on how well they gave and received feedback in this lesson. Remind them that they used this protocol in many previous lessons and review as necessary using the **Think-Pair-Share Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Invite students to Think-Pair-Share with an elbow partner:
 - "How did you do giving and receiving feedback?"*
 - "What worked well?"*
 - "What could you improve?"*
- As students talk, circulate and listen in. Take note of the ideas students are sharing and target a few students to share out with the whole group. Document progress toward SL.1.4 using the Speaking and Listening Checklist.
- Refocus whole group and tell students that in the next lesson, they will have an opportunity to use the peer feedback from the past several lessons, as well as feedback from the teacher, as they revise and edit their poem.

Meeting Students' Needs

- To foster a sense of community and provide options for physical action after students have completed their work, invite the whole class to join you in a special applause (e.g., silent cheer, firecracker, hip-hip hooray, and high-five a classmate). (MMAE, MME)
- For ELLs: Consider giving feedback on what an ELL student did well. This will help enable the student to identify and repeat his or her success next time.

Refer to the Assessment Overview and Resources for supporting materials for this lesson.

Lesson 11: Unit 3 Performance Task: Revising and Editing My “What the Sun Sees” Poem

CCS Standards

- **W.1.5:** With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.
- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **L.1.1f:** Use frequently occurring adjectives.
- **L.1.1j:** Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
- **L.1.2b:** Use end punctuation for sentences.

Daily Learning Targets

- I can revise my work for details. (W.1.5, L.1.1f, L.1.1j)
- I can edit my work for conventions. (W.1.5, L.1.1j, L.1.2b)

Ongoing Assessment

- As students revise and edit during Work Time C, monitor their progress toward W.1.5 using the Narrative Writing Checklist. At the end of Work Time C, collect students’ poems along with your completed High-Quality Narrative Poem Checklist to serve as work samples demonstrating progress toward W.1.5 (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Engaging the Learner: Moon Movement Routine (5 minutes)

2. Work Time

- A. Reviewing Criteria for High-Quality Work (5 minutes)
- B. Revising and Editing: Using the High-Quality Narrative Poem Checklist (15 minutes)
- C. Revising and Editing: “What the Sun Sees” Poem (30 minutes)

3. Closing and Assessment

- A. Pinky Partners: Sharing Our Work (5 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- In this lesson, students focus on revising their finished poem for details and editing their poem for conventions.
- In Work Time B, students are introduced to the High-Quality Narrative Poem Checklist that is used to give them feedback regarding which parts of their “What the Sun Sees” poem they

will revise and edit. Students watch the teacher model how to use the checklist to identify revisions and edits that need to be made to the draft “What the Sun Sees” poem (W.1.5).

- When modeling how to revise and edit on the “What the Sun Sees” example, consider using white correction tape or white paper to cover the mistakes and to allow space to make corrections directly on the model.

How this lesson builds on previous work:

- In Lessons 8–10, students wrote their “What the Sun Sees” poem. In this lesson, they use teacher feedback to revise and edit their poem to make it clearer and easier to read.
- During this lesson, students again revisit the High-Quality Work anchor chart (introduced in Lesson 3) and compare it to the High-Quality Narrative Poem Checklist that is introduced in today’s lesson.
- In Lessons 8–10, students practiced giving and receiving feedback on their “What the Sun Sees” poems. Many students will use this feedback to revise and edit their poems, but the main focus in terms of applying feedback is on using the teacher’s written feedback found on the High-Quality Narrative Poem Checklist.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may need additional time to revise and edit their entire poem during Work Time C. Consider your students’ comfort and capabilities with this task and reallocate instructional time to provide more time for the task as necessary.
- Some students may find it difficult to revise and edit directly on the “What the Sun Sees” poem template. Consider providing sticky notes and/or correction tape for students to use. If using pencil to correct, encourage students to erase neatly and to erase all pencil marks before correcting.

Down the road:

- In Lesson 12, students will practice sharing their “What the Sun Sees” poems for the celebration of learning in Lesson 13.
- In Lesson 12, students will begin to prepare and collect work from previous units that they will share during the end of module celebration.
- In Lesson 13, students will share learning from all three units during the end of module celebration. If you have not already done so, consider extending invitations to the principal, families, community members, and other teachers and their classes to attend.

In advance:

- Prepare clipboards with students’ “What the Sun Sees” poem and their completed High-Quality Narrative Poem Checklist for distribution in Work Time C.
- Review the Pinky Partners protocol. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Post: Learning targets, Moon Movement chart, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students participating in the Moon Movement routine in Unit 1, play this video for them to remind them of what to do.
- Work Time B: Create the High-Quality Narrative Poem Checklist in an online format, such as a Google Doc, for display and for families to access at home to reinforce these skills.
- Work Time B: Create the “What the Sun Sees” example in an online format, such as a Google Doc, to display.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.10 and 1.II.B.4

Important points in the lesson itself

- The basic design of this lesson supports ELLs by inviting them to apply what they have learned about giving and receiving feedback in previous lessons.
- Consider allowing additional time for students to revise and edit their entire poem during Work Time C.
- The revising and editing process may be challenging for ELLs, as they will need to navigate the High-Quality Work checklist for the first time today and attend to revisions and edits based on the teacher feedback in that form. Likewise, they might not be able to see the reason for the revisions in the teacher’s feedback (how they used adjectives incorrectly or how the descriptions they wrote don’t make sense). See additional support in the lesson.
- Make sure ELLs understand the revision and editing directions and the High-Quality Work checklist. See additional support in the lesson.

Levels of support

For lighter support:

- Consider allowing additional time for students to revise and edit their entire poem during Work Time C.

For heavier support:

- Consider creating a list of the steps students have taken in previous lessons and today as they prepare to write their poem: Interactive Word Wall protocol, analyzing an exemplar, choosing entries that describe the sun at morning, midday, and evening from their Sky notebook, and practicing using temporal lines. Draw a small icon by each and keep displayed to support students as they move into writing their piece as well as to reflect on learning at the end.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** To get the most informative data from the performance task, ensure that all students have access to the directions

and feel comfortable with the expectations. Vary the ways in which you convey expectations for each step in the revision and editing process. Consider engaging in a clarifying discussion about the directions or creating an outline of the steps for Work Time C.

- **Multiple Means of Action & Expression (MMAE):** It can be challenging for students to know how to use tools for revision (eraser, whiteout tape) effectively without removing all their hard work. Before students revise their writing, offer options of tools for this process and model how to use each.
- **Multiple Means of Engagement (MME):** Some students may require support with limiting distractions during the performance task (e.g., using sound-canceling headphones or dividers between workspaces). Similarly, some students may require variations in time to complete the revisions and edits. Consider breaking the task into more manageable parts and offering breaks at certain times. During the performance task, provide scaffolds that support executive function skills, self-regulation, and students' abilities to monitor progress before and after the assessment. For example, visual prompts or reminders that support sustained effort.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

New:

- revise, edit (L)

Materials

- ✓ Moon Movement chart (from Unit 1, Lesson 2; one to display)
- ✓ High-Quality Work anchor chart (begun in Lesson 3)
- ✓ High-Quality Narrative Poem Checklist example (one to display; see Assessment Overview and Resources)
- ✓ “What the Sun Sees” example (one to display)
- ✓ “What the Sun Sees” example (answers, for teacher reference)
- ✓ High-Quality Narrative Poem Checklist (one per student; returned with feedback during Work Time C; see Assessment Overview and Resources)
- ✓ “What the Sun Sees” poem (completed in Lesson 10; revised during Work Time C; one per student)
- ✓ Narrative Writing Checklist (from Lesson 5; for teacher reference; see Assessment Overview and Resources)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)

Opening

A. Engaging the Learner: Moon Movement Routine (5 minutes)

- Invite students to the whole group area.
- Remind them that in the last lesson, they reviewed and practiced the steps of the Sun Movement routine in preparation for the end of module celebration. Today they will review and practice the steps of the Moon Movement routine.
- Display the **Moon Movement chart** and invite student volunteers to lead the class through the Moon Movement routine as time permits.
- Tell students that they will get to display both movement routines at the end of module celebration.

Meeting Students' Needs

- Provide options for physical movement during the Moon Movement routine. (Example: Invite students to join in with movements as appropriate from a seated position.) (MMAE)
- For ELLs: Some students might not remember the steps of this routine from Unit 1. Before starting, briefly review some of the verbal directives involved in the Moon Movement routine and how they correspond to the Moon Movement chart before beginning the routine. (Example: "Can someone show me how you could show a crescent moon?")

Work Time

A. Reviewing Criteria for High-Quality Work (5 minutes)

- Remind students that over the past several lessons, they worked hard to complete their "What the Sun Sees" poems.
- Direct students' attention to the posted **High-Quality Work anchor chart** and remind them that they referenced the criteria on this chart as they wrote their poems.
- Referring to the High-Quality Work anchor chart, read both criteria aloud:
 - "Includes details"
 - "Follows conventions"
- Using a total participation technique, invite responses from the group:

"What kinds of details should we include in our writing?" (descriptive details that make a picture in the reader's mind)

"Which conventions should we follow?" (complete sentences, end punctuation, Word Wall words spelled correctly)

"What makes a piece of writing high quality?" (when our writing shows our knowledge and displays craftsmanship)

- Confirm students' thinking and tell them that they will spend time in today's lesson reviewing their "What the Sun Sees" poem to ensure that the writing is high quality.

Meeting Students' Needs

- For students who may need additional support with oral language and processing: Allow ample wait time as students prepare to share their thinking. (MME, MMAE)
- For ELLs: Consider showing the "What the Moon Sees" example to give context for the work with the High-Quality Work anchor chart today. (Example: "We used the High-Quality Work anchor chart to analyze what made it high-quality work. Today we will use this chart to analyze our poem and make sure it's high-quality work".)

Work Time

B. Revising and Editing: Using the High-Quality Narrative Poem Checklist (15 minutes)

- Direct students' attention to the posted learning targets and read them aloud:
 - "I can revise my work for details."*
 - "I can edit my work for conventions."*
- Tell students they have worked hard to write their "What the Sun Sees" poems, and they are almost ready to share them at the end of module celebration!
- Tell students that before they share, they need to do something that all writers do: revise and edit.
- Tell students that when writers reread their writing to make sure it makes sense and is accurate, this is called *revising*. When writers *edit* their writing, they do their best to make sure their writing follows conventions, and they correct any mistakes they notice.
- Direct students' attention to the High-Quality Work anchor chart and remind them of the criteria for high-quality work.
- Display the **High-Quality Narrative Poem Checklist** example and ask:
 - "What similarities do you notice between the High-Quality Work anchor chart and the High-Quality Narrative Poem Checklist?" (The checklist has the same criteria but also has more information.)*
- Tell students that the High-Quality Narrative Poem Checklist includes the criteria from the High-Quality Work anchor chart and adds more detail to describe each of the criteria. Referring to the High-Quality Narrative Poem Checklist example, point to the two tables labeled "Includes details" and "Follows conventions."
- Direct students' attention to the table labeled "Includes details" and read the detailed criteria aloud:
 - "The descriptions make sense and create a picture in my reader's mind."
 - "The adjectives are used correctly in each verse."
- Repeat this process with the table labeled "Follows conventions":
 - "Words from the Word Wall are spelled correctly."
 - "Complete sentences"
 - "End punctuation"
- Tell students that the High-Quality Narrative Poem Checklist provides feedback to the writer regarding which parts of his or her writing need revision or editing. They will see a

check mark in the “yes” column for each detailed criteria if they included it in their poem and a “no” in the column if it is missing and they need to revise or edit for this criteria.

- The table labeled “Includes details” provides information about any revisions that need to be made.
- The table labeled “Follows conventions” provides information about any edits that need to be made.
- Tell students that they now get to help revise and edit an example poem using the High-Quality Narrative Poem Checklist.
- Display and read aloud the **“What the Sun Sees” example**.
- Redirect students’ attention to the High-Quality Narrative Poem Checklist example.
- Think aloud to model how to use the feedback on the High-Quality Narrative Poem Checklist example to revise and edit the poem. Refer to **“What the Sun Sees” example (answers, for teacher reference)** as necessary.
 - “When I look at the checklist, I notice that I have a lot of check marks in the ‘yes’ column and three check marks in the ‘no’ column. From the checklist, it looks like I need to go back and reread my poem to make sure I used adjectives precisely. I also notice that the checklist shows that I need to edit my writing for complete sentences and for end punctuation.”
 - “After reviewing the checklist, I’m going to start by revising the details in my poem. Let me reread my poem once more and search for adjectives that are not precise. (Read the poem aloud again.) After rereading my poem, I’m thinking that my adjective might not be precise in my first verse. (Reread the first verse.) I think the sun is more orange in the morning, rather than white. So I am going to erase the word *white* in the first verse and replace it with *orange*.”
- Continue to think aloud, focusing now on editing.
 - “I see on the checklist that I also need to edit my poem for end punctuation and for complete sentences. Let me reread my poem once more and search for these two things. (Read the poem aloud again.) Oops, I notice that the second line of the second verse is not a complete sentence. (Reread the second verse.) I want to poem to say, ‘The sun sees smiling kids,’ so I am going to finish writing the words smiling kids on the line.
 - “I see on the checklist that I also need to edit my poem for end punctuation and for complete sentences. Let me reread my poem once more and search for these two things. (Read the poem aloud again.) Oops, I notice that the second line of the second verse is not a complete sentence. (Reread the second verse.) I want to poem to say, ‘The sun sees smiling kids,’ so I am going to finish writing the words smiling kids on the line.
 - “I also notice that I forgot to include some periods. I am missing a period in the first verse and one at the end of the poem. I will add these periods right now.”
- Using a total participation technique, invite responses from the group:
 - “What did I do to revise my poem today?” (You first looked at the check marks on the table labeled “Includes details,” and then reread your poem to make the necessary revisions.)**
 - “What did I do to edit my poem today?” (You then looked at the check marks on the table labeled “Follows conventions,” and then reread your poem to make the necessary edits.)**
 - “How did the checklist help?” (It helped direct you to what needed to be revised and edited.)**

- Tell students that now they will have a chance to review their own High-Quality Narrative Poem Checklist that includes feedback from the teacher as they revise and edit their “What the Sun Sees” poem.

Meeting Students' Needs

- For ELLs: By the end of this section, some students might still perceive the teacher’s feedback to mean their writing is bad and needs correction. Consider reassuring all students again that the feedback will help them make their writing even better so it is the best it can be for the end of module celebration.
- For students who may need additional support with comprehension: Use a bright color to make edits and revisions when modeling with the High-Quality Narrative Poem Checklist. (MMR)

Work Time

C. Revising and Editing: “What the Sun Sees” Poem (30 minutes)

- Redirect students’ attention to the posted learning targets and read them aloud:
“I can revise my work for details.”
“I can edit my work for conventions.”
- Today students will revise and edit their poems based on teacher feedback. Remind them that this is the final step in preparing the poems for the end of module celebration.
- Direct students’ attention to the High-Quality Narrative Poem Checklist example. Remind students that this checklist provides feedback to the writer about revisions and edits that need to be made.
- Tell students that you read each of their poems and used the High-Quality Narrative Poem Checklist to provide feedback to each student that they can use to revise and edit their poems.
- Review the High-Quality Narrative Poem Checklist as necessary and remind students that they will be making revisions based on whether or not they included details in their writing and will be making edits based on whether or not their writing followed conventions.
- As students revise and edit their poems, they should use the following procedure:
 1. Begin by reviewing the High-Quality Narrative Poem Checklist.
 2. Identify criteria on the checklist that need to be revised or edited.
 3. Reread the poem and locate places in the poem that need to be revised or edited.
 4. Make revisions and edits directly on the template, making sure to show craftsmanship.
 5. Reread the poem one last time to catch any revisions or edits that may have been missed the first time.
- Distribute prepared clipboards with students’ **“What the Sun Sees” poem** and checklist. Then, transition students to their workspaces and invite them to begin working. As students work, circulate and monitor their progress toward W.1.5 using the **Narrative Writing Checklist**.
- Remind students to show craftsmanship by taking their time when revising and editing their poem. Remind them that their final poems will be shared at the end of module celebration, so they should do their best work.

- Give students a 5-minute warning to finish up their revisions and edits.
- If productive, cue students to think about their thinking and to listen carefully and seek to understand:

"What did you do today that helped you succeed in with revisions and editing? I'll give you time to think and discuss with a partner." (Responses will vary.)

"Who can tell us what your classmate said in your own words?" (Responses will vary.)

- Signal students to stop working through the use of a designated sound. Model cleanup, keeping directions clear and brief.
- Invite students to take a stretch break as they return to the whole group meeting space.

Meeting Students' Needs

- To support sustained effort and persistence, emphasize the benefits of feedback for students by highlighting effort and growth over relative performance. (Example: Remind students that real authors have editors who provide feedback for their writing.) (MME)
- For ELLs: Some students might need support deciding what to revise based on the teacher feedback in the High-Quality Work checklist. Consider reading the feedback if needed and helping these students verbalize what the next steps are to revise their work. (Example: "Saying the sun is setting and my family is having breakfast doesn't make sense. I need to make this description make sense.")
- For ELLs: Some students might need support understanding the teacher's feedback regarding how a description doesn't make sense or how an adjective is not used correctly. Discuss the error and guide the students to correct it. (Example: "I noticed you wrote, 'My brothers is going to bed.' If it is more than one brother, would we say *the brothers are* or *the brothers is going to bed*?"')

Closing and Assessment

A. Pinky Partners: Sharing Our Work (5 minutes)

- Invite students to give you an air high-five for their hard work today revising and editing their poems.
- Tell the writers that they are going to use the Pinky Partners protocol to share their revised poem with a partner. Remind them that they used this protocol in Lessons 8–10 and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through the protocol and circulate to support them as necessary.
- Refocus whole group, and with excitement, share that in the next lesson, students will practice sharing their poems in preparation for the end of module celebration.

Meeting Students' Needs

- To support communication and engagement, pair students with strategic partners to ensure they have a strong, politely helpful partner to support their efforts at writing their poem. (MME)

- For ELLs: Some students can benefit from having time to practice reading their revised poems to themselves, before sharing them with a partner.

Lesson 12: Speaking and Listening: Preparing for the End of Module Celebration

CCS Standards

- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **SL.1.6:** Produce complete sentences when appropriate to task and situation.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can present information about the sun, moon, and stars to others. (SL.1.4, SL.1.6, L.1.6)
- I can read my writing aloud using a strong and clear voice. (SL.1.4)

Ongoing Assessment

- During Work Times B and C, circulate and observe students' progress toward SL.1.4 and SL.1.6 as they practice sharing what they've learned using the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Engaging the Learner: Ways We Share Our Work Anchor Chart (5 minutes)

2. Work Time

- A. Preparing to Present: Selecting Information from Our Sky Notebooks to Share (15 minutes)
- B. Back-to-Back and Face-to-Face: Discussing Patterns in the Sky (15 minutes)
- C. Pinky Partners: Sharing Our Work (15 minutes)

3. Closing and Assessment

- A. Engaging the Learner: Revisiting "Sun" and "Moon" Songs (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- During this lesson, students prepare for the end of module celebration by rehearsing several entries from the Sky notebooks, information about patterns in the sky, and their "What the Sun Sees" poems. Practicing sharing with a peer or small group before sharing with visitors provides a safe, low-risk environment for students as they build oral language and presentation skills (SL.1.4 and SL.1.6).

- As time permits in Work Time A, use the High-Quality Work anchor chart to prompt students to select entries from their Sky notebooks that include descriptive, detailed, and neat writing and pictures.

How this lesson builds on previous work:

- During this lesson, students practice sharing learning that has occurred throughout all three units.
- As students prepare to present to classroom visitors during the end of module celebration, they revisit the Ways We Share Our Work anchor chart, first introduced in Module 1, Unit 3.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may feel uncomfortable or lack necessary oral language and presentation skills as they share their writing with a partner. Consider strategically pairing students to provide extra support and encouragement for those who need it.
- Some students may have difficulty recalling information from previous units as they practice answering questions during Work Time B. Prompt those students to use resources around the room, such as the Patterns of the Sun anchor chart, Patterns of the Moon anchor chart, Patterns of the Stars anchor chart, and *What Makes Day and Night?* anchor chart.

Down the road:

- In Lesson 13, students will share learning from all three units during the end of module celebration.

In advance:

- Distribute:
 - Materials (Sky notebook and sticky notes) for Work Time A at student workspaces.
 - Materials (“What the Sun Sees” poem) for Work Time C at student workspaces.
- Post: Learning targets, “Sun” song, “Moon” song, Moon, and Stars” song, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: Create the Ways We Share Our Work anchor chart in an online format, such as a Google Doc, for display and for families to access at home to reinforce these skills. If you recorded students participating in the Moon Movement routine in Unit 1, play this video to remind them of what to do.
- Work Time B: Video-record students as they participate in the Back-to-Back and Face-to-Face protocol to watch with them as they prepare for the end of module celebration. Post it on a teacher web page or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time C: Video-record students as they practice sharing their “What the Sun Sees” poems to watch with them to evaluate strengths and areas for improvement. Post it on a teacher web page or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to watch at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.9 and 1.I.B.6

Important points in the lesson itself

- The basic design of this lesson supports ELLs through the opportunity to build their oral language and presentation skills in a structured way, and through the opportunity to practice sharing with a peer or small group before the end of module celebration in Lesson 13.
- ELLs may find it challenging or intimidating to speak in front of an audience. Consider offering choice in terms of what group they will be presenting with and/or which order they will present in.

Levels of support

For lighter support:

- Consider looking at the notes you took during the Module 1 assessment regarding areas in which students struggled with oral presentations, such as projecting their voices or enunciating their words, to help students practice for their presentations.

For heavier support:

- Allow time to rehearse reading their entries from the Sky notebooks, their information about patterns in the sky, and their “What the Sun Sees” poems. Practicing sharing with a peer or small group before sharing with visitor(s) provides a safe, low-risk environment for students as they build oral language and presentation skills.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** In Work Time B, students discuss patterns of the sun, moon, and stars. Reduce barriers to metacognition as students share by providing a visual reminder of the focus for what they are sharing during the protocol. (Example: Display the question on chart paper or sentence strip, or offer an index card with the questions to individual students: 1) What is a pattern that the sun, moon, or stars follows? How would you describe that pattern? 2) What is something you learned about the sun, moon, or stars that you did not know before? 3) What do you still wonder about the sun, moon, or stars? 4) What did you learn about how writers use their knowledge and observations to write a story?)
- **Multiple Means of Action & Expression (MMAE):** During this lesson, some students may benefit from sensory input and opportunities for movement while they are sitting. Provide options for differentiated seating (e.g., sitting on a gym ball, a move-and-sit cushion, or a chair with a resistive elastic band wrapped around the legs). In addition, consider providing options for physical action by inviting students to join you in a quick movement break if they seem restless during the lesson.
- **Multiple Means of Engagement (MME):** Throughout this lesson, students have opportunities to share ideas and thinking with classmates. Some may need support for engagement during these activities, so encourage self-regulatory skills by helping them anticipate and manage frustration by modeling what to do if they need help from their classmates. (Example: “I can remember when I’m sharing that if I forget my idea or need help, I can ask my partner to help me. My partner could help me by giving me prompts that will help me share my thinking.”) Offering these supports for engagement promotes a safe learning space for all students.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

- N/A

Materials

- ✓ Ways We Share Our Work anchor chart (begun in Module 1)
- ✓ Sky notebook (from Unit 2, Lesson 4; answers, for teacher reference; one to display)
- ✓ Sky notebooks (completed in Unit 2; one per student)
- ✓ Sticky notes (two per student)
- ✓ Back-to-Back and Face-to-Face Protocol anchor chart (begun in Module 1)

- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Equity sticks (class set; one per student)
- ✓ Pinky Partners Protocol anchor chart (begun in Module 1)
- ✓ “What the Sun Sees” poem (completed in Lesson 11; one per student)
- ✓ “Sun, Moon, and Stars” song (from Unit 1, Lesson 3; one to display)
- ✓ “Moon” song (from Unit 1, Lesson 8; one to display)

Opening

A. Engaging the Learner: Ways We Share Our Work Anchor Chart (5 minutes)

- Invite students to the whole group area.
- Tell students that they have done a lot of hard work during this module. In the next lesson, they will have visitors to the classroom for the end of module celebration. These visitors will be very excited and interested to learn about the sun, moon, and stars, and it is the students’ job to teach them!
- Direct students’ attention to the posted learning targets and read the first one aloud:
“I can present information about the sun, moon, and stars to others.”
- Using a total participation technique, invite responses from the group:
“What work have you done during this module that you could share with visitors so that they learn about the sun, moon, and stars?” (Sky notebook, “What the Sun Sees” poem)
- Set purpose for the end of module celebration. Tell students that during the celebration, they will share their narrative poems and Sky notebooks and will answer questions about the sun, moon, and stars.
- Remind students that at the end of Module 1, they had a celebration in which they shared their Most Magnificent creations with visitors and presented about the habits of character. Remind them that while they presented and shared, it was important to follow certain guidelines so that their visitors understood and learned from them.
- Direct students’ attention to the **Ways We Share Our Work anchor chart** and briefly review it by reading it aloud, inviting students to echo you:
 - “Use a loud and proud voice.” (Students echo this description using a loud, proud voice.)
 - “Say our words clearly so others can understand them.” (Students echo, saying the words clearly.)
 - “Use a complete sentence.” (Students echo, saying, “I can use a complete sentence.”)
- Inform students that because the visitors are so excited to learn about the sun, moon, and stars from them, it is important that the students practice presenting their narrative poems and Sky notebooks and answering the questions the visitors will ask them.

Meeting Students’ Needs

- For students who may need additional support with oral language and processing: Allow ample wait time as students prepare to share their thinking. (MME, MMAE)

- For ELLs: Some students may benefit from building their confidence by speaking in front of others. Invite a volunteer to read the Ways We Share Our Work anchor chart during the end of module celebration. Consider sending home a copy of the chart for the student to practice reading it with a loud and proud voice, saying words clearly so that others can understand them.

Work Time

A. Preparing to Present: Selecting Information from Our Sky Notebooks to Share (15 minutes)

- Invite students to safely and respectfully mimic with their hands and arms something the sun, moon, or stars would do (e.g., rise and set, twinkle, shine brightly) as they return to their seats.
- Tell students that they will now review their Sky notebooks and pick two entries to share with the visitors.
- Using a total participation technique, invite responses from the group:
“What should you keep in mind while you are selecting entries from your Sky notebook to share? What criteria should those entries meet?” (neat writing, accurate information, entries that show different information and times of day)
- While displaying the **Sky notebook (answers for teacher reference)**, think aloud as you select an entry and model marking it with a sticky note:
 1. Turn to page 4 in the Sky notebook (answers, for teacher reference) and read it aloud.
 2. Think aloud as you reflect on the quality of information and writing included on this page. (Example: “This entry is about the sun at noontime. I drew a really detailed picture and picked two adjectives to describe what the sun looks like.”)
 3. Using a sticky note, mark the page as you say, “This entry includes detailed and neat writing, so I will share it during the celebration.”
- Direct students’ attention to the **Sky notebooks** and **sticky notes** in their workspaces.
- Tell students they will use the sticky notes to mark the two entries they will share with visitors during the end of module celebration.
- Transition students to their workspaces and invite them to begin reviewing their Sky notebooks and using the sticky notes to mark their selected pages.
- Circulate as students review their notebooks, prompting them to select entries with show neat writing, accurate information, and different times of day.
- When 2 minutes remain, signal to students to begin cleaning up by closing their Sky notebooks and placing them back in the center of their workspaces.

Meeting Students’ Needs

- To support self-regulation and independence during a transition: Provide a clear routine for what will happen as this activity concludes and use a visual time timer. (MME)
- For ELLs: Students can feel less intimidated about speaking in front of an audience during the end of module celebration if they know that they will not be presenting

to a big audience. Share with them that they will gather in small presentation groups with only a few other classmates and one or two visitors, and that they will take turns sharing their Sky notebooks.

- For ELLs: Some students might be worried about who the visitors are. Consider telling students who is invited (the principal, families, community members, and other teachers and their classes).
- For ELLs: Some students might need help selecting the entries from their Sky notebook. Consider using the High-Quality Work anchor chart to prompt students to select entries from their Sky notebooks that include descriptive, detailed, and neat writing and pictures.

Work Time

B. Back-to-Back and Face-to-Face: Discussing Patterns in the Sky (15 minutes)

- Invite students back to the whole group area and offer them specific, positive feedback on their work selecting entries from their Sky notebooks. (Example: “I noticed that everyone reviewed their work closely to select the entries that had the most details to describe the sun or moon.”)
- Remind students that their Sky notebook entries are just one piece of what they will share tomorrow.
- Tell students that the visitors will ask them a few questions about the sun, moon, and stars and that they will now practice answering those questions with a partner.
- Tell students they are going to use the Back-to-Back and Face-to-Face protocol to discuss the answers to questions about the sun, moon, and stars and what they have learned. Remind them that they used this protocol in previous lessons and review as necessary using the **Back-to-Back and Face-to-Face Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Guide students through four rounds of the protocol using the following questions:
 - “What is a pattern that the sun, moon, or stars follow? How would you describe that pattern?”*
 - “What is something you learned about the sun, moon, or stars that you did not know before?”*
 - “What do you still wonder about the sun, moon, or stars?”*
 - “What did you learn about the Unit 3 guiding question: How do writers use their knowledge and observations to write a story?”*
- As students talk, circulate and listen in. Take note of the ideas they are sharing and target a few students to share out with the whole group. Consider using the **Speaking and Listening Checklist** to track students’ progress towards the targeted standards.
- Invite students to be seated again.
- Invite a few students to share out what they discussed with their partners during the protocol.
- Refocus students whole group. With excitement, remind them that they have a lot of information about the sun, moon, and stars and the patterns they follow to share with visitors during the celebration.

Meeting Students' Needs

- During the Back-to-Back and Face-to-Face protocol, increase mastery-oriented feedback by providing feedback that is frequent, timely, and specific to individual pairs of students. (Example: "I hear that you clearly shared a pattern that the sun follows. Can you share something that you still wonder about the pattern of the sun?") (MME)
- For ELLs: Consider having students who need heavier support choose which questions they want to answer beforehand, so they can practice their answers and build confidence. Be sure to let the visitors know of this accommodation, so they know which questions to ask those particular students.

Work Time

C. Pinky Partners: Sharing Our Work (15 minutes)

- Tell students that they have one more piece of work to share with their visitors: their "What the Sun Sees" poems.
- Direct students' attention to the posted learning targets and read the second one aloud:
"I can read my writing aloud using a strong and clear voice."
- Using a total participation technique, invite responses from the group:
"When you are sharing your poems, what is important to remember to do so that your visitors can learn from you?" (speak clearly and loudly, make eye contact with visitors, listen as others share)
- Tell students that they will now practice sharing their poems with a partner so that they are prepared to share them when the visitors come.
- Tell students they will use the Pinky Partners protocol to practice sharing their poems. Remind them that they used this protocol in previous lessons and review as necessary using the **Pinky Partners Protocol anchor chart**. (Refer to the Classroom Protocols document for the full version of the protocol.)
- Distribute students' **"What the Sun Sees" poems**.
- Invite students to begin the Pinky Partners protocol.
- Circulate as students share, directing students' attention to the Ways We Share Our Work anchor chart as necessary and making note of progress toward SL.1.4 and SL.1.6 using the **Speaking and Listening Checklist**.
- When 3 minutes remain, invite students to be seated. Collect their "What the Sun Sees" poems.
- Generate excitement by inviting students to turn to an elbow partner and talk:
"What part of your poem are you most proud and most excited to share with a visitor?" (Responses will vary.)
- Refocus students whole group and invite a few students to share out.

Meeting Students' Needs

- To support communication and engagement, pair students with strategic partners to ensure they have a strong, helpful partner to support their efforts at sharing what is important to remember so visitors can learn from them. (MME)

- For ELLs: Consider pairing students with a buddy for support as they read their “What the Sun Sees” poems.

Closing and Assessment

A. Engaging the Learner: Revisiting “Sun, Moon, and Stars” Song (10 minutes)

- Tell students that in addition to sharing their Sky notebooks and “What the Sun Sees” poems with visitors, they will also share the “Sun” song and “Moon” song they had practiced and learned during Unit 1.
- Direct students’ attention to the posted **“Sun, Moon, and Stars” song**.
- Invite students to join you as you sing the song and complete the accompanying hand motions.
- If productive, cue students to think about their thinking:
“How did our work in this unit add to your understanding of how writers use their knowledge and observations to write a story? I’ll give you time to think and discuss with a partner.” (Responses will vary.)
- Invite students to be seated and offer specific, positive feedback on all that they did during today’s lesson to prepare for the celebration in the next lesson. (Example: “When we sing for the visitors, we want to make sure we are looking at the audience so they can hear the songs clearly.”)
- Remind students that in the next lesson, they are going to get to share all of their hard work and learning.

Meeting Students’ Needs

- For ELLs: Some students may benefit from building their confidence by practicing speaking in front of others. Consider choosing a student to be in charge of introducing the “Sun, Moon, and Stars” song that will be sung and inviting the rest of the students to stand up to sing them. Write a short script of what students will want to say tomorrow during the end of module celebration. Consider sending home a copy of the script for students to practice reading with a loud and proud voice, saying words clearly so that others can understand them.

There are no new supporting materials for this lesson.

Lesson 13: Speaking and Listening: Sharing and Celebrating Our Work

CCS Standards

- **SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
- **SL.1.6:** Produce complete sentences when appropriate to task and situation.
- **L.1.6:** Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., *because*).

Daily Learning Targets

- I can present information about the sun, moon, and stars to others. (SL.1.4, SL.1.6, L.1.6)
- I can read my writing aloud using a strong and clear voice. (SL.1.4)

Ongoing Assessment

- During each Work Time, observe as students present their work and engage with the classroom visitors. Document progress and mastery of SL.1.4, SL.1.6, and L.1.6 on the Speaking and Listening Checklist (see Assessment Overview and Resources).

Agenda

1. Opening

- A. Engaging the Learner: Sharing the “Sun, Moon, and Stars” Song (5minutes)

2. Work Time

- A. Speaking and Listening: Sharing Information about Patterns in the Sky (10 minutes)
- B. Reading Aloud: Sharing Our “What the Sun Sees” Poems (20 minutes)
- C. Reading Aloud: Sharing Our Sky Notebooks (15 minutes)

3. Closing and Assessment

- A. End of Module Reflection (10 minutes)

Teaching Notes

Purpose of lesson and alignment to standards:

- This lesson serves as the module culmination. Students share two songs, their narrative poems, Sky notebooks, and other learning from the module with visitors. Sharing and celebrating work supports students’ speaking and listening skills and cultivates a sense of pride and ownership in their work.
- During Work Time A, students share what they learned about observable patterns in the sky. Depending on your class size, consider either allotting extra instructional time to this portion of the lesson (so each student gets to answer every question) or assigning students within a small group to answer specific questions.

- During the Closing and Assessment, students reflect on their learning using the End of Module Reflection form. This gives them time to formally keep track of and reflect on their own learning and supports metacognition and pride in work and learning.

How this lesson builds on previous work:

- The structure of the lesson allows students to present songs, knowledge, and writing learned throughout the module. After presenting, students reflect on what they have learned in the module.
- Continue to use Goal 1–3 Conversation Cues to promote productive and equitable conversation.

Areas in which students may need additional support:

- Students may feel uncomfortable sharing their writing with visitors. Remind them that they had time to practice in the previous lesson. Provide support and encouragement as necessary by asking a supportive adult in the school to sit near students who may need extra help.
- During the Closing and Assessment, some students may have difficulty recalling something they have learned or are proud of. Encourage them to use visuals around the room to prompt their memory if needed. Some students may need extra time to complete the reflection. Consider offering dictation support or carving out an additional few minutes during the day for them to finish.

Down the road:

- This is the final lesson of this module.

In advance:

- Determine small groups for presentations and prepare the Presentation Groups chart.
- Prepare:
 - Questions sheet (see supporting materials).
 - Clipboards with the End of Module Reflection form for the Closing.
- Distribute “What the Sun Sees” poem templates, Sky notebooks, and Question sheet in designated areas for each small group.
- Post: Learning targets, “Sun, Moon, and Stars” song, Sun Movement chart, Moon Movement chart, and applicable anchor charts (see materials list).

Consider using an interactive white board or document camera to display lesson materials.

- Opening A: If you recorded students singing the “Sun, Moon, and Stars” song in Unit 1, play these recordings for them to join in with.
- Work Time A: Record each presentation group sharing information about the patterns in the sky and post it on a teacher webpage or a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with their families. Most devices (cellphones, tablets, laptop computers) come equipped with free video and audio recording apps or software.
- Work Time B: Record students sharing their “What the Sun Sees” poems and post it on a teacher web page or a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with their families.
- Work Time C: Record students sharing their Sky notebooks and post it on a teacher web page or on a portfolio app such as Seesaw (<http://web.seesaw.me>) for students to listen to at home with their families.
- Closing A: Students complete the End of Module Reflection recording form using a word-processing tool, such as a Google Doc.

Supporting English Language Learners

Supports guided in part by CA ELD Standards 1.I.C.9 and 1.I.B.6

Important points in the lesson itself

- The basic design of this lesson supports ELLs through the opportunity to use oral language in a structured way, and through the opportunity to celebrate and take pride in their hard work.
- ELLs may find it challenging or intimidating to speak in front of an audience. Consider offering choice in terms of what group they will be presenting with and/or which order they will present in.

Levels of support

For lighter support:

- Some students may be confused about why unfamiliar people will be participating in class during this lesson. Be clear that everyone is a friend and that they are visiting because they want to see the work the class has been doing. Check that all students understand what to expect so that no one is surprised or stressed by the visitors.

For heavier support:

- Allow time to rehearse several entries from the Sky notebooks, information about patterns in the sky, and the “What the Sun Sees” poems. Practicing sharing with a peer or small group before sharing with visitor(s) provides a safe, low-risk environment for students as they build oral language and presentation skills.
- Consider allowing more time for the presentations if needed.

Universal Design for Learning

- **Multiple Means of Representation (MMR):** When sharing and celebrating culminating work with visitors, it is important to also document the group's learning processes. You can highlight aspects of the learning and writing process that were important in this unit by explaining verbally and/or by displaying photo documentation with captions that describe how students learned about the sun, moon, and stars.
- **Multiple Means of Action & Expression (MMAE):** As students begin the end of module reflection, vary methods for fine motor responses by offering options for drawing utensils (e.g., thick markers or colored pencils) and writing tools (e.g., fine-tipped markers, pencil grips, slant boards). Some students may forget their sentence ideas once they begin directing their efforts toward writing. Support strategy development by modeling how to physically touch the words/spaces on the sentence frame and draw lines for additional words you intend to write. This will help students recall their original ideas throughout the writing process.
- **Multiple Means of Engagement (MME):** During the celebration of work, some students may experience anxiety or be uncomfortable sharing in front of a group. Minimize these threats and support self-regulation by inviting students to share in a smaller group setting with one or two visitors. This will support them in developing coping skills.

Vocabulary

Key:

(L): Lesson-Specific Vocabulary

(T): Text-Specific Vocabulary

(W): Vocabulary Used in Writing

Review:

- astronomer, reflect (L)

Materials

- ✓ "Sun, Moon, and Stars" song (from Unit 1, Lesson 3; one to display)
- ✓ Presentation Groups chart (new; teacher-created; see supporting materials)
- ✓ Questions sheet (one per visitor)
- ✓ Speaking and Listening Checklist (for teacher reference; see Assessment Overview and Resources)
- ✓ Ways We Share Our Work anchor chart (begun in Module 1)
- ✓ "What the Sun Sees" poem (completed in Lesson 11; one per student)
- ✓ Sun Movement chart (from Unit 1, Lesson 2; one to display)
- ✓ Sky notebooks (completed in Unit 2; one per student)
- ✓ Moon Movement chart (from Unit 1, Lesson 10; one to display)

- ✓ End of Module Reflection recording form (one per student)
- ✓ Pencils (one per student)

Opening

A. Engaging the Learner: Sharing the “Sun, Moon, and Stars” Song (5 minutes)

- Invite students to the whole group area.
- Welcome the visitors!
- Tell students that today is an exciting day because they are going to share lots of learning from their sun, moon, and stars study with their visitors. They will begin by sharing songs they have learned.
- Invite students to stand up.
- Display the “Sun, Moon, and Stars” song.
- Invite students to join you as sing the song and complete the accompanying hand motions.
- Repeat this process with the “Moon” song.
- Invite the visitors to applaud the students’ performance.

Meeting Students’ Needs

- Provide differentiated mentors by seating students who may be more confident reading and singing aloud near students who may not feel as confident. (MMAE)
- For ELLs: To put students at ease, consider introducing the visitors by quickly identifying them in groups according to their roles within the community. As you name each group, the visitors can stand up, smile, and wave to the class. (Example: “We want to welcome our visitors today. Some of our visitors work at the school—we have teachers, students, administrators, and staff. Other visitors are family members, etc.”)
- For ELLs: Some students may benefit from building their confidence by practicing speaking in front of others. Consider choosing a student to introduce the “Sun, Moon, and Stars” song that will be sung and inviting the rest of the students to stand up to sing them.

Work Time

A. Speaking and Listening: Sharing Information about Patterns in the Sky (10 minutes)

- Tell students and visitors that the students have learned a great deal about patterns that we observe in the sky.
- Remind students that they also learned about astronomers and briefly review the definition of astronomer (a scientist who studies the sky, the universe, and beyond).
- Using a total participation technique, invite responses from the group:

“What did we do that is similar to what astronomers do?” (We observed pictures and videos of the sun, moon, and stars; we wrote about our observations; we wrote about and

described patterns we observed in the sky; and we shared information about those patterns with each other.)

- Tell students that now they get to share the work they did that is similar to astronomers by sharing information they have learned throughout the module!

- Direct students' attention to the posted learning targets and read the first one aloud:

"I can present information about the sun, moon, and stars to others."

- Using a total participation technique, invite responses from the group:

"When you are answering questions from the visitors, what is it important that you remember to do?" (speak clearly and loudly, make eye contact with visitors, listen as others share)

- Tell students they now will share information about the sun, moon, and stars with the visitors, and they will answer questions from the visitors:
- Tell students that they will gather in small presentation groups with a few other classmates and one or two visitors.
- Once in their groups, they will take turns answering questions from the visitors.
- Remind students that they practiced answering these questions in the previous lesson.
- Move students into pre-determined groups using the **Presentation Groups chart**.
- Once groups are settled in designated areas, direct visitors' attention to the **Questions sheet** in front of them.
- Tell visitors that they should take turns asking each of the questions on the sheet. Remind students that they will take turns answering the questions in the order in which the students are listed on the Presentation Groups chart.
- Invite a visitor to ask the first student in the group the first question.
- Circulate as students answer questions and offer guidance and support as necessary.
- Consider using the **Speaking and Listening Checklist** to track students' progress towards the targeted standards.
- Provide frequent time checks so students and visitors anticipate cleanup.
- With 2 minutes remaining, signal students to clean up.

Meeting Students' Needs

- For students who may need support with self-regulatory skills: Help students to anticipate and manage anxiety or worry about answering questions from visitors by modeling what to do if they need help. (Example: "I can remember if I get nervous when I am sharing, I can take a deep breath to relax. And if I can't remember what I was going to say, I can ask a classmate to help me.") (MME)
- For ELLs: Some students may benefit from building their confidence by speaking in front of others. In this section, consider choosing a student to announce that they now will present their information about the sun, moon, and stars with the visitors in small groups and that afterward they will answer questions from the visitors.
- For ELLs: To help students feel more comfortable in their small groups, consider doing a quick round of introductions of the visitors and students in the small groups, before starting the presentations.

- For ELLs: Consider having students who need more support choose which questions they want to answer beforehand, so they can practice their answers and build confidence. Be sure to let the visitors know of this accommodation, so they know which questions to ask those particular students.

Work Time

B. Reading Aloud: Sharing Our “What the Sun Sees” Poems (20 minutes)

- Refocus whole group and offer students specific, positive feedback on the information they shared. (Example: “I noticed that Jonah and Janis made eye contact with visitors while they answered their questions and shared a lot of important information about the patterns that the moon follows.”)
- Direct students’ attention to the posted learning targets and read the second one aloud:
“I can read my writing aloud using a strong and clear voice.”
- Tell students that they now will share their “What the Sun Sees” poems with the visitors. Remind them that they practiced reading their poems during the last lesson.
- Briefly review the **Ways We Share Our Work anchor chart**.
- Using a total participation technique, invite responses from the group:
“While other students are sharing, what should you do?” (keep voices off, listen carefully, look at the speaker)
- Tell students they will remain in the same small groups and follow the same order for sharing their poems as they did for answering questions.
- Remind students that once the first reader has shared, they should move to the second reader, and so on until all the students in the group have shared.
- Ask the visitors to help keep the group moving along and offer support as needed.
- Direct students’ attention to their **“What the Sun Sees” poems** and encourage the first student to stand up and begin sharing.
- Circulate as students share and offer guidance and support as necessary.
- Use the Speaking and Listening Checklist as appropriate to gather evidence of students’ progress.
- Provide frequent time checks so students and visitors anticipate cleanup.
- With 2 minutes remaining, signal students to clean up and neatly place their “What the Sun Sees” poems back where they found them.
- Refocus whole group. Give students specific, positive feedback on sharing their poems with the visitors. (Example: “I noticed that you did a great job of speaking clearly and loudly while you read your poem.”)
- As a celebration of students’ sharing, display the **Sun Movement chart**. Invite students to join you as you complete the Sun Movement routine.
- Invite students to be seated again.

Meeting Students' Needs

- To support engagement, strategically order students to ensure they have a strong, politely helpful model to support their efforts at sharing their poem with visitors. (MME)
- For ELLs: Some students may benefit from building their confidence by speaking in front of others. In this section, consider choosing a student to read the Ways We Share Our Work anchor chart.
- For ELLs: Consider pairing students with a buddy for support as they read their "What the Sun Sees" poems.

Work Time

C. Reading Aloud: Sharing Our Sky Notebooks (15 minutes)

- Remind students and visitors that the students' narrative poems were just one part of the work they did during this module.
- Tell students that now they get to share the work they did making and writing and drawing about observations of videos and pictures of the sun and moon by sharing their Sky notebooks!
- Tell students they will remain in the same small groups and follow the same order for sharing their Sky notebooks as they did their "What the Sun Sees" poems.
- Direct students' attention to their **Sky notebooks** and invite them to open to the pages they selected to share during the previous lesson.
- Invite the first student in each group to begin sharing.
- Circulate as students share and offer guidance and support as necessary.
- Provide frequent time checks so students and visitors anticipate cleanup.
- With 2 minutes remaining, signal students to clean up.
- Refocus whole group. Give students specific, positive feedback on sharing their Sky notebooks. (Example: "I noticed that Jeremiah and Kiara listened closely as the other members of their group shared their Sky notebook entries.")
- As a celebration of students' sharing, display the **Moon Movement chart**. Invite students to join you as you complete the Moon Movement routine.

Meeting Students' Needs

- To support self-regulation and independence during a transition: Provide a clear routine for what will happen as this activity concludes and use a visual time timer. (MME)
- For ELLs: Consider pairing students with a buddy for support as they read the Sky notebook entries they selected.
- For ELLs: Some students may benefit from building their confidence by speaking in front of others. In this section, consider choosing a student to read the Ways We Share Our Work anchor chart.

Closing and Assessment

A. End of Module Reflection (10 minutes)

- Once the visitors have left, refocus whole group.
- Tell students that they will now have a chance to reflect on all of the thinking and learning they did during this module. Remind students that *reflect* means to think about something we have done or learned.
- Display the **End of Module Reflection recording form** and read the first prompt aloud:
 - “One thing I learned about the sun, moon, or stars is ____.”
- Invite students to turn and talk with an elbow partner:

“What is something you have learned about the sun, moon, or stars in this module?” (Responses will vary, but may include: The sun looks like it moves across the sky; the moon seems to change shape; the stars shine all the time, but we can only see them during the night.)
- Tell students that now they will have a chance to draw a picture and write a sentence to show one thing they learned about the sun, moon, or stars during this module.
- Distribute prepared clipboards with the End of Module Reflection recording form attached and **pencils** to each student.
- Direct students’ attention to the first prompt using the displayed End of Module Reflection recording form. Invite students to put their finger on it and invite them to begin writing and drawing about one thing they learned about the sun, moon, or stars.
- As students draw and write, circulate and ask them to tell you what they learned.
- After a few minutes, repeat this process with the second prompt on the recording form:
 - “One way I showed respect or integrity as a learner is ____.”
- As students draw and write, circulate and ask them to tell you how they showed respect or integrity.
- Give students specific, positive feedback on their hard work and thinking. (Example: “Patterns in the sky is a challenging topic to learn about, and Tim was able to write down one big idea about the sun.”)
- If time permits, close the lesson by singing a song from the module.
- Tell students that in the coming days, they will begin a new module on another exciting topic to study!

Meeting Students’ Needs

- Offer partial or full dictation as students verbally share their reflections. (MMAE)
- For ELLs: Provide help for students to write their End of Module Reflection form by pointing them to resources around the room that will help them write, or by taking dictation on what they want to write.
